

112th Knowledge Seekers Workshop May 5th, 2016

(New MaGrav automatically goes into Power supply, how to survive Nuclear exposure,

(:06). Talks about MaGrav and problem with connections. Government officials tested wrong way and say it doesn't work. It works by high pressure PI transfer from electron to PI. We have data for Magrav increase in power. Connection to solar systems increases output to 30% after a month up to 50%. (:11). We asked you to condition the System, from 200 watts to 1200 watts. Now you can go straight to 500 watts. New development, use what we do in the factory, more of CuO₂ coating in water ?? Connect it to 15 watt LED light only, as a decorative light only, that's all it needs to do (??). (:15). As of today we will send the New MaGrav with only a single cord to plug into wall!! WITHIN 24 HOURS METER will STOP, 100%!!! The reduction will be automatic as you plug it in, we have to check and test it. We have seen it in Africa. I developed it in the last 48 hours. Your system automatically becomes a power generator. (:19). (:25). Combining MaGrav with Solar Systems increase of 10 to 30%. .. (:36). "Mojan" means space traveler. One thousand people will be trained (for 3 months isolation) for Space, 10,000 Euros, travel will be within weeks of training, you will be trained in medicine, food production, etc. We might show a SS before September, Chinese have requested for public show of SS. (:42). You make your own flight S, it's a car. (:49).

(:55). They blocked the flying car in Belgium, they took all the radioactive materials for the reactors. We will apply for international flying license of the system. It's to be ready for the October teaching. I have been asked about the earthquakes, we will wait until the Fall. (:57). We see possibility for Nuclear disaster in Belgium, the Dutch and Belgium's are distributing Iodine tablets on possible terrorist attack, we are prepared to help. Keep a Gans of CO₂, CH₃ and CuO₂, always as a package emergency with you, if you receive a radiation contamination all you need to do is to take the water of the Gans, not the Gans itself, dose is 1 teaspoon 3 times per day, whatever comes into your body will be rejected, we know this from the research of TEPCO in Japan. If you come under destruction of the Bone cells or where the radiation could be touching your body, make a lukewarm bath. (:59). Create 20 to 60 mls of CO₂ Gans, put it in 5 liters distilled water or normal water, shake it normal, good mix with water let settle to bottom of jar, put in the bath, you need a minimum of 5 to 10 liters of this water, keep the Gans good for years to come, sit in the water 30 minutes at a time 2 to 3 times per day, at same time consume 1 or 2 CO₂ Gans Water to reject any radiation from the body, we know from TEPCO that even if the Gans is consumed it is not toxic to the mice. Use only the water of the Gans. It will reject any radiation that comes on the skin, the bath water will protect your immune system. The biggest problem with radiation is destruction of the immune system, Bone Marrow, absorption of Lymph into the bone to create B and T-cells gets damaged. Important that the femur and lower leg is in the water, you can submerge totally under the water, every bone structure creates its own B and T-cells, they all get supported. We are here to support you, the T has been tested. (1:02). It's know that the Nuclear reactor should never have been commissioned they have millions of cracks in the structure, the man who signed documents became head of the safety of Nuclear Reactors.

(1:10) If you here siren of Nuclear disaster stay inside and don't look outside at light, if you see the light you die, if see the mushroom cloud die over time. Start consuming CO₂

water 1 teaspoon 3 times per day, wash your body on continuous basis at least once a day, with the same water, a number of people can use same water, you don't wash but neutralize the radioactive material that it disposes in the environment, top up the water every 3 days. If you see any signs of nuclear exposure on your skin or lungs, make yourself a pack of Gans water on a tissue in a plastic bag, and place it on top of infection, can use 10 to 12 hours per day. (1:14). Lot of people see radiation problem in their lungs, make a balloon get a tube fill it with CO₂ water put a straw through it and inhale through it, the air flows through the Gans, it will change the strength of radiation in lungs regenerate the cells. Leukemia can come through the lungs into the blood. (1:16). You have to protect yourself in 3 ways, skin, inhalation, and digestive system. Nuclear disasters create Nuclear Viruses, doctors don't know about it they call it a cancer, these can be created in body when exposed to high radioactive sources. Make a reactor fill it with a huge amount of water of CH₃, and some lead Gans water, rotate it you create a shield around the house. You start hearing a whistle noise, what people hear when they see UFO's it's a loving kind noise, you walk back from it to see where it moves from the back to the front of your body. (1:19). The point when you hear the transfer of the noise is the point of your shield. Arman has heard the noise. Get a fan, P Pong ball, CH₃, or Pb or Sulphur but be careful not to create sulphuric acid, sulphur is better then lead for the body, because it's part of our body, rotate at a high speed. If you don't hear the noise it means the shield is too far out and weak, change the Pb to higher dosage, that you increase the G and bring the boundary close. No radiation can enter this Gans shield but your body which is in Gans state can move in and out, x-rays, gamma etc are in a matter state and can't penetrate. (1:22). This is part of SS development. If you have to move out of contaminated area keep everybody under the shield move the reactor with you. Keep the ground covered that you don't pick up the dust. (1:27). Three levels of protection, the reactor, if contaminated need to flush radiation, in Fukushima so much Gans was washed into the sea it absorbs radiation, gets locked into the Gans, because its a field and not matter state. The monatomic gold was captured from the Tritium and used to treat the waters, it's worth 4 million dollars an ounce, 10 billion dollar game to fake an accident for getting the gold. Gans was shipped as "talcum powder" went through LA for USA to take a sample. CO₂ works also for biological and chemical attacks. The fat on top of the CO₂ is key to survival. You dip a plastic rod swirl it around that the Fat Gans gets stuck to it, transfer it to a clean water that you take the salt content out of it, repeat on a regular basis and what you start collecting in the water is the Gans of AA. (1:37). Wash out the salt, put into a sealed container, add a touch of CuO₂ to it so it stays disinfected, doesn't create any germs, place a little capsule of the AA Gans on top of a glass of water, like the orange on top, you transfer the energy to the water, this gives you every thing you need for energy, support for your AA structure of your body. (1:39). This is how you get protein in the Space, you carry the LP of the Gans of AA. You can carry the energy of it as a field Pl. Also add CH₃ that the energy release of the H allows energy transfer, you don't need food to sustain life for a long time until you find safety and produce the shield. If your shields break down don't worry, always carry with you a mixture of the water Gans of CuO₂, CH₃, CO₂ that you can restart the process, the motor can burn out, etc. (1:41). At times of disaster E distress is 90% of the failure, you need to have a composed stature to be able to act correctly, the only thing that gives you this is ZnO₂, a small amount of it has to be with your food consumption. (1:42). Most of the batteries have Zn

casing, the easiest way to access. Create ZnO₂ the depression will lift and make correct decisions. (1:44). And start supporting the others. Psychological failures are 99% of failures in Space, so the Zn is needed. (1:45). If you can't get pregnant and physically everything is good, sit in ZnO₂ bath for 30 minutes per day. How to use what you have built, to become a support and not a burden. If you come across high level radiation burns make a CO₂ patch and it will balance the tissues and start to grow. In Space it's 100% field interaction with your environment, this is the only way ?? balance your fields in respect to the environment. .. your job to feed the soul and E so it can hold on to the P. (1:48). The Zn protects the E .. you have to make the tools of understanding the protection. .. You take from the environment according to the process you set. (1:52). Questions. For those of you who have cancer and terminal illness and want to end your life, this is not for you. For those want to live, make a high saturated CO₂ Gans patch and put at the position of the cancer for 2 to 3 hours per day no more, when you feel the reduction, especially reproductive cancer, after a couple of weeks add ZnO₂ to the Gans patch, but use only 30 minutes per day. Never use CuO₂ with Zn or CH₃ in the sexual organ cancer, because most of these are E connected, the mother gives life through the E of the womb and not P. You have to have a reason to live, with acceptance of the soul and E to be able to change the P to take place. When you produce CO₂ you also ZnO₂ it's part of the CO₂ Kit structure. (1:57). Man built a MaGrav from just the LP the Gans water, I made G from Cu, M from CO₂ and ZnO₂, and the center with Pb, I see something but I can't explain, it's like heat but there is no heat there, the tube vibrate. I put more Gans around and now it's more stable. I heard that noise, Keshe says it's sweet noise. Arman says when he loaded it with Pb water that's when the changes came, like a whistling noise, you can step in and out, about 1 meter. (2:00). The other guy heard it at 5 meters, used 3 mls of Pb. Keshe says the more you add CH₃ the larger the field becomes. CH₃ is a field expander where the Pb is G, the reduction, Arman use 11 mls of Pb and 10 mls of CH₃. Keshe says the interaction of the Pb and CH₃ and earth's atmosphere depending on where you are, you should start seeing the creation of certain kind of dust, it's a Cosmic Dust created from the interaction of the fields, like the way you create N, clean the floor and see if you see this, this is one of the first signs of the development of the P structure, it's for you to create a condition that you solidify this matter state. (2:03). You have the earth and the atmosphere, the N is created at level of atmosphere in Gans state, as the G increases and M decreases, you convert the Gans into a matter state, ?? into the solid state of planet. That's why in these conditions you see a silver greenish color, this means you start creating the solid state until you can create the solid boundary, the structure of your SS. When you become part of the first KF "mojans", Space travelers you'll be taught all these things to do because you can use the same conditions to produce steel, iron or whatever you need, it's a natural process, up in atmosphere you have N but on earth you see it as a matter N, so the central control is ?? sacrosanct (? the inner core ?). Always look what is around you, not just what's inside the system. (2:05). See if you are producing any dust, you start looking and you see abnormalities, wetness, emulsions, fat, see energies that are not there, you might walk through a point you feel a pinch in your legs at a particular place. In that environment a field interacts with the neural S of the body and you feel it as a pinch. There is a group of scientists from the Chinese government listening on the side and he teaches privately. (2:09). Shows his MaGrav, when he made the double tubes they were clear now they are white, uses 6 mm tube one

inside the other 10 mm in aquarium shop, both are N coated he sprayed with caustic on a warm floor and left 3 days, the caustic dried and washed with distilled water. He used CuO₂ Gans water in the inner G tube, outer tube M CO₂ and ZnO₂. (2:15). Test the tubes after Caustic put in normal water and see if they turn white. (2:17). If the G is absorbing then the interaction is creating a white light, do they glow in the dark. he feels the vibration on the fingertips up to the ear, is it inside the skin or field touching you, touching me. (2:20). He made a 3 stacker of tubes, Bernie explains, it's normal because we are PI beings, you feel it more when you are tired because you are in need of energy. Feel more when left hand, yes. the heat is not the device heating up, but the effect on your body. The M on the device gives you energy. (2:24). Keshe speaks G always trunks in clockwise, and M goes out anticlockwise, this is how the fields get absorbed or rejected, they don't collide, each one creates its own path, we use the matter state to contain the PI, using N material, you have dictated a G pull in your system which is clockwise, with the same environment within the wall of the tube you created an anticlockwise which is the M fields, that's why the twin system of coils and tubes, this is what I said last week if you make the double glass tubes and put it in the center of the core you will get this response, the fields flow within the gap btn each other, they allow M to expand if needed or G to reduce (contract) if needed, this is how it works they don't flow in one channel, each one has its own channel, the same with the MaGrav S. (2:26). We use the matter state now to dictate the gap. You create anticlockwise with the Pb center core, and ZnO₂ outer, now the Pb in G in center has a balance with M and has to balance itself with the G and M fields of the outer ring, the interaction of these 2 fields creates the vibration, ?? the Center G fields is more and interacts with the earth's G field, and the Gans of body when it gets in touch with it converts its energy into P vibration, that's why you feel it, or it changes it to a mechanical vibration of the electrons in the PI condition of the body, it's a PI interaction you see, the body and fields of system are in a Gans state, (2:28). ... or reduction of strength to neural transmission of body. You couldn't feel this if you had a N material but now you have a Gans state interaction. The wood frame was burned, N coated. Bernie explains, he doesn't want to show on video, I don't look good today. In every flow one goes to the left and one to the right, like if you put your hands together with thumbs up. You have to identify which Gans is more G and use it in center. CO₂, CH₃ or CuO₂ are more M more giving. His hands are warm when inserting N coils, but coils are cold. The man feels the PI is with him when he goes to work. (2:34). Bernie can connect his MaGrav Unit to his car by his thoughts, the man becomes the key to the car, if they want steal the car they have to steal you also, you carry the E and energy of the MaGrav with you. Bernie has tested it to 1 meter. (2:36). Using his thoughts and left hand to absorb G and right to transmit M to car. Instantly the engine performance improves. The car improved from 14 km per liter to 23 km. It will be released in time. (2:38). The man said, my vision said that the MaGrav will show me, if I have more of them, it will show me the SS. GOOD MORNING!! But you have to take it out of the flat (apartment) to the vertical 90 degrees, you have to load your cores slightly different, that you create the motion. You are on the verge of developing the first SS, you still have a phase to go through, go to the fields without the water, no water in Space, you are on the right track, to interact the fields. You have to create a central G point that you decide what is absorbed and what is rejected, I explained last week but nobody understood, I made a core and a coil and I explained that the central G point in the center

is what is dictating, you do not need M so much in what you absorb you create in the center of the core and the coil, dictate what is going to be released ?? strength, you have to create a variation not only in the center, but in respect to 3 more sets, (2:41). it goes back to the structure of H, O, C having in mind one which needs more absorbs more of the G field is not the one which you put the Lead in, it's the one which has the CH3 in, because it's that which gives more so it has to absorb more, that has to be your top core. Bernie can explain more in the variations of the field strengths, with the LP it's much easier to do this. You don't need to have many different Gans's, you have to measure amounts, keep track of, for example you put 10 ml of Pb and 5 mls CH3, in the other you put 9 ml Pb and 6 of the other, now we can play with the Pl in a very beautiful way, you don't need to make things, just dictate the ratios, .. then you start seeing dimensions you have to be very observant. (2:43). You said, I feel it is with me, you took the syringe to clean out the Co2 from the bottom, right, you have transferred some of the AA to one of your tube, I touched the water with my hand, yes it carries a fingerprint of you, you have made a connection with it. Keshe says we are now making a wireless transmission S of ?? energy, I can make a radio which only works on my command, and only I can hear it. Now you have that possibility in your hand, so when you make this S and you are the only one who has been touching them, the caustic disposed of the fingerprints from the shop keepers, factory personnel, etc. It's you AA on the tube, you might feel oh my S is happy or sad etc, by the strength of the energy the S takes you feel its E, if it is giving then happy, if taking its a S which needs feeding. We are now entering the true Pl T, you start feeling these things. (2:45). You can go to planet Zeus you will still feel the S. Three years ago I see you and people laughed, but now I feel it will be very easy to build a SS. Keshe says, we'll take the teaching to the next step. You want to build a SS it has to carry your E, the desire and the control. You say you feel the S, if you use the protein of your blood, we always bleed, take a drop of blood and drop of Lymph (the white stuff when you cut), and place it on top of a Cup (? Cup of Life), and produce a Gans water of it. In science you make a copy of the M field the way you did with the orange, same process, take a drop of that water and add to the G of the inner ring and the M of the outer ring. (2:47). The S will send you what it needs, and feels, and with your connection with the G you dictate positioning, because it's the G which dictates your positioning of what the M can give. In the center tube (it a double ring) of the inner ring add a Gans; in the outer ring add it to the M, so it has a P dimension contact. When you make your SS configuration of the SF with your rings, then (...) ... what you consider when you make this S do not mix your Lymph or blood in all the ?? (rings), you want to connect with the E or the P. In one you put the blood, another the Gans water of the Lymph, ?? .. the P condition. ... with your thoughts and E, give the P to the core, in the way we are setting up the SF in the same basis as you have done, you start developing the P condition M and the control of the position through your E, (2:49). because you put the Gans of your blood in it (the center core), and then the little orange ball you have in the center has to have the same composition, which means it's controlled through your soul, it doesn't connect with your E, so you start seeing P structures, it's P to you because you have dictated the terms with your blood. ... people of a certain race can travel together in space, you can't allow others to come in because they don't carry that specific MG field of the E and the soul to create the structure (of the SS ??) ?? the P content of man. Impossible to travel together because they don't carry that strength of the field. The next

step for you is to use a drop of blood, make a Gans water of it, place it on the Cup, then you can do the whole structure. (We don't go beyond the boundary of your understanding). There are parameters, you add a quarter of a quarter of a ml of CuO₂ to all your rings and even the center, very small amount, just a drop of a sharp needle. (2:51). ... in all the rings and center, because it carries your AA it cannot ?? conversion and evolution of the AA, you guarantee the environment stays disinfected. The man says the reactor is responding to their talk by changing speeds, he can't see anything. ... if you put these in rotation inside a sphere, then it becomes like a solar system you dictate what is going to be in the environment and when it's going to be. (2:53). You are going very fast, but the next step is the field Plasma it creates the same energy and motion without any matter state. In the Space and U there is no water, creation of movement, materials on the condition of the fields only. By October on we'll work with the F Pl. Look at the ball in center, do you need to put any matter in it? Or would the creation of the matter state which is the surface will create the ball ... with your thoughts control that you create the E and the field interaction, do you need to feed any material in the center, or would the interaction of the rings the way you set it up deliver the G field in the center including your E, ... then the ball becomes the field Pl it's no longer matter Pl because you have nothing in it, but because you have created the rotation of the fields in the matter state now you have achieved the Pl inside without any material. (2:56). Do you need that condition or can you remove that material now that you created it. Look at the this, the creation of the fundamental understanding of the center of the galaxy as being dark, the Principle Matter, is where the Essential thing is there ... in the center of a Pl of a proton, it's the same condition, you use the matter state to contain the Pl, the Pl to contain the fields ... now to next level, you create the matter N material to contain the Gans, , then to the Pl field with the water, now we use the Gans and the Pl to create free fields, it's the origin of the ?? U, the unified field comes from this, now you have compressed everything in that ball, N coat the ball internally and externally then you don't need to put anything in it. It will contain the fields, that's the Field Plasma, without any matter. The beauty of the man is we can control the Pl with the fields with the containment of the matter state. Now you use the fields, in that ball are free fields no more Pl, but you have to understand the control of it. (2:58). Use the LP to create the fields the way you used the Gans to the Pl. This is Field Plasma, using matter only to contain it. Like in ocean water everywhere, you put a glass to contain it. Use your rings the way you have, but you decide the combination of fields you want in the ball and you use the ball to contain the fields, but because you have put the P boundary as the ball, and then added the MG field of the tubes around it, you have contained the fields, this is the F Pl in empty tubes, because of the Gans in the inner and outer tubes you put your blood and Lymph, now the same energy of the Pl is transferred into the center of the ball, you decide what comes out of the ball, you don't need water anymore ... I will be with my soul in the center ... you understand it, you don't need to fill the ball in the center, last week I didn't put a ball but only a color there and said this is the F Pl. We have gone from matter to the free fields, this is the way the U works, the boundary of the Galaxies, planets the atmosphere, the P matter of the planets and stars is actually a container for the free fields in the center. (3:00). You saw it in the ?? P Pong balls before and I kept saying this is the free Pl, you created it, now you don't need the Gans to be with the water, you have created the water in the outer ring, inner ring that cavity in the center is F Pl, and now because you added

your AA you're in charge of it. If you create a conditional slide difference the only thing in common b/n the 4 sets you set up is your AA, make one slightly different than the other so it makes a rotation, the field in center has a common denominator with the fields strength of your AA which is your E and ?? your controller. If you understand what I just said in the last 5 minutes you'll understand the creation of the U. The matter is the weakest it's at the bottom. (3:03). Heather talks about her research with Gans Patches with psychic friends. (3:08).

(3:25). Start of Norwegian video on MaGrav units linking art and alchemy. (3:41). These are still on limitation as coil Gans's, a lot of people will use this, we are on to the next stage. (3:44). A defense manufacturer wants to come in, Keshe says to defend what, create more mayhem, there is no need for defense technology. Keshe summarizes today, if you want to be the first passengers to Space. We are not here to create another elite. In Rome conference will select first group to Space. We will cross international borders we will need to come to agreement, we will not allow any interference, we enter as One Nation. (3:48). The Space training will not be more than 3 months. Arman for the first Captain.
