

130th Knowledge Seekers Workshop Aug 13 2016 at 10-00 am CEST part 1A (10hrs)
(, Lot of discussion about making pure CO2 Gans,)

(:08). We deliver to the Whitehouse the first free energy system to start a new change.
(:12). It taps into U energy, the Gans, Nano and matter state all work together, it's a harmonization of 3 different field forces, to absorb the U energy. A lot of you think it is the Gans or N, but in fact these 3 layers are a portal b/n the U Energy and the matter state energy which we have built our S around, be it the cooker, refrigerator or hair dryer. A lot of you did not see this nor understand it, but we have opened a portal to the U Energy. The 3 System layering we built the Superconductors, Gans's, matter, this is a transmission line b/n 2 matters, b/n 2 states of energy. The Gans and N layer are the intermediary, if you stand on the side of U Energy which is the Gans side, you have access, you are absorbing energy from the U, and if you stand on the Cu or matter side, you are releasing ?? take you to the weaker matter on the other side of wall, ?? it's 3 layers on either side, and the N material coating creates that transition point, it's the intermediary, the portal for the conversion of the U Energy into the Matter state. (:14). Now for maybe the first time we have understood what we have created. We have managed to create a transformer, transforming the energy of U to the need of man, be it as it is Ac or DC, 110 or 220 volts, it's not a magic. You have the top layer of the Man, middle layer of the skin, and then inner skin, it's the same process. We have simply replicated the work of the U. It does the same thing in your stomach for the transfer of the energy of the food to your Lymph. The same with Lung, 2 layers on one side and another on the other side, you create a transformer. Making these MaGrav S is like making different organs of the body. 15 31

(:33). We change the self appointed families who think they have the right to rape, kill and do whatever they like. There shall be no King nor President, we are all controlling our own destiny. I don't think there was any other way then this, we had to educate everyone at the same time. We saw in Austria peter creating materials, the easiest way is to make a coil that it freezes the water and you have as much clean water as you need. I explain and you do. (:36). You stand in middle of S and you wish what you want. I have to tell you one thing, my wish is my command, and I have carried out my wish. (:40). Douglas will go to Washington. It's time to put the peace on the table, in 3 days time I will release the defense T to 3 nations, which means I allow the governments to paralyze each others Military Forces. Then in minutes I increase to 5 nations, which means we stop any progress in military. China, Russia, Iran, then Japan and last USA, we have to bring a condition that they realize they can fight. Then Ghana, India and Brazil. To bring a balance. Bring peace through change of thoughts of Militaries. This stops immediately what is planned in the South China seas because all the American naval forces will be paralyzed within hours. Then we'll decide if to share with America, or with Italy. (:44). We crash the whole system and then teach you to get your basic needs. We ask you to stay correct in conduct. We share with China to stop the planned war there, then Russia to stop Crimea,, and Iran to secure the Middle East. If we can get agreement with American government to stop arms then we share with American government. We realized that the only way to speak to the Americans is to first take away their weapons, then talk Peace. We tried many times but to a deaf ear, now there will be millions unemployed people in

weapons industry. We don't want to create you misery but we have to stop you creating so much destruction in world. That is the only way I see, the same with Western Europe. (:46). All the weapons S rely on electronics and the MaGrav is excellent to interact, then we are back to stone hammers. If they stop us we immediately release worldwide. (:48). Question. Is there a way to transition the current world leaders into the new peace. They will do, there is no choice, businessmen dictate to the leaders. The 6 member U Council will dictate the change and not the present leaders because they all try to cover themselves. I don't have trust for them. We will go through total chaos for a short time, then they will have no choice but to come over. The big problem is who dictates the power behind the world leaders, and they sit in control of finance. We take those away. (:52). The reason I asked for the security people to set up a One Nation Police Force, is to bring in all the Presidents and Kings who have done wrong. In weeks you'll see large number of world leaders behind bars. You'll see the books open up. We all know that after Hillary had a stroke when she arrived at Dulles, she is not in a position of leadership. (:54). I was arrested in Canada for 11 days and everyday I was told I will be shot dead. Then they sent me back to the wolves in Belgium. Months later we released the USB Stick and the wolves went to bite. ?? Something about Clinton's involvement, we all see there is an end to it, the soul naturally brought about a balance in the brain through damage. Before the Kings die they will receive their own judgment. The problem is not with us any longer, it is with them and how they try to save their own lives. The best solution for us is to disarm the US Army, Navy, etc and not harming a single person, just disarm the tools of war. If I take the controls off the nuclear weapons. We don't want the others to become superpowers so we have to give the T to US. (:58). For the first time man takes charge over his own destiny. .. (1:00). The problem with us human is we felt lower then the others and allowed them to take charge over us. (1:02). We don't plan but change internally. Armand said he went to quick to send Douglas to Washington. Keshe wrote, to plan is to get involved in the P, to wish and to transmit your wish with your soul is the start of all, and P will manifest itself in the shape that the environment will allow it to be good for the time and the space. Now you may understand more, it is your wish to stop ?? that started and ended the process, the act of P is the manifestation of the soul of the environment that the wish has been designated for, the wish to take shape. I wish it and it is the soul of the planet is ready it will accommodate it. I don't think of problems, as these are not part of my soul's motion. We'll see how things turn out (1:04) and either way it is the soul of the man and the planet that will allow for us to see the outcome for tomorrow, which when we go to the WH to see if the man is ready for new birth from today on. You shall understand one day. When we wish peace, and we make the ?? for it, and if the planet and human race is ready, not those who think they are the leaders will take shape and will come and manifest itself. So I am not worried about the world leaders. We know no one is there at the WH, because it is irrelevant. (1:06). In coming weeks people will burn down the palaces because we have no need for them. (1:14). I planned this for centuries and now we have to go through the mayhem. (1:17). Speech from US president. He says, "we invested in wind, solar, etc... we don't have the technology to completely replace fossil fuels. And let somebody here invent something tomorrow, which would be very helpful, ... and if you have it, let me know! President Obama address 2010". We got a permit for 25 people to display on the WH Mall. (1:21). We have one of the top attorneys in US and have direct access to the WH. They said they

will receive it. When we presented it they said they wanted Yale University to check it, I saw that as a delay tactic, so that is why we are going to Washington, we can stay there until they receive it. (1:24). If the President wants to get his hands dirty we can make one in the WH for the TV cameras, maybe he can stay for a third term, because the people in the background won't have a say anymore. The people who finance the president are the Oil Makers and ones who make wars, now we take their tools away from them. It's the only way to take away their power, take out their legs. It's how the Human Race will decide the new structure. We are not going through the back door, we are powerful, we go through the front door. (1:27). Douglas under no circumstances share the knowledge, we keep it until we. They wanted to see that there is nothing connected to it. Bret (head of security) is going to Washington, orders only come from him and Armand, head of KF worldwide. Bret has a direct connection to WH. (1:30). The Russians and Chinese are asking for a copy urgent, and Iranian government. This is going to cause chaos worldwide. (1:34). Marcel from Germany built a new MaGrav in last couple days. Germans only will accept a running device. I don't understand why the Creator put me on this planet it is really boring, but now things are moving. I tried my MaGrav from December I only get 10%, in the night I cry a lot, I think my soul gets more and more open, everything push me to KF. I didn't understand anything. It's a pocket size MaGrav, I hope to run in next couple days. (1:39). Photos of his pocket size MaGrav is running his refrigerator, but he still needs the Grid. (They look like capacitors), he saves 12% power after only 1 day. Keshe says this is history, the new MaGrav is off grid. (1:45). The Chinese are saying they are too shy to show, this is not good, everybody should share. (1:47). He draws, we are looking at pocket unit of 6 cm x 10 cm and should get 3 to 10 kilowatts, we can even go to size of AA battery. It should supply for 100 years. With 30 kw we should run a car, this is in solid state the next level is to change it into an active PI, then you can go up to 1 gigawatts. We are talking about N material Superconductor, and availability of Gans. (1:52). Douglas starts on journey. The principle is we create a central Unit and the fields go out, and we make the gadgets or systems to connect to its fields, to give us what we need. We can go down to 2 to 3 mm, with kw, next 12 months. The proposition is 3 to 5 kw and 30 to 50 kw. At the moment we have achieved 7 kw. (1:54). The 3 areas of research going on is pocket size 3 kw, heavy load 10 to 30 kw, and then combination of cores and coils. Plasma interface what we saw with Peter, unlimited. With capacitors Douglas could go to 30 kw. (1:57). The PI and man's E and you get what you want. The beauty of it is, it always stays balanced according to the wish. It's the wish of the man that makes the gold. (2:01). The unit will be disassembled during transport that way if they take it they won't be able to operate it. The Press won't come because of the Jewish Lobby, etc. (2:06). Paul from Togo, HIV tests going on, the first lady the HIV is reducing. We have not used any Gans material on Naomi, she is improving, hopefully in next couple months. (2:08). Man produced gold particles in Gans of gold, is this possible? If you have only Gans of water with PI of gold (LP) yes, the MG of gold is there, yes they convert. You can put a glass of LP gold btn the ?? see how many particles settle. You just need 1 "Mother". It rains gold, you need to melt it down. (2:12). Armand lost 2 of his Gans balls. they looked all over garage but couldn't find them, 13,000 rpm, they disappeared. From Giovanni, Naomi has stabilized she is moving. Maybe all the balls gather in the ocean. (2:17). Armand shows setup for gold, use just the LP gold. The double core reactors one is inside acidic and outside alkaline, and the others are reverse.

(2:19). Keshe says to use a drop of AA in both cores, use 80 to 90% ZnO₂ on the outer core, use 10% high valued CH₃, very acidic, use in inner core 80% H highest acidic you can get, and ZnO₂ only, run 2 cores, 1 on one side of house and other on the other side opposite. The only 2 elements you need in this structure is ZnO₂ and CH₃, very pure Gans's on both ends. ?? Do the reverse on the other side of the house. Tell me how the people in the house feel. This is a message to world leaders we touch your soul, we don't need your P. (2:22). You will not even know your children or neighbors. Keep one at home and take one to work, anybody in the corridor b/n home and work you'll see they will change. You elevate the E of man to the point of satisfaction. It has to be pure ZnO₂ water, very little Gans of Zn if you have and highly acidic CH₃ and highly alkaline ZnO₂, these are the extreme isotopes of Zn and same with combination of H and C. This is how the start of the process will come. It has to be dynamic and start them next to each other then separate and tell me what happens over the next few weeks, It has to be pure Zn and a drop of AA in both cores. (2:24). In all for cores DO NOT put any of your own AA, it has to be from the Zn plate production of ZnO₂ and Gans of Zn. DO NOT take AA from the CuO₂ or CO₂ Box, no way!! If you have access to material near to the soul of the man with a drop of AA and a drop of Cobalt Gans water, you elevate the soul of the man, the same combination highly acidic and Alkaline, the Cobalt allows the division of acidic into Alkaline and division and rotation, the speed of rotation needs to be b/n 5 to 10,000 rpm, you separate the fields, the reason you are losing your outer balls is because you have fixed the position, or the field doesn't have anywhere else to go so it explodes in trying to expand, and that ball will go through anything, the wall, even 2 feet of reinforced concrete, because it's in the transformation of energy. If you use a third core it has to have a combination of AA, just a drop but the condition of it has to be highly Alkaline. If you loose the Unit when next to each other it means the power is too high. As you move the second reactor to your workplace on the way if you wish gold it will rain gold, if it is peace it will come, if you need the gold to feed yourself it will rain gold. You become the point b/n the source and the end matter production. (2:27). Your E is the controller, and if your intention is peace, and the others whose intention is also peace will come. The best time is when people are sleeping peaceful, then they will interact and wake up in the morning with a different approach. Put these units with MaGrav and float them in the sea, you will change the fish. ZnO₂ is access to the E of the Man. For the soul you need Cobalt, the soul can divide itself to P, the E is a transition time, it can only receive and take the E to transfer. You NEVER add the Cobalt to the ZnO₂. I taught this to you early, now you know how to make man peaceful. If you are going to Washington you have S you can make with the ZnO₂ and CH₃ water, leave 1 at home and take 2 with you, and give the 2nd one to someone to take to the other side of world. The fields are there but don't forget your intention counts. (2:30). Another combination ... CH₃ only to outside, AA to the outside, .. then you have the soul in center and E as transition, AA from the ZnO₂, your intention and if the others are the same, get peace. (2:35). Iodine is the material needed for the elevation of the soul. Cobalt is easy to get hold of. Make sure you always used pure distilled water. No salt. remember I taught about Gans Liquid and vapor fields, heat up the LP to boil and collect the vapors, you'll have a very pure water of the material you made, because the P residue will be left behind, then you will understand. Use that pure water in the cores, the soul sits in the center, Iodine plus Cobalt has to be in the center, you need a little amount of CH₃ to do it, because Iodine is heavily

G. It is the seat of the soul of Man. Then the outer core visa versa, then the Zn outside because of huge difference with Iodine becomes M, the reverse position. (2:38). Then you can add part of the iodine into the outer core where the E is, then you create a connection btm the soul and the E. You need 2 core setups to transfer, if you all use the same Iodine you are all on the strength of the isotopes of Zn, we shall see the results. Have Bret make a cocktail, start the peace process before the energy crisis. The middle of Summer is the weakest time for the political machine, it's not Christmas. (2:42). Douglas is about to leave, blessings coming in from around the world. The KF Forum will have a special place for comments. I will come every couple hours to check up. We are here because collectively we have made the decision for years to bring the peace. (2:46). The starting point is St. Louis, MO. (3:01). Chinese man has a ball with 3 balls of Gans CH₃, CuO, CO₂, photo of a ball of light. (3:05). Translation, Rick tries to explain difference btm double and triple cores. (3:13). Keshe asks if the room is dark, not clear, these are flows of fields. (3:22). ?? the second core, it can be dangerous, it goes through your body or walls, it most probably get attracted to the G fields of earth, it could be meters down in earth until it finds its balance. (3:34). Another rotating ball. Possible making new materials. (3:51). Rick draws 2 double core reactors, Alkaline and Acidic setup of cores, and field interaction. (4:10). (4:23). A video of how to make pure CO₂ with plates outside. Be very precise in making Gans. Only use a protein that is pure. Keshe uses plastic bags on N and Zn plates, adjusting thickness and distance until you get pure Gans. And use a thin walled container. The Chinese had a lot of problems to get the pure Gans. Mostly we are getting mixed impure Gans. (4:31). Rick shows his container for pure Gans. (4:34). Alek says he tried but suggests putting one electrode inside the container. He didn't try with plastic bag. (4:36). A man used glass container and plates outside and he got quite a bit of Gans, Zn and N Cu Plates, when he added a few drops of NaOH he got a lot. He used a small jar and wrapped the N Cu plate around, cylindrical that seemed to work good. And he has seen that Cu pipes produce more Gans. (4:40). Mario says someone used a container with the N plate in a bag of saltwater and Zn plate in bag of salt water, and got 3 pure Gans. He also blew CO₂ gas into the container. (4:43). One used 2 C rods with .5 amp and got Gans. Talks about all the different gases in the atmosphere. With pure NaCl might be better then sea salt as it is pure. (4:48). (4:50). The Man made Gold Gans, used pure gold with C rod and power 1.5 volts and 2 amps, it came out black, maybe too much power so it turned black, Distilled water and Himalayan salt. Gold will disassociate with high acid, negative to gold and positive to C, you may have got Nano C. (4:55). Nano state gold has a range of colors, 24 karat is pure. In Middle Ages they used gold N material for the red color of stained glass, Gold in N state has special properties when it interacts with the UV rays of sun, it annihilates any air pollution near the window, turns it back into its prime elements and water vapor, and disinfects against microbes and virus. It changes the O to Ozone, most potent ionizer, they just found this out in last years. It's not the same as Gans. (5:00). Photo of gold Gans. (5:02). Zane shows his gold Gans, 14 karat is black used 7 amps. He loaded up Gans balls, they exploded in 2 to 3000 rpm. (5:06). (5:10). The dangers of Acrylic balls. He suggests a polycarbonate plastic balls. Making a shield for the rotating balls. (5:36). talks about different salts. (5:38). Distilling Gans water to concentrates the fields and drops the P. (5:41). Vaporizing LP to get the vapor fields. (6:40). (6:57). Public demonstration of the unit in front of the unit has been called off. (7:08). Shows the video

of Douglas's MaGrav. (7:27). Man tells how he made gold Gans, he put gold chain in salt water, some CO2 Gans into it to give kit energy, 1.5 volt battery, added another 1.5, nothing happened, left it in the sun with solar panel, max 17 volts and .29 amps, , it turned purple after 1 or 2 days. He used just the gold no other electrode. (7:35). (8:01). Check in with Douglas, will stay in Pennsylvania for night. (8:08). Keshe talks about application to the KF, you can come in any time and start. The layman can learn the PI T faster and higher then the professors because they want to hold onto the old way. The mindset has to change. People respect the nuclear T out of fear, but with PI we bring it peacefully and show its power. (8:12). Keshe talks. (8:15). Q: about S for Stomach cancer. We are waiting for our license to be approved, then we can offer them. The lotion, Gans, and supplements, in Japan. They know us from our work in TEPCO, the last license only took 4 weeks. ?? to start the trials. We will accept cancer people across world, come to office with passport and certification of cancer, it will be intravenous treatment. Up to 80% reduction of cancer. (8:22). I have the cancer myself but I don't rely on the T, I have a different mindset. If we get 3 doctors with successful results around the world we release the T, we don't wait for corruption of delaying by governments. (8:26). (8:35). Douglas arrived at the Arch of St. Louis. We give you the link and you can read everything. (8:39). At the moment we gave copies to the Security Services in US and Europe. (8:43). Alek comes on to explain question, you make your food Gans and add it to CO2. If you add the food to your CO2 kit, you put the food on top of the reactor it becomes part of the PI. (8:45). (8:53). To make Gans of Orange, N coat the stem of orange or fruit, steam coat it don't burn it, ?? positive is N side, ... orange salts get Gans. If you get the Gans of plants they taste like the plant after awhile. (8:55). Q: how to make diesel Gans, he hasn't tried. If you use Caustic with fuels it improves octane. Keshe asked him to make a Gans of Crude oil, but it didn't work to attract the oil. (8:59).
audio not on. end
