

(:07). Earthquake in Italy, KF releases all its reserves of PI T for the nation. The Earthquakes will continue on around world through the Fall. (:14). Make sure you have CO<sub>2</sub>, CuO, ZnO<sub>2</sub>, and CH<sub>3</sub> on hand for disasters. The earthquake in Italy and at the same time in central US so they are connected, and in central Asia, which means the platform under the continents are on the move. We usually see an earthquake of a certain magnitude in one place and the next day somewhere else, but now we see high level earthquakes occurring at the same time in 3 or 4 different locations, and this is in line what was estimated (months ago regarding continental plates shifting), and it will carry on and become an order of magnitude out of control. The problem is not a single earthquake but multiple quakes that start creating vibrations across the continental plates. (:16). If this process continues and links up with each other the continents will move. (:25). He draws the 3 continents on his board, Asia, Europe and N America. When they occur at levels of 6 and above on the 3 continents it shows that the final push to separate the continents is happening. And when we see them occurring in a straight line across the continents the inevitable is occurring, (as we have earlier gave warning). Why Italy, it's a boot, a free zone that can absorb the shocks, this with the American earthquake appears to be part of the bigger movement in the Fall. (:28). Earthquakes are adjustments of the plates.

(:40).

(:44). We offer energy technologies that are not in the public domain, (that must means S beyond what the MaGrav does), but only if the Italian government asks for it, at the moment they have not asked. In the next 2 weeks it will hit below Rome then to Gibraltar and Spain. We will see Greece, Turkey, and Iran. We will have to release the T, and it will be applicable to all nations. It will hit in the Winter and energy will be needed. (:46). We have T that have not been shown in public that are not electron vibration but PI field strength dependent. The hybrid generator is 110 and not 220, we are looking to convert it to 220 volts. Shortly we give you an alternative to the 2 compressors. It will be solid state. If you can't get the power production there is a conversion you need to do. These S will produce 3 to 5 kw. (:50). Douglas's Compressors are generator compressors and not just compressors which will not work, you need 2 I Loops. The secret is a 2 generator pump (what you call compressors), with or without capacitors, with the condition that one likes the other (interacts with its fields) and creates the motion. The production of a loop is dependent on capacitants and the winding as a motor or a generator. ?? These compressors are generator backup compressor front. You need to loop in both generators but in a way that you can tap the energy in both at the same time. (:52). You need the MaGrav and Capacitors to give you the 3 to 5 kw. Understand that these S are already obsolete. Those who have gone into the multi-dynamic (3) cores, if you run them and have managed to empty the middle core, it means the field strength in the center is very strong. ?? Create a S that hold no liquid in A (center core) and liquid in B. You fill both A and with LP and push to a point where A becomes empty. It is not empty, it's part of

your fields, there is no way you could get air bubbles in the center core. The bubbles are Field Plasma (FPI). (:55). If you reach the stage of FP or bubble in the outer core it means you are on a target of production of energy and everything else. If you create a vacuum in outer core and empty in inner core you have created a FP, a hollow center that is not hollow. It is a beginning step towards creation of independent MG fields, and the matter state of your cores as defining it. Though you don't see it a very fine Gans layers has formed to confine the inner core FPI. If you put a third core and you start to see matter content forming in it ... when you start seeing depletion of matter from the second core, empty spaces, when you see both A and B empty you are in the process of field M field and you decide the field and how you can work. The emptiness of these cores is not that you have lost material, but a sign of entering the next dimension of the PI T, which is the field T. If you see bubbles in the outer core it means you have not created a field strong enough to empty the center. You have to consider that you are giving so much from your M to G that can't support or (:58). is not enough to support and empty the center. If you managed to put salt water in the outer core, as I told to the Innovation group you'll capture most of it in this layer, very small amount of salt, allows the creation of materials which you need. Redraws it, 3 cores (A, B, C) filled up with different materials and you'll be left with materials left only in C. The cores A and B are N coated so they're not empty but have fields left in them. Because you rotate them the interaction allows you to lift and descend. This is how the center of stars and galaxies work. (1:01). Look for a black Gans material in the center core, when you see the dark (stuff) in the center it's not N material, it's the "Principle" material, what you call the black hole, because it absorbs most of the energy and radiates it both ways as needs. And by the water in the outer core you dictate what is absorbed and returned, that is filtering according to our structure. The outer core with Na, water, .. all the things AA balances according to the P structure on this planet. You need to be rotating at about 10,000 rpm or more. If you place this in the center of your Stacker, it becomes an energy deliverer, you have energy and lift, what you need you absorb, your Stacker dictates the boundary of your shelter. This is the option if you go through the Gans and motor process. In the U there are no motors. Those who happy with the 3 to 5 kw and the Hybrid generators, I am sorry for you, it means you still stay in the matter state. (1:04). What we are trying to supply is in the range of 20,000 volts, continuous, but only about 0.1 micro Amps. At this level fed into a field as an operator you'll create lift and motion without any matter state. This is where the Foundation work is headed, this is why I am not really interested in the hybrid, we have to keep you happy with 3 to 5 kw. Too fast a flow can't allow the creation of the condition, 1 Amp is too much, 1 mille Amp is bearable. In PI T, we need a potential difference that allows the creation of but allows a very slow movement that's what the current means, flow creation, if the flow is too fast you will destroy everything you have, or you can go on the other end of .5 to .75 Amps and create a ?? horicanal field and that compresses the field to give you the black hole in the center, then you create the conditions of existence. You have to decide which way you are going. Going through the mechanical S to 20,000 volts has problems, failures. Now creating a PI field flow around a solid state that can guarantee 20,000 then we can allow a small amount of field flow as we like, or a rapid current flow. Understand the difference btn the voltage and amperage. (1:07). ... if we create a PI flow from the new hybrids we are not looking for atomic electron vibration for a current as you consider it to be important. We are heading into a space T that works under these

kind of conditions. We are running these S on the back of advanced knowledge but we have to break it in on steps that you can catch up. We are going in stages that it can be done in accordance with the U System and not electron vibration. the knowledge is going very rapid and a number of you're catching up and hopefully you teach each other the way you did with the Gans, N coating and the rest. Now if you understand, you created a N material, a Gans PI, and now we have achieved the emptying of the central core in the Innovation Center. (1:09). with achieving FPI in the central core. This is our target to achieve interaction of the fields which creates the PI. In Book #1 we said that when the fields interact they tail up (spiral up to center) and create the PI. We came from the matter and now in this one create 2 opposing field forces and let's see what happens. We start building a PI in which we decide the size of it to be a SS, to be an atom or the beginning of an AA. In the U we can build whatever we like from it. This is the end, the COMPLETION of the knowledge. This is important because you have seen this before, rotating a Gans ball and achieving a hollow center, while still having matter around (the hollow center). Now we have compartment ?? we decide exactly where this goes, how it's going to be and when we stop the motor the center should still stay without matter. Which means we start confining and controlling the PI inside, it's not that the matter has leaked out, (1:11). but the fields inside are strong enough that it can hold the return of the PI into matter state. This is where we have to be and are heading for, a lot of you are busy with a different part of this T, but those of you who are coming with us, realize the first house evacuation (of center core) is completed by the Innovation Center. The next step is to empty core B, everything is in the Gans state field forces. If we manage that in the next few days we will achieve lift and power generation in a much simpler way. There is no need for motor or anything, because if we manage to create a power supply that can create a voltage difference of say 20,000 you have M and G and if you can feed these 2 in opposite direction to each other, then you'll understand the process. (1:13). There is no need for liquid you go directly into the PI fields and as these are created in the PI condition this is what it gives you all the time. I have explained before, Alkaline and Acidic, positive and negative, North and south pole, G and M, these are all the same thing, no difference it depends in what language of science you want to speak, then you can understand how you can lead from one to the other as you need it. Your knowledge has become advanced enough to understand this. As I said, Atmosphere, Coulombs Barrier, the skin, or anything else you want to call it, it's the terminology for the same thing, you can go from one to the other. We started at matter state, N, Gans, step by step we built it up ... became LP, we talked about the vapor because that is how it moves from one to another, and we came into the Field Plasma and we have seen it. And in the process of the FPL we can decide where we want to end up (draws arrow to any of the lower states). Unified Field Theory they all come from and depend on the conversion of where you want to be according to the strength. (1:16). Even with the disasters coming up each one of you have to decide what part of the T you want to handle to achieve the same (result). He goes over the difficulties of each of the different states, N has handling difficulties, Gans has power but we don't know how to handle them except containing it, in LP you find freedom in accessibility because you know it is there, with Vapor you have little knowledge about it because it is a transition, the fields are actually the Field Plasma and everything can be taken from it. Since last week the Chinese went directly to direct transformation of LP in the bottles with FPI and interaction with another FPI of a

?? cup introduction of a field. (1:18). Some of you have already started to understand FPI by its results, because the liquid interacting with the field and matter give the desired effect. To understand the difference in strengths you have to understand the creation of flow from one to another which gives you the current. Those of you who have understood the last sentence have broken into the world of U energy. The larger the potential difference the deeper in the knowledge of man in the work of the U. People in the future who listen to these teachings will understand it. the potential difference in PI for M to G is the span of the U, the smaller in the matter state, maybe this picture covers the last 3 years of teaching or the whole knowledge of humanity. (1:20). So simple! The center of the U sits here (the line at the bottom), the earth sits here at the edge, the further ad the weaker, the higher potential difference with a slower rate of flow, matter state is possible, now you understand how you fit in there in the matter state, you don't see the totality. You can convert one to the other, (draws A outside and B inside). You still get the same result. You can introduce fields that are still within the bracket (inside) but you dictate where the ?? has to be, this is what you call the transmutation of the PI, not the element. It's the PI which manifests itself in the matter state, it's the PI which does the transmutation not the element in the matter state. (1:22). When the sun radiates its fields it doesn't make Fe or Ca, it releases a field that in interaction with environment at given condition, that field package fits into let's say O according to the rest of the environment which is created, now you can understand this (field radiation from sun) and this (?? other field diagram), it's the translation of the same knowledge. This is one of the reasons we are not pushing the production of the generators, we are pushing for further down the road, 3 or 4 weeks when you start making these things, then you'll understand why ?? because the generators you are going to create are not for electricity, it's the tool for you to be able to release the power of the PI in using what we have already built, the Stacker Unit, that allows you to create what you need but creating the potential difference according to your need. You decide a current flow, this is a change of using electrical vibration to potential PI level balance. (1:24). Next week the teaching in Barleta will start again and we will show you how things can be done. I'll try to make it more practical for you to see in understanding the T. We can create a lot of things without actually having any material. If you are testing for production with the different cores you are doing the same thing as creating potential difference in the interaction btm the fields, that the balance interaction in respect to the condition that you determined will give you the material which you need. Show us your developments with the Hybrid generators, it is not for electricity but is generating PI for the production of whatever you need. The PI outlet off of the generator will become your food, energy, material, etc. you can dictate which plug will give you what. I showed this is Rome last year where I put a DC 110 and 220 off the same line. This should have given you a lot of information. (1:27). It's the same as putting the two hands and creating the fields, there is no difference. You went a long way producing the Gans etc to get fields. The Gans is in your body, there is a potential difference btm the hands. You yourself are a source (of fields), and you have never seen it, man has always demeaned himself. Do you need to build up reactors, create the PI fields? You are looking to create a potential difference to create what you want, within your body structure you already have it. Your right and left hands are the electrodes. In more knowledge, your right brain and left, don't need the P of hands. There are positions in the P structure of the brain that you can lift yourself, create your own shelter. If you are P you look for the hands, in

science you look for control of the fields of the higher strength, you can go inside your brain then you'll find out the biggest mystery to the man. (1:29). Do you need the SS, or the SS you have chosen is the P of the man himself. Blessed are those who are wise to understand. If it's your E, the central control of the Soul which decides for you to have blue eyes, black hair and 1 toe longer than the other, if you understand what you have within yourself, why doesn't it become a SS? The body of man is a SS which he has chosen to be at the present condition of this planet. This is the secret and none of you will understand because you're too P to feed the P to exist, you have forgotten that the P is fed by the soul itself and the E is the controller. You have the control as E and the supply as the soul. You have decided to take the shape of the P of the man. (1:31). If you understand this you become one of the most advanced creatures of the U, because you decide how you want to manifest yourself or to be seen or to have contentment that you are happy with what you have, you condition you. When you arrive at the destination point (planet) you convert to a structure according to the environment you land at. It's your soul to decide if you stay and be equal in balance with other souls and structures which have 10 fingers etc. We are not teaching you ethics but pure PI Physics. ... You have to understand where within the structure of yourself that you create the dimension of the Totality. (1:33).

(1:46). Questions.

(1:56).

(1:59). This is the knowledge which was in small portions that was given to some men we called the prophets, and they used it to abused you, now you're all prophets. The knowledge that was shared today was never shared with them in the past. So you are receiving more knowledge than before. That's why when masses of you are teaching and some grasp and come with you and the others reject, you have become prophets because you're sharing knowledge of the creation, he used to send one, now we are making masses of you, because this way the teachings are much easier, the man understands another man (like himself). You are teaching how to make N, Gans, LP, etc., this knowledge was never open to Christ or any of them before. Because they were involved in the matter state, how to wash your face, how many times to bend and the things you have to do P, yes or no. Now you understand the state of the soul and P is irrelevant. Without your knowing I have made prophets out of all of you understood, but according to the time and space, and how much you want to understand the totality, you become what I call the prophets of different levels. From now on the prophets of the U will not come just to teach ethics, but they will be knowledgeable men of science of the U. (2:01). Those who call themselves whatever to ridicule you that's what they have to do, you become the next Christ they put you on the cross. It's the soul you carry which counts. When you are teaching them all you need to do is to give from your soul to theirs, because it's like Christ said forgive them for they know not what they are doing. You have been given all the knowledge above what was ever given to the prophets in the past, you don't need Vatican, Mecca, Jerusalem. Understand how we are becoming educated in the totality and people are realizing the injustices and what needs to be correct. (2:03). ... We are aware of justice coming in groups, that elevates the soul of a nation and humanity. Which means we don't want to (get involved), but we know what has to be done to be correct. In that process you know if it is the right hand taking more than the

left hand or if you decide to be in the process of understanding. How much do you understand about the motion of the fields, and the field flow from one side of your body to the other, how much do you understand about the rate of flow from one side to the other, how much it moves if you move the next finger 2 mm forward or backwards. Would it be the motion of the movement of the finger or of the toe? Then you understand the rate of the flow, then you understand the difference btm the motion of the finger and toe and how much you need to flow between what. You have to realize the simplicity of the creation, it's man who has made it complicated. (2:05). You have to decide how more complicated you want to make it that it becomes irrelevant and you end up back at the beginning (ignorant). This is the problem, the structure, the process you need to learn. Do you need the understanding of one core or another when you carry the core yourself? You're trying to build a PI where the ball of the PI is with your 2 hands, you decide what rate it goes, it goes so high that your P can't handle it, then you'll find out that your E takes over. A guy sits in my teaching and he concentrates so hard to move a cup, he doesn't understand that the cup is himself. We don't preach, we teach the knowledge of the U. And each U has its own rules, conduct, own field flow and interactions. It's for us to understand but we have become so P that we have blinded ourselves to understand. (2:07). Last year we lost a lot of teaching on one channel, but that loss brought freedom to a lot of children (captured a pedophile). 25

(2:12). I received a warning to stay away from American politics that it's too hot, too dangerous. If we speak about the truth there won't be any election, we know too much.

(2:23). Q: does iodine evolve the soul? Explain what you mean and see. He made the Gans of Seaweed. (2:25). Wikipedia definition of seaweed ... (2:29). We are not talking about matter iodine, but PI converted and in the AA level,

(2:37). Understand the connection with P, which is part of the hemoglobin, Fe, and then you see the connection with the E, connects the 2 together, the soul in the interaction with the E, the Zn and the P, which has to do with the Fe. You found the jackpot. By adding some ZnO<sub>2</sub>? No that doesn't count, ?? the holding of, when you have oxides, O is the linking connection to hold on to the P of this planet. In the Space ZnO<sub>2</sub> doesn't exist, unless there is an O somewhere with it. Zn exists as a monatomic PI. The oxidation or acidic is the connection which end of the strength of this planet. Oxides don't exist in the U. If you connect on the H you go on the end of the acidic, if you connect on the O you go on the Alkaline, which means you become G or M, you end up taking or giving in connection with the environment. (2:39). Does using LP of Zn to make the Gans of seaweed elevate his soul? ... I am waiting for you to answer yourself. Thinking makes the man wise. (2:42). no, no, you start judging yourself .. is what I believe about myself in line with my E, what I have been made to believe. Most of the knowledge of the P life has been taught here, it's up to you to make the connection with your E and P. Christ is one of the most misunderstood prophets of the past, because he brought a lot of magic due to the lack of understanding of the people around him, where he actually explained a lot. When we talk about rising a dead body, everybody looked at the P of rising a dead body, but he elevated the soul, and it moved the P. He didn't lift the man on his shoulder

and teach him to walk. (2:44). This is where the misunderstanding causes a lot of problems. Now that you know that if a man could give from his soul, that's all Christ did, with the purity of intention he gave from his soul to the soul that did not want anything to do with his own P, ?? low stem or misconduct of his P. When the Christ gave from his soul he gave to bring balance with the soul in respect to his P, and that is where the body rose. Christ did this to himself, but nobody understood, He became excellent in understanding self-elevation. If one day I explain his work you'll hang yourself and flatten every Church on this planet. Maybe today it's time to start and that's why you are here to ask this question. When they put the Christ on the cross, understanding the P, and as I showed you the shape of the brain, and how the sphere of one part belongs to P, when they (He ??) took from his P to elevate his own soul that repaired the P damage, He walked out of Jerusalem in a P life, He understood that Man can't understand the message He has. (2:46). He never went back to Jerusalem. This is what is not written in the books of the history of Christianity, that's why you are waiting for his resurrection and He disappeared. He didn't disappear but He understood the connection btn the E and His soul and through the elevation of His soul through the P was ?? beat gave enough from its own P to elevate His soul and repaired his P and walked out of Jerusalem. There was no resurrection. He understand exactly the question you're asking. You do it in small ways, you (can't walk) and you walk, today you have cancer and tomorrow you don't have. Or if you don't now we elevate with the power of the soul to receive it and then you walk away from it, because we give and take, but it is not as natural as you do yourself. There was never resurrection. He went to take from the P of himself which was on the cross, which was no use for it, instead of waiting for it to decay he took from it to elevate His own soul. he left Jerusalem and never mentioned his own name. (2:48). Because He understood that Man can never understand the message of God, and he knew the punishment was for what he did wrong and He never repeated it. He lived out his life as a common man and died natural death. You'll find the remains of Christ in South of France. With the knowledge you have you can do what Christ did if you are sincere enough and understand the weakness in your structure, that you can take from your P to elevate your own soul and then repair the P, this is what I did with my own cancer and broken bones. The rest, the Pads and all is a magic show because this is what you understand. You asked the question, understand the implication and find the replication. When the pain is so much you detach yourself from it and you get ILS, Christ understood this but he used this in a rapid way to heal himself. He healed the P using the E and soul. (2:50). He said it in one sentence, God forgive them they know not what they are doing. When he forgave it means He received, and in that receiving He elevated the P to the E and to the soul of the man and He walked off. He never disappeared nor resurrected. You have to learn to do this in deep space because there are no doctors to help you. This is my philosophy, the last man standing. Christ was the last man who stood for his correct conduct in the belief of the messenger of the ??? (2:51). And He received. The symbol of the last man standing is the replication of the Creator, you can't do wrong to no one nor to yourself. You can't take unless you are given to have. You don't understand and worried what to do when no medicine, because when you get to that stage He was the last man standing of the cross and there was no one to help, He found His own salvation by understanding what He did to the man who was dead (He raised), because He knew He elevated the soul, He could ask for elevation, but He knew His misconduct. So knowing He knew He

could take from His P at the point of the strength and used it to elevate His soul and He never again did misconduct and walked away from Jerusalem. The rest is made up to catch money from the rest of you and imprison your souls. Ask yourself a simple question, if a man could raise another from the dead couldn't he do the same for himself with the knowledge he had. Yes He did, He had a child and wanted to be the father to the child. He forgave the Humanity for what He could not deliver to them to educate them further. That was His forgiveness. (2:53). [That is a lot to take in]. Christ never died on the cross, He elevated himself. I have done that 3 times and the people around me know, I talk about it openly and I teach it openly, but you have to understand. The structure is to understand oneself and the connection b/n oneself and the rest. I am here on a holiday, I have chosen a 78 year gap, and during the holiday I teach. You call me the Messenger. I am Messiah as much as you're, but I am Messiah for a bigger (picture) you are for a smaller. You are a messiah to your own soul, and if you can teach you become a messiah to the others when you can give them the freedom of their soul. The problem with me is that I know how to handle the Totality, the problem with you is to first learn how to handle yourself then you can handle the totality. I made Man in the image of Myself, which means once I understand myself I understand the Totality. This is the problem and what you have understand, ask yourself ... it requires a lot of detachment from ... (2:55). you have made false promises ... I put to Christ many times, how come you did not show what you showed to the others, how come you resurrected a man but not yourself. the answer is simple, forgive them for they don't understand what they are doing. When you understand the process, then you understand it is the same across the U, has no exception. The Pope will burn me down in everyway possible now that people know the truth. I am not afraid, they can come in shape of Masons, Knights of Malta, Popes and Ayatollahs. We see the truth and shall prevail, because we are part of you and you are part of us. Enlightenment comes from giving and not taking, and we give freely. Understand the process and how simple (easily) Christ walked away from the cross. I repeat for the third time so it won't be denied. If He could give life to a dead man couldn't he do that for himself. (2:57). Instead of what happened to Moses which he learned by going ?? for what they did to him. He knew what Moses did was wrong. He chose a path I deliver my message (I will deliver whereas Moses failed), I am just a postman. If you want to find the blood of Christ look in the south of France. He became a common man and those who knew his teaching were touched by it. Ask yourself where many people do the long walk (pilgrimage road), between France and Spain, why there, this is the path of Christ. He walked amongst people knowing he had done his job. I live the same life. Ask the Iranian authorities, they offered me the palace of Shah in Iran, I said no. We live amongst people not to be separate and different. (2:59).

(3:08). You have to understand the operation of your soul and the weakness of P, then you can promote your own soul and with it the soul of others. Would you like to put your finger on the table and chop it with a sword, why do you do it with the P of another man. We are here not to prove but to elevate. I can keep a lot of this knowledge behind and patent it and open companies. Once he gets attached to the world of P. Many people say he (Keshe) is gathering wealth, you heard yesterday we opened our wealth to the government of Italy. We are detached from P. We live in the palaces of the U, but you are happy with the palaces of the dump of this planet. (3:10). Read the writings of the Christ

in the essence of his E and connection to his soul. If you want to find out more about the operation of the soul ... read Bahal ... It is written for the soul, that's why it is hidden, ... what is to come .. the elevation of the soul of man into the U Community. The only transition book we have b/n the man and the next development is the hidden work. Read it in the understanding of the work and elevation of the soul. The message of God has been with you for a long time, nearly more than 200 years. (3:12). It's the same message give by Christ and Moses but he lost his way, went back to the P of man and has no status. Buddha understood more but he could not connect. Mohammad lost his way not by his own but by his followers. Pleasing the followers brought him the demise of himself. Moses pleased himself. Christianity the way it is now did not exist and it was never the intention of Christ. Understand your own soul the way you receive it, don't look for it in vegetation or the sea fish (? as a Gans), understand your own then you have the ability to convert. In Wikipedia, the parathyroid gland, understand the operation of the conversion of the matter into the matters you need, ?? part of your Parathyroid is for the elevation of your soul and its E, it's the conversion, it's the only organ in your life that connects the E to, and it's responsible for the conversion of the matter state, Ph to Ca etc, metals to the others, man has never understood its work. (3:14). ?? Is the electron in the nucleus of the Pl in the center brain, and when it's misplaced misconduct appears. Understand how and why, don't look to the vegetation or the food, we have to guard, because you are P involved you have to have something to see, but it sits within and inside you. This is the beauty of it, if you understand the work of your own P and the connection b/n it and your E, and the interaction b/n P and where doesn't need the E to interact with its soul, you have managed to understand the secret of the work of the Christ on the Cross, for 2,000 years the man has not understood how the man walks off the cross and that's why they made a mystery out of it, because nobody could do this, since he is gone we can make (write) whatever we want. His disciples watched him healing himself until everything was healed. (3:16). In the process of crucifixion it's the weight of your body pulling you down that tears the organs apart and you die. Separation of the P tearing apart from the E, he could manage to hold it because he knew he had the strength through his E. It took him very short time to replenish because He tapped into U Energy to receive what he could not receive from the food. I can go step by step from the time He received the first nail to the time he landed in France. He lived as a common man amongst common people, and never wanted to be known. He saw the betrayal by His own disciples and the abuse of the people who ?? but He knew what He did wrong that He received this condition, the crucifixion was for His soul to be elevated to understand His P misconduct. And I have said many times not in my time or under my watch, I will never go on the Cross. The Cross is not there for the P of it, it is there for you to become the judge of your own conduct. Does Theology exist within the structure of the Pl, or is Pl the conduct of the Theology of existence? Yes. (3:18). I got that one thank you. Rosy of China wants to ask about the New Hybrid. We are organizing one teaching for the Chinese through Professor Zhu. You got a lot confused about a lot of things it needs direct translation. In the next couple days. You are approaching manufacturing the Energy S in a different way then the rest of the world as I see it. I have seen S vibrating too much, S made with not the right intention, others not understood the interaction of the generators. A special teaching just for the Chinese. I have seen some misconnections and genius things. (3:21). This is an interim (? will be out dated soon) that you can

understand a little bit more, in coming time we develop very small S. We have shown the solid State S, and ??? .. there is a need for all of you to understand the PI and the vibration of the PI and none of you will succeed unless you understand this. (3:23). You come in from a vibration, from the electricity of the pump from the Grid, you come in through the PI and go into the Capacitors, through the Stacker, then you go back to the pumps which is P, and this clicking of the two is your problem. And then you want to take matter state from it. It doesn't link up, you see it is not running, but you don't understand where the problem is. Hints, separate the 2 sides and then when it connects as one, ?? but they still go the old way. But that is the Hybrid one. (3:24). Do you understand the structure of the compressor internally, or you just put it there? I solved this in first meeting, I put the work of the compressor as a generator to the Stacker Unit, if you're not versed in the PI, you are still looking for the generators. When Bernie showed you the loop. Do you see the checked floor, black and white? Understand the history of where that came from. ... The black encircles the white and visa versa, this is remnant of the Masons. Armand will show what he has done, he is still missing a piece. It means a lot of you have not understood the 2 compressors. (3:29). Armand shows his camera. He has configured 2 KF Magravs and a Stacker, and 4 Capacitors. the 2 MaGrav's are connected M to G, (need to go over in details the connections), and he has Split Capacitors, and connected to a motor. I just want you to see we don't need the compressors. The compressor motors one became a generator for another generator. (3:32). If you understand your Stacker is not very far from a generator, there is a change btn the motor, generator, and transformer. if you connect your Stacker Units in a correct way, 22

(3:43). Renan's version of the generator, 3 double coils and 12 Capacitors 1 set regular, 1 set split 18 and 9 ?, and 1 set split 9 and 9. It is not finished so leave it at that for now. It's a MaGrav Unit with Capacitors, there are hidden things in here we will explain later. This is all that is needed to produce 3 to 5 to 10 kw. No more and you can miniaturize it into a laptop or make it bigger, it doesn't matter, what does is how you transfer energy. We will explain in future how we build these special Capacitors that you have never seen before. It only took Bernie a few minutes to put them together, it's a new development in Capacitors. I wonder how many of you will share with us what you have done? (3:46). We are testing Capacitors in such a way that they give 1,000 plus watts. Please don't pressure the Innovation Center for leaks in the knowledge, go to the help line. We will release at the right time. (3:49). Bernie shows the cores that empty in center, but only show for now. (it's very hard to see) but the core came off the motor and they said half of the inner cores water was gone but the outer core remained full. The inner core emptying itself is the same generation of the fields before. (3:52). If you understood the picture with the rotating cores then why do you need the MaGrav generator unit? Or do they become the structure of the frame for extraction of the field in the matter state vibration of electrons, then the process becomes a conversion S your Stacker is a converter of PI into matter state level, and if you know how to do it you find a potential balance in respect to the matter and PI state and then you can drain what you like. In Armands setup when we get to matter state we can drain as much as we like. These coils can easily give you 1 Megawatt, because we are working on the PI transfer on the N layers, which is totally resistance free, superconductor. To the Chinese inside the compressors are

generators. (3:54). If you understand how the windings of the generators are it takes a few seconds to convert the knowledge instead of that big box to a coil. ... the number of wires and connections ?? from each other. By connecting in a right way you get rid of the.. (interrupted). He draws a blue circle around coil #1 (hybrid blueprint) and a green circle around #2 and #3, the blue is the stacker and the green is your generator (for the Chinese). 3 becomes A and 2 becomes B, you don't need the compressors. because the compressor was used only as another version of the coils. We think we have managed to eliminate the starter unit also. ... we may go straight to 15,000 volts in future I will explain. (3:56).

(3:57). tells to be slow

(4:00). Armand show a single coil with rotating center core that's all you need.

(4:06). German man's son got autism from the vaccination of Measles, Mumps, and Rubella, and anybody who has stood against it has been killed or imprisoned or told they are demented. The damage caused by mercury in the injection. Try feeding your son 3 spoons of Gans water of ZnO<sub>2</sub> CO<sub>2</sub> for about a month and let us know. You have to wash out the mercury and balance the positioning, use straw to breath through ZnO<sub>2</sub> and CO<sub>2</sub>. 08 40

(4:21). This is Paul of Togo understanding in this presentation of an Health unit D7. It's kind of a mix btn African and Indian Chakra and energy systems. (4:35). Keshe says this is not going in the direction of what we wanted to teach, you are stating a lot of things as you have gathered with it (your understanding), I don't know where you are going with this. Paul says we are just giving this as background to allow people to understand first, then we will discuss according to PI T. (4:37). Starts talking about Gans and Alpha units. First is Pineal glands, 2 ways giving and taking, one side CO<sub>2</sub>, CH<sub>3</sub>, ZnO<sub>2</sub>, the other side CuO, CaO and Mg + D3. Keshe says he sees things that are not correct and asks him to stop. (4:39). There are things here that are not fully understood with our work. (4:43). Chinese shows a box with Capacitors to replace compressors. (4:44). Question asking Keshe what is the barrier in my soul that keeps me from reaching the point you have reached. I don't know. Is it my diet, my understanding, what? In so many ways its the understanding of your own operation of your existence. She asks about Bahala's book translation into English, what are the meaning of some of his passages. (4:46). For those who don't know about the history of the religions. For example, the writings of Moses was written years afterward and was what they could understand. Same with Christ it was written years after, even though we have testimonials from disciples and then it is fitted the way it is. Mohammad had some of his work written 40 years after his time. Bahala is the only one who has written and himself corrected his message, so it's the first time we have hands on writing from what we call the prophet of God. There is some credibility in that way it is not tinted with other peoples saying. ?? ... there is one part of his writing that goes into the connection to the soul, and it is called hidden, because the soul is hidden from his P, that's what hidden works means. If you understand then it is no longer hidden and you can read it in the language of the soul. I never promote any of the religions but I do the acts and behavior as a prophet, by the man who made a decision which way to go. (4:48). You have to read the writing in the

behavior of the soul. The only part which is the elevation of the soul to understand the coming of the Messiah. I can go verse by verse, but it hasn't got, even the Bahai's don't understand it, they memorize it without understanding it. If you understand it from the soul, a lot of understanding is given in what is to come, how you can connect and what is in there (he's not being very clear ?), it is not to do with the P life, much of it is meaningless to the P life. We don't have that kind of detailed writings from nay messengers of the past. It's all that has been said at latter time. And what was said and changed to fit some people. ... I read the Torah as child and couldn't understand a lot of it, what was the reason for what was said or was it changed to suit some (people). (4:50). This is the problem, I mention this because it brings the understanding of the soul to oneself, it is not for anybody else. It's the first time you have to understand the station of your own soul, and to reach that point. I don't agree with a lot of writing of Bahala because it is written in a way that fits the time it was written 200 years ago and not the present time. I don't agree with a lot Mohammad but we respect the station of their soul as a prophet. 50
