

127th Knowledge Seekers Workshop Aug 4 2016

(Naomi out of coma by Keshe, Universal Council members disclosed, work with pH in cores, Norwegian man's out of body space travel and cores)

(:10). Naomi is recovering from the coma and car accident. Flight was achieved. (:13). (:26).

(:29). Shows video of center column of fields. The dark core in the center at a certain point becomes completely transparent, and you see the full column. (:32). On a 3 core S at a certain speed the outer core empties of all its water without any hole. Even the top air gap isn't air but PI. As the water goes out the PI takes over and the center core is moved outside. We make a container for this outside field, it creates lift and motion. AI is used because of its lower strength when compared with outside. If you can tap the AI it will give you all the energy you need. ... (:36). Video of Gans in the ball spin without motors. In reality the center ball is much heavier and should sink, but it rotates in the center. Fields interacting are rotating, like how the planet rotates 24 hours. It's sitting on 2 round magnets and Cu plates filter out M fields, this is exactly the Universal rotation. It's a permanent rotation like the solar S. (:40). If you can create the conditions for faster rotation like the neutron stars. You can see this better in a tank to see how they interact like elements. (:42). The platform lifted 4 inches off the table. (:47). He shows the new total PI generator. (:51). Keshe shows the new wireless power, you build a receiver opposite to the transmitter, the Principle core to the matter layer. (:54). By putting Zn and Ca in the core it can interact with the man who is short on E. We can create the emotional satellites. (:56). If you replicate the MG field of most distant planet we can start traveling. Those of you who lost Gans balls. (:58). Peter from Austria lost his inner most Gans balls. We are going away from LP to the FPI. (1:05). Maybe we will give the new Power Generators in Rome meeting. (1:14). We have technologies that can interfere with everything on this planet, cars, power, etc. The Chinese government instructed the KF representative to block our work there, we have bypassed, and not allow it again. We create the conditions which we force the others to react. (1:19). Once the field forces are created we don't need the balls. (1:21). If you create more outer containers around the balls, N coat and specific MG strength you'll collect Na in one and Cu in the other, you start filtering different matters out. (1:26). In U 2 forces M and G, at any given place is the balance of the 2 forces. These balls also replicate how the U works. (1:32). One small problem using a fan motor, don't place the ball directly on the fan because the field locks in, use plastic or Cu to create a gap with the motor so the field flow will be mainly of the ball. (1:35). If you are using plastic cores and in the center you have CH₃, CO₂ etc, the plastic is made of C, H, O. They leak because at one point you have replicated the property of plastic, so to the eye of the fields the plastic doesn't exist, and the water goes out. (1:37). He made a cylinder with 3D printer but plastic ends up porous. When you use CH₃ you bring balance to the barrier and it doesn't exist to the PI. When the field strength becomes balanced the ball becomes transparent. (1:42). G always rotates Anticlockwise, M goes Clockwise. (1:59). Video showing this rotation, in the bottle is CO₂ Gans, and in the ball only Gans. (2:23). Keshe describes the Universal Council, UC and Core Members, no government can threaten the Core Members (11) they are selected by soul, any threat against the Core members will be handled severely by us. Lisa is a CM. We are not a secret society, any CM please come forward, Rick and Ghee, Lisa and Jin Zhao,

Sandor (Hungry), Armand (USA), Marco (Slovenia), Hungry, USA Red Bucket. Any threats against the CM we will handle severely and show. (2:32). Back to Chinese presentation. (2:43). (2:47). Video of balls and splashing out of water. (2:49). There was a silence and then the unit jumped up, he achieved silence and lift. (2:52). The 2 fixed cores can't move so they move in respect to earth's fields. (2:57). One way or another we will achieve peace through technology. I show you how to make meteorite, if you release fields within your brain according to thought and E, in respect to the T you can create shooting stars. You don't create matter but fields by understanding your E, I can do it at will. Elle says she witnessed it. (3:00). They had asked Keshe if they could see a shooting star and he said yes, it was blue green with a fluffy tail, at 2 AM in morning. Armand says he was showed twice. (3:03). The energy within the essence of your soul is so powerful you can decide the point of interaction and where you want to see it. If your wish is pure to see gold within this atmosphere it shall happen. The only man who could do this but he couldn't explain it was Christ, bless his name. To handle P is very difficult, but to change the soul to change P is so easy, if you understand and are pure enough. In space this is how you create things. If you put some (N) dust around your cores you should see some shooting stars. (3:06). (3:11). Peters core water had a pH of 12.1 and drinks it, tastes like pure water, and the other is pH 1.9 and he drinks it. Keshe said he will explain in the future. (3:13). How to make Gans of salt, 1 teaspoon of salt and 3 ?? NaOH and boiling water over it, in morning looked like Gans, washed with CO2 water. It doesn't taste like salt but pH was 12 to 14. I can use this water to adjust pH in cores. He made sugar Gans with HCl acid, it turned black, and he washed it 10 times with CO2 water, takes a long time to settle down. Next time he will wash with CH3 water. (3:18). Keshe says CH3 is acidic, acid means giving energy (M), and alkaline means G or receiving it. If you add alkaline into the acidic CH3 and then in rotation you see the change in rotation of the fields, .. how the matter changes from G to M, when you put it in rotation the G fields which are mixed with the M, tries to link up with the G in the center and this builds up the energy which then comes out of that center and it allows the M fields to push itself out to expand, and this is why you see the liquid coming out (of the cores) and rotation. He draws on board, the inner core is Alkaline, and the next core is acidic, then you add a little bit of very high alkaline to that acidic core, which means adding a huge G, this G tries to go into the inner core which is G, when it becomes part of the G it gets too strong and it pushes out and produces acidic or M, when you increase the G you get a higher radiation on the M (thus it splashes out of core). This is what I say as a soul the more you give (from what you don't need) the more you receive (the more higher levels you get). When you add a CH3 it is giving so it radiates out, but when you add alkaline to the acidic it adds to the G in center. (3:21). It releases it fields at a higher order and radiates out. It's important to understand why you mix alkaline into acidic, it doesn't do any chemical reaction but it adds more mass to the center, pulls the G fields which is alkaline, what it receives it has to give at a higher order, it's so strong that it pushes the P matter which is weaker out of the ball, having the same MG field matter doesn't exist (at the boundary). How you make a star, you can wish within your hand. ??... (by building the fields in your hands) you can enter another body with your hands and take things out or put things in. This is a knowledge which belongs to the Creator, and we show it when we need. Those who have been enlightened and can use it the right way possess it. All this power within the soul of your body, you don't need to do this physically. You can

transmute the fields in the E in the length of the field, and they shall hear. I demonstrated this yesterday in front of 20 people. We start showing the strength and power of the soul in interaction. Giovanni can explain how a body (Naomi) that was motionless for 20 days start shaking and moving legs. We have the power within the soul to understand, that's what we do, give so much from the soul to the P that it will radiate out. In the hospital someone said the minute you spoke she responded, there is no need for P. You can do the same. It's the same as Christ resurrecting from the dead, (3:25). because we don't interact with the P, I wasn't in the room but standing outside. The way we create light in the sky we can give and take life from the man, but taking it not to kill, but placing it where it can be no danger. We have done it before with the presidents and kings. When the King of Belgium came to me in the restaurant and threatened me to give him the knowledge or leave the country, I said when I leave the country in a short time you will abdicate and not be king, a few months after I left he abdicated. Now you understand our power and what we can deliver and that's why we introduce the UC, the 6 member council, they are not governments because they are not there to govern, but to guide as councilors. There will be no governments. (3:29). Norwegians show. The core has CH₃, CO₂, the inner core has 40 different food Gans. He uses the Sour sop LP brought in by Togo for cancer, and he sprays on health coils. Keshe says in South America a similar decoction has been put together and is effective on AIDS within 30 days. Using vegetable based Gans is very effective for diseases in body. (3:35). By using Zn and Cu in both cores you have a link btn inner and outer cores. They feel a very strong energy, like in a vortex, Keshe says that's because you put the lead in there, give to it and see what it takes. (3:38). If you have a cancer this is how you take it out of the body. You have shown us a new step. If you put AA in inner core, with 4 or 6 of these cores on either side of patient, cancer gone. They had a 70 year old cancer lady and she is getting better. (3:42). You need at least 4 of this cores, 6 is best. I will help you set it up. The ZnO and CuO for E and P, you elevate the soul and E, and cancer tumor gone in minutes. You need to elevate the E and cancer goes. You have to elevate the E through high concentration of Zn, most cancers are psychosomatic, unless created by evolution, that's how we build organs because we have a different E, like appendix, we needed it but then not, it's not a cancer but an organ. The development of the pancreas most likely killed a lot of us in the process of evolution. You have to have a small amount of AA, so it connects to body of man. (3:45). When you make a Unit for Health you always have to add AA from all the elements you are using in cores, when you make the Gans take the AA on top, you might not even see it, you can take a lollypop stick and collect the AA from each Gans, as you make it, on the same stick, then use that stick to put in the inner core. hen you connect all the minerals which are in the Gans state, with the minerals in the body, then the (healing) process will be very fast, not just from the vegetable Gans but ALL Gans's. If you have a breast cancer you have to work with Ca, because 99% of them are Ca based. You have to have the Gans of Ca in the center otherwise you don't see the seed moving and they say it doesn't work. Or choose food Gans which are high Ca based, that's even better then using Ca (mineral). The best source for medical application is to use the Bone Ca. If you are treating brain tumor use the Ca in the brain of an animal, sheep or cow, because the Ca in the structure of the brain are exactly the same for all the creatures on this planet. Make a Gans of it, within seconds tumor gone. (3:48). The core reactors have to be different (sizes) on the front and back of body, you need a gradient flow of fields. you can't use the

same on both sides. In link connections with N wires from the front to the back coils, you can't do with the cores. So it goes by the core mass, if you use 2 cm core on the left side use 1.5 or 1 cm on the right. This is how you create gradient for the motion, you use the mass field strength. Please do NOT USE Lead Gans in any of your health Units. Lead is very heavy G and that's why it causes problems in body, do not use Al, and make sure there is no Mercury in the vegetables. Study the materials you make Gans from so they don't have hazardous materials in them. (3:50). Talks about how he made his MaGrav ... (4:01). Keshe explains why they felt so intense energies;. You used Zno2 and Lead, because of the lead connection into the matter state, your P state separates from your E and soul. That's why Lead is lethal to the body. You hold the body within the structure as it is, but with the rotation of especially the Zn and other minerals, you elevate the soul which becomes detached from the body, then you live on the level of the E and soul, that's why you had such an experience (traveling into space). If you can give into (the feeling), you'll find the P body floating, you can P see it. (4:03). But the fear of the loss holds you attached to the p on this planet. I do this quite frequently, you can travel the speed of this .. what we say Father Christmas travels the same time throughout the world, you become the Father Christmas in the soul of the man. It allows you to have unconditional detachment, then you see through the eye of the E and soul, not P. The reason you saw the lights (stars) coming closer is because you elevated your E to the level of the soul, you move in a higher speed in direction of the higher, which is more central to the center of U direction. As you go further out you see less, but as you go further in you see more powerful ?? but closeness. The experience you explained is very correct. What I said you don't need a SS to travel, you can create the condition that you travel through the ?? scent of the soul and E. You made a S which can hold on to the P, where due to the spread of the fields from the center core with what you put in it, you elevate the soul ?? , like the way the water came out of the cores, you E went beyond the containment of the P of body. (4:05). I had the MRI of Naomi, I showed to Giovanni this is the seat, the soul of Naomi, if you can reach it you can bring her out of it. You can see the seat of the soul in the P brain of Man. Like with your S you put the heavy attachment to the matter state, then you hold on to the P into the prison of P of this planet, and now through the Zn you have elevated the E of soul. You call it out of body experience. He says he was just an observer of the experience. You are like a pioneer opening the space, you don't need a SS. You can (or can't ??) stay P, with confidence you can present yourself in another position in the U at the level strength of your soul and E, so you can have 1 soul presenting in 2 dimensions of the U. If you understand and elevate you don't need a SS. (4:08). There is no way you can brainwash a man, only you can elevate his soul to work ?? on level of soul. Then it's you who decides I want to leave this P behind, or you can hold on to the soul and move the P, you are 1 second here and 1 second there, you use the soul as a transportation method. If you make the right combination in your cores you can fly the structure of the body ?? This knowledge can't be shelved, because it even touches and changes those who would abuse it. I put a lot of pressure on you to work with the doctors so you don't stand any misconduct that way your soul stays free. (4:12). When the S goes empty (the water flies out), do not stop it, let it run. Speed up to 7 to 10,000 rpm.

(4:16). Attach a loop of N Cu wire thin around the inner core, you'll find a much stronger field, performance. Let it run for awhile to get the fields up. put a radio of FM and AM next to it, leave the radios on until they go silent, it shows the boundary of the field.

(4:20). fixes machine. (4:25). The changes happen bwn 7 to 10,000 rpm, the fields can't catch up and interact. (4:31). They had to stop and bodies and organs vibrating. Always ask people if they have matter in body, valves, pacemakers, etc. (4:34). Change the lead to Gans of Iodine.
