

103rd Knowledge Seekers Workshop March 3rd (special teaching on emotion, 7 hours)

(:08). Keshe summarizes what has been achieved over the last 2 years, KF is growing beyond what they imagined and more rapidly, now we will bring in the governments to handle the demand. Will show the SS.

(:16). How to communicate in the Space, you can ask for a glass of water, what is a tree, etc. these are all Physicality's of the Man and life on this planet. In the Space we don't have this, we recognize E if it is the same as you, or in respect to your E what is the other side releasing. When we open this it is important for those who in the very near future will open the Space, at least you will know what to look for and how to communicate. We call this the blueprint of language, U communication. I teach more in depth in the background, but after yesterday's experience I thought it important to share the knowledge (and this knowledge), very rapidly with those who are developing this technology. Rick was present during this development and I will let him tell. (:18). Rick is not very clear, only says that they are entering something very new dimension and not just getting free power. I guess he wants to say that they experience some Emotions through the reactors.

(:23). What this person achieved, what we saw? There seemed to be an alteration of perceptions, feel the fields of other people more clearly, change in view point from Physicality to feeling fields. Vince is there anything you want to add because you were present. An increase in the communication b/n the System and the people around, being able to walk around the different areas and "know" the person, to "see" the person's real E. The increase in sensitivity of the fields, multiple instance of instant communication, knowing the question before it's asked. Reading intention without speaking. Telepathy. Field effect rather than just the Physicality. We asked him to taste a banana, he was receiving the banana, receiving the taste and E connection. We tested it with water of banana, his words were the water is me, I am in the water. We tested a Sulphur gas. (:29). The same as putting the orange on top of the Cup, you had the taste and smell of Orange, now we are transferring this without the container of water, because 60% of body is water you don't need to drink more water, you can desire what you need and the tangibility of the energy needed ... ?? in the Space you get the desire for taste of orange, you don't carry food in Space. The real Space technology without all the Nano material and the rest of it, the whole purpose was to bring a new standard and new knowledge. Renan describes one person experience of levitation near the reactor. (:36).

(:48). Talks about the Red Circle and a pedophile group in America. (:59). Asks them for where the graves of the children located. (1:06). Interpol is on to the Belgium's falsifying documents and attacks on scientists. He calls for scientists to contact KF and get protection for them and their technology (security.keshfoundation.org). (1:22).

Question from Klaus. A map of German KF is huge number of groups. We have seen the German government move in the past few weeks, as more German's get involved. Their manufacturing companies growing, they tested at a 20% reduction in 2 months with Power Unit. This is not a free fuel it's a plasma increase. The German government support them 6 years ago. (1:31). Austrian Health and Food unit, compared as a tree. It's like a small room with 10 reactors on one side and some on the other side. (1:40).

Only used CO2 Gans. He shows the helmet, you wear the helmet and go inside Health tree. (1:49). A case study of Health Tree. (1:55). Keshe says please remove the coils in

the Tree and the helmet, on the same side as the paralysis, (you don't want the PI energy on the paralysis side), when the hand and arm are involved, the reactors which are near the ear and go to the center of the head, the front and back has to be removed, you don't need coils in that area. He draws on the picture, only need the PI reactors on the healthy side, he shows which coils to fill and remove. You allow the part of the neural system of the brain that has to do with the hand and arm to come into operation. You put a single coil on the opposite side to start a flow to repair brain, you need an opposite phase that the flow can go through. Empty the other cores because you want the brain to focus on fixing the hand. A question about just disconnecting the cores, no, once you N C them they are active, you must remove them from the helmet. (1:58). The problem is the spinal cord pressure on the brain, first you have to see if the hand opens up first, that's the target. The Epileptic seizures is because so much info is created, but the tumor sits on it, and those information's get released in one batch, so the body stops sending info. Once you reduce the size of the tumor the seizures stop, you have 2 choices, run these 1 and 2 (coils) and 4 for about a week to see if you get the hand moving. You have to find out the exact position of the tumor, if the hand doesn't move, you have to create a flow which is draining it, means you take from it, you only connect your G rings and not the M rings, on either side, what it means you only take energy from the cell which you don't want, the brain decides everything else is okay, where there is a difference which is a tumor, literary you empty it out. The only way you can do that is when you put 2 facing G rings in operation, G means taking, so you take energy from the cells of the tumor, then you end up with a tumor which is very ... just dissolved in the brain where it is, and then you'll be left with a center. For the center we change the composition of the Gans on the coils... ?? .. just because you made the body unit (Health Tree), doesn't mean you have to use the full body unit, the deformity of the body has to do with the pressure of the tumor on the brain. For this case you do not need a body unit, do not touch the body unit (? put her in it), because this is not what you are looking for. (2:01). Vivek has a question about how to put half a strength on the coil next to 2 and 3 in the helmet? You control when you build the system, control with your PI batteries. In my system I use different size magnets of different strengths, you can't do this, here with the PI you create PI batteries, when you make them the number of turns decides the power of them, in most cases. Test your batteries see how it's double and how it is single, or use 4 batteries for the left and 2 for the right. Yes, there are different ways of controlling the power. You use 2 batteries for the #1 and 2, and on the #4 just use 1 battery, but it has to be the same kind of batteries you made in the same batch, the 4 batteries being stronger (left side 1 and 2) are trying to feed the weaker (#4 on the right side), creates a transfer flow of the PI. (2:03). You can do it 2 ways, you can go for leaving all the helmets open (take off coils), but you have to see where the tumor is and target it, for the hand you need to use those 3 (# 1, 2, 3 coils), because even when the tumor goes that part of the brain is damaged, you have to rebuild the cells, this is very important, you have got to see the resistivity you have, bring the MRI up look at tumor, then decide which one effects it, you make a decision, you going to reduce the tumor or the building of the arm after the tumor is reduced, or before, once you start activating the arm the tumor gets activated itself. There are different ways of setting this thing up, but where the arm is (like a stroke) this is what you need to create. The twist in the posture will automatically go back up, do not use at this moment your Body Unit, you don't need it. FIND THE SOURCE of problem, not just clean up the

side effects. It all has to do with the tumor in the brain, there are 2 ways to handle, 1) you can activate the arm which will force the reduction in the tumor. Or 2) decide where the tumor is and activate the coils above it. You have to target and not just a helmet for everything. (2:05). There is a specific way to use this helmet, and add a coil in a specific place and within minutes you can bring anybody out of Coma, even 10 years in Coma, within 24 hours I give you alive person. BUT you got to know what you are doing, just because you built it doesn't mean you have to use it. You see when you put it on your head (demonstration) it's no problem because there is no problem in your head, if it's needed the energy will be transferred. When you are dealing with tumors, epilepsy, understand the reason, spend an hour or 2 study the case the way it is in reality and not the way you want it to be because you want to use your own system. Decide which configuration you are using, understand the connection b/n the different part of the body why it there and which section it's in, find out which elements of the P is connected to this part where it's at, then take the next step. This is a bad habit, I built it now I got to use it. It's beautiful what you built but now be selective which coil to keep in or out, and if you are going to use a M or G ring. (2:07). For the brain the majority of the time you need G, if it's ?? you have to take away, if it's Epilepsy, when you see the body shaking and convulsions this has nothing to do with what goes on, this is the problem in medicine they only look at the end product and produce medicine for it. In fact Epilepsy is nothing but the switching on and off, the brain there is a pressure on it, the arms and legs want to move, the permission doesn't go to it, ?? you see it twisted, so that info is released in mass. Let me explain exactly how this case is, the tumor is sitting on the brain, most probably putting pressure on the hand and arm and its trying to get rid of this pressure, the pain, so it's producing a lot of info to send to the different organs of the body to create sedatives and send it to the right place so the pain is not there, but because the way a man sitting on a child, or a tumor sitting on the brain, ?? produced it finds a short cut, goes to a specific point of the brain, as the brain wants to release the info to correct the arm, the brain has a capacity of 1MB/sec of info to go through it, but 3 MB come, when it comes to .1 MB the switch comes up so the info goes, but the info from the brain is taxi designated to a specific point, (when you get a needle in your foot you don't shake your hand, because the info goes to the foot where it is), but when 1 MB info is released it has no characteristic so it goes anywhere it can go, so info comes for moving your foot and not your hand, the info has no base and everything moves, then you see the stupid shaking of the body, then it opens for the second time and releases another MB of info so now you see another shake of the body, and it opens for a third time to release the last of the 3 MB, then when no more info, shakes stop ... we call this Epilepsy. (2:10). So the cause of the shake is the tumor sitting on the hand and arms part of the brain, so the source of the info released for the Epilepsy is sitting at the seat of the tumor, and is for the arm, in a lot of pain, but the body is creating a sedative for it so you don't feel it, it has no where to go, it releases it and you see Epilepsy. It takes sometimes 2 days to build up to 3 MB to release, and this woman has an Epilepsy attack every 3 days, when it reaches a point it releases. Can we see an MRI, you don't have then you have no right to treat her. You must first know what the problem is. (2:12). They will scan in MRI before going further. There is a group in Holland selling P Pens but they are not correct. (2:14). The Health Tree stand is made perfectly. You have to decide which organ it is, if a cancer, if you are giving from M or taking from G. Keep the M and G separate, the double coils are

of course together, but when you transport across keep separate. Keshe offers him to build one for the KF hospital. (2:19). Shows the MRI tumor on the right side, so set up like . (2:22). He draws where to put the coils. This looks very much like a mobile phone tumor. He draws the position of the coils, on these coils you keep the both together but don't connect the M, shows the connection of PI batteries, use a Sink to shrink tumor. You don't want the Tumor to move. The first sign of treatment is less Epileptic attacks. As the tumor shrinks the brain wants to readjust can get head and muscle ache, this is good sign. Don't use anything else. Try for 2 weeks and we'll check in. These can't do any damage it's just a flow of PI, you don't need it you don't take. (2:30). Ask a medical doctor to supervise you from the KF. Connect the 3 coils to M and to the Sink, then only the tumor gets drained, this is safest way because you don't create a flow to go anywhere, it takes a little longer but very effective. A question about using salt water as a sink, Bernie will explain. (2:33). Go back to Tree, if you have a Kidney problem just connect the one at that level and not the others, if Lung use the top 4 to line of diaphragm, have to decide if a Cancer or just giving energy, if energy it has to be balanced btn all 4. The top 4 cores have to be connected to the same power supply according to the ratio, if your connecting the left to 2 (batteries) then the right to 1, which creates a gradient flow of energy. Have to decide if emptying or adding connect accordingly to M or G. You use it according to what is needed. (2:35). Get a doctor to work with you. Try to separate each coil and each ring, and make the panels detachable. The coils in the helmet are copper N C with CO₂ and ZnO₂ Gans. When you stand in these machines the desire to release yourself of the pain of the kidney will trigger only the coil going to the kidney. Today the man (earlier experience with PI reactors) who desired banana tasted banana, we are coming to the same point, (2:40). when you desire only the kidney to receive you decide left or right, it's the E which will trigger the system. We have to gradually reach to this level of understanding. You don't need coating, you just need to create the E that this is where the pain is, the body knows the system knows, it flows to it and changes itself. (2:42). To Ghana, they had to leave for emergency meeting. Corrected water treatment results. (2:52). Water Treatment process. (3:28). Keshe says to try to see if you can wash the CO₂ and CuO₂ out of the residue so we can reuse it. (3:31). In time of disaster you can use Gans to clean, if you want to make the water drinkable, the CuO₂ comes on the top to take out, CuO₂ is a huge disinfectant. (3:33). Lakes in Russia with contamination and now we have a way to treat. In Fukushima we used CuO₂ to clean the water of radioactive materials. TEPCO in Japan didn't want it called CO₂ so they called it "talcum lotion". In a Nuclear disasters CuO₂ is the only solution which gives you sediment free, germ free, and radioactive free water. Keshe ask The Ghanaians to test the water for germs and bacteria's. Leave the CO₂ out and test only with CuO₂. These rivers are fully contaminated. Make a test by contaminating a sample of water with radioactive material. (3:38). (3:44). You have some old Cobalt radioactive waste from your hospital. If you find Mercury don't touch put sediments back in water, add CO₂ and then measure the sediments. You should see a lot of gold, plus you convert the Mercury to gold, if you add CuO₂ you'll see the gold come out. TEPCO is collecting 50 kg per tank. You might need CH₃. The gold will become a national asset and subsidize your research. (3:47). (3:59). Results of agriculture tests seeds treated with CO₂ for 5 hours before planting, germinate 2 weeks earlier, but harvest yield same as control. Keshe says if you N C the copper water pipes you'll also get a better harvest and use less water. You keep the CO₂ in a

separate water proof container and put in water, you don't need to continually change or add new CO₂, seeds only need 20 minutes in water, plants require much less water. Belgium tests show 3 to 4 times more harvest, 1 /5th as much water, and harvest time shorten 30%. (4:05). Question from scientist trained in nuclear crop gene modification, and about using Nuclear energy to genetically modify seeds. Keshe says that the radiation treatment only gives the M. Use of PI CO₂ gives and takes both M and G and brings a new dimension into world of seed genetics. If CO₂ doesn't work you can use CuO₂ for more effective pressure, can also add CH₃. It's not radiation pressure but MG pressure, and the seed will modify in the way it needs to do. The radiation forces its way in, but in PI allow seed to find its own balance. (4:07). Radiation is adding energy to, but this way is PI energy which is balanced and acceptable to the seed, and you get exactly how you wanted it to work at zero cost. If I want to increase beta-carotene 100 fold what to do? Play with the mixture of 3 or 4 Gans, until you get what you want. CuO₂ has property of taking energy at certain levels, but if you add it with ZnO₂ Gans, it allows the balance within the seed structure, we know this from research. The problem with irradiation is we dislocate and put where we want, but this way is MG fields put it where you want it (intention) but it is in balance with it, so it's not genetically modified, it processes according to what you want with the MG fields. (4:10). Talks about KF in Ghana, KF should remain independent. Authorities want to go over the research again with other departments as witness. Benjamin to make large quantities of Gans for tests, make sure there is no salt content in Gans, or it will transfer its PI condition to the seed, it can also be of benefit allowing the seed to extract moisture from the environment through the salt. (4:15). It acts as a water sink for the plant, and in some plants it works the other way around. Give both with salt and without. The plant is looking for moisture and it comes through the salt content in the DNA of the gene of the seed, if you have salt in the Gans it behaves as the Gans of Salt, it will bring the gene in to the state of being thirsty and instead of the drought killing it from outside, it calls for the water to come to it and it creates its own water, in some countries we have seen that effect, and in others due to the climate it doesn't seem to be responding, so test both. (4:17). Benjamin is going around to different sites, Keshe says to make a N C Cu pipe from outside and cover it with plastic, and let the water go through it very slowly, and feed plants all the time with this pipe. The plants will grow totally different because you are feeding through the water. Don't water everyday, schedule and control amount. Water shortage today is a big problem. You should see 70% reduction in water consumption, 5 times more foliage. (4:22). Shares his work on screen.

(4:30). Share the teaching of yesterday, the interaction of the E, and control for U communication. For most it will sound like nonsense. This is at the highest level, understand how we will communicate in Space. We are on the final stages of showing the Space Technology, and how to feed yourself. World wide Space Agencies who are secretly testing MaGrav systems this is why we are releasing this info, if you are ahead of us, one of the first things you need is to communicate with other life forms. You need this to be able to stop any conflict in Space, because your thoughts are read before you come, and Americans have the habit of pulling the gun before asking questions. This is the blueprint of Space Communication, language. We are about to produce SS without dimensions, the way upper atmospheres of planets are created, etc. The way we see the surface on the sun is created through the same process. Containment for holding to the PI,

up to now we produced PI to release its effect, if you contain the PI it will create its own surface, this is what this technology is about. Then you'll understand P tangibility, from now on when you do such a thing, you should understand how to control it. (4:36). And now we release the PI for interaction of itself of the PI to create tangibility. We have entered the true deep space travel without the need for food or water from the planet, because we can produce it through the fields of the source of the PI of the reactor. In this process you open the door and the family greets you and you know how to greet, he already reads your mind. Understanding the characteristics of the E in the different parts of the brain. Up to now we only handled the P, now we know the core sits in the E part, and then your interaction of your E with the E of another creature, understanding the color and interactions of the E will give you the U language. Understanding the E in the different parts of the brain. (4:37). Before we only dealt with P part, now we know the core sits in the E part, interaction of your E with another's creature's E, understanding the color and interactions of the E will give you the indications of U language. This is what today's teaching about. As it has been promised in all the Holy Books, by the Spring of this year we open the door of U to Man, and this is the first thing, when you are born you have no language, we don't understand you until you start saying Mama, Papa. etc. The language of the U is the Color of the True Thing of the E of Man, and that of the other creatures, that we only love and there is no war. ... (4:40). This teaching you will learn the way and structure of the U, we do not see arms and legs, but they are there to carry out the wishes of the E part. E have MG field Strengths, very much like Earth has its own MG field Strength and its interaction creates the color blue of this planet. (4:41). The interaction of the sun creates the golden color we see, but if we put the colors of the earth with that of the sun we see different colors, gold, red, blue, etc. The colors come from the interaction of the fields of the earth with those of the sun at a given angle. The same is with the interaction of man's E with other entities E. When the Earth fields interact with the sun it's white but we see the blue of the planet (its different). If there is a slight change in the angle, they're still the same fields but it creates a red sky. It's the same entity but a different position of the fields. In the Space we do the same if our color is of the same (?) we get a white color, no interaction, I love you, you love me, if the true love is there ... when the 2 fields are of the same strength they don't create any residue, it means we are of the same (soul ?). Anger has a different color in respect to joy, when you're happy your giving, same with other creature, what does it do, because it doesn't see any color, but because your E is happy and giving you know he is in the same condition too. This is the way we communicate in the U, there is no alphabet it's the interactions of different strengths of MG Plasmatic, this is how we start the teaching. We are getting the human race ready to understand how the rest the U works and communicates. One Planet, One Race. If you understand that we are one race in the U. (4:44). Keshe goes off line, plays a tape from yesterday's teaching, first time we have opened private teachings to public. (4:47). Keshe tells story of an African tribe when they greet someone, the chief is given milk, he spits it back on the face of the guest, everybody cheers that the chief has respected the guest so highly. Same with the E, the spectator watching if African he rejoices, if European get angry, may try to hide. etc. (4:51). He draws the fields in the brain. Can you separate E of fear from Joy, laughter. Fear is the one which brings control, it means I am going to hold onto it, it's the heaviest (G). Joy happy giving, is the outer field the M. Those that can feel the fear but don't show it, for

beings without P can feel the fear but something else on top moving, the guy doesn't like it but he stills shows it's acceptable. He don't see but he feels your E. (4:53). The ones who have developed and separated their E will be the best ones for Space. They are aware of it and have some control over it. Like a blind person learning after falling many times. ... learn this and return to earth, pass a tree and feel it's energy, ?? I am sure it's going to eat me, I am going to be part of its energy and not there anymore, would you feel that energy? You have to understand in respect to you where that E comes from. Joy you like to fly, fear (inertia) stay on earth, the childish one I don't know what I like, he calls this the zone of ignorance. (4:56). If you can do this non-verbal communication will start appearing to you as second nature. If you stick to inertia then you play that game. (5:02). There is a few degrees temperature change during woman's cycle that 99% chance of having a girl. So by your E you can change body temperature. The E has found a verbal language for itself. So if we can measure that E of reproduction, what have we missed, Man's cycle of understanding of his E, also his own motion. By knowing about it and controlling it in different positions in our body we can do it to produce lift in our body, can we produce an energy that we don't even need to walk. Walking just for pleasure. We know all the tricks of the life. (5:04). (5:08). Silly intellectuals come on and waste time. (5:22). Rick talks ... initiating ones will on moment to moment. (5:24). Italian speaks. (5:26). Keshe says the biggest radar is skin, skin of face shows E. Left side is G we take energy in. Receiving E through the Skin. Try to feel what it is so you can recognize it in the brain. Releasing energy and seeing what other people feel. Keep your face straight and send the message of I love you, which is the joy of giving and not expecting anything back. Se if they will raise their head and smile at you. (5:30). Last semester talked about moving things with your thoughts. Test sending feelings to someone or animal and see if they respond, this is how you are going to control your reactors. Now your antennae is your brain, now I want to go to that planet, etc. Man in space will be busy traveling. I don't teach you what the E is I leave it open to you, it's different btn all of you but you all feel the same. It's nice when I stay silent I listen to all of you. (5:37). What is anger to you, can be joy to the others, they laugh. (5:39). Mood rings that change colors with your change of mood. (5:42). Keshe interrupts the talk, I know where I want to take you, I am just trying to let you go there. You get standard signs from a water to measure what E you are having. we think, work with the Space technology, water is the attributes of Earth, our brain is not the water, it's a Gans state, we create a Cup of CO₂ and our brain is based on the CO₂ add a touch of ZnO₂ to it, it's a copy of your brain, we make this as a standard for people who go to space to understand their own E and say that this is a standard for being happy, this is the speed of rotation of the Gans in a cup, this is how you give energy and the Gans expands in the cup, if you get to this size it means you are very giving. Or in the space would they measure us in respect to that cup, when the man gets the Gans to this level it means he loves, so the language is this, so we create a Gans U MG field language. I am trying to teach you the language of U through the fields, the way the U operates. There is no A or B, it's the field strength which you understand and is understood. (5:45). We don't carry a dictionary, but a vocabulary of field strength of giving and taking, this why I teach about the layers in the brain of Man. Does your E which becomes like a Sun, when they see the Man they say look he is a giver, kind, he is in love with U. The way you give dictates the way you receive, I am giving so much but I don't need maybe he likes. You don't speak a word

you give your E. Inside us as a race we feel fear for the End, and collectively what is about to happen, even though we don't see it, we feel it, we are emitting the sign collectively as a race, birds, etc., that we are receiving the fields, is increasing at a level that we know at a level we cannot sustain, so collectively we are radiating a field which in the U language is an SOS. We have the U beings on standby so when it comes we go in, but don't forget our seeing is coming. (5:48). Then we be so receptive that we see another race, is getting to a boiling point, that we do the same to help not the P, but to help to release the soul, or take the soul somewhere, it's just like a child, I am taking you somewhere safe, a U orphanage, this is where we are going, not for you to interact the same as before, right hand quarreling with the left. The whole purpose of bringing these E levels and layers, is what we always thought, the language of U, non-verbal, U works in interaction of the fields in all dimensions, which is a Gans. Now you see where we are going step by step, people are making the Lift by M positioning, you don't lift in the space, lifting is in respect to the Earth, traveling in the U it's like going across from France to Germany. In the U same, you come across different languages, cultures, different entities, but does your entity change when you smile, everyone smiles, on Earth we know it means I am happy. (5:50). I you take 1 and give 4 it means you are a happy giver, I can't do anything because he gives so much he doesn't let me come close, but only he takes from these fields and gives only those fields, it means he's fooled ?? I have a little bit extra I give it to him because that field I don't need. I am walking you into a direction with your E, One to teach you U language, two in controlling (E) you can do the driving too, but where do you want to go with it. When you are driving your car you are also talking, smoking, etc, now in the space you have the same. One part of your E dictates where you go and the other side of E is to understand how to communicate. (5:52). Guy comes on about the Iranian New Year March 21, 2016, beginning of Spring, over thousands of years they have measured it to the second it comes into the Spring. It take 365 days 6 hours, etc. to complete 1 rotation, sometimes falls in middle of night, we stay up for it, we call it, means time of evolution to the next cycle, we start the celebration days before, we plant seeds that by 21 they grow to shoots, yesterday it started that we put the seeds out, we put out 7 items that start with the letter S. (5:54). Guy rambles, Matter state 80% of population, Nano State 5%, and Gans state 1%, Plasma state .001%, 700,000 of 7 billion people on Earth, to go there is to be beyond Plasma where you manipulate the PI and that's how you become the pilot of the SS. The MG field is so powerful, (hidden) intention has to be just right. (5:57). By becoming aware of the colors of E related to MG fields in the brain is how we can control the PI. The awareness is your intention where you want to go. The guy drops into his heart, being in that centered state, he's feeling and not thinking, connects to the Infinite field of Plasma, feeling the resonance becomes joyful, which is M. This is the key to controlling the PI field regardless of anything else. The center of the Torsion field is the heart. (6:00). Keshe comes on says to guy you have a very big ?? I hope you can understand it. At the moment we have a digestive system which is there to convert the energy of matter to energy of body, we have lung which converts the energy of the gas level to what we need is a PI conversion, which is a huge amount. We eat very little compared to the amount of energy we take through our lung, which breaths 18 times per minute (10 to 30 times). When you switch over to E, you loose your mouth, digestive S, lung, and no need for the heart, we don't pump any blood into brain only around it. Where goes the function of the

heart, no need for heart, blood circulation. (the arrogant guy doesn't want to listen to Keshe), the other guy comes on and says that when he goes into that state the he doesn't drop into the P heart but ascends towards the soul level, btn E and soul, it's a higher field strength than the heart. (6:03). Keshe says what I am trying to say is that in Space our P structure will change beyond recognition of what we carry on this planet, if we become the passengers of a SS for a ?? time of hundred years when we come back, we will be aliens here, because we will have gone through the evolution of our understanding. We will have no need for a heart because we learn to absorb energy in a different way, because no eating no liver, kidney, intestine, etc. The structure of our brain will change. How do you see, feel, with the changes. When we take man to space we preplan our own evolution, because we know the evolution and change of our structure for flight will bring evolution, we ?? the RNA and DNA to evolve to survive, this time we have a choice, we are the decision makers, we ourselves are going to decide to create the evolution and revolution. The guy says, which is the pilot ... No! You are the forth comers, the group that will decide if you understand what is on the table. (6:06). The evolution is decided by us because we know what is to come, and we decide how the human race in the space will look. It's the guy who came from the village and trained himself to be affluent, he's different than the monkey's who just look affluent. There are 20 of you in these teachings and the rest of the 7 billion is aware of what is to come, and if we hadn't spoken it today you could never imagine there is such a thing. I put everything to you step by step logically so you can see. You go into Space, learn U language, instead of food need to absorb energy directly to sustain P body to carry the E and soul. As you don't eat you don't need a mouth, you don't need lung, so P you are going to go through evolution. Man will change beyond recognition in the next say 100 years. when we go strong active so little brain can supply because now you will have no blood circulation, now you can transmit immediately so no need for nerve system, no cancer. How do you plan to change the structure of the human body to become true man of Space. tells story of lady at age of 5 wanted to become harpist, and in 15 years she managed to make herself tall, long fingers and arms, and different posture. (6:09). .. she evolved by her desire, every time I try to reach the last string my E tells me I need a longer arm so I put the energy into it so the arm can grow longer. In the next 20 years man will go beyond in evolution in a very rapid way. It's you who have got to decide the change. Once you do the E needed for the change to survive in Space will be perfect. Will transmit through your E to the rest of the human race. None of you are ready for it, BUT this is what's going to happen. ... the guy interrupts and talks about Caroline creating a PI ball in her hands and put intention in center of it. (6:12). We are living in a vibratory system, E, light, PI, everything. Where are we right now and how do we plan to get there? He says when I drop into my heart there are no thoughts, Left hand for men in M (tantric system), when you interact this field you create a PI ball in the center, with intention collapse the wave ... instead of analyzing which color is which, asking the PI, that's how you manipulate it, let the PI answer, everything will collapse fear, etc. (6:15). He talks on. Keshe stops him, you have a rope to hang yourselves. I make the PI to be my soul, and move my P to be inside the PI, and whatever I need to will manifest myself in the P of the dimension I appear in. A lot of you missed this. The guy says, that's the intention .. no that's not, that is the only solution. Other guy, I would say it's more a willingness .. no, it's not, it's the fact of Reality. ... asks can you repeat the concept ... it's

not a concept it's something you have to do in the Space. A lot of you see a lot of flying light balls, these are the entities that have managed to convert themselves to the PI of themselves. The light you see flying is a Gans where the passenger is inside itself as part of it. I brought Caroline to show you how to create these PI Balls, is how you bring your fingers together to open it that it becomes your new jacket, and what you emit from it becomes what you want to be, what you are prepared to give and take, you become the Sun, which you control through your E. (6:18). Is the Sun the reality of the Jacket of the entity, ?? in vacating human body the rest is part of it? If you can create and control this PI it is like the clothes you cut and wear. We'll go to the next step, none of you chosen for this "round table", we know the soul, hello friends we know each other a long time. Now we speak the language of the Man so he can do the whole thing, like a bunch of people in the Theater, now we have rehearsed enough now we show the show. We teach the evolution but Man has to put himself through it, to reach and become part of the U society. A step further ... We came out of the Light, manifested in P and now with creating a ball of light, would we go back into it, or inside it with the full knowledge that we don't need anything else, but we can become P at any point we like. (6:20). Instead of sewing a shirt and trousers and putting ourselves in it, now we make a PI that becomes part of us, part of inside it, then with what we emit and receive we find balance in the whole of creation. You need 2 hands to open your jacket, are we creating this PI ball as a new home, that we can with a finger open and go inside it, that we become part of it through the E of what we give and take, ... we become like the Sun and Earth and find each others position. This is the true condition of the travel, and correctness and fairness. ... is there a humanoid in there? You are the humanoid. ... How much are you afraid of loosing the P as you know you are becoming the Light? (the man uses the excuse he is getting old ready for death so not afraid, {I say he completely doesn't understand because he conformed his whole life}), ... when you look at a cup of Gans and it has so many divisions that it makes the totality. How many beings are inside each cup, that they are looking at me from inside out, they laugh at me and are more mature then me. (6:24). Each individual Gans which has become a PI a being with inside it. Scriptures say even a stone has a soul, but different level of soul. Our ignorance .. PI collection of state appear to us to be there are a living entity, in fact, by going inside we find the truth about what is going on outside. Mohamed said the unity of being, not just a god but the totality of it. You are part of it, it's how you want to look at it. Christ said thy shall not steal, because when you become a light you cannot, you are a giver. If we read the message in the right way would we see the path to the U community, a hidden code for us but we are so P we didn't see the real code. We have gotten too P. Zoroaster said, think, speak, and act correct. What language do we talk when we are a PI. The code of U language is in every religion but man has only taken its P part. (6:27). ... that guy comes on ... holographic .. (6:29). Are you saying in Space there are no rules except the love connection which is the PI ... good morning! ... are we in the stage of maturity to accept the Totality, I am the Creator, but the created have to understand the essence of the Creator otherwise there is no purpose in existing and creating, I made Man in the image of Myself, I made you to make children that they may love me, which means I need to feed myself back, are the children the feedback on the little bits which you make and connect back to the G and create the essence of Creation and create more. You have to move away from P. (6:32). The guy says then we shouldn't make up any rules, Keshe says there are any except to

give unconditional. When I said hello friends we haven't seen the soul for a long time, then I decide where that soul sits, because when a friend comes you decide where you want him to sit, the beauty of the ?? This knowledge needs a lot of openness to understand because I have put the teaching in a way that every step of it has to (be) understood, it's not in the past that I said and it has got to be, it's the way we understand we want to be, we decide how to be that collectively our want benefits the rest of the people, who are made the same way as us through the AA, through the condition of the conversion of the PI is a star in this Galaxy, what we are came from the Sun and the Sun came from the Galaxy, which came from the star of U of creation itself, which came from the Creator. I made Man in the image of Myself. The whole understanding is how we can manipulate this ball that it becomes the new clothing for the Man. This time if he understands, he will know that all the stars shine the same, unconditionally what they give, ?? at the end they will dominate? Look at the Sun continuously radiating, but you don't listen to the other side of story, the same when we have 2 PI what comes from the Exit goes in the Entry, it's also ABSORBING! (6:35). It's not a one-way traffic, obeys the rest of the rules of creation. Does the Sun take the soul of the Man it comes and radiates out the soul of the Creator. ... we sacrifice our souls for it, where do you think the energy fields come from that go back into the Sun? Have you become so ignorant to it. What is good for one is good for the other, North pole of M going out South pole absorbing. What feeds the South pole of the Sun, this creature, if he has the full spectrum of the fields which in the reduction of field strength became the tangibility of the you, becomes detached at the field strength, would we sacrifice ourselves to become part of the creator ... to be radiated now that it is matured. Does the Sun only radiate what we think, or does it radiate the soul of the Man? ... or the created things in this planet, Solar System, that it creates back btn all. Is the maturity of the Man due to the maturity of the souls which leave it, and in the field strength get absorbed back into the Sun and radiates equally out? There is no difference btn the Macro and micro, they all work on the same principle. It's the intelligence of the Man who has to understand the truth. (6:38). Where are we going? Are we becoming the light which has lead itself by itself from inside that we elevate ourselves to become part of the structure, that we can travel to other dimensions to become part of that to be absorbed by the Sun of the U that we can shine as a Creator. that guy comes on again ... Keshe says that when you become the soul you don't have a mindset, your mind is set in one way just to give. United nations heading into building. Human beings are like the limbs of the body, when one limb is in pain the other limbs will feel the pain, if you are not aware of the other humans pain you don't deserve to be called a human being. (6:42). (6:47). Keshe comes back on, who wants to shine more has to give more, the problems for most humans in the next step to get to the final, is for the man to decide that this time around we are in charge of the evolution. Last time around we came from gases and AA without a choice we became what we are, in going back to the PI of the Creation, this time we have a choice. Do we choose to steal and become suckers of the energy of the U or do we elevate ourselves that we have no need for P, a sun the shine unconditionally to give, we know that we want to give the best that we can shine more. (6:49). The Sun shines all the time, but we forget that the PI receives from the Entry, what does the PI of our sun accept to enter it. Do we become the matter to become the most purified fields of unity that our wish as a soul is to be absorbed by our own Creator, which is the sun that we can shine and spread the love of the Creation

across this Solar System and the same way with the Galaxies. For the first time understand the essence of the Creation through these teachings, or do we still get entangled with the P, the Gans etc, because we know the faster we can solve this problem the faster we have to enter the dimension of non-physicality as we won't eat we have no need for a heart and lung and we become an all shining star. (6:50). the guy and his holographic U comes on ... Keshe says the Totality of the soul becomes the creation. Add this to tomorrows workshop, those who understand this will be enlightened. By evolving we become part of the giving of the totality of the creation on this planet. Out of the stars which you see in the U are some of them the stars of the souls or are they stars of P of Pl which hopes to become the star of soul. (6:53). Have we matured enough to want to give unconditionally to become a star of the U, to dictate as a race our own destiny, to become the soul part of the star of U, or are we so materialistic that we want to remain matter state. I have to use the tricks of the brain strings, laugh or happiness that I can bring you in step by step to show how you communicate, receive, and how to change the direction. A matter star has to mature again to become a soul star, it's detachment to P. (6:56). You don't need a craft as you are the craft yourself. You are the soul but you don't see the essence of the truth your own created through the creation of the ??.

(6:58). Part of the Afternoon Teaching. What is Plasma? Scientists have made a terminology complicated to show their cleverness, but they are the most stupid lot. They twist it so you can't see it so that they look to be clever. Look within yourself you'll find all the answers because you are the Pl. You radiate heat, energy, thoughts, you call it aura. There are machines that pick up the color of the aura, let's put it around our heads, forget about the body. You test it to see what color it gives for hate, see if the aura color goes purple, then hunger in your mind and see the color, can we color code our E. Create a machine to standardize E with colors. Then people couldn't hide their E. Can we reach a point that we become the machine and detect our own fields, and then we can see the fields of others, and if they interact with us, then if their field strength is the same as our field there should be no reaction, 2 field forces the same don't create any residue, this is how we will communicate in the space, field interactions. (7:02). The E in the head which creates the color. Does E contain the truth or create the truth? Do we need to have E to find the intention, from the intention we see the E, the truth is very near to each other. In the Space when we come across another entity we judge it by our own strength and not theirs, because if our intention is peaceful and loving and if their intention is the same there should be no magic show. It means we are at peace. If both our intentions are to eat each other then there is no field either, we radiate the same M and G energy. In the space there is no material except Pl, it's the intention and E. We judge the environment from within ourselves, and if it doesn't interact we know it isn't good for us because we see the interaction. (7:05). We become the aura or M field of your head, becomes your true love communication, I love you. We become the judge of ourselves, because intentions will be read before we act. If there is no color both have the same intention. Understand why we are teaching so fast, because now we open your eyes to the truth. If we start teaching the interaction of the Gans of the body of Man, we know exactly what it means. We have to start color coding our own strengths. if you are both thinking to eat each other and the other is a heavier mass you are gone. Speaking and teaching doesn't exist in the U, only a few backward races have schools, because they haven't learned the laws of the real U structure. We don't see armies, etc. The human race has not progressed in 3,000 years.

(7:09). (7:12). the whole purpose of the teachings is to know your self and can communicate without speaking. The science of E. the process of the U order is to not eat you but elevate your soul. (7:16). We could have gone with the waves instead we went against them, that's why everything looks as it does today. When the medicine doesn't work it's because you fight it. (7:19). Question about the Cup of life, it has many aspects of ourselves in it? ... when you want to change the P you have to change every single cell within the structure and its happy with the change. ... you make the energy available to the soul that this is my desire, if it fits the E will follow, ... the E has to fit into the P. Every feature of p has the role of guaranteeing the survival of you longer, nothing else. Your soul knows what it has, you give to the soul I would like to have blue eyes. When you change things the first thing the body does is what am I going to feel in the crowd. The soul is created before your E, and then comes P out of E, that it can handle it. If it was the other way around it would have been a big mess. ... everything has to be harmonious in the body, yes. (7:25). The animals are more mature then we are, when they don't have enough a certain number don't reproduce. He says the animals souls are higher then man. The E creates the body and it won't demand anything more then what it can handle. Pray for your Cups and give from your soul. (7:29). Man shows his coils wants to attain lift. First of all it too close to the wall, it has its own MG fields and is sucking everything in, make sure the environment in correct. The coils are tilted, the frame you put it on is matter state, you have to N coat it. The structure of a craft comes from the interaction of the fields and not the structure held together by matter, forced structure, see how you feel near them, put a camera on it and you'll see them move. He saw them shake which means the fields are active, by moving it releases the field. For lift the one that shakes is the one you have to add up for lift. Everything in the environment matters, vibrations from router and guitar, radiator got water flowing in it.
