

**104th Knowledge Seekers Workshop March 10th** (Entrance to USA, savings for nation, How to give to Plasma?, Universal feeding System the end of food, new bodies)

(:07). It's been 2 years since started. This week 4 new companies in USA have started. Talked with Kerry Cassidy Camelot interview. The fear of patent was for control, now a new way to share knowledge. (:14). We are all children of knowledge, and we are there to learn. The term of "Free Energy" was chosen by one man (pedophile), he used it to catch children, (he's caught). Two ladies are doing the same thing, Susan turned up at Foundation, with false hope claiming she can help children in Africa (Morocco). These people have did a lot of damage. She was asking for a picture of daughter. (:24). They have a software program that can break into mobile phone of child and get photo, then the criminals send that picture to you to threaten you. Protection is to put a small piece of aluminum foil with black tape in front of cameras on tablets,, laptops, and phones, front and back. The man in Utah got caught and the judge killed himself. The children are taken in Morocco, "false hope" is a Moroccan name. (:30). (:36). We support Kerry Cassidy as long as her site remains correct, we are monitoring it. (:44). MaGrav unit testimony Robert, from Utah has his utility bill on hand from November to February. Started from October Blueprint teachings, watching videos and finished his MaGrav in November, 2,400 kwh plus wood, in December down to 1,400 kwh and stopped using wood went fully on electric, and in January 839 kwh. Using a stacker unit. It means 60% reduction. Saving \$2,400 per year. (:51) Keshe says we are in line with project, in USA have double phase system, in Europe use single phase so 30% reduction, 3 phase 90%. (:54). Shows electric bills. (:58). America produces on average 11 million barrels per day of oil and imports 4 to 6 million, if your government wants to make savings for other activities, and if not for war. You saved \$198 and 50% of that is cost of fuel the rest is profit and charge, the say the Savings is \$100 per month, if 1 million Americans have units that \$100 million per month, adds 1 billion per year to spend on goods for nation. In US you have 300 million houses, if in the next 5 years add 100 million houses then add 5 zeros to the figure 100 billion. The same in automobiles. The same with Health Care. KF technology will shift the nation in process of bankruptcy around, it's in black and white. (1:01). The Chinese have understood the result and embraced. Now 5 factories going into production. What about stop spending on the war machine. The oil industries are on the way out. We can't be ignored anymore. The oil producing countries are running to KF, because the \$100 barrel has gone to \$25. The revenue now will come by saving and you create jobs with it, this will directly boost the national economy. The candidate who supports Peace will get KF support, giving America a new chance to stand, and new jobs. (1:07). Peace for energy. Now you see the power of the technology. Keshe has a man he wants to put forward for presidential candidate on the basis of technology for peace. The empty Churches, no one need go hungry, etc. Keshe brokered peace plan with Iran on basis of job creation. Keshe has worked with the Chinese for 20 years their army is not a military force it is a nation force for the people, and he respects them, and give them full technology and even technology that he hasn't released. (1:15). We can show the power of technology, 4 assassination attempts from Red Circle. The German Chancellor gave Keshe 500 million backup to bring technology to Germany, but Red Circle stopped it. German engineering is the most perfect technology in the world. Now share it with the rest of world. (1:18). Support the 5 companies in the USA, we are strong enough to

handle the Illuminati's, the Rothschild's, etc. We are doing what no other organization has done keeping these extreme groups out, we are working with KGB and CIA. Soon we will see the king of Belgium in custody especially with the capture in Utah. This is how Susan came into the KF, she claims to be an Iranian national, we are negotiating with Iranians to extradite her to Iran. (1:24). Rick looks for letter from Susan to post. Scientists should send allegations to KF. (1:28). Rick reads letter. (1:30). The man who received the letter came on and told what happened and how she tried to get a dog on the premises but Caroline refused. (1:34). Now we see the technology is paying off. We developed it together, carry on together and travel into Space together. Let us change Man to a peaceful man. We are developing a new food system, the U feeding system. (1:36). Keshe gives instructions how to setup Stackers for Universal Feeding system. Each Stacker has 3 layers, we put 3 Stackers in triangle position, then each of the 3 Stackers are again forming a triangle (9 Stackers). You can either add a 4th one to each to make a SF, or leave it as 3. Because of our mentality we had to put the 4th on top, but it doesn't have to be. The 4th can be anywhere, because all the system needs to do is reposition itself in respect to the 4th, you can move the 4th in any direction because it is always in touch with the System. AND the 4th is the brain, the body of the man, it is the existence of the True and it's in a way you. The system readjusts to positioning of the 4th but the energy doesn't change. So if you are at home with your system or in Washington or in Zurich you are still in connection with your system. (1:39). Let's say you use 4, in 3, 3, 3, 3 combination ... understand the 4th one is the interaction of and creation of own free energy so you always get 4, but you have 4 times that, 4 times the stacker unit here (?), each combinations, and then they create a combination each one with each one, it covers the full spectrum of energy MG field from H to orange juice to Plutonium, Uranium and the amount you need, by setting up this structure you have created a copy of every Element which could be in energy level to man. Are there any mathematicians with us to give us a simulation of such a combination? Each Stacker of 3 in itself has 3 coils and each coil has a M and G. You have 2 coils in each set and each coil has its own ... 144 and 81 turns, every loop creates its own field strength, times 3 sets in 1 Stacker and 4 Stackers, and in each you have 4 FP units energy, the SF makes a FP, and on top of this 3 units of the same. Look at the multiplications of energy both G and M. Asks Mathematician to calculate for next week. You have all these multiplications of MG fields, that's why it covers the smell, the feeling, sensation, energy, everything, the minute your brain, you think of it, because it has a fingerprint on it, what the strength is, what that food gives you, to you its a food, a chip, but to your brain it analyze what it's going to give .. (1:44). There are salt, fats, all kinds of AA, sugar, etc. Your body breaks up the chip into every bit of whatever it can use. You haven't understood that even the smell gives a path of energy, the taste is an energy which you receive, and has a strength, through the chip in the mouth the brain receives a lot of energy in different forms. How much you are breathing through lungs, needs to balance the energy to the E side that it matches what is received by drinking and eating it. The brain wants a chip, it knows the amount of energies it receives through the chip. We showed on Tuesday that what you think about the chip shows ... that info shows how much which energy from which circle (which Stacker) it needs, because it's all available in your (U Feeding) System, that's why you taste and smell it. Don't forget the Gans you used in the system, CuO, CO<sub>2</sub>, etc. A MaGrav used as a U Feeding System which is the way we use in Space. By using our

thoughts all the info is already embedded, you wanted the chip and this is what it gives me, you receive everything from your own system, that's how the system feeds you and why you feel you received it instantaneously, because it is with M field transfer, it doesn't need digestion. What Jackie said, I can think of banana and I receive banana, because in your memory bank of the inner structure of E and P when you say banana it means I need Ca. (1:47). You crave and you get milk, which means the E tells the P I need Ca, and these kind of fats to be able to run the parts which are needed, I am running short, that's why you crave for it. When you think of orange these are the energies the orange brings to the body. The minute it thinks the trigger lights come on in the field strength, it automatically connects with your cores (Stackers), and you receive it, the combination is so much everything is received, even the taste and order. Don't just accept all that said here, understand the science behind it, if you just remember it in an accident you forget, but if you understand you will never forget. When you understand it you see how pleasurable it is to become a part of it, because then as a layman you contribute more than a professor, because you look at it without prejudice. If you are going to Space you have to understand everything that is involved, because in the Space it's you and me and I can lie to you for 3 days, after 4th day I can't go anywhere else and you can read my mind. We clean the desk of all the mistakes of the past then we go to Space with no mistakes. This time we have everything we don't need to make mistakes. (1:49). When we put these technologies on the table, understand you are full blast in the Space technologies, because you saw the matter, then the Gans, now you see how it works, you have the energy system that shows your bill reducing, now you trust there is something there I can work, and in trusting it you can feed yourself. You might say I wanted an orange but I didn't feel it so it didn't work. Maybe you wanted it to see if you are still in control but you received it. Now you have to test the U Feed System which is 12 different Stackers, will go on sale next week, you can do a collective unit with the neighbors, 5 to 7,000 Euro. You don't need to plug it in, just place it in the house. Later we can tell you how to use it as a power supply, medicine, etc. , because we are testing right now. You can buy a U Feeding System and test it for the rest of us to learn, we have to see how far we can go with it. (1:52). Jackie is testing it in his own house. Somebody refused to join the group and Keshe also refused to join. I have to stay until I see all through and then I know my way out. We met at "diner table", went through process of why some people see and others don't. We're going to put them in major hunger places, disaster points and everybody can eat from the same system. You receive the energy and don't go hungry and clean water through the system. We have 10 people from Innovation involved, and 35 students and 6 people makes 50 people. Once setup the system continues to take what it needs, but we are monitoring what the body gives back out, excrement and urination, at moment that's the only indication that the body is no longer taking matter food, and matter state air. We ask for the state of E and the residue (excrement). (1:56). We said you take 80% from environment, 20% from solid food, with this you take 100% percent from environment. We look to see if you stop going to toilet, then you understand that your body is transforming. If you do this you have a responsibility to yourself, once you start absorbing U energy your body will start mutating, what is not needed (organs) will not be used but it won't rot away, the body has a habit to hold on in case he might change (his mind, back to food), or the change is so rapid it might shut it down because I don't need it anymore. When you build or start using these units you can loose you P appetite,

in that process because you are not eating but receiving all the energy you need, the body doesn't go into crisis, it finds a solution but it doesn't need. We have seen this in the body with Tonsils, or Appendix. As your body holds on to your intestines, liver, etc. but having no function, just runs in background with no use, but as nothing can come in and cause infection your MOUTH WILL SHUT, because you are not taking anything in, the moisture doesn't allow the closure and your voice will go, we will NOT SPEAK, because now that this position has arrived we will speak through the parents, to control which is our E, so we start communicating, seeing and feeling each other, understanding what the other says without a voice, we see the true face of the man, true E of the Man, you cannot say darling I love you when you have another mistress. (1:59). we become transparent, correct (behavior), and when we go further in the next 12 months you will lose your lung and use of your nostrils, because now the energy intake is from the environment gradually the whole thing will go in a way the E will follow the P and will go to the same energy level, you'll find that you don't need lungs to breathe, so you might keep the body for some time the same as it is but you tap into the U energy or your feed structure system that it feeds you. In that process we become detached from matter state inertia, because when we eat matter we only offer ? through the matter and Gans. Earth has 2 attributes as fields one is MG field called G and M fields and one is created by the interaction of the Plasmas and the other is from a state of matter state which is the crust (of earth), so earth is a combined MG field, G of the PI plus the ? inertia of matter state, so in us not using anymore matter state and we rely on the energy of the PI of the Earth we become independent of the matter, and we become part of the true PI of the creation. Now in that position we become Man of the Space, because we have finished with the matter state, in the Holy Books they write it as detachment. (2:01). This is the beginning of the true process of detachment of P, from P life. We become man of the Space. For the first time MAN does NOT GO through the EVOLUTION! And because he has to, now we decide to live a correct life, not to eat another being, not to destroy another life we call apple or vegetables because they are all living things they all carry protein in it so they have a life. We don't eat a lamb or a ? ship because we decide, ... never thought why man is in such turmoil of anger, because our E hears and feels the E of the animal we ate and it does not accept the behavior of the P to do such a thing, now we don't consume the P and E come in balance, man becomes a peaceful creature of the U. Then in that position we open the door of Heaven to man. The day of Judgment is those who want to be abusers to ?? and stick to the P, and those who want to be correct they can take the path of U energy. This is what has been written in the Holy Books, the day of Judgment, you judge yourself, there is no god and no court. It is you who decide you enter the SS because you build that SS the way you made the SF. (2:03). You have to understand what you are getting involved in when you enter a SS Program. It is the decision of the man to dictate his own evolution and his own destiny, you become the judge of yourself. Do I want to stay as a man to abuse, still eat, and murder or do I become a man of peace that I am transparent. As we have done with KF technologies, everything is on the table, transparent. To be able to teach you we have to live the light. Because the followers of the prophets of the past follow the prophet, if he murdered they became murderers, that is what we see with the Jewish, because Moses killed so many to them it is normal. Mohammad did the same and we see his followers of the Christ, the same path of adultery we see what is happening in Christianity. This time there is no mistake, clear

transparency, it's you who decide your evolution and your path into Space, this time you build the reactors, buy the system to become a man of correct conduct and man of the Space, when the time comes we show you how to take yourself into Space. When the Second Sun appears it doesn't matter anymore, because you carry the true essence of creation with you into space, and it's your decision to be there. (2:05). Understand the principle behind it. Every turn of the coils you made a decision yourself to open the door of the U to the Man yourself. I guided you like a Shepard into the slaughterhouse of the U open free life, the only thing you slaughter is the misconduct of the past. You want to live a correct life not to eat and consume anything else unless it is given to you as energy which is a field, then you come to understand that the correctness of the conduct is within the E of the Man, that the E dictates the behavior of the P. When we speak about the process of the change is for total humanity. This year give as a gift, a MaGrav Unit to others, it's a gift of life, without them knowing it will change their lives, because the fields within the system interacts with theirs when they receive what they want they loose their grief, sorrows because you elevate the E of Man to the level of joy. (2:07). From last week, if this is your main brain, fear is draw closer and happiness is drawn further out, so you reach to this level that is giving unconditionally, because you know you will receive that you have enough to give. Now you know how the teachings are coming together, there are no prophets, service stations, Churches, etc. in open space of the U. You are the judge of yourself according to the Ethos of understanding that you only take what you need and give when you don't have any need for what you have, but you find out that the more you give the more you receive and find out the fantastic world of creation. And in time when a number of you come together of the same Ethos, the upper 3 layers of the skin created the Man, through the skin you make your own SS. And the more of you who joins in the understanding the bigger the ship becomes. And even this is a entering (beginners) stage, there is more to it afterwards, if you are knowledgeable and become just enough to become part of the true U Community which means you dictate the size of your own ship, what you want to eat, because you tap into the U fields and not into the ?? manmade systems. (2:09). But remember one thing, at the diner table I did not attend, so they started it, I was a late comer, ... I said to people you take what you like, they are all there eating what they wanted, they explained to us what they had was delicious, bla, bla. But this is the freedom of man, you give him the freedom he takes everything, and there is still something wrong with you (complains on you), but I said that there is one thing you have forgotten, I explained why I did not join you in your festivity of food in the classroom, because you forgot the biggest point, how can I eat when I don't give? How can I receive when I have put nothing into it, before you start eating and help yourself to it, you have to give ... take what I do not need, what I need enough to exist. And then the system takes what you want to give, and gives back to you because it knows what to give to feed you back. Instead of being in a hurry to eat, feed first before you eat. This is behavior of the mothers and parents, if you are a correct parent you always serve your children first and the you eat. It's the same, if you care for the U community, the environment you live in, you give first and you see you receive so much. The story of mother with 4 children she only had 4 eggs, she my children I have only 4 eggs and I gave you everything and enjoy it, and they say, no Mom, you can have half of ours and she actually ate 2 eggs and they a half. It's the story of the U, the more she the love they paid her back with Physicality. Think before next time you are pulled in by me, why is he

giving it to us free, is he testing us or are we there to fail because of it. It's not for me but for you to judge yourself. I give you so much that you get drowned in the love of the Creator. (2:12). Jackie (French) tells about his system. He thought about food and felt it, then add E to system. His 6 friends had the same result as he did. Afterward he didn't eat for 2 days, and then 80% less food. (2:16). Then we tried on the group, the majority could see the food, smell it, enjoy it. Then only 2 people discovered we are taking and taking and not giving to the system. The system can give you anything if you can feed it. So the group spent the night to give to the system appreciation, love, they feed it a lot and now it is fully functional again. We are here to serve the people who need feeding from the system. It went from myself to 6 then to 37 people we made a group decision to start the process. We are ready to open the flow, the people can take what they want from it, but they need to understand what they are doing, because if you take you perhaps need to give something. (2:20). Keshe says we have started the process of making man into man of the Space. The 50 people are from across the world. You will understand one thing, because you built these units for the purpose of peace you will achieve peace. If everyone who buys or builds one and donates one we will very rapidly cover the whole planet, even the fish and lion and the rest. The only problem is that when we don't eat each other the way we have done, will our E create a balance, that the numbers reach a point, I am not eating you, there's no more room to live, do you mind you lot slowing down a bit (population expansion). the same with the other animals they will start accommodating each other because they don't (eat) each other. We have to find a way to live in peace on this planet with each other. (2:23). This is not anymore dreams, this has become the reality, it's in our hands to change the future and evolution. I showed you the way to change energy to become free of energy, and I have shown you the way now, if you decide to leave this planet to prepare yourself for change of P, to become passenger of Space by becoming independent of the matter state of this planet. This is where our destiny is going. In the next few weeks you will see the first crafts, but it's no use getting into the crafts if you still carry the body of the man, with the matter attachment. We don't ask you to change, you stay the same but did you change when you wear the diving or space suits ... no we wear the U suit, but this time we don't need the camouflage of the suit it is us ourselves which decides what to do and what to put on. If you learn this process in a radical way you will find that your body will react to the environment you arrive in, according to the correct conduct. You become the citizens on any planet anywhere in the U. Now you go from star to star in every corner of this U. You were worried about the speed of light, the 37 people thought of chocolate or pizza they received it instantaneously. (2:25). This is the Zero time travel, essence of creation, where you want to be you will be instantaneously, just learn to receive, to be detached from the P of matter state, the U is yours. But be correct (conduct). You need no Kings or leaders, you don't need anyone to tell you are wrong or right because I can read your E, see your intention, if you always carry good intention you don't see any colors and you become transparent as the U. When you create colors which means you create problems or you want something to mark your territory and I decide if I want to be in that marking. I made man in image of myself, this is the first time man can see the true image of the Creator. Transparent. Mohammad said God has 100 names, 99 are written, the 100th is for him who reads it sincerely, and no one has found it yet. The 100th one is God Himself. (2:27). Rick reads from Libby about love after Tuesday. Keshe says please

don't ask for something else, because people receive the fields from your essence of creation and when it's true it is received, and now that we know that we can't lie ..?? ... our teaching hasn't finished, it has just started to learn the language and conduct of U. We still make the N coating, reactors, coils , because we have to teach 7 billion to behave correct, and while we are making for them, there are trillions in the waters, seas and on the land, we still got to change their lives, to understand they don't need to kill each other. ... This is the knowledge of the Creator. (2:29). If you want to stay matter state you'll find every way to object or find excuse not to do, but so many people got fed up with the wars, the Chinese called it a happy room because they received the feeding and not the food. Now we feed the food of the soul of man, you can receive it if you know how to position this system. You can elevate your own souls with the same system if you understood all the teachings of the past. Questions. Robert asks about praying with your units, treat as child and bring them up, and get out what you put in. .. Keshe says someone put in 86 billion combinations (from before), I think there is much more than that, I usually make 4 to 600 million combinations for different diseases. (2:33). Not multiplication but it is an order of magnitude, then it will come to thousand time more, 1 trillion, trillion combinations. Can people with Pacemakers use the system, yes the Cup of Life is you. The Tuesday teaching was the backbone of Space technology. Understand how things systematically connects, if you have a pacemaker that is your heart, maybe if you are in the vicinity of this system and the conduct and everything is correct you might not even need the pacemaker, in time to come. We had given a cancer unit to a man with recurrent cancer, and he returned it, maybe he doesn't want to live, because he said to the nurse that when he uses it he has no pain, maybe he decided I want to give the life to another stage, it is us who decide. Maybe if the man with cancer wants to go to Space the cancer provides a lot of energy because it has to give. Maybe man comes to technology out of fear of dying, he goes to space, then he has a bigger problem, now you live for thousands of years. (2:37). Once we take the food connection from the man and he finds peace within his P and E, now what is to kill, nothing, you become immortal. You wanted 200 years I am giving you 10 million years, then it is you who decides I want to give up I have had enough, or I want to stay in. The Cup of Life and Immortality is within you. You are the Cup, if you don't understand it go put the Gans on it and put an orange on it and taste the water, and you feel the taste and energy of orange. You yourself are 80% water so why do you need anything else put the orange on top of your head and you absorb, if your E is correct you receive it without eating it. But now we have made a supermarket of energies with these Stacker Units (U Feeding Unit), then in future you'll understand when I teach you further that you can tap into the "U Supermarket", this way when you learn not to consume energy, when you see something else (a being) you don't look at it as if it is edible. It's not a sheep or cow, it's a life, an existence and it has to be respected, when you meet (another creature), do you have any surplus energy for me, I am short of vitamin K and D, he asks do you have some shortage for me, I am looking for #\$\$, but your field fits into my #\$\$ my planet #\$\$ is what I need, you give him #\$\$ and he gives you vitamin K and D, and say good bye. (2:39). We are coming very fast to this point, does a king have more right than a layman to treat because they have everything they want, then kingship is over. We are all the King of this planet because we care for it. We gave you everything for all to be the kings. (2:40). Klaus from Austria shows his new innovation with helmet showed last week, portable units to plug in and out

with cone connectors to make the system more modular. (2:43). Keshe shows how to make the coils to rotate so you can target a specific part of brain, pinpoint an area instead of a broad region. Try to make the coils so you can control the MG fields of the PI on each separate M and G coil, that you can increase or decrease depending on what you are trying to do. If you want to pull a cancer out increase the G, if you want to feed or build a destroyed cell then you can increase the M and decrease G. Try to refine your system more, you need 8 plugs instead of 4 on helmet. (2:46). The body immediately knows if it is giving or receiving. He wants this to go into manufacturing. When back from China we might open one of the biggest Space centers in the Middle East. I taught you the N and Gans materials so you have enough energy in your life, the cores and gas cores which we did with Iranian government, further was the Gans Cores, then to the Coils and use and interaction of the coils and from here we can go into feeding and into Space, so whatever you like there is something you can attach yourself to, to be, but then you decide what to be, I know not many people will go for what was just put on the table at the moment. (2:49). A lot of people who want to leave but don't want to loose their attachments to their loved ones, when the cancer is imminent and not much time left they will choose the option of Space Feeding. Man will accept it not out of its beauty but fear for his own life. (2:54). Acupuncturist asking about Health Pads with Pacemakers, Keshe says you can use the MaGrav systems but not the Patches (it seems also not Gans), unclear about the Cup of Life, for people with Pacemakers bring the system close to the heart to test if they feel it effecting them, so if you bring the patch hear the heart and it starts to race then you know you interfered, so stay out of it. She asked about The Cup, if it is only Nano, yes but if the water happens to have salt in it, it can create a Gans unknowingly. Keshe says you can just put a water bottle inside the Cup and then they drink it and you can put it back in again, that way you can use one Cup for many people, they bring there own bottle. She asks how long to charge the water, he says you are not charging , you're transferring PI. From teaching today the minute they thought of ice cream they had the ice cream. (2:57). Question, what can we give our MaGrav S to help it evolve the way it wants to, rather then what we expect from it. We answered that earlier, before you start taking from it, give to it what you don't need, this part we never discussed, it you give you receive, you understand you give and then the system gives what you need, because when you give to the system it sees what you need, you receive what it is not short of, you receive it because it is there. You GIVE and then you receive. You don't take, go to the table and say there it is. It's not on the table if you don't bring something for the others to share. And this is where the change is, where the difference will come. (2:59). The System will change according to what you want because you are the creator of it. An Iranian student came on to say thanks and he is proud to have Keshe as his master and teacher, in Parsee language. (3:03). ... At time of making Gans he used a frequency from guitar tuner, the purpose for Gans was for health and helping others, his Pain pen is very strong and has an effect, he got an ice cold feeling for knee problem, did I make an infinity loop on the Gans? Almost what you probably done is you connected the Gans to the matter state, this is something which we as human beings receive as music, why we are attached to music and we all love it, doesn't matter what it is, because we eat food to connect with our P, breath air because it connects to our feeling of E, sound and music is another structure which is non-tangible and it connects to our PI, that's why we all enjoy music, its another way receiving energy. You have done exactly that what we do with the

body, you transferred the matter state which is the noise of it into the PI of the man, that's why it worked that way, it's another level of the noise (music) vibration, it doesn't matter how we create it, because it cannot be eaten or breed in, but it still has a strength it gets attached to or used by the Gans by ?? outer man. (3:06). This is part of the energy absorption of our body, music is a feed because it's a matter state vibration of the element to the PI condition when it converts back in, but because it's in the strength of a PI itself because it has no matter strength it goes to us directly, we receive it in our Gans state very quickly. When I spoke about Alzheimer's is because we understand this, why music or vibration is so important, we ask them to sing a tune, if they can do it means they are still connected to the creation of their P, without them knowing we open the channel. It's like if you eat banana are you allergic to it, we say yes or no, if you breath the air with a little moisture you cough, music is the same thing, but it's a food, an energy transfer for the body of the man which still touches the same as the food you eat, banana because you remember the taste of the banana what you need from it, this is why we go for a specific music in a specific structure of the E, if you are happy you go for a certain thing (music), then we see the cultures go the same way. The culture according to the music states the condition of their E. We see with the Youth how the culture across the world is becoming one. The new generation is already first to become one planet people, because they share all the same music. But music is more effective direct energy to the Gans then is the food or air. You have transferred part of the P with the Gans you used on your P Pen which it directly receives ??, it depends what that music does to you when you tuned it. (3:09). Do you find happiness or do you give forgiveness, or find pleasure with it. Understand what that tuning has to do with your P, because you have a Gans on your Cu wire which is in a layer you don't see because you think it's only N material, so you have created that condition, according to what that condition gives you the E, repeat the vibration you had in your tuner and then change it to a music and see what that music gives you, whatever feeling you had on your leg is from that music. The connection btn the music and the Gans state of matter we never speak about because it's very delicate, because you can use it to add, you don't change but you add to it. Some of the viruses in the U come in the form of music, noise, and these are extremely hard to release, there are no noise viruses on this planet but you come across it in Space, which is they add energy exactly like virus to the Gans of the AA, and then finding it is almost impossible (God's help), because it's undetectable, and then you have to find the level of noise, and find in what way has it attached itself to it. There is a way you can reverse it, but it requires a special technique, you got to do it within yourself, you have to find out where it has come from, where it sits, these noises then they go into your body, and it's horrendous if it's not done (correctly), because you absorb it in a way which is already digested form. It's one of the biggest problems in Space. (3:11). The Space virus is worst for any creature in Space. (3:13). The Cups can be used for addiction. They are good for addiction to medicine, when you decide you don't want the body will find a parallel system for it. It's you who really want to do it through your E part. They are doing work with doctors in Plasma Centers. In Dubai we had to reduce numbers for security, moved to an undisclosed hotel. They discovered that the Red Circle has planned funny things for conference. (3:17). Bret is working in background with KF securities. The highest level of security.
