

(:07). We have reached the pinnacle of Matter teachings and have moved into PI field. Some of you reach the point of change but then nothing happens, there is a huge gap in the understanding. (:09). A lot of you make the coils and make the cores, but none of you go through the phase of understanding how things connect. We can bring in the final push. Everything has to be of the same level and structure. You connect a motor to an electrical power supply to rotate core. (:12). You create a field flow through the windings of the motor, and to a ground, at the same time you are receiving electron vibration and not PI. Your system up to now has always had a massive leakage in the flow, you have connected yourself to a ground. Douglas has had more success because he uses a hand held motor without ground, his body is in a Gans state. We are looking for self contained PI state. (:15). KF is offering PI generators. We have made a video, a last supper to finish the work. This will change the energy production worldwide, we asked the governments to be present in line. It has been sent to world leaders. (:19). 5 kilowatts stand alone PI generator. (:26). (:35). Douglas's connection cut ... There is NOTHING under the yellow box!! It's only the regular MaGrav once you open the PI. (:39). We have offered it to Chinese, American and Russians for World Peace. China and Russia have spoken and are in agreement. The Oil Prices will plummet. There are 4 units worldwide, if anything happens to me they will release immediately. The secret is that the energy produced is in a PI condition. (:42). The yellow box is empty. Energy comes from nowhere, kilowatts. (:44). Under the yellow box was the trigger of the PI, now we don't need it. We needed a 6 volt battery to trigger the PI. (:46). The Americans wanted Yale University to see it. There is no need for power stations, no motors, moving parts, nor magnets. The trigger point of the PI has been found by the innovation team and released. It's a gift from the KF to the world. (:50). We are prepared to make a deal, give the blueprint to the Whitehouse and let them release it. This MaGrav is static, you can imagine once you move into the dynamic cores what kind of powers released. It was a dynamic system that paralyses the most advanced American Naval vessel. The officers that resigned had felt the power of the PI, they literally walked out of the Navy. The elevation of the soul of the man through the PI showed the officers there is no need for war. This can be practiced throughout the war. We can release a dynamic system for the world. Two or three of these systems in parallel or series you can run a car, fly. (:55). In the microwave if you warm the water, you can pick up the energy for food, same with the refrigerator. Explains about the food in the microwave, the system will feed the cup and drink the water. Once you have set up the PI and if you melt the Cu or break the N coat the fields will continue to follow the path you have set up. We ask you to bombard the Whitehouse with requests for peace. (:59). he asks Douglas to start a path to the Whitehouse and everybody can join him, we pressurize the governments to peace. You can condense water from the system, you can add energy to the water. We appointed 6 people to the KF core. (1:01). We organize Douglas to go to the Whitehouse on Sunday. We have no choice but to pressurize for change. (1:04). Douglas says that anybody knows that an 18 gauge wire will melt under 5 kilowatts and this one is still good, it is N coated inside but on the ends is still bare wire. Douglas tells his story. (1:10). Keshe has developed this T with common people. We give you the blueprint in coming weeks to change your MaGrav Unit into a generator. You

can set your MaGrav in LP or Gans water and you'll see different results. I have no voice unless you express yourself, it's your job to pressure for it. (1:14). Open the lines for people to express what change they want there governments to do. Rick expresses his wish for his government to accept T. Ali, Jackie in French, Kenya, Vivek Singapore, Klaus Austria, (1:30). Professor Zhu and Chinese government. (1:34). Lucy from China. (1:38). Paul from Togo. (1:43). Vietnam, Germany, Switzerland. (1:50). Professor Zhu speaks. There is a summit in September. Russia and China have already negotiated agreement for KF T. There will be E crash in Oil Industry, but we need your support to pass through this. We want to build one in the palace and the other people to follow. (2:00). (2:08). Turkish man speak. (2:12). Now we are bringing the governments into play. Our goal is to show flight in September. (2:15). Douglas will leave for the Whitehouse on Saturday if anyone wants peace can join him. It is not for them to accept, WE DELIVER! The fossil layer only goes down to 18,000 feet, this scheme was set in 1892 to make people believe fossil fuel was limited source. The oil layer is 20,000 feet, but nobody asks these questions. Ali comes on and says everything in past is forgiven and forgotten. (2:21). Keshe calls on all supporters like at Vatican to go to Washington on Sunday. It was a year ago today he met the Saudi Prince and said he told them to stop loading tankers. (2:24). There is a huge plan by governments to assassinate Keshe in the next 3 weeks, we know who is paying for this, (Belgium) we are not afraid, we even know the Company who was paid and the people they hired. There is no time, the change has to be very rapid. (2:27). If we do not do this our children will continue the slavery. (2:29). We will introduce many systems in next few weeks, one is by flying over the countries we'll eradicate cancer. In due course I will talk about election in US. (2:31). Stop the wars and we will deliver T worldwide. If you have a MaGrav you only need to add a few pieces and it will work. (2:37). The top coil reads 101 F (north pole) and bottom 81 (south), the capacitors read 83. This shows the work of a dynamic PI the North pole is slightly hotter then the south. (2:39). It will be important for Obama to manage the transition. (2:41). Renan says the Blueprint can be released right now. You can put a glass of water on top of MaGrav and you'll receive all the nourishment, your system becomes your feeder. To eliminate cancer you have the MaGrav at one point and on the other side of you put the auxiliary MaGrav and there shall be no cancer. In the snow they can walk in and there will be no cold. (2:44). (2:50). Peter made gold in Austria. (2:54). He has 2 reactors rotating at 10,000 rpm, (2:56). the ball flew away on the video. then he rubbed paper on the plastic, looks like gold microscopically, one was highly Acidic and other high Alkaline. (2:58). Goes over the method slowly, each cores are double, one acidic with sugar Gans, the inner core gold and salt Gans, and outer core sugar Gans water and CH₃, it starts microscopically and then the Gans attracts mass. You have to create enough friction and then it builds. Write down a blueprint for this. (3:07). When the gold came out of the air, we proved a lot of things in Astrophysics on how materials are created. With a high speed camera we could see at what point these materials are created, a huge advance. Doesn't matter if it is gold, that shows your intention, what is important it shows the friction of 6 different fields has lead to matter at that state. In space we have to understand how the matter is created if we supersaturate these matters and they go back to become fields, that you don't get friction, ?? meteorites coming to the earth, shooting stars. (3:10). You have to adjust your mixture (of Gans water) until you get what you want. Look for any kind of lights. Try to make minerals and metals etc.

(3:14). I give you a tip, hang a ball of Gans lighter than Al between the 2 reactors, see if you can get new materials in the ball or other materials around the ball. As you create more fields with hanging the Gans balls, you will start seeing entities of the U passing through, seeing lights. These are the cornerstones of PI transportation. For us to transport our Gans state from one place to another. There are 2 or 3 nations working on this, within the next 6 months. We achieved the Plasma with Douglas and that opens everything up. (3:18). (3:31). Douglas puts the 2 reactors on the floor with the PI plugged in. (3:45). The blue core is not stable it releases the energy. Release the path that you will travel to Washington DC. (3:47). Keshe reads a paper from US Ambassador, 6th November 2012 at 3:40, we would like to accept the USB stick, setup a meeting on 15th November. Mentions his letter to NASA. The decision about KF is being made in Washington that is why I am sending you there. I read you a number of these letters. September 27 2012 from NASA to meet, ask for governmental rate at hotel. Second letter from NASA, they are involved space exploration, says not involved in Military. The letter was signed and notarized that Keshe had security clearance. (3:54). 2013 letter from Barack Obama, he doesn't read the letter completely, only to show that the world leaders know about KF and that we are men of peace, but they do not know about how to deliver world peace. (3:56). They don't know how to deliver it to their people, it is us who have to give them the confidence to go ahead. (4:01).
