

116th Knowledge Seekers Workshop June 2, 2016 (, further explanation how the CO2 Box works,)

(:08). Man Originated Zone Habitation And Nutrition, Mozhan training program 2016. The first humans in space. (:12). Happy Birthday to Rick (61), and Vince (40's). (:15). Deep Space T means being independent of planet earth and to be safe. Man has been kept safe on planet Earth, a nursery, we are protected, the Mother Earth has provided for us for millions of years on this planet. Human race becomes like a teenager ready to go out and try to survive in U. (:19). (:21). No one has reached the world as the KF, it took Christ 300 years, Mohammad longer, they used the belief of man to control the soul of man, they got bogged down. Man has to abide by the Ethos of Space. The comfort of having everything changes the position of it, being able to see clearly changes perception and work. We are preparing the last stage for man to enter S community, it is not easy we see reactions, it will take time to become peaceful. (:24). Some nations were made contact by Space community and given technology but the final key was withheld because of war conduct, now the final key will be given upon entering Space Community, the creatures of space will make contact here on the planet. The Chinese will lead the way as a peaceful nation. All nations given the final key at same time.

(:31). We have been preparing for centuries, the United States with 50 nations, Europe joining as one nation. (:33). The Russians and Chinese join together recently, if Russia attacked by US the Chinese will release all the papers (dollars) and dump the economy of the US. It means China has taken the leadership of peace. They have all the money now. All the pieces are on the table.

(:42). Go back to original teachings, Nano materials, he has some videos of a diamond tester shows the behavior of diamonds. It only shows when there is a specific fields rejection and ???. When we look at N materials the dark layer, all is absorbed, is looking down on and not across, you will see the most beautiful crystal structures, that's why you see 20 Mega Ohms, but this way you see superconductivity, this is the behavior of creating perfect crystals, now you understand how to produce crystals. (:44). In composite materials you created different spacing, you can make the right spacing, MG field position and with it decide the size of the crystal, because each one of these takes a position within the crystal spacing perfect structure. The crystals you made as N layers is so thin but you don't have the tools to see are the most perfect crystals, because it allows the nature to do what it is happy to do without any damage and taking the position it likes. You put this N material in a liquid of another field strength and placed it and released it as a Gans. (:46). In creating a condition to go from attachment to freedom, in creating a spacing you can create any crystal size, now you need a medium not to let them loose to become Gans, but create a condition in becoming loose they find a position you can have a diamond the size of the planet, we have seen diamond structures in the U, there are stars which behave and are the structure of a crystal diamond, NASA reported this years ago. The space of the U allows crystallization in the dimension. It is the combination of the matter which you use dictates the spacing, but now you understand how you all have been building perfect crystals, you've been releasing it, but now you have to develop a T where you can control this freedom, don't let them loose but collect them as crystals of the Gans. This is the Space crystal structure, then you can make any material in the Space by controlling the fields. (:48). Let's open the knowledge, in CO2

Box, the MG field created by the N material in respect to matter state created the field of C, it attracted MG field which now you have created in the water has created a magnet for the C in the air around the box to be attracted and match up, and in that process and in coming in touch with the O of the water created your CO₂. (:50). Understand the terminology, we did not create CO₂ absorption, we created MG field of C by choosing the appropriate materials which the divisions and different ?? some of the isotopes leads to creation of the environment which has the MG field of an entity. In this case the precise choice of the matter, N material and the matter just gives you enough to create the strength of the fields of C. Field Plasma Technology ... you have already created the PI field because it lead to creation of M and G fields in the strength of the C which attracted anyone passing by, what you collected as CO₂ is what falls on the bottom, but this field never changed ... after awhile your S stops producing, because it's not the field that has changed, but you have consumed all the O in the water and that's why the process stops. (:52). Understand you have already worked with diamonds, and already working with the F Pl. ?? We already explained even if you put Cu with Cu N ?? it allows the fields to flow. Now put an entity in the middle that has nothing but the fields of the PI of the C and you create MG fields, where now you have the ability to use the fields to create your crystals. (:54). If you understand the principle you can make any size, color diamond. (:56). You can produce crystals which are uniform and have unified fields, if you extend the dimension, size and shape of the crystals. I have always said the future of the Space program depends on the crystallization, on crystals, you make your reactors out of 1 Crystal, then you have mono controllable, Star Formation of crystals, unified with no losses (of energy), but the positioning of your crystals has to be a crystal itself, then you decide the shape, color, shape ... you create a unified field protection SS. (:58). How in 10 minutes I changed the course of humanity if you understand what is written here. Now you have all the tools. Now I don't tell you Cu plate, Zn Nano Gans etc, because now you are graduates of the KF knowledge seekers, all of you. Start working collectively on the Internet. (1:00). If you create the right diamond structure of a Gans you can create anything across the U, understand the totality of the structure, many times this knowledge was given to man but he never understood, the only part he got was the matter part and he made Pyramids. This is your pyramid. Those who were in control of understanding never understood, and those who understood a bit of it tried to become the Pharaohs and other leaders. The current world leaders don't understand therefore they can't apply. Now we understand collectively that no army or nation will be superior. This was done once before but somewhere in the line the greed took place. The greed of the man is very strong, BUT NOT this time! This is why we see pyramids in every corner of this planet. (1:02). The knowledge was shared but because of the lack of communication in totality it was cascaded but those who used it to rule. This time there are no rulers, that the knowledge is shared correctly. The pyramids in different structures are the domes of their own SS, but man only made what was matter important to him and not the rest of the knowledge. Now for the first time with Mass Media we are allowed to develop this collectively. Through understanding the T you are joining the U Community not just making a N layer. I have taught you the technology, even the Christ or Buddha did not do, the guidance of the P conduct of the man, we have taught the full knowledge with the Ethos together, and the ethos of its use in the space. (1:04). I have taught the full spectrum of every need of man, Energy, Material, Health, Food, in the language of

science and ethos of the U, so you understand as U messengers we complete our work totally when the condition is ready. We start teaching you the knowledge in totality to be able to survive the basic need of man in space and the ethos to use it correctly and spread of the beauty of the Human Race in the rest of the Space. Every flower brings a beauty to the bouquet on the table, even all that man has done wrong he is still another flower of the Creator. How long the flower on the table will last depends on his own strength and weaknesses and not using others weaknesses, but using their strengths to add to his knowledge, the way we have done. We give you a platform to share what you have and proudly share it that the others use it. (1:06). All of you are in a position to be able to become the passengers of the U, but it is you who are choosing the level of development according to your understanding. In each lecture (workshop) I have put some knowledge its for you to decipher it and put it together. Now I will not teach in hours but few minutes at a time, but the knowledge is so deep that it will take years to decipher. (1:08). The Chinese are leading and they have had contact with the U Community for some time now, the same has been with Russia, USA, and a number of African nations. We know who and how the knowledge has been transferred, but we are waiting for one responsible World Leader, Commit humanity to peace and we open the rest of the doors. We expect humanity to respond to the knowledge we have given in a certain way, start making tools of peace, which can guarantee that every man can have food or energy without enslaving him to you to have his energy. I have always objected that things should be made cheap in China that the West can have the best things, and that the man in China has to suffer the separation of his children ... and then when they use it they say it's Chinese made. What a disgrace to humanity. (1:10). The energy of a man irrespective of his race is the same, the respect for man has to be the same. It's a lack of understanding of the White Race in winding himself superior because he is the last race like the last child of a household kicking to be the most important one. Whereas the first child of the Black Race is so humble because he knows he possesses all, when we stop this race division and work as one the way the KF does. When you have the insight, knowledge you can't be enslaved in space by no one. We want man to be equal with the U Community. If we go as a divided race we will be enslaved. (1:12). 2 choices stay on this planet and suffer what is coming to it, or collectively join and become One Race. You have been watched all along from the outside just waiting for you to mature. Turn the Box upside down, create the fields to make the fields, ?? put the brain of the man and create the crystals, the conditions of the PI crystals ... put in the brain of the man when he is damaged in Stroke, you build the cell in the compartment of ?. Put the man in the right position and build the Gans crystals of the structure of the heart valve of the child with hole in heart. Now you have the knowledge. (1:15). .. F PI T in conjunction with crystal structure, you don't need to see it, you can use the field of the balance crystal can lead to the create ion of any entity within the crystal field forces PI or matter state. (1:17). ... Commercialization is to share knowledge in a technical way that those who can't understand it can use it .. Today is a national holiday in Italy but we don't take time off. (1:19). Governments have access to the Space program, they see it but don't understand it, it has been on the table for years, they have been given T they don't understand, bring on the table and we'll help you understand. Because you have not committed yourself to Peace, you don't get the key. Now we are here to help you. (1:21). Chinese and Russian leaders committed to peace, but in US committed to killing machines, the youngest infant to be the most powerful.

Why is Iran so peaceful because we had the Empires in past, we realized nothing comes out of it, killing brings disadvantage because you have to pay for the souls that came out of it. How many of you will start making crystals? Very simply empty the bucket which you made the Gans material in, you'll find out the bucket still carries the field PI, you wanted the CO₂ but if you look deep inside, Giovanni tested and found a field in the empty bucket. (1:23). Because now in your empty plastic bucket you have confined the fields, you don't need the water or plates, you have created a field, you have a field bucket of C. Try to bring another bucket that had CuO₂ in it and see what you are going to get. Once you create the fields you NEVER lose them. You were happy to see it in the water now you have it in the fresh air. Just putting water in the empty bucket will energize it with CO₂. (:25). I think he is drawing an empty bucket with water pipes on either side, run contaminated water through it and test it. The fields never loose their strength. Do you need to produce Gans, LP, vapor PI etc, or do you create the condition of the fields and can contain it and do whatever you like with it. In the space you put fields into one end and the other out comes concrete blocks, or steel, whatever, because you have determined the size of the crystal, the organization of it ??, by putting it the right way field strength, the same way you did with patches of CO₂ and others and created the taste and smell of the orange. Moving from LP to field PI, because in the U you don't see CO₂ fields, but with the environment around it, hundreds of thousands of km, without seeing the CO₂, you end up in the CO₂, because the fields of the U have created it, but CO₂ is the last thing you want, you don't want to walk into a wall of crystal, it's not there but with your presence it comes there. (1:27). PI fields are the essence of creation in the U. Now understand how to manipulate and contain it, but as humans you need the confirmation that I put the orange on the top, I taste the orange. If you empty the water and just breath the air you still get the orange taste and smell. Make a glass vacuum and you still get the smell and eating the orange. Man is so P he always needs something to do. ...?? you created the field around the box that brought you the protein and smell of orange. But you had to have a liquid to confirm you had something. (1:29). Do we need to give children anything for immunization, except we put them through a field which embeds info in their body that measles, and the rest cannot develop in the body to kill, then there is no need for Pharmaceuticals to put Mercury in the children to make them mentally retarded. Now we don't go more into teaching aspect but how to apply what you have learned. I give you guidance to finish it. Do we need LP to finish research in Innovation Center. (1:31). (He must be talking about running car on fields). The pistons go up and down but no fuel in the tank. It converts the fields of U into mechanical rotation to move the man. If you extend the power of PI to become equal to the matter state of the cylinders you find out the car will run without the fuel. The teachings are coming very fast. The Chinese are mass producing Gans for the Oasis System, try to create homogeneous mono Gans, then try to use the field of the Gans to create a condition of the structure of the crystal ?? , you have to learn how to convert the energy using the position of the Gans to interact with the crystal condition of the energy. (1:33). The Chinese space people know exactly what I am talking about. You use one to contain the other. We used Matter to create N and Gans, and contain them, now you use the condition of the Gans to contain the PI and then contain the fields, because it's the ONLY way you can CONTAIN F PI, not by matter but by application of the fields which comes from the LP which themselves are controlled ?? by the Gans, N and matter state.

Use your matter to create the crystals of the matter. If you want the crystal of Cu to be diamond, the color of green which you are used to, CO₂ ?? now you can do. (1:35). Ghana and Benjamin. Please share the knowledge. We made a soap, and they did the microbiology tests on it, amazing, killed bacteria within 15 minute range all gone. (1:37). Nano Soap microbiology Report. Soap is made from natural oils or animal fats with Sodium Hydroxide, been using for 6,000 years, first used by Babylonians. In Ghana they use as enema. In US per capita use of soap 25 lbs. in India 4 oz.. The skin is largest organ of body, easy to be poisoned through skin, gives visible and E feedback, like a rash. (1:43). Three layers of skin, water can seep easily into the blood stream via the skin. Coconut oil has anti-microbial and anti-fungal properties. it is immediately converted to energy instead of being stored. Good for the liver. Cocoa Butter is also used in N soap it has anti-aging, reduce inflammation. Palm Kernel oil has 0 cholesterol, use roots and whole tree. (1:50). How to make the soap, Dissolve the Caustic in water, add soda ash and the fats and mix. (1:52). (1:55). (2:04). Goes over tests. (2:09). Results were all the microbes killed at 10, 30 and 50 % concentrations. (2:13). Will reduce concentration to below 10%. Will make tests on hands of people at Public Toilets. (2:16). Keshe says historically people add caustic to fat, man has already been in the Gans and Nano making for centuries. You add caustic to seawater to make the Seawater Gans, soap is a natural type of Gans with AA. (2:20). Soap is a Gans state of protein, fat, so when you add another Gans to it, you boost it ??, why when you added CO₂, CuO₂, or CH₃, they all work on Salmonella and other bacteria's because the foundation of the soap you made is already AA based, so all you have done is add additional energy, in a way you created a new virus because the AA Gans is still there, ? and now you have made a virus which is stronger then Salmonella, etc. That's why that are so effective, The new virus is from the energy of CO₂ added to the present Gans of AA, which you created. In this new energy packet by adding one Gans to another, is more then what is held in the body as virus, bacteria that's why you see ? destruction. You can go to the minimum amount of Gans, in your next test just use the water of the Gans. (2:22). Because now you have added energy to the Gans of the AA what you call soap. This is a new knowledge, the Gans works on bacteria's. Two years ago in Sierra Leone they got the same results but the WHO blocked them, they were threatened to loose their seats at the University. Why you see reduction in all bacteria's and viruses is because any bacteria has a base AA, and with your soap you have already created a base AA, by adding another energy to it, any Gans you add to it the power of it becomes more then the bacteria or virus (2:24). which is in the St and the transfer of the one from one to the other shows total reduction of bacteria, because you transfer energy of the bacteria which already has the common denominator of AA of the protein. This is what you have to do in the space, need a common (denominator), ? you need to have an AA in MaGrav power strength, which you can add slightly more to it you can guarantee life, you did not destroy the AA of the bacteria or virus in your culture, all you did was deplete the energy of it, that's why it's left black, that's why you still see it, but it isn't there, if you take the residue of the culture dishes and analyze it, you'll find out it's a pure AA. You haven't destroyed only depleted it. (2:26). We thank you for what you shared you need to share it with your scientists. Now if you add a small amount, say half a percent, of soap, if the energy of that 27 -20

(2:35).

(2:38). Dr. Nash had burnt his hand back in January but so far no result then he as treated with Gans, quickly healed. (2:43). In August KF will hold a summit in Ghana for African Continent. Keshe will try to be in Ghana. The knowledge you so freely brought to humanity solved a 6,000 year old mystery. The point is that you so freely shared the knowledge, without patents etc. You just opened all the rules of this economic cycle, how easily bacteria's can be defeated, or balanced, has been the dream of the world of medicine, thousands of people die everyday around the world. You have been watched by Obama, Chinese leaders, NASA, we speak to them and know they are online, we monitor them. You destroyed half of the soap industry and Pharmaceutical Industry in the world.

(2:48).

(2:55). Veterinarians will be on Facebook. Question about an illness, yes you can use because TEPCO tested it with mice. Use the water of the Gans and not the Gans it's too powerful. Dilute it in the soap 10:1. try to use CO2 Gans water first and see if works, you can use Gans water of CuO2 but it'll be a big punch, very powerful. Use 2 ? teaspoon 3 times a day, slowly let the body take it, don't use CuO2 water it's too powerful. (2:59). Talks are going on b/n KF with Japanese firm Moto to manufacture these waters across the world. You can use these waters for radiation, heavy metals, (with Mercury ONLY use CO2 no CH3, CuO2), people who got MS, etc, from mercury fillings can use CO2 to balance effects, do not use CuO2 because it links up with Mercury and K and it can create a different condition, it's not hazardous but it's something you don't need. So you can clean metal toxicity from the body by using the water of the Gans, if it's not enough just add a little bit more ? try once you make the culture base, use the water, it transfers the homogenous energy to the water, you can use it a base for hundreds of years, you just pour water on it and harvest the water. (3:02). Yes you can drink the water on top of the Gans, a spoon or 2. We are running a trial on Gans supplement and drop and lotion. For the Gans ? we are using the water of CO2 not the Gans directly. Keshe suffers from degeneration of eyes, I am losing my sight slowly, I switched to retina screens to be able to read easier, I started using the Gans water for eye drops last Sunday, first time I used I had a strange tingling pain in back of brain, the second time tingling on my tongue for some hours, and now I can see what I couldn't before. He can now see at night and no pressure on the eyes. (3:06). My wonder is what has the eyes got to do with the nerves of the tongue? Do we need to wash with water, can we put the Water near the clothes and it transfers the energy? Thanks to CIA we got connected with Ghana. (3:09). (3:11). Half of Ghana groups are living on free energy. (3:13). We challenge the big University students in West to come and share so openly without peer review. Let humanity be the peer review. (3:16). This was one of the best teaching in last 2 and half years. As of today the donation of 300 euro to the KF for the MaGrav Power Unit becomes voluntary, reduce to 400 euros. The Italians will save 64% on the Units. (3:34). Doctor is testing agriculture in Kenya. (3:37). Testimonial from a doctor who got chemicals in his eye and CO2 solved it.
