

## 151st Knowledge Seekers Workshop December 22, 2016

(Testing of Gans completed it's nontoxic, Is there a God?, John shows some videos on strengthening M and G fields separately, Back EMF and Eddy Current discussed in terms of Plasma's hidden fields, )

(:07). We are adding to the knowledge on a continuous basis and the expansion of the knowledge has no limit. Usually on Christmas we unravel some secrets of the knowledge of the creation which leads to the creation of man on this planet. (:09). The testing of the Gans has been completed and it is proven to be non-toxic for ingestion or injection into the body of Man. But understand that this is a bandwidth test and that which was tested confirms. We have entered phase 2 of the cancer tests and they have shown immediate results, within 6 hours of entering the body we have videoed the results and will receive a report on it. The Gans material destroys the total cancer cells and is more effective then Chemotherapy and no side effects. A new development, we can produce specific Gans' for specific diseases and we see the same performance. (:12).

(:30). This changes the whole spectrum of the science and opens a need for more understanding the structure for the creation of the cell. It brings a new dimension into application of the T. I will open a new dimension in the teaching. One of the secrets of world has been his own creation. How did life start on this planet and how did man become man. What is the process of creation. Is there a God? Or is the creation of Man a natural process and the Man through his own weakness created a Creator to submit himself to a higher level and that he doesn't understand the totality. In the creation anywhere in the U dependent on an extra or additional Being for it to be created, or is it a random process, that when all the randomness comes to it leads to the creation of a being. (:32). depending on the environmental strength. This puts a very big question mark on the existence of man from a Creator. Buddha understood part of it, but not the totality of it. The reality of the Creator goes back to the very beginning of the teaching. ... the creation doesn't need a Creator, it's the condition that leads to the created. Let Jon show videos first. (:33). John shows videos. We are trying to isolate the G from the M fields and play around with amplifying each one to see if we can increase the overall field size. The setup is 6 coils in the middle and 12 outside with the G coated with Acidic and M with Alkaline. (:38). We think we can create a toroid out of these 3 M and G. ... we wired the coils G to G and M to M. We think it will be a bubble with a toroid in the middle. (:42). Keshe is back. You can see that we can go further with this development and adjust the fields. (:44). We can strength the G and see how much it gives and takes. It needs to be more realistic ... when you turn a magnet on its side the gap increases 3 to 4 times. When you hang it in the air and let them swing against each other you'll see the expansion of the field. We have asked John to lift these off the ground, where the M are held at 2 points only and the rest are free, then we should see an expansion in the field strength. (:46). This is what we are dealing with in the atomic molecular structure in the cell of the cancer of anything else. We are coming more and more to the dimension of the real condition where the cores like the SF hang in there, but this time we don't create rotation, rpm in the motors can be changed through the voltage, potential difference. This way we don't need high speed rotation, ?? can control G and M, move the power unit inside the S and then we come to a more realistic operation. This is for the flight S but at the same time applies to the Health application. We said this before with Klaus, that you can tune each core, its M and G. How life came to be on this planet and in the U, some of it you heard but now we bring everything together, then we complete the body and life on this planet. (:48). John how high of

voltage have you applied? The 2 power supplies only go up to 3 volts, but the transformers go up to 70,000 volts. They amplify the fields, just by the power supplies we wouldn't see much. These transformers are Post Transformers and not continuous, they create a pulse voltage up to 70,000 v. But the most important part, when one unit is at 3 v or 0v, (:50). and when one is at 70000, you see the expansion. ?? at one point you switch off the power supply so its not pulsed ?? on one branch and at the other point they changed. This is exactly how the body operates, these are pulsing transformers, mimics the body, the heartbeat the frequency. That's why we see these behaviors, when you go to 3 volts it's very little, but you still have a field. When we show you the upcoming generators you'll see the expansion of the fields 2 to 3 meters beyond, very powerful. The new generators behave very much like the body of the Man. They become a source of PI, we can expand the units ?? and make it wireless, with a very high balanced PI energy. The knowledge from one part is adding to the other. The field is very low without (?), which means it is at rest. Do you increase high or low pulse or do you create .. (:52). if they manage to tune the pulse b/n 2 fields you'll see zero shielding or field around. One of the reason you see when they switch from one to the other the change of variation, is because these 2 transformers are not synchronized or one has a slightly different voltage. these things can be explored further and see how the change comes. How can we change the M to a G and then link the M to G to bring balance to itself. Q: is this related to back EMF as in flow of electromagnetic system? We are going back to the same thing that we said before, confusion in the W of Science's use of language, they call it back flow, Eddy current, what else do you want to call it. It is all the same. In the WoS, now that you have been educated, there is nowhere a forward movement if there isn't (at the same time) a backward movement to support the forward. In the present WoS with the Newtonian Laws they say that a force has to overcome a point that the matter can move. (:54). In the World of PI such a thing doesn't exist. In PI you have to receive more in order to be able to give. Newtonian Law looks at the solid matter state, while PI looks at the reality of interaction and this is where a lot of people get confused in trying to understand the PI T and electromagnetic field and current flow. In a way we use the same terminology for the same thing, back flow and eddy current for G field, it's the same meaning and terminology. The WoS has created a confusion in the use of language. You can call it whatever you like, back flow or eddy current, call it what you like, it's what has to come back much stronger that it can allow you to push forward with it. Now there is no confusion. In PI T for us to move forward we need to receive in order to give. That's why in electromagnetism when you measure the back flow they are higher voltages. Professor Miles calls it scalar waves and his argument is that, my S is better than Tesla's, he couldn't ?? pass file a cage I can. (:56). Because Tesla gives, giving is weaker, receiving pushes through. I always said, ?? scientists one is Tesla the other Miles, scalar and back flow are the same. That's why it goes through the Faraday cage because it's stronger, it means to come in to be able to give. I had the privilege to meet Miles and when you are speaking to him the ?? is the same thing. Without Tesla's forward ... there is no Miles backwards .. because it needs Tesla to push forward for Miles to receive the scalar waves. And this as a scientist is blind to it. ... whenever we see a condition we have to determine if it is coming to us or going away from us. If it is going away it means its a weaker strength, if it's coming it means its a stronger and I have to find a weaker side. If it's going away (it's weaker) and I have to find a strength that allows it to go back on its strength. The creation of every cell on this planet works on this (principle). It's just that do to the time we have as a race we have chosen different ways to understand different parts of the science by creating different names for it. (:58). But in principle the whole thing is the same. If you

understand in the cancer cell how much is needed, they have found a threshold there where ... we have to wait 6 hours to the second with a specific Gans to see specific cells change. They don't destroy the cancer, I wish I could show you the pictures, it's absolutely amazing what we see. We have to find the switching point when the field changes from M to G, and what does it become when it changes to G, because why does it become stronger. It's like what I said with the banana, you can't eat the skin (M) of it but as you peel it the stronger part is the flesh inside which appears. ?? The skin is weaker in whatever it is supposed to give, but as the center (flesh) as it appears it becomes stronger (in fields), so one is needed for the other one to manifest itself, the skin can't exist without the banana inside, and the banana can't exist without the skin outside. Every fruit has this balance, that's why you have the skin on any of the fruits. the skin is a feedback, it's the M, **sorry it's G and the center is M, and then visa versa in another layer, where the skin becomes M and the center becomes G.** (1:00). This is the confusion that was created when we explained the first MaGrav coils. For the cycle of life, which means the repetition and holding onto needs a process, where one strength matches the other. In the very early teachings when we put 2 magnets on the table, why do they move, what is the distance, it's where somewhere in the center the M of the stronger loses enough energy that it becomes the G of the weaker, and then on the other hand the M of the weaker, in traveling it reaches a point where it absorbs enough energy that it matches the G of the stronger. This is where we see both M and G ?? on 4 lines .. they coexist ?? the way it is, even as a field is moving, the exit pole from the weaker side to go toward the stronger is absorbing energy on its G skin, that's why the M moves and when it reaches a point that it matches the weaker side of the G pull of the stronger. Without it life doesn't exist. (1:02).. no star could position itself, not could earth position itself in respect to the sun. We look at 4 M and G fields but in reality, in the operation there are 8 of them, because at the same time as each one is moving out to a new destination, as it gives it's also taking to find its balance. When we show the M field of the exit point of the magnet planet, it's not just that its M is going, you have to see what the skin is also absorbing that it increases so that the ?? field can go further that it can become balanced at the point to the strength of G field of the destination S. This is how we deplete energy from cancers using the core S. .. Understanding the creation and what needs to be created. Go back to when we said, you have the Sun and the Earth, we have in this process the creation of the fields, he draws the exit and entry fields of each, where the position is dictated, draws a circle around the crossing point of the 2 fields. ?? (1:04). On this layer you have the M the same as the G leaning against each other, where there are 8 field forces existing, but we only consider the ones which are moving forward to the other. Without these (hidden) forces the forward forces couldn't operate. It's like when you drill a hole into a piece of wood, you go through the wood but you have the chipped pieces left over in a matter state and we collect it as a dust. In the world of MG fields the "dust" are the fields gathered on the back side of the forward moving fields and by collecting them the overall field strength is increased at the point of (inception) interaction between the fields, it reaches the balance of the other. But because we don't see it we don't consider it. In the matter state we collect the dust, but in the Pl state the G field strength which the M is coming out of is collecting the energy and that is how it increases itself and that is why it feeds back on it and when it reach the G of the other the balance is created. This has never been understood and I keep on repeating until one day somebody understands. There is NO wastage or leftovers for someone to come and collect the dust. The S because it is created out of itself also absorbs its own residue which becomes part of its G. Look at the Alek Beads and the MG coils, we have repeated the same thing, the feedback (loops) are collection

of the residue, which in the matter state after drilling we throw it away. (1:06). When we cut through a mountain we have a hole going forward and we discard the dirt that comes out of the tunnel. But in the world of PI, because all of this is created out of the same self (it's the same material). We always said that the PI is both M and G, so as one loses the other one gains because it has somewhere in its spectrum part of what the other one is releasing. This is how the WoS and PI work. And up to now it has always been discarded, we only looked at what we gained, but we can't go any further unless we collect what we already have destroyed and ?? part of it. We take the energy of the other, so if you take all the dust and put it back in the tunnel, ?? it is made. Now it's not there but there is more of it for the G to feed on. When we go more in-depth then the science of creation becomes more pleasurable. When the field forces of the planet and the sun interact you create the materials of the planet, N, O, C, H, and huge amounts of He are produced in the upper layers of the atmosphere but through the centralization and the compression of the M and G fields, of the vacuum or lesser strength, what we call a vacuum it converts itself to the field strength of the H and energy for the production of O, or C where the N as a centralizer releases the energy needed. The life of the Man starts in the gaseous part of the planet. (1:09). The gaseous part itself radiates and receives, it is created out of the inner structure which has a field and matter state. The same process which we see in the interaction of the 2 field forces of the earth and sun, now appears and takes place b/n the PI fields of the earth and the materials which are created, this leading to creation of the gaseous part, interaction of the fields with each other called the AA. The P part itself has different structures the outer solid part and the liquid part, which are the oceans and seas. When the gaseous part, the AA, interacts with the solid part a new kind of life is created which is blind to the science of Man. (1:11). In the future we'll explain. In the interaction of the gaseous part, AA, and the water part we see the creation of new interactions, according to ?? interaction, a ?? cold partnership, whatever you want to call this, takes place. We have the AA and the water which itself has the possibility of creation of weakening or creating a field strength of this S. The AA enters the water, it no longer in the free space of the gas motion but in a thicker interaction of the MG fields of the water structure. Remember the water on the planet manifests itself as a matter state in respect to the MG field of this atmosphere, but in reality because it's in the PI condition of the Solar S it still behaves in a Gans state in respect to the strength of the Solar S MG field. (1:13). The waters in certain and most parts of the seas are like in a CO<sub>2</sub> box of the U, or of the planet. (The solid part has created matters for itself and ?? they liquid part are soluble ??) , like Na and therefore, the salts of the seas in the presence of the water gives you the condition of the CO<sub>2</sub> box. The Oceans are like a Gans pot. You know that you can create certain elements in the Gans pot depending on what elements you inserted into it. The rains and storms wash down solid materials into the oceans, the rubbing of stones, gold and silver comes out, Fe, Cu etc, this pot has millions and trillions of particles. You have the saltwater, AA, and N state Gans particles, say you add Zn to it, then in another part the same thing comes NOCH plus H, (1:15). then you add Cu to it, ?? 2 similar to each other, easy to make the link, you have AA of Zn and of Cu. The 2 entities entangle and the life forms in conjunction. Somewhere else interaction of AA with the saltwater, with the addition of what we had, Na and also Fe leads to formation of Hemoglobin. A ?? magnetically formed ?? in respect to the earth's magnetic field. The only entity which on the solid state of the G field strength of the earth creates levitation. In the interaction of the Zn and the Cu, now you find yourself in ?? circulation of the flow of the fields, Hemoglobin or blood. The protein on top of the Gans boxes is flat, in the interaction and creation of the field of the PI of the hemoglobin. (1:17). It becomes encircled. You

see the Zn and the Cu, this is how blood vessels are created. This is why blood flows in the body, due to its MG field forces in balance to Fe keeps its levitation in respect to the other fields and once it's created it's self-sustaining. It means you can take man to any place in the U and this property is inside the structure of the human being in its MG field strength, that's why when you bleed in this environment the blood solidifies when it comes out because it's a different strength. The adding of different field strengths makes heart and lung tissues, brain cells depending on the ratio of it, on the salinity of the salt, what kind of salt exists. Now the game of life starts. The question is, if you understood this, is there a Creator or is it the weakness of the Man in his own creation that has brought him to the demise of the creating of a God. (1:19). I made Man in the image of Myself, if the man is strong he reflects my image as strong. How did the creator come to it? Did he come and measure how much O, N would be in the atmosphere, or how big a field to create. Is the Creator the limitation of Man's understanding of his own creation? The reason I teach this way is that when Man understands in the depth of Space the limitations of his understanding then he can't be abused. Then the Man doesn't believe in fallacies because he can analyze and understand the condition. When you are in deep Space and someone tells you I am this and that you can analyze how is this guy created. Can I repeat it and understand his ways, then he is not the Creator, but it's my weakness which allows him to be. There is no abuse if you don't allow it. Religions are the abuse of the weakness of the Man's understanding of his own creation. In one page I have explained the whole process of the creation. (1:21). from fields to Man. Is there a Creator? This page (what's on the screen about AA) is the history of Man on this planet. This is the history of creation on this planet and it replicates itself anywhere in the U. Now go back to what John showed, adjust some fields, create different dimensions of the strength, then you'll find the MG field point absorption of the crumbs becomes the liver storing the leftovers, creating fields inside itself to be able to be balanced to Ca, Na or whatever else. Liver is the storage, the warehouse. You create a S that those (cells) that pass by and are too weak they need to be extracted (from the blood), you call them kidneys. As you take solid matter (through the digestion) at this point ( large intestine) you need (to be able to convert what you extract from the food back into the blood stream), if you block (the process) there will be nothing more coming in (constipation), because life finds its balance. You have created the Large Intestine. Another disposable unit. You have stored energy in its operation to know what needs to be done in respect to what. You have create a computer center. (1:23). by different strengths of MG fields of salts in different (ratios) of salinity you have created a computer , the brain of the Man. Then you have divided its control in a way that the central computer has little substations can do their operations and reporting now and then to the headquarters. You call it the glands. You need to run this operation through electrical fields and current control S, your wiring, dealing with the matter state of it, you call it blood circulation, if it deals with E and works with the central computer communication lines. You call it Neural S. You need to be able to make the S mobile that it can have access to ?? that it can regenerate as much as it likes. You call it legs and arms. There is nothing to the body of the Man, it's a mechanical S which has seen how to adapt itself to its creation. If you change one of the MG fields of one of the parameters of the body and you can get man to live anywhere in the U. He will still be in the E of a man but P as that of the destination. The whole S needs concentration that the P, E that is the control S, are operational and receive the same amount. You call it the soul. (1:25). A central energy for both the P and E. Is there a Creator? Does a man have to be fooled with a Cross or a Star of David, or Moon, to confirm the weakness of his understanding of his own

creation. For Man to become strong enough for what he has learned in the depths of space he shall not be used (abused). To be a Man of Space you need to understand the reality of the space, to understand the whole process that you won't see any Churches, Mosques, etc. anywhere across the U, as you understand the Reality. By being in that position you see a bigger picture of the creation, of the whole U. ??? by changing a little ?? you make the life vertical or horizontal, by changing one of the parameters you make it a dog or an apple tree. (1:27). If you slightly change another parameter you make it a cat or an orange tree. The reality is that the fundamental understanding of the creation cannot be changed. Did an apple tree exist a billion years ago, or due to the changes of the atmospheric positioning of the planet allowed the creation of the apple. We need to understand the process in its totality because Man is about to enter into Deep Space. Partially some have, but do not be fooled and taken as a slave. I will take Man to Space with the full knowledge that he will enter the UC as an equal partner and not as a subordinate. Therefore it is fundamental that Man understands this process that he doesn't become subordinate to the others due to his own lack of understanding of his own creation. The fundamental point is to understand what gives and what takes, what allows and how much, what creates a condition of an interaction and when you don't see it, where is it, that it doesn't become a magic. (1:29). When you don't see this return line (the hidden fields we call back flow and eddy current), but if you find the return line and understand the process and strength of it, there is no magic. The life of the U is very simple, it's an (Infinity) Loop, and nothing else, you see it very clearly, it means the existence of the both, one on the strength appears to be of the other, Yin and Yang, Yang and Yin, each one connected to the others and has to bring balance to the creation, and there is no point of change. The exchange in strength to whatever (is needed) to become balanced and accepted by the others in the field of the attraction. The science of PL in its entirety is, let's say understood by 60% of the Chinese Culture. And those who follow it see a lot of things, pathways, passage through (to ) other points. (audio broken ) is par for the game, we don't see that what we have received is what we have put out. We are always out of balance in our judgment. (1:31). Be it on every level, because this way we can be abused. When you don't see the other hand putting the money in the pocket when you are playing magic, then we think the money has disappeared because we didn't see the move, because you were not at the visual strength to see when the hand went into the pocket and left the money there, you only saw the empty hand. It's your job to find the pocket, when you understand the pocket is there, you understand the full circle. The creation of life in the U is as simple as ABC, it's the Man who misses the B and just see the A and C and wonders how it has happened. When the Man doesn't see the link then he is open to abuse in the Space. Questions. Is our soul grown from elder souls and our P comes from our environment? The P comes from our environment. (audio broke up ..) ... as you have seen the AA interacting with the salt in the water, we call it life. Look at the way the red and white muscle tissues are created, why do birds have both white and dark meat, why do 4 legged creatures on this planet have red blood cells or red meat, why do fish have white meat, ... understand these are all due to environmental PL MG fields. (1:34). In the liquid of the water different structures are created, look at the structure of the body of a fish, you don't see muscles but layering because the ?? is there to do the PL fields of the water creates that. The needs of the dog and man are different because the atmosphere ?? has changed the conditions. We are not created each time out of nowhere, we don't fall out of the storks basket. We are created out of the interaction of the cells which have created their own memory. At that level what has been stored in the memory bank, in the energy in the cell of the father and mother, it becomes the central bank to the new life. There is an important thing to

remember, again going beyond the matter of P towards understanding the totality. As human being we have one illusion and fallacy, that we only store what we see, hear, or feel. (There is also) the aura. The man who existed at the time of Christ in another part of the world has received the message the same as the one who stood next to Christ. He choose not to hear because he could not see the man and the reaction. (1:36). Many who were at the strength of the understanding of the teaching of the Christ and lived a Christian life without ever knowing about Christianity, because they received it through the fields of the planet and through the fields of the existence of the soul of the Christ. In the memory bank of the soul, what was translated (transmitted) to us, even though they lived in South America at the time, if you go in the depth of the knowledge of the existence, they still have heard the message. The soul of the entity of the man on this planet hears and gathers everything and it becomes part of the next generation. Is it possible that we are reincarnated and have done this and that? No. We carry the accumulation of the knowledge of the past in our soul, in what we have been given. The sperm and the egg are the hard drive, the soul is the information on the Hard drive. It can not be erased and doesn't matter how the Hard drive shows itself. Man or being at some point or another saw the interaction of singularity, as too much, as when you are for example, (1:38). pregnant, it's very hard to go and hunt and feed the child for 9 months ..

(1:43). Rick tries to summarize what Keshe was talking about, something between the red and white cell tissues... someone asks do we have a God? Who is we? Look around humanity doesn't speak as one, say "I" when you ask if you have a God. She asks, Keshe says Christ bless his soul, if we have no creator why do we bless the soul? Anyone have an answer? Armen says, bless the soul is, bless him for the teachings his soul has brought in. Who is the one who said I created Man in my own image. Armen says it is us that said that. Actually we said that. We are God then? Correct. (1:46). Rick says we have to discern what we mean by we. Not all of humanity is speaking from a place of God. If we are all God then why is one God a killer and another God a nice person? Well we are all God, but we are all idiots and other bad names as well. It all depends on your perspective, what are you seeing, are you seeing God or idiots fumbling around in life. You could see each person as God, address them reverently and see them as purity. Or we could think of them in an ordinary way and treat ach other as we see, not very kindly. ... or if you treated them as the Absolute incarnated right in front of you. In fact your image in the mirror would be as well if one was able to see that. If you're not able to see it then you are not at the point of being able to see it, that's as simple as that gets. We see other things instead, peoples flaws .. it all depends on the level we at looking from. (1:48). What do we call Christ, Moses, Mohammad, Buddha, and where did they get their knowledge from? Sandor says many messengers came and they had to come again and again, we are so dumb and stupid that we don't learn from the first. We have a messenger so we have a Creator then? Armen says creation takes place on every planet. She asks him, do we have to be thankful for what we have, if so who does the thanks go to, the Creator or ourselves. Armen says to yourself. Because I totally got confused this time with Keshe's talk. Why is that? Because I thought I got it, but absolutely I didn't get it. (1:50). Armen says if the planet created us then who is the god.

(1:56). Keshe comes back on. Let me explain what Rick was talking about. In the body it's under a vacuum condition, if you look at the transparent balls of Gans' you made you see the stronger moves out and the weaker is in the center. So the Zn moves out,

then the Cu, then the Fe, that's why in the structure difference as the ?? goes to the thinner part of your body you get a finer blood vessels, the same is with your neural S, which works in the reverse way as the blood S. The Neural S is the Infinity Loop of the blood S, the other side of it. That's why the veins and the neural S work parallel next to each other, it's part of the feed back and taking in. the body has 4 (? systems) we always looked at where the blood goes and the other vessels which bring it back. The same S hides within the neural S but it's internally, we have a feeding and a feedback. In respect to what we said about the animals, it's the environmental condition which has dictated the color of the animal, blood and muscle. (1:58). I explained so much, but when I looked (just now) the internet was disconnected, which means the Man is not ready to hear. I revealed a lot of information, maybe it's heard by your souls. When the body becomes part of the interaction of its P it remembers the part of the P in the memory disk of the P part. If you look at the CD ROM of your player you can separate the drum from the keyboard even though they play at the same time. The keyboard is the soul of the Man the guitar is the RNA, the drum is the P, but all play at the same time on the same disk. It doesn't matter if you stop playing the drum, the keyboard still plays, the CD doesn't stop, it doesn't matter if you stop the guitar the keyboard still plays, it can mimic both the drum and the guitar. That's your soul, it carries the entirety of the information. (2:00). There is a very big question in the world of creation, why do we always rely on the mother, because (not much many produced) it carries the totality of most of the information. The father is the addition to the keyboard, what was missing and what needs to be added. That part that was heard and the other part was not ready. This goes back to the Jewish belief the bloodline goes down the mother's side and in many African tribes it's the same. The mother produces one egg as most ?? perfection, the father produces many because it doesn't know if it is distorted or not, it depends which part will arrive. The process of the understanding of the P is to be detached from it, it is just a point of manifestation. A point of presentation in a P dimension and not in the dimension of the totality. That's why when you travel in deep space your body structure will change. It has to change to exist within that environment. Do we need to have a belief that there is another god in that destination that we can now join a new Church. (2:02). Or do we understand that in that environment we have to look like this to carry on the message of the keyboard. The creation of the Creator is the biggest point for Man's position to cross the line of understanding. The creation of the God (in limitation) is the same as the fallacy of the speed of light is the ultimate speed. Those that have become wise understand the whole fallacy of the teaching of, or writings of Einstein. He never understood and he gathered his own believers. So are the others at the level of the soul understand. The important point in this junction of man is to understand the Totality, and this is our biggest problem. Those that would like to stick to the current way because it fits them, will deny everything else but their own belief. Jews deny the Christians, Christians the Moslems, and they the Bahai's, and the rest. Because in accepting the development it means letting the past go. This is why religions have no basis in the U, because when you understand the totality and are open to see the reality of (how) life (works), in different shape or forms that exists don't need different churches or belief's . (2:04).

(2:15). You manifest yourself in any dimension according to the given environment, if you're in the environment of the gaseous you become AA, you still have (an internet) you interact and create the life on the fat line of the Gans of the AA, if you interact with new environment you become the fish with a different structure that you can be flexible in the fluid. You change into the atmosphere of the solidity of the earth connected to its

matter state because you carry it inside you a solid state you become a 4 legged man and the animals, then when you stand a little upright you call yourselves intelligent because you see a little bit further and walk on 2 legs. But all this, ?? take man on the surface of the planet Zeus, he'll make himself 13 arms, 14 eyes, etc. because that is what is needed there. Is he anymore intelligent, or need a new church to pay attention to, ... there are no churches, temples, and no god. The god of the man is himself to become correct (in behavior), this is my job, to get the man to understand that the Temple of the Creation sits within the soul of himself. The wealth and status is what man has made, whether one suffers or not is according to what the P can accept. (2:17)). I walk the streets of Acre and see people, I have never seen so much pleasure. People don't have the position except what man has made for himself, ?? they're happy because they understand the position of their P in their soul. In the West we do everything possible (we can do anything we want), but we are never happy because it's gone, the focal point has moved, the understanding of the truth has moved. One day I post these pictures on the Internet. We drive everyday across this beautiful city, when I say this you people pull your hair out. The Europeans say that Africans are wild people they do this and that ... (audio breaks up ...) CNN has made you think that way. The man in Africa is the true man. We walk we drive we see generators that cost thousands of Euros outside the houses on the pavement. In the West within 24 hours they would be stolen and gone, but here is the freedom, I trust the nation, I don't trust the 4 walls, I put my S outside. We pass rows and rows of furniture on the side roads ... they don't get stolen. Nobody locks because the man carries in his soul the truth not to steal. In Italy they don't touch because the Mafia will kill them, here they don't touch because it is wrong to the soul. The only people who steal are the foreigners because they got the habit of it from the West. ... people go hungry but they don't steal, then the white man in the west ?? because he has a gun in his back. (2:20). We invite you to come and see what the white man is missing, the trust in himself, then he needs those kind of gods and creations. ... where is the difference in understanding and why do I feel at peace in Africa. We invite you to come here to work on your health issues because we work out of the hospitals with the same ethos. We don't work in the back of hotel rooms ... these are the messengers of the ?? of the man. Nobody steals and everybody is within the law. Now who is wrong? Do we just show the lions and the things and the man who lives in a hut but is correct and doesn't steal. They steal the crosses from the churches in England to melt the copper and gold, and they call themselves Christians. ... (2:22). .... they accept their limitations, this is what I have agreed to have. Those who have agreed to be westernized, they do (?) call them from presidents all the way down. If you understand this so when you go to space nobody can bribe you because you can produce everything. Nobody can tell you that I can change your cancer because you can do yourself because you understand the process. Nobody can touch you because you are made in the image of the strength of yourself. I made man in the image of myself, if I am weak then I make that image. ?? I am detached but I have to serve in the life of a man. I am testing the group at the KF to see and understand what their detachment is, and it is very interesting what is coming up. (2:24). Because then I know who is there truly and can make the next step. We have to understand our own strength through understanding the knowledge of creation, what I have explained this morning and now you have seen how simply you are created. Is there an oil crisis (from fossil fuels) where the oceans create millions of tons of oils everyday. If you understand how the oil got on top of the CO2 Box then you understand how life is created from single cells onwards. What happens to those who do not come into the condition to become part of (? creation), they sink to the bottom and become oil. Those who are thieves in the West say there is a shortage of oil, how many

dinosaurs could there have been that you can extract 85 million barrels a day. So it shows this planet is continuously producing more and more. We found new oil reserves, yes because you emptied it and converted the field of the planet and more AA are created to replace those that were used to create the balance. So the more we dig the more we create, because through the extraction we create the surface area so that it creates more and more. If you take the AA from the top of the CO2 Box you see that more is created. So how could it be a fossil fuel. It's abuse of the man through his lack of understanding of how oil is created. (2:26). Now you've seen in a simple way why you even have blood vessels in your body and how they change according to the environment, becoming thinner and closer to the less and thinner they become. Did God create every single vessel in all the creatures in all the U and beyond, do you think there is such a process? Or the creation of God has been the path for the abuse of Man. We change names, sacrifice a virgin to get the clouds to go away or volcano stops, if you would have waited it will stop anyway so there was no need to sacrifice. We change this to giving many to the churches and then we can abuse you and pedophiles and the rest as we see now a days. Living in England we got used to policeman without guns, we could talk to them. The first time I saw a machine gun was mid 80's. (2:28). He asked why they carry machine guns and the police don't, we are a special force to create terror and show that there is something wrong. .. before the police in England weren't corrupted, they didn't need guns because they relied on their own correct conduct. Now they have accepted corruption in the police force and clergy, because they rely on the meanness of the man. Now if you don't give the police what they want they can write you as a terrorist. ... abusing has become the norm. We moved out of Gambia because of the corruption. We have been preparing man so he can see the while process, through working with Gans, etc, he gains confidence in the whole process. (2:31). All my teaching in the past years has been to open the eye of the Man to the reality of the creation, of himself, his environment and the U, that he can't be abused due to lack of understanding. In the Ghana conference in the first hours I saw a lot of resistance to the teachings from the nuclear physicists, they thought there is something fishy about this, something we can't understand, we are the N scientists of this country and we can't understand. I solved the problem, expanded their horizon and took the shackles of limitation to the next level. I said we used to be the matter scientists for thousands of years, in 20th century we understood the Atomic because everything has got a chain in it, etc.. now we become Plasmatic. then they understood that if they accept they become plasmatic scientists and not lost out. We change the term of Nuclear to Plasma and the PI has no (more) change, because it's the essence of the creation. (2:33). There is nothing wrong if you have accepted that there is a God, it's you who brought the limitation of the God. 11

(2:48). Why when it goes further it needs a Zn and Cu, the heavier. The structure of the body is exactly the same, it's ?? pointed. He draws a circle, this is the soul and another circle, this is your brain, and you P. Why do you see your P in respect to the earth, why don't you see it upside down (walking on our heads)? It's the same as a raindrop. The pull of G in respect to the earth gives the P of the Man. The fingers and toes show which kind of strength I want to take. Have you ever thought why you have 5 different fingers? A leaf has so many ?? tips it's what connects it to the fields that it can absorb, it's the same with the man. (2:50). If you take the earth away from the Man and position him in a new MG field then he reacts in that environment. Would he have fingers like that ?? ... so the essence is the soul which interacts with the earth and the field balance

dictates the shape, that's why all the animals have the same shape, head in front and legs in the back, because it has to create a field balance. There is less energy in the tail of the fish, so to create a balance dictates the size of the fish. So it is with the cat and dog. But here you have a connection with the planet so you have to give it legs. The fish have a connection with the water and so become elongated. We change according to our own environment on this planet and become black or white, short or tall, but we don't want to accept that this is because of the reality of the existence in respect to the interaction of the soul. .... (2:52). If we see the AA to become the fish and the man in the same atmosphere, ?? so is the atmosphere of the Solar S, etc. I always say this to the trees and this is the first time I make it public, where is the church of the dog, which temple does he worship at. He knows who feeds him according to his understanding ... .. it's Man due to lack of trust in himself, being bound to bricks and mortar. We don't preach religion but understanding of how the creation works, P creation and not imaginary creation because it's you who made the Gans'. You put a ball inside a Gans environment, the same as the earth, then you'll see the shapes of the creatures in the water. (2:54). I have done it, it's fantastic you see animals in the shape of the fields which have many combinations of arms and legs that they move along. I replicated the core dynamic in the Gans water, the Zn and others and gases on top of it and you see the beginning of the creation of being(s). Have I become the Creator or have I understood the process of creation? I am of the second and you are of the first, that's why you need a church and a temple. I always respect the prophets of the past, because through their teaching I can reach your soul to elevate it, because this is the limitation that you have understood. I can't teach you medicine when you haven't even understood how a plant works. Or what is A and B of the process of creation. So I speak your language. I am the creator many times, I am the light and so are you. It's you who are so weak in the trust of yourself that you call me a messenger and creator of whatever. (2:56).

(3:00). I explained how blood is created, and how the weaker part leads to creation of the stronger pull in the feedback to become the eddy current, it's the darker blood to your heart. In understanding I give you a strength which stops the abuse of Man in the space. This is the whole purpose of these teachings. If I open KF churches we could make billions and then we'd carry on with the same abuse. And there can be no abuse. Share the knowledge freely and you'll receive more, put a limitation on sharing and you have put limitations on your own intelligence. Next year we build the first Space Center in Ghana and hospital. (3:02). They understand that the new (T) is the opening of the life or the totality of the nation. We sit, watch and pray that some don't abuse others. I have put the top KF management team on a very specific point, they all know what is happening and I have a purpose for it, because it shows in the understanding what they understood, then they will see the change, if they don't then we'll help a little bit, because they should have matured and understood their position. It's the same with the rest, a lot of you got afraid by the attacks of the others because then you were tested. The failure is your in the understanding of yourself, not us. Intimidation by the others is exactly what is happening in the wars of the Middle East. Intimidate war then you'll submit to what we want. The KF has been made a terrorist group by the Belgian police, because one man needs children (pedophile). The wise nations have seen it and now they block it. They are not blind. It's like you the way you see some people abusing others, (3:04). you sit and saw look, the Moslems have 4 wives ... okay so let them have the 4, at least they don't abuse the children, but in the Church they do it (pedophiles in west). How come most of the child abuse is concentrated in the Catholic section of the Church. Because a man has been driven from his natural way of living in

not having a partner, E and reproduction doesn't stop. A man has given his soul, he sees the pain and he wants to cuddle, to give, that's how he gives comfort from his soul. Look at the Church of England the priest is free to share and have a wife and child. We don't see that much abuse there. (broken audio .) even though it has created its own ?? patterns. .... becomes a hole in the dam and it'll become a bigger hole, how much can you patch it. In the western world it's called abuse. In the Islamic world a 9 year girl can marry and become a woman, it was done for centuries, the law of being 18 years old is very recently. A man could marry at age of 9. In the West we have made it a criminal offense, which is correct, a child of 9 doesn't understand what is right or wrong. (3:06). Understand why Mohammad brought this out, in his time they used to bury a girl out of the womb in the sand, because she was a burden, so he allowed the coexistence. You have to understand the environment which Mohammad became a ?? . Now in the West we have a bigger problem in the Catholic Church but it is all done in the name of the Creator. It's you that has to decide that it is not to be done. Many times I have said that even people who are as innocent at the age of 28 are as those of 9 years old and should not be touched, because this is not the process (?). It has to go according to intelligence. Fro the majority of us 18 is the right time at least to understand the borders of the patterns of the body to mature, sexual maturity from a boy to a man and a girl to a woman. Man has used the name of religion to carry on his own abuses, so if you are correct and understand your own soul you cannot be abused and you cannot abuse. We see many of these patterns in different belief S. (3:08). In the bush country in Ghana when a king dies they kill 4 children and put the king on top, so the police announce that no children should go out alone. Why when somebody detaches they have to kill, they could put concrete blocks underneath it. In all the cultures abuse happens, because it's the way a man tries to confirm his own existence, ?? they allow themselves by different levels. This is why I am trying to teach an open your eyes, because when you understand the creation of your own body, would you like to work with the MG field of the Sun or the Earth, or does it in reality exist if this is your body here and we have seen it with your soul, and you have created the MG fields of the 4 legs and arms in respect to the earth and the sun is over here, then what kind of feature do you have in respect to the sun, because if this MG field has managed to create 2 arms and 2 legs, does it mean the soul expands the U, and then you have ??? many dimensions according to the field of interaction. (3:10). The field interaction of the soul created the fish. The field interaction of the MG of the center of earth gave Man 4 arms and legs ... the vertical beings have different combinations, Ca or Zn. Does the P of Man in respect to the U ?? , is it Pl. And do we have parallel features in respect to the Moon (? MG fields) ?? it still has a pull. If we managed to create 2 arms and legs in respect to the earth, we must have a structure within the fields (? concerning the moon). You came to the KF to find a solution and now you understand the solution sits within the soul of yourself. It's you who has to unravel the mysteries and understand your weaknesses and strengths. How do you look on the Moon, can I find an image of you. (3:12). Q: If I have 2 children, one sitting in New York comfortable and safe and the other in Syria crying and terrified, how is my soul supposed to react? This is a condition made by the Man. You can't react because you have to rejoice that both exist. Is there a position for the one in Syria to learn the hardship so that in the future it becomes just? Or is the future that the one in NY becomes arrogant and thinks that it is his right (to live like this). Or can you bring the 2 (together) that they can bring the peace to both sides. We see this many times. I have seen both side, you and I have both gone through revolution and different ways that we felt the pain, but has it made us wiser to (be able) to understand more of (life), or have we become ?? more narrow minded and defending one side over the other. I

was in Theran 8 years ago and the security apparatus around me was very tight, I was not supposed to see a lot of things. Girls who are not covered are pulled into police stations. I came out of a shop and they were pulling a girl into a car and she was shouting. (3:14). They recognized that I was not supposed to see this, so they let the girl go and she ran away. Where is the reality of enforcing the cover on the body of a woman, or the cover of the soul and the intellect. It's all the same, it's enforced and we allow it. It is us who have to bring the balance, we can't stop this process. ?? I explained last week how Def Fluorescnece wrote the Health Contract and now we see the opposite, because the paymaster has changed. Or it's the same paymaster but before they had the control and now they don't. Do we give from our souls to the world leaders to change the condition? Or by delivering the knowledge we change the expectation of the man to understand that we are all equal. Life is very tough because we made it tough, because we put value (a price tag) on everything. (3:16). .... i set up the operations and live a comfortable life, I don't go and live in palaces and hide behind walls. But I set up the apparatus and I don't do anymore. I can't run the organization from the garage. When you deal with the scientists you have to set up the apparatus, the structure with the governments because this allows the others to understand ... they the people sit on their brain. He speaks in Farsi, "if you don't want to stand out then become part of it", but this is the wrong attitude. Show the people that what they do needs more and can be added to. Be proud that you are adding to it and not be ashamed. (3:18). And then you'll see the change. there would have been no Syria if there had been no Queen of England, we all know that. The plan is to empty the Central Bank. The Russians and Chinese fooled them, ??? (not to empty it into London). We announced it, it will be in the papers because Putin is being correct. And we see it more and more. We don't take part in politics but we see the reality, the truth. So is it (audio broke ..) the child in Syria because the others want to rob (the central bank), or is it (better) to sit in NY and have a good life? Which one will come out best ... time will tell. We can not fight the fighters anymore because it has become their habit, but we can bring wisdom to those who don't understand that they don't fight. understand there is no need for ...??? we see that in a couple of world leaders, the Chinese, Russians, Iranians and others. ... the 2 S have to be in the same house with their parents in Syria. It is us who have allowed the abuse because we accepted it and they enforced it. (3:20). wisdom ... brings adjustment to intelligence and that brings justice. ... when you are intelligent, when you understand everything, then you understand what is wrong and right and you become right, unless you're an abuser. Rick asks do you think the world is improving? We are going in the right way. If you take the American and European out of the equation the rest of the world is very peaceful. The guns and the bombs are made by the western world and the Christians and they blame the others to use them because the pay some of them to do it. If you understand the history of Man in Africa and Asia you see the same pattern, it's the same people. When the English came to Africa they didn't go in and destroy, they attacked the religion and a group of Africans and when they came to defend themselves, (then they claimed the right to attack them and they became the saviors). They're doing the same thing in Syria, and in Libya they paid a bunch of Italians to go to Libya and start shooting, and then they said why are you shooting ?? but now they see (news shows) there is shooting and then they started the revolution. Nothing has changed, the stupidity of man allows the repetition of the same thing. (3:22). Not a single Libyan ever started the shooting ?? it was the Italians. It's the same process they did in Africa 200 years ago. Now you are defending him, because he is shooting .. there is something wrong with you. And then the have the news and press and they can publish it. How many Chinese and Indians listen to CNN, very little. the whole thing is westernized

propaganda and they have control over the airwaves. **WE CAN REACH THE SOUL of the Man without the airwaves.** And we are. Because we have changed the communication channels. Why for the past 30 to 40 years are all the problems sitting with the Moslems? Since the state of Israel, the 52 state of US. And in the middle so they can create that continuous stirring up, sell arms and drain life and money. There should never have been a state of Israel and we call an end to it. That state will become part of the One Nation. We don't say an end of, we say an amalgamation as One. Because then a brother can't kill a brother in the name of a different belief. This is why we established the Earth Council and UC, and One World and One Leadership. To put an end to one brother killing another. (3:24). In One nation there is no need for armies, guidance and protection from the civilian police force needed. The Police don't need tanks, missiles and riot gear. The money spent on these things to furnish a few in the western world (elites), destroying many lives in the Middle East will be paid back by the Western world, we will take my decision that has been made ... and we shall see. The Europeans will have to beg across the world to survive very soon, the same with the Americans. The doors are shut until you sort yourself out. The condition is simple. Destroy all the weapons technology, gun manufacturing and then we'll allow you in. We'll allow you back to the world of humanity. I gave time until today for the world peace to be completed. You ignored it. I will serve it and you will not like it. I gave humanity until yesterday and today to complete the world peace. You saw we gave the Key (patents, USB stick) and they abused it, locked it up. We came and gave it out to the public. From now on we'll do our job. As One Nation we'll deliver. There shall be peace because the soul of the Man is crying for it and we have educated the Man. (3:26). And then the story will change and the girl in Syria will laugh and ?? girl in America ?? will not arrive to kill somebody. Every American will pay for what they hve done, because they paid their taxes in to it and couldn't appose it. To kill someone, 20 million people have been killed by the American financing in the past 50 years and you paid the taxes. The same in Europe. It's pay back time. Correction. Balance. No harm, no one shall suffer, but they will do it their own way. There are no houses left in Syria. There will be no food left to feed in Europe because the arms will not be sold and manufactured ?? making guns to kill now he has to sweep the floors ?? Very simple we teach the rest and the blind will stay in their own temple, they find out they have to eat each other. It's very simple. When we decide we will deliver. I waited 2 years for governments to deliver the T to the public, until we gave it. Then what happened to it. A rush, a take, then you weren't understanding so we started teaching, and now you're understanding more. Look what happened to the MaGrav S, a rush to build but did any of you put anything back into the KF? No. The KF is ?? humanity, No?? (3:28).. We get reports from Germany, before using the MaGrav I consumed 18 KWH, and a year later only 4 KWH. Did you put back anything into the community, or to teach, or just that's me (mine), ??? Now you loose the share. I tested you and you failed. Now you'll pay back for it through your own ignorance. By yourself, we won't do anything. The process has to be understood, the Church is in the temple of your soul. How many of you around the KF are making money ... we don't say you have to pay us. But we see everything. You make things and then you still come to the KF and ask for this or that. How many of you put something back in. I gave you more length for you to abuse yourself. By me giving you freedom I allowed you to suffer more because of your own greed. The temple of Man is the soul, and let's see how many of you have any soul left to have a temple. And you don't learn but carry on with the same thing. We are not preaching, but teaching for you to understand yourself. (3:30). ?? the path of your creation, how you're created, the position of P with the interaction of the fields, then the

rest is you and how you decide to move within it. It's Christmas for those who believe in the path of Christ, but I have one question, was the Christ there for the Christians to kill some more, 2000 years later in his name? ?? said, EU is a Catholic club and won't let Turkey in. Now EU is paying for a Catholic ?? where Turkey played the game. Those who are wise understand what I am talking about. Or should it be the whole world is one club and we work together, this is the ethos of the KF. Let us see what happens, from today the peace is in our hands and the leaders of the world have lost their time. Now we decide and we serve exactly how it should be done. Humanity will be equal across the whole planet. Thank you for today and have a wonderful Christmas. end
