

13th Knowledge Seekers Workshop – June 5th 2014 (1st hour of WS Very Good)

- **Main topics of this Workshop**

- **Changing the course of Humanity**
- **Periodic Table / Going Beyond the Narrow Thinking**
- **Epileptic Attacks**
- **Becoming Refuges in the Space**
- **Look to the Totality, not to the Reactor**
- **Real Purpose of these Workshops**
- **The More you Give the more you Receive to Give**

(:00) Mr. Keshe starts abruptly... But we start the process of Peace as a race not through names and this is the purpose of this letter (I think he is talking about the letter for peace in exchange for the technology). Deliver a copy of this to every priest, every holy man you know. Ask them as humanity that you want to unite the humanity, through their Souls but not in the name of any religion. This is on our road map. Even if you worship a statue put this letter in front of the statue. So we as one race will change the course of humanity, the man of Physicality who does this for the wrong benefit. This is the time to change things accordingly to our wish, our will, according with what we know and where do we want to be. **(:02)** We have come to a moment of change, but the change must come in a very peaceful way, we are asking to close the churches, you still pray with the channels which you find peace with yourself with your Soul who you have the contract with, what you call Religions. This is the way we go for the change. We will meet at 11 o'clock in the Vatican and we give the message. We know that they receive the World Peace treaty, now we add the other two papers. If the pope as the major world leader in the name of God, in the name of The Creator, would put the hand out to rest of the others religions to call all in for peace, there is a problem with this, Muslims will not go to Vatican nor do the Buddhist or the Jews, because they accepted it as a submission, and this is against them. We offer the house here for the meeting, because here is a Neutral place. Here is set for the meeting of World leaders and not a center. **(:06)** The man who shut the bullet to kill, his Soul is responsible, plus the man who designed the bullet and the man who thought to set up the war to do that killing. So the punishment goes all way down the line. Majority of these wars are in created in the name of God in different shapes or forms. So now is time to stop all this mess! The one who shoots it doesn't matter what religion he carries is as guilty as the man who designed and the one who pushed the button for the bullet. No one to blame, but all to understand! This does not happen overnight, there are so many bullets made, they want to use it. We ask the World leaders for Peace they thought that this is just a talk, but if you are not listening to, then we shall the power, in a very simple and effective way, through the power of the technology, then the World leaders should follow the people, that is when the chaos happen, the revolution that goes to nowhere. Direction has to come through the World leaders. **(:09) Every single of you is a Messiah if you can change the direction of the course of the humanity!** **(:10)** I pray that this house here become the house of Peace. They can keep the wealth that they created, God has the wealth of the Universe this is

nothing but the dust. Now you know why is the 13th, it is the end of the past and the beginning of the new time, and as humanity we planned it, not we follow it, and when one can bring this unity, then we can open the Space to the man. We share the knowledge freely, now we share the Peace freely. Give this to everybody in the day 16th, the day of unification of the God. Don't worry if they will burn your letter when you give to people, it is about the way you give from your Soul that matters. (:14) Keshe talk about the letter that they sent for the criminal court. (:15) There is a lot of questions about the table of Mandeleev, about how many elements do we know. I explain in a different way. If you look at H and He is the difference of the amount of MaGrav fields in one package of the Plasma of that one element, He has a little bit more then H, slightly different formation, so we call it He. Now humanity has access to create any amount of different MaGrav fields, in time you will be able to produce all the elements in the Mandeleev table. The question is, does that change the limitation of elements? Expand your horizon deeper beyond what you've been taught to look at. Every star is a center, is a neutron, a center of a system, and it has electrons which we call planets, we call it an atom in a smaller scale and Solar System in a bigger scale. Every star, every element is one Entity. The man with his limited knowledge has just found a feel. The Mandeleev table, the number of elements is equal to number of stars and Galaxies and the Universe which are in the horizon of man. There are no fantasy or exotic elements anymore. The Mandeleev table is not even the first step in the numbers of the elements in the Universe. This is what man could understand and now we open to further knowledge. You have to look for openness, not a narrow way of thinking. (:22) Keshe talk about the intentions of give and receive with the reactors and how it changes the behavior of the reactor and the center core. When you give this letter to the Pope or the priests is not the Physicality, is the thought that you give and the thought will change their Souls and through their Souls they accept the deed. There is a collection and understanding btw all levels of Creation! Is the man who restricts itself because he can have, what he can manage. And if you go beyond that point you find out that you have to reject it, there is nothing wrong with the science with the technology, is that your Brain is not capable to do it. When your Brain creates so much information and the body can not accept there is a switch in your Brain, it stops, this is how much information I can send to the body, and if the information is too much and it switches off, the Brain switches off and it can not accept that, so what happen you get spasms, you get one chock, and in so many ways we call it Epileptic attacks, this is not a sickness, is due to the amount of information created in the Brain that can not be handle by the Physical part. We have to create the shake in the same process, in Peace. (:26) You have to understand the interaction and what you produce when it is given too much information. When you are given too much information to the Brain that the body can not handle the body stops, then you get the Epileptic Attack. Is the same thing with the human race, when you give so much, the Soul gives to the body but the body can not handle then you get the outrages and the Brain stops, because is too much for them to handle. Do not expect that everybody walks to you with open arms for what you have to deliver, because they have to put a lot of dogmas and a lot of false beliefs aside. We became blind, why the colors matters? Why race matters? Very soon our children will become refugees in the Space. In my life where I could not live, my home was threatened I had to take refuge in another country, now that we have open the Space, and in time this planet will be under some sort of self-destruction. When we lose our home what do we

become? We become refuges in the Space. This happened before, and we have to find somewhere, to find home. If you find home, at least a place that you can be able to be, do we fight if there is a life their to fight, or we share and allow them to share with us? And the people in the Space have the knowledge of the thought. So we sooner or later will become refuges in the Space. What do we carry from this planet with us: the Love, the care or the fights with the Religions? Or we go as united and whatever we go we fight for nothing, because the homeland is gone. **We carry God in our Souls not in the heart of the human body! (:30)** So we are refuges, we find a place where we call home, then are going to carry on with the same problem that we created here? Or we will be subject to destruction because they will not accept this behavior. There are refuges here on this planets, they have being among us, but they have taken the shape or form that leaves the man to be what they are. These are not theories, very soon you can think. Man will have to shake hands with people of the Universe to allow man do what they have done. The police of the Ethos is not to interfere, otherwise we do not see evolution. When you don't have home any place that you can feel home is welcome. We will not teach you how to build the reactors, but show the consequences of the reactor and the effects of the reactor. In trying to develop the technology walk away from looking to the reactor, look at the totality of what this reactor will offer, what this gives you, what it takes from you. When you take from the systems, you see that the take from all the people is about the same, but when you look at the figures on giving is different, and those who pretend that are very given and generous when I look at their data are the worst ones, because actually they are the ones who want to take but they talk differently. The systems don't lie! And the data that I have seen is exactly what I have seen in their Souls, nothing is hidden. This is the way they will try to dictate there own destination trough their Souls. The center reactor is receiveing all the knowledge of the KS, but this center is not to become a temple, but a place of Peace and knowledge. **(:34) The whole point of this workshop is not about how to make Gans or nano Materials, is to show how to use the knowledge to make a new Path to humanity to yourselves!** If you think you will be immortal by knowing how to make food and energy, nothing in the Universe has been immortal. So the whole process is how we can serve, to give to others. Try to make sensors for your dynamic systems, and then you start to understand the meaning of your own Soul and you can not lie to it. Philanthropists has become the word of nowadays, but if you watch them, they are the one who are taking more money then are given away. Mr. Keshe talks about the Bill Gates Foundation and the billion dollars that was spent on this. If the purpose is to serve why keep things for you in your own shelter? God does not need banks, when you open a bank account and putting your means to it means that you want to hold on and do not want to share. This has to stop! The whole purpose is give to others as a Soul <audio breaks>. Religions are finished! No we work as One! This unification is from the Soul. The more the other Soul takes more I receive to be able to give. You will find out that the more you give the more you will receive to give. Now you have found a way to test your Souls, the true meaning of your own intentions! Then you understand you can not lie. By going to Vatican in 16th we are not going to disturb anything, but we are given our Souls. In transferring the Soul we set the new scene. The knowledge has to go with science, and the science has to go with the knowledge of the behavior of the man in respect to himself and the others, not Physically. **(:43)** Keshe talks about Steve Jobs and the terrible life that he had, in consequence of "poisoning" other people that worked for him. The real

peaceful man die in Peace. You do not need punishment, the demons you sleep at night is your punishment, you punish yourselves! This technology brings you the your own judgment day! The way that the Universe works: you take none, unless you are given, and you give everything that in one time somebody that who needs it can use it. Then we became into balance and why this technology has come. (:49) You are the collection of your past generations, because what you carry is what you have been given for what you are as a collection of the past. Judgment day is in front of you for yourself! **There is no Heaven and Hell, the Hell comes when you have to understand what you have to let go which is been wrong, and the Heaven comes when you know you are given freely and you are in the process to be equal and to be correct.** (:53) Keshe talk about how people were angry with him because it did not had a leader, and he said that he made a circle with chairs and how this changed the reunion; there was total disturbance in the behavior. Keshe served them and this shocked them. (:58) If I talk about reactors there is a lot of questions, but not now. But this is the way the things are. (1:05) Question about reactors, there are like diamonds in his production of Gans, and his question is about the amount of fat that he is producing. Keshe: The rate of production of fat in the top is correspondence to Gans materials which are produced in the liquid accordingly to the current flow. One electrode is the South pole and the other is the North flow, then you have a flow of current, not of electrons, but of Plasma. (1:26) Discussion goes on about production of Gans. (1:49) Everything that you Nano coat is black, it doesn't matter the material, is not the matter which is black is MaGrav field which is underneath the top layer amongst the multi-thousands of layers. When you release that atom as Nano then it takes its own shape, become independent, when this thing changes it changes the color and it field strength in respect of the point of view. Example of the CuO₂ that was green and is becoming white exactly like the color of the Brain (Keshe talks here about the center reactor that is absorbing the knowledge of the KS in the lab and is getting the color of the Brain). When the fetus is made in the womb of the mother there is no Brain, when the confinement of the structure of the Brain creates the returns of the fields to its center, which are all the fields from the materials, converts the matter of the flesh and the blood to the level which becomes the nerve, it's the confinement condition which allows the matter to change from one state and change to Gans state, then when it changes in that position you get the cream color, the nano coating of the Brain cells. The communication in the muscle tissue is by Cu and not by nerves. (1:55) You have one reactor that you call the Brain and other that you call Intestines. The talk goes on about the reactors. (2:10) Mr. Keshe leave. Marko assume and talk about the reactors and that they put Magnetical sensor around the reactor. (2:43) Mr. Keshe comes back and talk about the relation btw a flower and the reactors. (2:45) Armen talk about his reactor. (2:49) Mr. Keshe advise to not inhale Gans in vapor and to not touch the Gans, we must learn about the side effects of it. (3:04) Keshe talk about systems that can levitate, that they can never fly, because in the material they produce they create MaGrav field which is the maximum that that field can create btw that material and the MaGrav field of the Earth. Now translate the same knowledge into Gans. (3:07) Outside the skin you accept atmospheric condition matter, inside your skin after three layers you accept a condition which is Gans, do the same thing with your reactors. (3:12) Keshe says that they may have found the roots for Diabetes 2. A lady that used these systems stopped the use of insulin. (3:16) Mr. Keshe thanks Rick to set up the humanity to walk with the Messiah, we are all Messiah. As a

human race we set to change the way that we think of how life should be, and we carry other people with us. We have to be the example and not try to force our ideas, but we have to tell to people how we think and how this can be achieved.
