

101st Knowledge Seekers Workshop February 18th, 9am (Cup of Life, new, as Food)

(:09). Today we try to open blueprint for Agriculture and decontamination. The blueprints were first given to the governments and then to public. When we show the full lift of SS it will be done by the people and not by Keshe. We will stay in Italy but open a base in Middle East in Dubai, the city of Spaceship and Peace. Bring all the technology that you have developed. We will select the leaders of the KF. (:13). I cannot take the Man into Space if he becomes a slave to the U Community, my job is to make sure Man comes equal and that can only be when he has all the knowledge. The knowledge is across the "One Nation". (:19). Plays the new promotion video. The first U World Council, it will be a bridge bwn humanity and the U Community. (:22). Hardly anybody donates to the KF, but they take everything free and expect it free. Every Soul will judge himself. The Dutch KF is giving away Pain Pens free to public to get the knowledge out there. We have to take a step to make the change. We have become one of the most powerful Scientific organizations in the world. The Pads and Pens have "C" certification by Europe. And have a certificate in Belgium under Alternative medicine. (:27). Please do not promote people to move because of the Earthquake around the world, it shows you do not understand the work of the Physicality of the Plasma Earth, and you stand responsible for the soul who you will cause the death of. It is the responsibility of us as scientists who understand not only the work of the planet, but the structure of the pressure on this planet, first because of the motion of the magma underneath, secondly certainly because of the pressure of the change of season of the southern hemisphere at this time, and thirdly because of the approach of the "Second Star" which is the twin star of the earth, which creates certain pressures of its own which increases pressures at this time on the southern hemisphere, and fourthly because of the position of our Solar System with its twin sister ?? on the wings of the Galaxy, maybe not in next couple days but in the next year or so the pressures will separate or crack the thin layer of the continent of south America at the point of magma, and floating on the magma, this is the reality. The Light Workers have said they will stop this, Keshe says please tell us how. You are the dark forces because you don't work for the benefit of humanity. (:30). Please move from West Coast of USA, there is a huge possibility, the switch time (seasons), there is a huge possibility from Feb 20 to April 20. If we see the approach of the second sun it will put pressure on the S. hemisphere, it's like a piece of metal you keep on twisting it until it weakens and separates. The magma is flowing counterclockwise so it is pulling it towards the African and S Europe section, that's why we see earthquakes in southern Europe and Africa. It's the combined forces coming together. Thousand of years ago people sacrificed a virgin girl to stop the earthquake. (:33). It just happens to be our time, like the dinosaurs when the meteorite came. That's when the second Star approached the earth and pushed all the meteorites towards the center (of earth), now we are in the same position. Why is American continent in that position, look and see the structure. The backlash of this movement will hit East Asia and Philippines, how far we don't know. We have seen the eruption which is the opening of the earthquake of the volcanic area in CA, they have been dormant for 50,000 years and whenever this happens it always follows by shift in continental plates. According to scientific data whenever eruptions happen we have seen earthquakes within days, at the ocean level. It has happened in last 24 hours, double

volcanic earthquakes, this is when the continents have started moving where the magma can open up and release the pressure, it's like a pressure cooker and now it is opening up. (:36). Obama talked with Keshe on February 2, and has put an Executive Order for earthquake investigation committee. We have seen what we were waiting for occur and now the clock is ticking. My responsibility as a scientist is to protect the children of the Man, we are very clear about it. Please start moving out of the West Coast USA, Chile, and North Canada. We see waves up to 200 - 300 meters high in the long distance ships. After today I will go silent with it. We are safe in the city of Dubai. Light workers get underground and lift the plate 22 cm and release the pressure, and we'll see if you are light workers. (:41). Question about the Fault Line in Midwest? The scientists are trying to assess this. If the South American continent drops down another 5 cm, it will try to find its own balance. The big Chile earthquake acted like a release, the continent became free and over the next decade has to find its balance with the others, it can go up and down first. If it happens in the ocean we'll see a huge Tsunami. I monitor the situation on a daily basis, the movement will happen. (:46). The question on the second star was answered on Kerry Cassidy and Mike Harris. Austrian man asks about the Second Star is approaching and puts pressure on the continents. He saw it on the left side of the Sun not as big. Talks about Nirbiru of the Sumerians. Keshe explains, our Solar System didn't just appear out of nowhere, the usual process is the same in smaller or larger dimension, the way a neutron splits and you get an electron and proton, but keeps its integrity that it is still working for themselves but they rotate around each other to keep each other in balance. The same thing has happened to our Solar S is the electron or proton of the division of a bigger star somewhere in the past. The way it has lasted so many billions of years is because it has a twin star which absorbs all its energy which it releases in its atmosphere and it absorbs whatever energy that twin star sends it, exactly like an electron and proton. Finding single entities in the U is very rare and we are not one of them, because we are part of a Galaxy system, which means a collection. (:50). So we have a twin sister or a twin with something else. This twin star approaches like, we call the bandwidth of an electron, so it moves in a bandwidth and rotates around from each other, this rotation takes sometimes 26 million years, then they come very close and when they do they put pressure on each other. By the movement of the S American Plate we can roughly tell where the approach of the second star is coming from. The movement of the magma and pressures of the M field cause the snapping. (:56). The nation of Japan will be wiped out by the tsunami of quakes. Austrian guy talks about Ananaki etc, and Second Sun, story ends good the flood. Keshe doesn't comment on this. (1:00). In England the Thames will back up and in Holland the dikes burst. The start of Blueprint Teachings. (1:02). Benjamin in Africa will show agricultural development. (1:05). Dr. Nana wrote article in magazine "Ghana" about Keshe technology. KF is financing Ghana development from the sale of products. Pollution of water bodies in Ghana. (1:11). ... contaminated rivers from illegal mining. (1:22). Water treatment with KF technology. (1:27). Treatment samples. After 24 hours treatment with CO2 Gans, it became clear. (1:33). Test results discussed. (1:58). Talks about cleaning the water and recycling the CO2 Gans back into the process. How to get the rare metals out of the process. There must be huge amounts of gold in the waters. The water is clean enough to drink? (2:07). Experiments with Fish in tanks. The one treated with CO2 has less sediments, etc. Do not use CuO2 as mixture for fish. He feeds the treated fish less fish and they grow bigger.

(2:14). Mushrooms treated with CO₂ Gans. (2:17). Keshe says you don't need to add the Gans into the water just put the sealed container in the water. You are still thinking in a matter state, the Gans works on PI condition, this way you can feed the fish for hundreds of years, that way you are going to run out and have to make more. You cannot introduce Cu especially in the white meat. The energy will be too much and they will die, the growth of white meat different then red meat. (2:26). Dr. from Kenya living in USA, studied Organic Agriculture. A study on Gans CO₂ with growth of Potatoes. (2:32). Soaked potatoes for 5 hours before planting, the sediments immediately sank and cleared with addition of CO₂. The first stage 3 weeks no difference was noticed, but the CO₂ flowered and matured earlier, but weight at harvest was slightly less then untreated. Results are good for places where the growing season is shorter. (2:39). We have got to test if the potatoes have been organically modified. (2:41). Keshe discusses that the genetically modified seeds turn back to the time before. We are producing N C Cu pipes for watering crops. (2:45). Keshe did these experiments 10 years ago, treated plants are frost resistance. You can even see a better result with CH₃. Plants create a MG field which tunes to the needs of the pests, that's why they come to it. When you energize a plant, tree or shrub you give it an environment that doesn't suit the pests. With this technology we don't need any pesticides. Through the Gans watering system you can create a continuous environment that is not suiting to pests. (2:49). Have to do research to see if growing season can be reduced for countries in Africa, and use of less water. If you can change the environment and pest can't survive then you can do away with pesticides. (2:53). Mexican man and his agriculture project. (3:04). Photos of harvests. (3:18). He made some coils. (3:24). Keshe says let me correct, you are bringing a lot of sciences together just to justify, this doesn't exist, there is no frequency in PI, and no resonance. You do not magnetize the water, it's a single word, but what you are doing is both M and G, changing the PI of the water. You said you are changing the information of PI, but it doesn't carry info, it carries a strength, that is its information. If we use the right terminology then we understand it in a correct way. You are doing a fantastic job, but anything water that comes in N Coated should be covered, so you don't pass on N material but only the energy of it. He said the stone is magnetized naturally, Keshe then lets use the new term that the stone is a PI, it takes and gives. Now that we understand more it's important to use the right understanding, because we know water has H and O in a PI state, if you just magnetize then where does it take? (3:27). So you increase the energy of the PI. (3:38). The background of the man. (3:54). Renan, Douglas will present Water energizing tubes N coated. These are used to raise the alkalinity in agricultural water, decontaminate, and filter water. Keshe says you can not touch the water with the N material direct. if you don't have tubing you can wrap N coils around the outside. (4:02). The pH raised and the particles reduced. (4:07). Seedling experiment. (4:21). Video by Douglas of agriculture. (4:31). Bernie of Philippines agriculture project. (4:49). Video from Germany, a man create electricity directly from Gans. Keshe says we did this early 2008, its Nano coating absorbing energy from its environment. If you put 20 of those buckets together you can run motors. After some months depending on the load you use the water gets saturated and stops. He testing rock from fireplaces to see if something inside. (4:52) Man wants to share about Victor Shaugberger work on water, when you put it in high pressure and ?? it dies, it kills the water, and in Reverse Osmosis filters you have high pressure and you take all the nutrients out of it, so that water doesn't give any

nutrients to the soil. He says the steel and iron give negative ?? for the soil, Cu or bronze only. Rick says they confirmed Schauburger's findings about iron plows and switched to bronze. Keshe says that maybe when using copper plows from salts somehow coming off the plow creates a Gans that goes in the soil. Because land (earth) contains salt and every time you plow you create a thin Nano coat on the plow, ash or whatever is in the ground, maybe every time you do it you leave little traces of the Gans in the soil. If you put marbles in the water pipe that creates vortexes and livens up the water. (4:55). Keshe says with any vortex you amalgamate the energies or free energies or PI fields of the water into concentrating into one point in the atomic or PI condition, as we have vortexes in tornados, in space we get the same thing, in the ends of the bigger star formations we see them connected to the central energy. The guy says zero point energy, Keshe says there is no zero point energy, it is actually full of everything, this zero point is another word for Black Hole which is actually totally wrong. We call it central point because then it has a meaning. When you say zero there is nothing there, but actually it is the point of a star, the most powerful point of any structure, because that's where most of the energy is deposited. (4:59). There was somebody who lived off the Cup of life water, you have to keep drinking it as your body uses energy and keep recycling the energy. (5:00). Douglas gives his testimonial about the Cup of life, since 2008 he had great disabilities, last October he made a Cup of Life, he put a N Cu plate and CO2 Gans in the inner wall and sealed it. The first 2 days he was so energized from that point it's been a fairy tale, eats once a day not very much and active 18 hours per day, hair becoming darker. I am not completely pain free, but amazing change of life. I fell in love with the Gans. He's making 12 Cups for friends and family. It tells him when not to take in coffee (3 pots a day) and cigarettes. I owe Mr. Keshe my life he has given me my life. My body becomes acutely aware of what I am putting in it. The smell is phenomenal, and he puts different fruits on the Cup. (5:11). How he makes the Cup, he got a double wall Cup from dollar store. He has a double walled cup, fire coated Gans CO2 water, use a razor to separate the top seem, then take a sheet of paper to trace the shape of the Cup, then used it to cut copper sheeting, then fire Cu once to soften and form, then Fire N coat and also steam caustic 5 times, put 20 ml Gans CO2 and adjust level with distilled water, slowly press the 2 parts together and adjust level of Gans, glue together with rubber cement, turn upside down with heavy weight until dry, 24 hours. (5:16). Keshe says thank you for a lot of joy, if you use ZnO2 Gans with CO2 get a lot of E comfort, loose appetite for smoking, good for other addictions. The system when you drink it gives you what is lacking, gives understanding of the E, which is connected to the Zn. The CO2 is not a pure it has some Zn Oxide. It gives energy, our E needs energy too, this Cup with the ZnO2 and CO2, and the N C Cu, you feed the soul the E, the neural system which is muscle tissues and with the Gans of Zn you feed your inner E, which is totally 3 different things. You feed what has been missing that's why you feel better. (5:19). We see these things (miracles) happen a lot, what is in the Cup is also in the body. The minute the water touches the lips the energy is transferred, the water is just the converter, anything else would do the same. One thing more you can do is to make a lid with hole for a straw and breath it, make the air flow very slow so the conversion takes place. If you add AA on top of your container (? instead of fruit) you'll hardly need to eat, because now you receive the protein level, this is useful in time of disaster when you don't have food to eat for protein. Apple is protein, cauliflower in protein, wheat is 80% protein. Anything we

eat is AA based. At time of hunger, put in your Cup CO₂, ZnO₂, CH₃, and AA as Gans in the Cup you would never need to eat. (5:22). You can do the same with the Pain Pen, add CH₃, some of the fat AA Gans off the top, that you collected, seal the Pen, if you put in the water it gives you the same energy. You don't need to make a Cup, you can feed yourself and do the same thing, just leave it like a spoon (put P Pen) in the water and you receive all the energy. You have to understand what you are doing. The new Pain Pens we launch from tomorrow. You can use the P Pen like an aspirin for pains you can't reach with it, just put in the water and drink. Yes you can mix the Gans together in Cups. If you have a really pure natural water source without much pollution, these are the best water to make Gans with, because they are naturally balanced. If you have a deficiency of any element in your body, use a caustic of Sulphur, if you can make a very slight amount of it, when you drink it, just add 1 drop in the whole pack, this will allow the energy to be balanced in your body, especially those with Thyroid problem, it balances Thyroid gland, even your nail changes, posture, habit. You need Sulphur because in our body it is the regenerator of the balancing of the change, if you can make a Gans of it, need just a little, one drop in whole Cup is more than enough, you'll find the body start transferring the minerals in the right way and you'll achieve what you need, Sulphur in the Gans state. (5:25). If you have a problem with Hemoglobin or RBC count, cancer of blood. When you make the CO₂, put a small nail just touching the Gans on the top of container, that it becomes red drops, it's hemoglobin and put it in the Cup as you showed it, you can rapidly overcome blood cancer. Because the body picks up the energy it needs for the blood, these are pure blood, it doesn't matter what type you are. We are trying all these things and you can report back to us. When Keshe made his Cups over past 15 years he hid the Nano and Gans materials in the magnets around the cups, the magnets dictate a lot of positioning, here you don't have any conditions for positioning all the elements of the body receives if they don't need, but if you have a Cup like yours and if you can put in like a circle and stick it in certain positions you can dictate where you want the energy, if you want it in the liver .. turn your Cup upside down, the Cup you have in your hand, all the energy accumulates in bottom, so the top is your head, the 1 third top is the position of your brain, head. (5:28). Keshe draws on his screen. Divide your Cup in 3 levels, the middle part is lung and heart and arms, the lower part is Stomach and legs. You can make small Gans patches and dictate which part of head (body) you want, ?? I think liver and kidneys are at the bottom edge of the middle part, and prostate, womb on the middle lower part. When you turn Cup back to normal position most the energy is in the bottom put your straw at the level of where your illness and start drinking from there, as the water comes down it changes the info. ... it matters if it is the right or left hemisphere of the body, treat your Cup like the body, after you reach that place keep on drinking to the bottom because the nerve info goes to that place. When people have E problems drink from the bottom directly. Then when done drinking, close the lid and position the straw to where your problem is and breath from there. ... I opened the Cups and showed, you can control the body just using the brain. You can carry a man into Space just using his brain. Then wherever you go through the structure of E and through the P you can create the body according to the environment you arrive in. Question, yes you can do it with circular magnets and embed the Gans inside the inner hole, you can put the Gans patch on with hot glue, ?? with magnets you can control the direction, they have both N and S pole. For example, you have a cancer in right lung, cancer means extra energy, so I need

to take the energy out, 2 South poles to take out, so put the S against the Cup on both left and right sides of Cup, if you position it correct the 2 magnets will drain energy from the lung and reduction in the cancer. (5:34). If you have Fibromyalgia, means you need energy to feed psychological and you have pains everywhere, so put the magnets on the bottom of Cup (brain) with N against the Cup, with ZnO₂ and CO₂ in it, and do the same on the other side of Cup. .. (it seems he started talking about arm but on the position of the brain ?). To target something directly I use a very small magnet, bigger magnets for larger areas, if I want to hammer something I use a?? disc ??, .. if there is a genetic defect use rectangular magnets, rarely used and you have to know what you are using it for, because now you transfer copy to copy, ?? transfer energy from ? top part and build it to come to the brain. you direction from that side to the other side of the brain? ... this is why they tried to kill us because we learned how to reverse cancers so easily. ... you brought a lot of memories back ... but now you understand what these Cups are. (5:38). < he goes back to Cup> So you have created your Cup and lined it with N C Cu with the bottom open, the Gans is at the bottom is more powerful, pushing it up the sides balances it, if you can sectionalize the sides you can feed different parts of the body or put Gans patches on it. (5:40). Logos on the Cups, must be first authorized by KF. They will have barcodes on authentic KF products so we can track who it is. KF will start selling winding and N coating machine fully computerized and as many coatings as you like. (5:43). Coil machine 144 turns. It can make about 350 units on 8 hour shift. Price is 7,500 euros. They can supply mass copper from Iran cheaper. You can use a car battery in place where no electricity. (5:49). (5:55). Teachings open now on internet for 100 euros minimum. (5:57). Videos of KF Australia.
