

137th Knowledge Seekers Workshop Sept 15 2016

(Report on Universal Council in Rome, Result in Peace talks US and Russia over Syria, Explosion of US Rocket, Hillary, All the Reactors built around the world only need to be connected by a small reactor and Zn for world peace, Hot Glue FIRE HAZARD, AIDS cure, Changes to Capacitors, Gans can't be dissolved in Acid it changes)

(:06). Sandi presents on Universal Council and the meeting in Rome. The visions expressed by members. The rocket that blew up recently was carrying technology to knock out nuclear capability of other countries. Next conference April 7, 2017, in Rome. (:24). Keshe comes on. (:26). We started UN after Second World War to stop te abuse, but over time we have seen the UN become the abuser and sanction certain wars, Iraq, Libya, etc, so it had to be stopped. UK carries around 40% of the votes pressurizing its Common Wealth members. So setting up the UC on language basis we have done away with borders. (:28). He talks about the rocket that was intended to use fields and communication to destroy nuclear warheads in Russia to force them to submit. Similar to what was done in Hiroshima. We warned you in our talk in Washington and now we delivered, we will stop you, the UC is not yet mature enough to handle these situations we will do it until you are ready. (:36). Warning to China we gave you the same chance as US, you have abused our trust and we will respond, very direct. We support the joint use of T of Russian and Chinese forces in the South China Sea to show the Americans, but it must not be abused but used for peace. We will interfere to bring peace. As with the rocket no one was harmed, if there would have been a cat we would have removed it. We carry on with our plan, we have to be correct in making the way for peace. People who made lots of money by working out of their garage (? Apple), now they think they can finance and control nations. We will handle them one by one, and don't say it was an accident, we warned about the rocket in Washington. (:39). There shall be no more accidents. The next meeting will be held in Rome, because it is safe for us and we bring the ancient Rome into tack with the new science. As we go hand in hand with the science and the strength of the soul. Everyone has to go together science and belief, if you have the science you can see what is true, and this is what is needed when you travel in the depth of the space. We announced the first scientific conference in Ghana, it's to show and submit papers. (:41). Every quarter a scientific conference will be held across the world. We have to do this, because hundreds of thousands of you have done a lot of work (with the PI T), you developed new sources of food, (energy), you are a professor, you are the ones we are doing this for. If you can't write a paper bring a presentation. You are a housewife and you found a new way of producing Gans, we invite to present. (:46). ... a few came to disturb but they saw the armed police and backed down. Governments are supporting us heavily. This is no place for misguided people. The first batch of the Gans trial for reversal of cancer has started. (:53). We are working in the background for universal police force and bank. (:57). We will work 2 weeks a year, and I want the rest to learn etc. Why should you work 40 hours a week for the others to have a better time (elites) and for you to suffer, that will all change shortly. If we have no time to spend with our loved ones where will we learn about peace. This is why we are interfering with the past structure. As I said last Thursday in my talk, 9 - 9 - 9 is the last number before you go to the One, and we started the One on Saturday (the UC). It's a new condition and it is us who has to force it, to do it. The scientist's in one of America's leading technology

said, 'we can accept Keshe's T but he is involved in prophecy, in religion, in ethics and this doesn't go with the science'. Now the two come together, unity of science and religion this is what we are targeted at. We will achieve it because we are correct and it comes from our soul and the P of paying someone to say yes. We act and in acting we deliver. Thousands of you are making the Gans, etc. (1:00). This is not preaching we are laying out the new laws for humanity and our wish is our command. There is a high possibility that you will see a joint conference of religion and science across the planet. A lot of you asked why I spoke about Hillary last week and US election, there was a reason. I was captured in Canada for 11 days and each day they told me and my family that I will be killed, a bullet to my head, and I watched each day as my sister was crying and begging them not to kill me, they said to her if she talks about his capture they will put a bullet in my head. I asked the man who was so proud to threaten me with death who is responsible, he said, "you speak to the US Secretary of State Hillary Clinton, she decides when you will be released", then I knew I was under the control of the most violent woman on the planet. I didn't do anything. (1:03). Strange enough her boss decides to get the KF USB Stick with all the patents and knowledge on it. And strange enough the same woman takes a flight to Iran and crashes and she actually got the "bullet in the head", brain hemorrhage, and now we see the result of the election in US. (it comes around), our mission was peaceful and theirs was violent. (1:05). We have to understand the science of the new knowledge, and the limitation of where our knowledge will go. Look at the Globe being shown on the web screen, those white dots are like the MaGrav reactors being spread across the planet. Now we teach you how to connect them, and help you to create PI in an order of magnitude needed for PI T. ??? when you create the PI then all the white dots you see on the screen (across the globe) will connect. All we need is to allow the master to play his game. (1:07). Because all of the fields will connect to each other and emit what we were after. (1:09). He draws a single S on which all the S on the planet can respond. Many of you have built Gans, Cores, coils, PI etc. In all your products you have this in common, C, Cu, Zn, and somewhere you have made this as well COHN (AA). The first 3 have connected to the AA, and every being has AA in it. If I want to interact with the feeling I need the Zn, ... mixing Zn with AA which effects in a natural way the E of the Man. With just a small S we can connect to all the S on the planet. Many times I have said that when you make a coil pray from your soul for the S you make. In the process of making the cores and coils add a little of your own AA to it. (1:13). You pray for S that you strengthen yourself and your own P. In fact you are opening a bank account for yourself, and when you call you cash in that bank account and your wish becomes your command. Knowingly or unknowingly we have made you to walk the path of peace. One way or another you touched the Gans or N, you came in touch with the P of energy of the U through these Systems, even if you bought a MaGrav S we have touched you, we need to change your ethos to peace and that is what we are doing through these reactors. Even if we went to full automation to try and eliminate any AA, which comes through the touch. We try to tame you before we let you outside to bite the others. (1:16). Because one rotten apple can spread across the whole cart and destroy the others. It has taken a lot of work to keep the peace in the U, we will not allow man to spoil it. Now you can see through the picture I have drawn how I can reach you the way I want, we have the capability to spread the E and thoughts. I have a very bad news for you, we are developing, building the S to reach your soul. Now you see how easily I have brought all

of you to become man of peace even though you have aggression. (1:18). Questions. The lady says if I have Zn Gans in front of me and I concentrate on you I can change your E? Why not as long as it is positive. You can't do much damage because I take what I need the way it suits me, this is the beauty of it. We change everyone at the same time then we get what we want, peace. We are just about to interfere with everything we want, with things that man couldn't imagine that could be touched. I have no choice, your intention is peaceful and theirs is different. Then you'll understand that no one can touch another unless the intention is peace, which means bringing balance b/n E and P. We have left these things in the hands of the "animal". (1:21). How much more bloodshed? ... (1:25). They have taken the confidence from us that we don't even believe we can make the change. (1:28). Paul of Togo asks about that we were taught never to let sperm go out of the body if we are not going to make children, they taught us how to transmute the energy, is this a right teaching? I don't know, we don't make decisions on what people can do or not, the structure of the man is the intention of the man. The P teachings of the past are over, if you understand the reason of the teachings of the prophets of the past, if we believe the teachings then we have to abide by it. (1:31). (1:32). Discusses the lady who had AIDS and now he got the tests back. (1:41). Keshe says to take her to another doctor and have him to test for AIDS, and write a paper on this. (1:51). He used ZnO₂, CuO₂, CO₂, ... (1:53). Keshe explains, AIDS is a virus and very strong energy pack, it is the stronger and it gives its energy to the weaker CO₂, CuO₂ etc. (1:59). Benjamin discusses his methods of treatment. ... (2:01). he adds 2 mls of LP ZnO₂ and CO₂ and add to 500 ml bottle of water, take 2 spoons 3 times per day. (2:06). Keshe says he'll pay for the AIDS couple to travel to Ghana Conference. The power generator will be shown in Vatican and Ghana Conference on 20th, at the same time, and may show the flight S. (2:12). (2:16). Rick reads Peters letter about the UC in Rome. (2:23). People are deciding for themselves to bring the change. We have to understand what we have already received, it's not a matter of learning more. (2:25). She tells a story ... she asks if he understands the story ... not really. (2:28). He tells a story, about a father who gave all his wealth away but not to his children, .. it was good because all the bad deeds the ancestors did to get that wealth doesn't go to the children, they start fresh. When we go into the space are we going to carry all the bad past from the earth with us, we want to go with a pure soul. Those souls that were hurt for thousands of years can through you become equal and balanced. You always pray for the others to bring balance, then that is the time the space will open up. There is no sense leaving the past behind unless you can bring the suffering to balance. (2:31). We feed the suffering to the soul from the time of its birth, now it's time to free the soul, that all the souls as one soul move on. It's no use having a painful toe that the whole body has to limp because of it. You said the ancients used pyramids to bring peace to the planet. The picture you are showing of the MaGrav and pyramids have big meaning for those who work close with us, in time we will explain. ... all the lights on the globe (MaGravs) it needs a top, if you understand the SF, star formation. (2:34). He draws a SF, the fields cover everything, but what is important is the flow of the fields, they all get mixed up and brings balance to the others. H sits on the top, it's the position of the Creator, humble and knowing it receives more and it can give equal to all. It doesn't need much strength because strength comes from receiving from those who have, ?? for it to be the center. There are other flows then just from the bottom to top, there are out to side flows. The only time there is a balanced flow when

they all flow out and then come back in. ?? All the crimes of humanity come back to the U ... (2:37). Q: whether we can weld the connection on the MaGrav and the then N coat. When you weld you still have an interface, the PI flow changes on the point of interaction, you create a slightly different energy at the point of interaction. When you twist the wires you share what needs to be shared, they take and they leave what they want from it. (2:40). You all are making these pins for the center of your Capacitors and you turn the end back on itself, what if you left it open, are you open to receiving energy from the U, would it make a difference if you make the connection on the opposite side. What about if you twist the Al foil back on to itself on the ends, that it holds and absorbs all the energy, you'll hold more capacitance because now you feed it back onto itself. It's a much more stronger capacitor. You have to think what that connection gives you, what if you made a MaGrav coil with an open end. (2:42). When running trials if you put the control right next to the Gans crop it actually also has an effect on the control crop because it's so close to it. The same, everything in the room of the experiment has an effect on it, even your E. (2:44). The proximity of the material has interaction. I am going to shock a lot of you, do you remember that S "beam me up Scottie", very soon you are going to see one, but where are you going to land it Scottie? Armen lost 2 (Gans) balls, others lost balls. This was a tele-transportation. Those in Pacific put Zn in your reactors and see how many Naval forces will walk off. We saw in the 60's people marched and would not go to war. (2:47). If you understand what I have given Paul, and what Benjamin told you, you have the same power. But the wish of peace has to be there. You have the tools to paralyze armies. You made all the materials to escape the earthquake, but the present disaster is the war. The "earthquake" is really the Naval forces and military aircraft. The earthquake is to stop the Naval forces. You have all the tools of peace, the conference was just a show. (2:49). Set a time for all those in China, Philippines, Australia, to put Zn in cores and run them and WISH for peace, all the Naval Officers will walk off. ... I have infected the humanity with the PI T and I don't need to do much more. ... he tore a muscle but no pain because of the CO₂ and N materials, because of the C connection in the CO₂, the pain doesn't transmit itself. (2:57). Because it's an energy information, it doesn't transmit it balances itself out. The same with N for amputations. I broke 10 bones from falling off the horse, I didn't feel any pain. If you get a burn spray CO₂ on it, no pain. (3:00). He shows a new Pain Pen he built, he has a light in it, light is the central nerve it goes through a Gans. (3:03). Ali was extending the hand of peace to the group who lost the launch, and lets work together to build a Spaceship. What is importance of today? Tomorrow is 9/16/2016 in Jewish calendar is known as the point of change, we are expecting a talk from some of the world religious leaders in coming weeks in respect to the structure of their beliefs. (3:07). What is the shiny stuff, glue, what is on the Capacitors, Hot Glue. It is a FIRE HAZARD to use these hot glues on the capacitors and coil wires. We know a couple of fires have started because of them. You are carrying a huge amount of energy and you can set your house on fire!!! (3:09). It doesn't matter if you plug it into the wall or not, it's a capacitor so it builds up energy. He made a ring of 12 capacitors in parallel, and 2 coils in center, in tubes with Gans and water, it's based on Tesla. (3:20). Stephan made some gold Gans and puts it in his health cup, says it feels good. (3:30). Bob speaks for the Chinese. There was a mistake in the blueprint, you come from the power supply to the + of the Capacitor and go out the - of capacitor to the Stacker, this is wrong. It should come into the (-) of Capacitor and go out

the (+) into the (-) of the MaGrav. (3:34). There could be a mistake in the MaGrav connections in the blueprint. ?? You come from Grid to the 4 Capacitors and then to the Stacker, there shouldn't be any other capacitors on the Stacker. Please remember the CAPACITORS are made in a strict way, ?? you may go up to 3 or 4 Nano, CO₂ .. fire coat Cu plate and dip in cold water you get N particles, you need these for the Capacitors, added to a gel that has NaOH in it. This will be added to Blueprint. How you roll the paper, you put this on Al side and lower on the paper side, you can put the gel with NaOH on paper and then CuO₂ with N particles on the Al foil, let it dry that you can't scrape it off, it joins to the Al fuses to it and gives high capacitance. (3:39). When you use the Compressors one has to be much bigger or more powerful than the other one (1:2 ratio), not the same, then you get a condition of flow. The line from the Compressor to the Capacitors has been taken off. Armen discusses the mistake with Keshe. (3:44). Back to Chinese, he put 4 capacitors in center of Stackers to replace the Gans balls. (3:50). You have to allow the S to reset itself, to operate in the new manner, how you position the 2 compressors will effect the performance of some of the S. We are trying to replace them with Solid State. You can add more infinity loops. (3:53). Question in Chinese Group about drinking too much CO₂ Gans water, it may have too many heavy metals that effect the health? When you make the water there should be no metals left, take only the top water, where would the heavy metal come in, you use only Zn and Cu. The top water is very pure. It's in a Pl condition and it doesn't interact with the body, it's in a Gans state or monatomic state which doesn't carry any structure with it. Quantity wise we don't advise more than one or 2 spoons a day. The question about sea salt Gans, it carries all the minerals but also all the other things in the sea which we don't need. Would our body take from it or reject it??? The iodized salt has been added. You are using the water of the Gans so if the body needs it, it will take from it. (3:58). If you eat processed foods with different chemicals the body stores some of it in case it needs it later. If you eat say 100 grams of a fruit that the body needs for the day, if you eat a kilo of it then the body has to work to get rid of the extra food, that creates and takes energy and it's one of the best ways to loose weight but it is done in a specific way. With the Gans it's the same way, the body only takes what it needs and the rest is rejected. When you take solid Gans it attaches to .. it absorbs a lot of energy ??? heavy metals .. but if there is a need for that then it gives it also. So your body doesn't hold on to what it doesn't need and finds a way to process it, and especially in the Gans state ?? it rejects it. We will show data ... that's way it was so successful in Fukoshima, that's why they found that the radioactivity that came out of the body was equal to what they have injected into the mouse. The rest doesn't work it's non-toxic, there are a lot of rumors in China ??? (4:00). Is there any way to test the Gans, you said before that the Gans can be dissolved in a strong acid, they tried that and some of the Gans disappeared? That is not Gans, we tried that we know that. we tested it, part of the process goes in the matter state and part in the Gans state, and partially the acid itself creates a condition for the Gans to convert to near enough the matter or energy state. Just because you put acid in there, you separated it, the Gans in absorbing the energy creates the environment which can use part of the Gans itself, it doesn't dissolve in it, now it has taken a new stage or state. What it means when you add acid to it, the acid takes or saturates what it needs from the Gans, it doesn't dissolve it, it's like another virus it takes energy from it. You have to understand the process, what kind of acid, what kind of Gans, and what is the energy transfer in what condition. It doesn't

dissolve, it's like what we saw in the tests (Gans balls rotating) we saw the center cores emptying, it is not emptying the energy is transferring in the Gans, into the balance condition of its environment (4:02). Inside is pure PI pure field. Translate the knowledge the way it actually is and not in somebody's own interpretation to fit what they want. For the Cores, if you want to add acid to Gans in cores to raise the pH you should find a Gans that is low in pH and add it, you don't add Sulphuric Acid to it. You can use food Gans that are acidic and since they are in the Gans state it's already adjusted. In the Gans state you don't lose the matter, it means the environment you put it in needs the energy of the Gans for it to come to balance. What is left is what is not needed after the balance is reached. If you add more acid you'll find the rest disappear also. It's an energy transfer and not dilution. (4:04). end
