

119th Knowledge Seekers Workshop June 23 2016

(How to see Universal Community, build MaGrav copper tubes for the vision, new way to make pure Gans with Carbon stick, Hwo to make Food Gans, Explains how life began on this planet,)

(:10). (:15). A 20 minute tape of U Council what it means. (:22). Plays an earlier recording to U Council members, you'll walk the streets and nobody will know but they will feel your service. UN has become a killing permission, it will not be there nor the building. We are teaching man how to absorb directly without killing other beings and converting their energy. This is not a title, but who can serve better than me. We will communicate by E through the soul. For Council members, when you are standing before the sun you see no shadows, the soul of the member will be one with sun. (:36). On Tuesday we talked about entering the U Community. (:38). The Pens and Health Units show that the fields exist. The Gans gives its energy through the fields into the water, LP. (:41). Now it has the power of the Totality has been released to the fields, if you put the fields in front of the original matter it should be able to open the atomic structure, ?? comes back to feed itself, now you can make whatever you like from the fields. We take nothing with us to the Space. We create everything at the point of demand. (:44). We have just seen the transportation of matter from one place to another, we'll confirm. Keshe allowed some fake stuff to come in because they are trying to discredit the T. (:46). How do you know the UC exists if you can't see them? Man has been blind because he only looks at matter state. (:49). We put Patches on both sides of body and by field transfers the cancer went. By looking through the Gans, the Pl, you'll see the other creatures. When you put 2 babies next to each other they don't speak but communicate with each other, this will be the same with the UC. If your intention and understanding is same as him you'll hear. (:52). Make MaGrav out of hollow Cu tubes, they have to be double tubes that fields of one effects the other of both M and G then you create a condition of Pl. Now instead of 90 degrees, put the coils next to each other, you get solid, you'll see different creatures of the U. You make Gans of different strengths. With this device you'll see what kind of creatures are on this planet exactly as they are. What kind of life and what the planet can support. (:56). The soul you receive the knowledge from might not be from this planet. The souls can communicate in your dreams. (:59). If man doesn't open to the UC he has made his doomsday. Make a few of these coils around your head. (1:02). We give you the first time to make communication with UC. By showing you the way to make communication with UC I have given you your doomsday. The hell is to stay on this planet and kill each other like rabbits. When you stand in front of the UC he sees all your shadows. The level of intelligence at this time reaches to the prophets of the past. I teach you how to crack open the shell of this atmosphere to UC without even leaving. Every one of you are the Messiah. (1:10). He discusses what happened with Allen Sterling and how he complained to Live Stream and now he has been arrested. Rick shows articles. He raped, sodomy of his own daughters sentenced for life in prison. The researchers of KF gave the info to FBI. Keshe worked with Kerry Cassidy. (1:18). One of the big Judges in America committed suicide because he was connected to Alan Sterling. (1:21). False Hope and Susan are connected to Red Circle. These are a group of child trafficking and murder. (1:24). Another man who writes patents poisons the scientists to get liver cancer. They pretend to be students and we keep the info. (1:34). (1:37) A 3

kilowatt PI generator is now available, production time 3 months. Video of new development with MaGrav to a generator, it has become a total power supply without connection from the Grid, tested with 8 kilowatts. (1:41). (1:47). Arizona Manufacturing will soon get American certification. (1:55). Armand says the lady with Lung cancer in 10 days it has reduced from 10 to 8. (1:59). Dr. Rodrigo speaks of his patient. After 10 days tumors reduced using health Unit and helmet, after a month they are all gone. Treated dog with cancer 10 days tumors reduced, blood test showed Fe, made a patch and gone completely. The cancer markers in blood were reduced, and liver went normal. (2:04). As a medical student he felt they deceived him, he never saw these kind of results in normal medicine. The PI gives us the power to heal ourselves but we have to do it. (2:11). Explain how you helped the dog depleting the cancer. The blood test revealed what kind metal was in the seed of the cancer, then he made a Gans of it. It's a 2 part process first reducing the energy of the cancer and then you find the metal in the seed and eliminate it. (2:13). The heavy metal holds the MG field of the Cancer, it pulls a lot of energy. He grounded iron and made a caustic of it and Gans and made a patch. The Fe in cancer is a Gans, it receives a lot of energy, by putting the 2 patches of Fe on either side which are of weaker strength they draw the energy from the cancer. ... The seed of brain cancer is usually Ca, and it usually flakes on the skull outside on the hair, that is actually the transmutation of the Ca from inside to the outside where she put the Pen. (2:16). (2:21). Using Gans of CO₂ and CuO₂ for disinfecting hospitals and post operations infections, keeping the instruments in CUO₂ Gans water, wiping the incision with Water afterward, etc. Iranians are making tests. (2:25). Gans water can disinfect toilets in homes. Can use CO₂ to disinfect house, foot infection, corn on foot, for baldness. (2:29). Fukushima. I have filed murder charges in Italian court against Red Circle. (2:33). For mouth cancer use CO₂. Please do not use CuO₂ for the time being until we have more research. It has to be diluted by a low ratio. (2:36). Test reports from Austria, chain smoker 14 years, and breathing cup, saliva went from acidity to alkaline, maintained alkalinity for 4 hours. (2:41). Renan shows Gans 3 water drops in cup of water, turns saliva becomes alkaline. ... a 1 year PhD in PI T in Ghana. (2:52). Renan is making comic teaching for children the PI T. Plasma Man Superheroes for children. (2:57). From now on you have to present your presentation 2 weeks before, and checked by security. (3:00). It's a presentation about Gans making to try to clarify the many different processes. ...? Carbon stick instead of Cu. (3:07). New Gans production method. (3:14). K: you can't use pencil it has clay. (3:16). The bedroom has become a research lab. (3:19). Keshe describes making diamond. As the C comes off the plate before it oxidizes you blow it up into a diamond. ... (3:25). Rick reads "Liquid Plasma Kitchen". (3:34). Detailed process of making food Gans. (3:38). Keshe, life on this planet was created this way, vegetation digested and created the first Gans's. The process went further to horizontal people. You showed us how the Gans was made with HCL and NaOH. Ginger Gans. (3:44). Jackie shows what he has done. A Gans Jam Shop. (3:46). He does eat for 4 months. He experimented with putting 2 small Cu wires, 1 N coated in box and Gans starts to grow, the current he used was 12 volts about 2 minutes each about 12 times. It's a brown turquoise, mix. Then he put acid in to the Gans. (3:48). It all converted to a green liquid. Then I was remembering what you said about creating life from Fe, Mg, etc. Then I added Mg, Iron, a Zn plate. and it starts to produce brown clumps, no electricity connected, it has a HEARTBEAT,

the brown matter is like a tree matter and it continues to grow, no electricity and it's bubbling and producing incredible energy. (3:50). The Zn plate is releasing so much energy, no caustic in solution, it acid, Mg, Sugar Gans, the salt left over from the Gans production, Liquid Pl of Fe, little bit of Gans of bone marrow and protein. (3:52). There are jar of different Gans under and around the bucket. You have simulated the womb of the Mother, this is how life started. If you allow this to carry on you'll end up with 2 things, (I have asked Jackie to make another bucket with Fe for Hemoglobin), we start seeing the structure of life, which is how life started on this planet. When the acidity balanced off with the salt which was released with it, with the Lightning strike, which happens on most of the planets where life will start. Jackie used 1 or 2 volts intermittent, that's how it is (enough) to start life. Half of the cause is the release of energy so it can start, like a match to the fire. You have Mg and every other elements to create a vertical entity, the other one with Fe you start horizontal. (3:54). The brown matter created becomes the trunk of tree, in man the brown became the skin of man in Africa. This is how life started, gases becoming in touch with the metals in the acidic environment of the planet, then being there for awhile, then change of conditions bringing of the salt, then stroke of lightening, then conversion of energy from acidic to alkaline creates the first process of current flow, then the C in the Pl of a Gans creates the connection and that's how everything gets linked up, and life started on this planet, if we hadn't had the acid first but only the salt, we would have had a different combination on this planet. In most cases in U it's the lightening that starts the life, it will grow its own brain, legs, ?? according to the salinity of the water. With the right conditions you will create an intelligent living being. Now that you have the bucket and control you speed it up. In time it will have lungs, fins, heart, brain and everything else, because once you start this process up you are in the room you give it the info about how to make the being. (3:57). The scientists have tried to replicate this but they haven't understood, the acid, and Alkaline and the transfer across, if you put the right elements in, the creation of Gans, you have created life. In deep space you can make your own steak, why I asked Jackie to put the Gans's underneath the bucket, like the womb you still need to receive some of the energy of the planet plus what you add to it. You can create any animal you like depending on salinity, the ?? process of elements, ... the Ca gives the base structure, the radiation of the fields of the Pl is to support life, whatever is needed we give more, if you change the Gans's under the bucket you'll get a different animal, because now you are releasing different kinds of energy into the S. (3:59). Is there a God or has Man become the freak accident of the mixture of the chemistry of this planet. Keshe thinks there is no God, there is the release of the original fields that has lead to the creation of being different conditions anywhere across the U, because we received part of the field of originality. If we call the Original Field the Creator, yes there is a God, he created the first field. The release of the origin of the fields of the Pl, God, but was the intention to make Man or is he the byproduct of the interaction of the fields ??. All of you understand the interaction of the ratio of the salt, acidity, gives you what kind of life you like. Why man can't breath in the water, but if you change a slight factor in the salinity in his body, he swim anywhere (? breath underwater), it the (salt) ratio that has made the difference. (4:01). After 15th July this teaching will stop. The Mozhan, program will close soon. You can purchase the new Power Generators. (4:15). MaGrav power Generator, 1,800 Euros.
