

153rd Knowledge Seekers Workshop January 5, 2017

(Keshe technology recognized and made a part of Italian Civil Defense, The West will come begging to Africa for help in the coming disasters, Pedophiles lead by DL on verge of capture with help of Keshe Foundation, He will not release the power generator, Keshe is taking the teachings to new direction in the soul, Use the physical body with its own Gans as a reactor, Explains how Silver Nitrite works isotopes switch between B+ and B- thereby releasing energy)

(:11). The numbers add up to 9. For the first time in Italy the government has given official authorization for the KF to help in Civil Protection in support of earthquakes. It's an example for the whole world. (:15). The earthquakes are getting closer to Rome so this support is important. It can be replicated in other European countries because of the Union. (:22). Other Europeans shipped in a lot of Gans Pads during the earthquake and greatly assisted in the emergency and now they have officially become part of the Civil Defense support team. This gives us an acceptance of the T on a medical level internationally, once the second level comes in. One official of another country said that this means you have become equal to Red Cross in a very short time. The only difference is they have to go and buy supplies but you produce everything yourself. You'll bring the new T across very fast. If you are setting up in your country we'll supply copies of the official letter. This is official recognition of the Health Units as effective and a breakthrough. With this we can join Civil Defense organizations worldwide within the next 2 years. (:25). Slowly and gradually we are getting to where we want as One Nation. In the next couple weeks we are working hard for acceptance of the T for Decontamination (water and air). Alek in Nigeria is setting up Decontamination for Oil Drilling. Like in the disaster of the Gulf of Mexico we can deliver decontamination for oil spills, it dissolves the oil. (:28). When the Canadian government blocked me and held me for 11 days I was on my way to Mexico to deliver this T for the Gulf of Mexico. In Ghana university it will be part of the education. This would not be possible without the support of all of you (worldwide). ... the blueprint has to be your thoughts and the way you think it can be put into market to help the others. The setting up of manufacturing has to come from the heart and not just replicating, waiting for others to set up and then copy. (:31). In Ghana we have used almost everything locally. Instead of asking for blueprints look to what your nation needs. Use what is locally available. Caroline is working to save the lives of dogs in Ghana by giving Gans. The Vets have asked her to give lectures. You don't have to wait for FDA approval. (:34). Our ancestors had medicine men and they didn't have FDA and they saved their lives all of their life. I come from that blood line. Manufacturers, look locally what is needed and use local products. Those of you who are only greedy for energy (electricity) you are in the wrong place to start with. We are looking to the local need and that is what brings the change, not getting the most sophisticated to plug in, which only goes for the 5% that live in houses. We want to help the 95% who have to look for food everyday to keep from going hungry. We all thought that America was the land of milk and honey or whatever, until there was the hurricane in Louisiana and we saw through them, it was worse then central Africa, poverty beyond imagination. In developing countries, 35% of the children go hungry and live in poverty in USA, 5% in Norway and 15% in Korea. In the richest countries people are going hungry because they can't afford expensive food. (:36). Just look at the statistics on the internet. There is a saying in English, "fair coats and no nickers", it means people wear fur coats but they don't even have the money to wear underwear. The Western world has reached that point and the other nations are not far behind. We are not preaching but teaching you

how to change the course. You want to manufacturer, I will not give you the blueprint, see what you need locally and respond to that and use local materials. Everything in Ghana is 100% produced locally. It may not look as shinny as in the western world, but it produces what is needed locally. We have given educated people without jobs work and we are putting into the nation. It's no more teaching to just show you this and that. We just try to enlighten and teach more and more, to understand in depth what needs to be done. There are 3 websites (? KF) around the world that are doing misconduct and they are directed by one person, (:38). thousands of websites under one name, DL, and that will be handled soon. People say have you seen "Facts about Keshe", it's all one man. I give you warning, we are going to clean everything up. Do you remember when we put Sterling on the stand (international pedophile case), he wrote (told) a lot until about a year ago we opened his hand and revealed that he was abusing his own children. And he doesn't write anymore and at the moment he has become the biggest informer for FBI. He's doing 25 years in prison for raping his own children. The people who are guilty write everything to divert attention. We teach to bring knowledge. The birds (of a feather) flock together. Look who writes the same (as Sterling) and she also has 2 children. We have hard evidence of them trafficking (? children) and we share it with Interpol and other offices. The secret was that nobody could point the finger, look at the websites, they are run by the same man. The man is a hypnotist and the children are raped while they are hypnotized, the evidence is heavily loaded to one side. (:40). Even his own children don't remember, because he is proud to announce he is a hypnotizer, so they can't remember. Let them write, but you yourselves know the strength of the T. ... The enticement is that you get a free ticket to the cinema if you send a photo of your child who is not more then 6 years old. Because when they are hypnotized they can't remember a thing, now you see the truth, Mr. DL. We praised him so he would make more mistakes, a trap, and the authorities got him. The whole mentality on his websites is on sexual abuse, writings, tools. (:46).

It was 5% carrying 95% illiterate or the ones who could read a little bit more. (1:03). That's where everything is now (in world). We are trying to increase this number to at least 20 - 25% in the coming years, that in trusting one the rest will understand and then we can teach more to join in that we can open the community. It's no use opening to the UC to land when they are still carrying arms and the latest weapons T. The will is the connection btn the E and P, can change the condition of the soul and through it the condition of the soul can change another man's job. I came across a man in the most advanced weapons T, ?? Stirde, (broke up ...) a few years ago ... in a very simple way I made my wish that this man should not do this job in weapons T. You don't need to go out and protest, you need to understand your own soul, the creation of the E within the structure of the soul of a man reaches another man. (1:05). Men will disarm themselves. You shall see my work very soon. Two weeks ago was December 22, (broken up) world leaders ... without them knowing, because it is our wish. (1:07). I met a man who was the head f Stride weapons T, I understood this man was not happy with his position there and I made my wish that he not be there and very shortly afterwards he moved on, left the job. The point is our wish has to be our way of bringing peace, we are working in that direction. We gave the World Leaders until the 22nd December to organize and come with a position regarding the World Peace. It did not happen and I said we will take over and we have taken over. Very soon you'll hear about our work. We is not me, it is us as the followers of KF, we want a peaceful life.

It's a response even to the souls who have not heard about the KF, but the wish is world peace and the end of wars. It takes time but we are very good at it, we will deliver. A lot of world leaders need to understand the wish through the soul and then they become servants to their souls and the soul of their nation, and as One Nation to the soul of humanity. (1:09). Start to understand the process of connecting to your E that you can reach the soul. In the Health I have taught that if you have a finger that is not functioning proper, it's paralyzed or is not moving. We said that you go into your brain, into your E and send the info for your finger to move and you follow it through your arm down to your finger, but you don't move it, you just test that the info reaches there. Then you do it a second time but you don't move it or have the intention of moving the P to match the E. On the third time you send the info that you want the finger to move and then you inform the P to follow the E, then you try to move the finger and it works. It needs practice and it works. Those who have done it have seen how beautifully it works. A scientist couple who work for sports people have replicated it and it works. (1:11). Now reverse the process, send the P in without moving the finger, send in the feeling of heat on the tips, and try to feel the E of the heat in your brain. You start to establish how to go through your P to your E and then try to see how your soul responds. This is the way you connect to your soul, you bring your P, I want your P to change that here I don't feel a pain, the temperature is too high for me, but I want to be comfortable where my soul is physically happy. This is the process that we are trying to teach. It's not ?? reversal, up to now I have been teaching you M, now I am trying to teach you G and feedback, and it goes to the soul because next time it has to reflect to give out as M. You have got to understand the Reality, the Truth, the Essence. In Italy I taught this and the guy was pressing with his eyes and trying to move his arm, but something is wrong it doesn't move. He never understood, it of the soul of whatever it is. And you ask it to move because it will give ?? you pleasure, it will move. We have to learn how to do this. (1:13). This is the reason we announced that last week's teaching (deep space travel through the soul) was going to be one of the most important teachings. But those who are P and feeble, when they heard the teaching last week they laughed and said there was nothing there. Those who were wise saw the wisdom in the teaching on deep space travel. If you understand that in the Pl of a matter sits the Pl of every matter, sits the Pl of the connection with the U, then you understood that you can lock into any condition anywhere in the U and travel there is zero time. Those who are wise in centuries will understand what has been spoken. If it is hard to understand then go back to basic principles, he draws on screen. (1:15). He draws many circles inside each other, these are Pl, take a point on 1 before the outer ring, on this side you are M (pointing upward) and on this side G (pointing inward), H, Cu, Ur, Plutonium. Another way take a magnet, you have M and G (up to your understanding recently), but now you know why you are M and G also, and reverse. Now what about other things that carry the same, you are M to one or G to the other. You have understood how you can go in a matter state from one to another. (1:18). You can go M and be in one position or the other if you understood the essence of the soul. Can I be in different places at the same time? If you understood the operation of the soul ... YES. You become like a loud speaker coming from the same receiver, one speaker in one room and another in the other, but you have to understand the line of connection. It's the first time I teach this but you have to understand what it means. In reality you have done it all the time, but you haven't understood the process. You sit at work physically doing something but the E is handling something else. This is the multi-tasking of the soul. You are with one person doing business but your mind is somewhere else for example, with your child doing homework. You can do the same with the soul but it needs expertise and

understanding, (1:20). of the reality and the presence of the soul. The position of the presence of the P of the soul, because now as you have seen you are connected to different points because of the field strength, but it comes to a point to ask, which all of you know, in present state of science calls it different stages of sleep, where does the soul of the man go when the body is at rest? Or is the P of the E, the time part of the soul, gets engaged with the P of the environment of the existence. We do not teach, we enlighten, it's for you to understand, to enlighten yourself. What language do the children speak when they come out of the womb of the mother, in China, India, etc. Bring them together, they don't see but they feel and know the hierarchy of their position. What language does the soul of the UC speak that we understand in the essence but we have ignored for the sake of survival for the sake of survival of the ?? religion of the earth. This is the ?? enlightenment. (1:22). This is why in the teachings before the Christian New year that we have finished with teaching, and are now teaching the language of the UC. The language of the existence means understanding the process of interaction of the soul. Where does the soul go when the body is at rest? Where and in which dimensions? Why do we dream when asleep? Or is our P existence the dream of our soul? Why do we dream and contact the things we don't do during the daytime, and in the next few days we say, I had a dream about this (deja vu). I had a premonition, I saw this a few seconds ago. The soul has already seen before you do because it was set up that way because you have ignored your own true existence. And this is our job, to open a channel for the man to have control (not control), but interface in the operation of his own soul. Then "Thy Shall Not Steal", because if your steal from yourself half of the info goes to the other half and its not there, so you have only half of the body. (1:24). This is the teaching of the space T, the Pens, Pads, and Gans is to keep the materialistic man happy, we have to do. It has taken time to bring those who understand to this level now that they can start finding a path to their own P and E to where their P and E came from .. the soul of the Man. When we have finished with the Gans' and god knows what, N material, now we have to use the body Gans of Man and the N layer of the skin as a line of communication to the fields of these plasmas to reach the soul of the Man. And we decide where we want the soul to manifest itself in what shape or form, according to the environment for its appearance. You worked so hard to make the N materials, Gans', coils, and now the guys goes to another S, what are we going to do with this one? Nothing, embrace it and fly with it. The SS of my heart embraces humanity. (1:26). It's now extending the "goal post" but increasing the understanding of the soul of the Man. But you say we have to see the thing in P, I put something in the water with the N material and it goes from Alkaline to Acidic, but it's the as going from M to G, so it must be a field force, it does something. Now you have seen something working, that container with the Gans, the ball reactor is your body and what the body holds. Use it to reach the soul of the Man and through it you'll reach the UC. THIS is the SECRET of the teaching. I have to feed you with 10 ?? around ?? neck to feed the ?? , but that is part of the teaching process. This is the burden of the teacher until he can carry the student across the finish line. I am not interested in the N coating or Gans, I know the path of the soul. But it had to be down. When I went from the N material to the Gans everybody shouted and we lost half of the people. Now he spoke about the Pl and we don't see it anymore, but we know it does something. Now we enter the true Space T and essence of the creation. It's you who have to give it the P, and have to live with the P. (1:28). You have become the creator of your own creation, you are the god. If you do wrong with the P you have to pay back with the soul which created it. They Shall Not Steal. Then we live the life across the U. You wanted the generator because I need electricity, go to your soul and you can walk in the hot or cold it doesn't

matter. It's so hot here (Ghana) the sweat was dripping from my tie, I said it was so foolish because we have the knowledge to change the structure here without any cooling S at 24 degrees, but we have to stay here because that is what it is now. The Pl is not a structure that you put it like this is the Principle, Transition, and this is the Matter state. What is a Transition to me is a matter, what is a soul part is my Transition. Man has to understand the totality according to interaction of what is needed, (1:30). or wanted to be present at the time of interaction. We do it so often that we just took it for granted and never understood it. Have you ever seen a man on the phone sitting next to the mistress and talking to the wife on the line, he's shouting on eh line it can't be done, you don't understand, while holding the mistress and saying, oh darling I love you. Where does it sit, the love of creation, or have we decided to be condition, position present. This is what the new teaching is about, the goal post has moved from the Gans to the soul of the man. And God help you Man, I hope you understand, which will open the key to the UC. Disgracing it will shackle the Man to the world of P and all its problems. The time of transition is harsh because we got used to the old way for too long. The problem is not a problem until there comes the time of transition. Accepting the acceptance is the biggest problem. (1:32). ... Now we change the containment to the P body with all the Gans' in it and the soul ?? inside. Try to operate it (as a SS). Those who achieve it will enter the UC in no time and when they try to talk about it to the others they will say you are stupid and dreaming, because it is beyond the limit of what they understand and they can't handle it. When I was in Iran one guy said he was in Russia and they have one metal that flies, they call it, "flying metal bird", and his colleagues laughed at him and a few months later one of these metals landed in Theran airport. Now I have seen what you (were talking about). At that time I was stupid and ridiculous. We are all stupid because we all excepted it (that there was no such thing . In Africa they call it a metal bird. Now we accept it because we put engines on it. We have to come to accept the transition and transfer of our souls because now we found the engine for it. (1:34). The maturity of the Man comes from understanding his own soul and no further. Because if you understand it later ... if you want a spanner (nutcracker) to open a nut you have to go and buy one. If you understand the operation of the conversion of the energy you either create a spanner in your hand and open the nut, or you understand that the nut is made of a collection of the fields and it has the essence of existence, then you transfer the energy of the wanting of its position and it will satisfy your need according to the accommodation that you make for it. Then the question is, do you need a spanner? Or do you have a spanner of the U. When we speak like this, for you it's only like talk because it is very far for you to imagine it. It takes a few times of finding a core putting Gans in it and rotating it, then you see things move (it lifts) and you see 129 Tesla. And those who can't understand it say he is wrong and cheating. But if after seeing 129 Tesla and you understood, then you are enlightened. Let the fools be fools. You have reached the destination of the creation. Now how would you to put this body on a motor and rotate it at 5,000 rpm, that you can separate his juice, Gans and find his soul in the center. Any volunteers. (1:36). Rick says that is the exact speed he was rotating the Gans water and trying to get a center bubble forming. Rick says you can't just do that to a human to get a core. You can do! R: you can do it once with each entity (they would die). K: What are you going to do with the soul you separate in the middle? How would you like to put it back together again. R: it would be a different environment, Humpy Dumpy wouldn't go back together again. K: you never know, if you had the right glue and find all the pieces. ?? it's like you said with the hard boiled egg. People like Rick who started these programs (Workshops), made the N materials and started the cores. Now they understand that you have 2 simple choices, the secret of

the communication and interaction of P sits with what we call the potential difference and the current flow. (1:38). It's you who dictates what the P Difference is going to be, and through the soul how much E is passed on to be the current of the flow in respect to the environment. It's as simple as that, and no more. To understand the Totality, to be the Essence, to become part of it, to understand the position of it. Is to be in Essence the totality of the Total. To be part of the Pl of the U the being on your own. Then you can transfer, position yourself. Go back to the position of the magnets, it's you who change the strength of the E of the P appearance of the matter state of the energy, that you can move yourself across the U without doing anything, you just change the rate of giving and taking and then it positions you where you want and where you fit. Or you become the nomads of the U, you change it, you land somewhere that you don't know where you are, okay we'll spend some time here until we would like to move on. (1:40). With this knowledge you should be able to control the giving and taking from the soul, that it is like the magnets dictating the positioning. When you put the circle magnets next to each other if one is stronger the distance b/n is more. Now we have the reactors that do it, we call it MaGrav positioning. Or you can call it positioning yourself with your soul. It takes time, we set up the knowledge, the course of the line to achieve it. But it's for you to understand it, otherwise it's just another sound. In time, many have achieved it in the past, and many will achieve it in the future. You will find that to achieve it comes from the detachment of the soul from the P, then you'll understand that the line of communication from the E and the soul, that you can give it any P you like. "Wherever I lay my head is my home". The head of the Man is the soul and his home is where he makes his P to rest on, hold and contain it, and to enjoy the sharing of the soul with the fields of the others. I ?? I don't teach, I enlighten I don't force. Now people like Armen are banging their heads, 'now he has gone from the core to the coil, now where am I going to find the soul'? (1:42). This all finishes one thing, it's got to finish one thing, ?? the U. Try to understand the strength of your E and how it interacts and positions, understand the capacity of the soul then the P will be child's play. Try to position your soul and test it. Start little by little, then as you gain confidence you'll find the pathway enlarges to a road and you can go the speed you are at (your level). That's why I said the present computers and control S are useless because you can go the speed beyond imagination. And if you want to control it through your P, you will not be able to contain it by going through space in an aluminum frame, that's why you make the frame out of the Pl, and to understand the condition of the soul in control of the craft. I always said that computers are too slow. It's the Man's thoughts and E that will create the conditions of the motion and with it the Pl of the Craft according to the environment. Now you understand. A year ago we put the SS on the ground as dots on a picture (1:44). And a year later we see the interactions by John in AZ, with little blips. Now we have to make the transition to the E to the matter state that you see the P of the craft. There is a discussion, a school of thought that says that there are nations who are in touch with those from outside (ET). They have always been in touch with humanity it has never stopped and will never stop. We know the path of the Man to his greed and to his connection. Understanding of the interaction of the fields of the different strengths leads Man to his soul, but it has to be to understand that in that path it needs a stronger field than P, which is free and you call it E. Any questions. Also says the last teaching was very important and we are trying to transcribe it, it's just like Bahaula it has a lot of hidden words. (1:46). that we have to understand, but being in P makes you not to be able to understand a lot of hidden things that you are talking about. When I fall asleep after your teachings I usually have dreams and you are always in it. One thing dawned on me, our language is so primitive even though we have so many vocabularies, we

created the language to cheat and lie and cover ourselves up. True language is of the mind once we make that connection. If we talk with E it's beautiful, if we say love with E then it's beautiful. The second thing that dawned on me is that everything we created like a home, plane or car or even a cup we drink from, they are all inside us, but we want to have everything in P, but we no longer have to do that, we have made the earth so cluttered. ?? everything to create is from inside, if I want a home I can create that, etc. The way I felt was so great, I just wanted to share that. We always talk about E going from the soul, it's not clear for me, please explain in detail. How can we practice and recognize that E, how to use it to get the soul, it for me is a puzzle. Is it love, a feeling when we talk about E, is it ?? or an inner E, (1:48). I am supposed to feel. I need some kind of detailed instruction. The E we talk about is the line of communication from the beginning to the point of manifestation, what we call the delivery of expectation. You call it, fear, love, if you are strong enough to be within it, you still need a center which is ?? stronger that its flow allows for you to be a part of the transition of it. The transition doesn't come from the center of the P1 to another point. It passes all the elements of what is available, and the strength of it. This means that there is always a higher strength that it needs to dissipating that it reaches to the point of your existence. There is always an intermediary time of transition. There's no other way, if you are at the center it is non-existence, it just stands there. At any stage, it doesn't matter what our ?? com creation is we are still in the path from the beginning to the point of manifestation of ?? com creation. You might be able to shorten the E that it is instantaneous, but still from the soul to P it has to happen. You call it transition time or E. (1:50). It's all the same. Any other questions? How do souls proceed to the next level after death and what is the roadmap? There is no roadmap. The soul is ... if you live in England you go up M1 and somewhere in Junction 19, etc. to Manchester. This is a roadmap, the souls don't have a roadmap. The map of the soul is delivered by itself according to its comfort and presence. Maybe we'll make you a soul GPS sometime in the future. At the moment it doesn't exist in the U. Q: if nothing happens when trying to understand any soul teaching does it mean that I am too disabled on the E side and death is my only hope of enlightenment. Why does Man see death as an end or change. When you can connect your soul and manifest somewhere else, you die in one place and come alive in another, it's the same soul and you look different. (1:52). Soul is the collection of the free existence of the fields without the attachment once you die after P, but still itself has manifestation of existence in respect to the environment which is existing. Any other question. If you understood the teaching of last week, this week, and the way we'll carry on, you'll soon understand, and a lot of you will try hard to reverse back the heat (?) and feel it and show your E, and then you'll start getting in touch with your soul. Then through it you'll create the condition of the transfer. It takes time. The time it took you to make the N material, Gans and cores. It'll take longer, or it will be instantaneous, it depends on the clarity of the soul and understanding and use of the knowledge. Your talk today has answered more questions I have since I went out of body and grateful for your sharing. Do the fields of the Gans and reactors align our P to the E and soul. You can use it. Armen has done it once or twice but he jumped it, but I don't say anything. He has a beautiful soul but he is too busy, he was born premature, 7 months, so he jumps things and doesn't see it. (1:54). I have seen it done once by Dr. Eliya Kostova when she was in the Insano, but she wasn't aware of it. Armen saw it and tired to repeat it, he repeated it but never understood it. Making Cup of Life, Cores, and the things I have done with the core members is just being a path, trying to put the essence of the creation of the soul in a p matter that they could understand. The man is P. There is a connection btn the p dimension and the soul, we call it E, but if you find

the path of it and understand the process of it, it is a transportation across the same media, because matter itself is a PI but at a given strength. Where the soul is a PI itself at a different strength, but they are all PI and transfer of fields. (1:56). Try not a shortcut, but the path, a method, an understanding, then you have achieved. Any questions. Describe Consciousness? Why should I, you explain what it is to you. Behavior of the P, has nothing to do with the soul. Or witnessing of the soul, the behavior of the conduct of the P with no E. I always said that what we eat is only 20% of what we take from our environment the other 80% is absorbed through the fields and given through the fields out, because we can't just always take, we give that we can take, we empty the cup, the energy of the U and it gives what ?? (1:58). By the same standard only 20% of the E of the Man carries through reflexes of the neural S, the other 80% is free flow btn the point on delivery to the extent of the E and the soul. Because it's so fast, matter, Gans state, superconductivity of the nerve S is still too slow, we call it reflexes, sometimes. Or we take actions without knowing. Caroline watches videos (youtube), the father of a child is asleep on the sofa and the child is about to fall off the chair, in his sleep the father grabs him before he falls. The body is at rest while the soul is watching its responsibilities, which it has given life to. Because at the time of sleep there are no reflexes. We know all the ways our soul works but up to now we could not understand it, we always explained it away with some other things because it P had some meaning for it. Now it doesn't because hopefully we understand more that we can explain and use it. I watch my sons train in martial arts, one closes his eyes and feels the fields of the other, what they might do. Part of the training is to have 1 person in the middle surrounded by 5 others and they have to feel who and when someone will go against them. It's not that they feel the E, they feel the soul, open up but it hasn't been developed. This is why Eastern martial arts extend slightly in that direction, to extend its P through E through the soul, because the soul extends the whole of the planet and the U tries to access the field. We need to get trained, you can't just walk out the door and think you can run a marathon and win. (2:01). It takes years of experience and training. The first day maybe 20 meters the 100, etc and slowly build it up. But to win a marathon is too much effort in P, understand the work of the soul, it's so simple we do it all the time, but we have forgotten it. We haven't forgotten it, but in forgetting it made for us, he does his job and I do my P part when I need it I contact (it). Our own denial is the cause of our own problem. Q: Am I the director or is my soul the director? Oh, there is this little problem of who is the director and who the producer. ??? and the art work are all sitting in one place. At the end of the day it's your P that shows the E and the delivery of the behavior of the P. Was it the soul who moved your arm or the soul that moved it, because the guy was pushing you. (2:03). Q: Do all the creatures in the U speak the same language or understand each other? Of course. We understand it also. In the body the info flow in respect to say the immune S is so much that it would occupy the whole of the brain operation in traffic of the info in say one place to another. For reproduction the brain has decided to carry a separate colony or substation as a gland. In our soul transformation in understanding our P, our soul is aware of communication of the Universal Language, the P part has been made into the brain for it to handle the P, what I operate in the universal condition. The gland is our brain, substation for our soul, at least it can leave to do its work while it is busy with the P, walking, changing, selling, cold, flu or whatever. Now with the latest T scans and MRI how they locate which part of the brain is responsible for the hand, top right, with the legs on the same parallel and the rest. What happens from the soul to that position of the arm? Why do you have different layers of the nerves and say this is for consciousness and this for bla, bla, bla. Because the strength of the soul is so intense, it needs to reduce in strength from the

soul to the point in P where it goes to ... when you touch or feel a bird, the soul, brain, E feels the neural S on the brain and NOT on the finger, that is how it's done! When you put a needle in your finger you feel the pain but the E doesn't go so much to that location (finger), it is already felt at the position in the brain in respect to that cell. (2:06). The filtering from the soul to that position ?? Which reduces the strength that it can feel the E in the strength of that field as a matter state of the position of the (finger) nail. This is what the World of Science never understood about the operation of the brain and the P, this is the problem. This is where the P finds a line and calls it a nerve as part of a neural S and we say this is it. Where does it go? How does it go in one point and suddenly disappears inside this disc, and then we say this part is responsible for the hand and the arm, etc.. .. inside the brain and going out is the upper arm, then the shoulder which is closer to your soul and brain ??, in fact the neural S that is responsible doesn't go (just) through the connected lines, it actually works by the transmission of the fields and the interaction at that point with the interaction of the soul. Oh, there goes all the biological books into the trash, now you understand the truth. One the science goes further, you can say I want the tip of the left finger to feel pain. (2:08). And you'll feel a certain point on the brain and you'll feel the pain. Is there a wire connected to that single cell, or the energy level with that cell is zero time communication and you feel it. This is how you bring people out of Coma, you operate the brain and it connects itself to the cell, not through the neural S but the space of the fields. Man has a lot to learn about his own P, let alone the soul. Today is a glorious day, one day we'll explain why. Q: You once said that one time you and Caroline were in London and something happened you needed to be stitched up, and you were yelling at the man. Was that a normal E reaction? In a way that was a P reaction, you have to understand how we work. I don't look at the next step, I look at the totality and what it brings at the end. (2:10). Our goal in that meeting was to show the missile T is useless let's talk about something more, that's why I went to the meeting. The goal 20 years ago was to bring disarmament. That was 2005, 14 years ago, if we would have achieved our goal we would have saved millions of lives being killed by Americans. Because that guy was at the top of Lockheed Martin. Am I responsible for the death (?) or the soul of the Totality? We react according to the time and what our P says, but the whole lot is the end (result). Many times I sat in Toronto airport, the guy with the gun to my head threatening to kill me. I said, one day you'll see the return of your action. What puzzled them, with tens of officers in the next rooms asking questions from him, I laughed at them, you are so stupid you don't even know what this is in the suitcases and what you have in your hands. The decision was to steal and disgrace, the woman who wrote it (signed the order) we have seen how she got disgraced in the last election in USA. Bigger embarrassment and bigger shame. (2:12). I have to act and behave as part of the P but the ultimate goal is to achieve unification of Mankind as One, World Peace, and opening to UC. ?? It will happen over time, we ?? hypnotized, .. (now he's talking about the pedophiles hypnotizing the 6 years children so they can't remember.) We opened the hand of Stanley that he victimized his children, and now we open the hand of DL. We would have done this months ago to save other children, but the security services had to do their work. When we told how he was abusing the children with hypnosis, now his attacks on the KF became harder. ... (2:14). Q: Someone asked if pedophilia was G fro those who commit atrocities? It's so shameful it's better not to discuss it. These people have no essence, there's no place for the soul for people like this. ... (2:16). Everything is so open, Stanley wrote everywhere I am a pedophile, but he thought that nobody could touch him because he had the biggest judge behind him. You saw what happened to the judge (suicide when found out), and now we'll see what is going to happen.

Please inform the Police across Europe and see how many children have been taken picture of for a free cinema. They can't remember, but that was the key that nobody could prove and now we (got it) it was hypnotism. We have 1 TB investigation, the facts about DL, it will be set up and pass it on. This is how we collaborated with the FBI to get Sterling. How scientists were killed the same way. We have the link and can give it now, but there are so many people around him, the international police are working on it. People said why do you let these people write all this rubbish about you, this is why so we could stop the pedophile. I am big enough to take it, but you lot couldn't. Now you understand why. ... The man in Sierra Leone was selling pictures of sick children ... transporting sick children to USA to be abused. (2:19). ... the curse of God on the soul of these people. let's talk about better things. The process you have to think is how to interact with your own soul. You can't touch another soul until you understand the working of your own soul. Because when you interact it's to give and not to take, and when you give, you receive more. (2:21). A lot of you should have achieved this point that the connection you used through your E, you react P where your E carries the essence of your soul in interactions, can be with other souls. Now try to do it in reverse, but don't put yourself in a centrifuge, it would be very hard to put the soul back together again to its P. The Potential Difference, on the field difference btm the manifestation of P and your E and the flow of the fields to get to P from the soul. It doesn't take much, less then the time for Armen to build up the coils and put them in a set. (more talk about the pedophiles). They put children in the cube and take pictures naked, called cubically happy, it's like the pizza (scandal ?) going around in USA. Mr. DL you can't erase it we have it on the Internet Archives. Good morning you are caught Mr. ?? (2:24). Q: Can I use Silver Nitrite for treating ?? Tuberculosis? I don't know but I can't tell you on this program. Silver N has a connection with the N of the AA, and Silver has the behavior of the K, which gives energy to N, depending on the condition, the way you produce it, and the way you bring the interaction, the way it feeds and works. Because of Silver's radioactivity in its isotopes, in the cycle of decay works because it has both positive and negative and it alternates, and it creates backflow. (2:26). If you look at the decay cycle of most of the isotopes of Silver and K you see B+ and B-, B+ and B-, which means that it is switching, there is a current flow and it has to switch. the energy surplus between this switching is what the body uses. This is what is done in the generators, if you remember some months ago Douglas showed 2 motors switching back and forth, one has the current positive in respect to the other, and one has a potential difference in respect to the other, that's where the switching comes. As a Nuclear physicist I look not just at the isotopes but at the switching of the power. Every time there is a switching some energy is released or absorbed, that's how radioactive material in the cycle of the body works. (2:27). It's the isotope's cycle in the microsecond (nano second) switching and energy releasing. it's just like ?? watts switching back and forth. ... and because it's connected to N and near the structure of the AA, then it depletes or surplus (adds) to it, this is how it (Sliver Nitrite) cures. There is a scientist who is actively promoting nano Silver. I support such a science, but the reason is the ambiguity of such a science, ?? now we have created. We had a meeting with a scientists who says now for the first time he can explain how the water Pl works and he will publish them in June/July in magazines that are peer reviewed, that the Pl Gans is correct and he'll show the effects on it. And all we do is put the Gans on a tissue and put in plastic bag and give to the Red Cross or Civil Defense of Italy. A lot of research data in the next 2 to 3 years will come out of these things. Because people said I had a pain and put the water on it and the pain went away, so the scientist know it works and want to put data to it, to understand how. We thank them but won't release their names so

they don't become a target for Mr. DL and his team, a bunch of pedophiles. (2:29). Do you notice we don't show much on these teachings any more because they threatened their lives. Understand the science and not just that it works, where is the location and what is the content material, what does that muscle or bone carry, how much of it and to what extent. In the lab yesterday we had 25 cultures on the table, the researcher said, the first water is good but by the third or fourth water something changes. It puzzled us because it should be the same thing, it should be reversed. Why is the culture growing reversed. I said, one of the tanks storing the water has a problem, we opened it and there was a problem. Not just say the T doesn't work, but go and find where the interaction is coming from. (2:31). The beauty of the present time is the access of the knowledge through the Internet. ... when reading scientific papers read the abstract and the intention of the writer and the last 3 paragraphs of the conclusion. Look for how they tried to make their data fit into their own idea, then carefully study the data and see if they achieved it or made it fit their expectations. (2:33). Was the school of thought with the abstract and the reality with the science. ... AA are weak and Gans' are stronger, so 2 things can happen you can use the element as an intermediary, and the put a weaker or stronger mixture, 2:1 is usually the best, it means you work with atomic mass, take a tissue paper and put 5 mls of Gans in one tissue and you put 10 mls in the other tissue, 2 patches one on either side, what happens is according to the ratio mass, the 10 trying to bring the mass of the 5 up, with the middle in there, what is on the positive MG ?? damage in between gets depleted, because this is what it needs. Walla you are a physicist scientist, doctor understanding the PI where the stronger always feeds the weaker to bring it to balance. (2:36). To be JUST, this is the story of the U. You never take you always give that you bring the others ?? up. When you take, you are lost. Because you want anything ?? but when you are given it's this I need and this I don't need. I like rice not potatoes, not meat but chicken, if I don't take the ones I don't like, then it is left over there and wasted, this is NOT the way it works. Understand the balance of the U. Why do you have twin stars where one is always slightly weaker than the other, but one carries slightly bigger mass or volume, and they try to balance. Look at an electron and a proton, one is 1/2000 mass and the other is ?? of volume, and then they try to balance each other. And in that process they move and interact. The truth about the strength of electrons is not what is written in the books of science, that's why the electron moves so rapidly but it keeps distance from the proton, because one has the potential difference and one has the current flow. (2:38). If I could write the books of physics and electronics there would be none of this rubbish that is written there today, but because you made a S and it works in the matter state, but it doesn't work in the true state of the PI structure. Because if the PI of the proton was always so strong it would absorb the electron, so how come it's still there and moves so fast? How come it works in the bandwidth, it MG-ly positions itself in 360 degrees and knows where the next point is, where it's going to catch the next one. Please understand that we haven't changed the teaching, we have shown you the tools and now we take you to an understanding of what we had to teach 3 years ago, which is introduction of the Man into the operation of his soul through the operation of his P. But we had to see the powers (? Gans, fields, etc), the movement, the existence, that we build trust in ourselves that what we do ourselves is correct (our direct experience of the PI). The matter part (of the teaching) took a long time, but hopefully with what you understood you can reach your own soul, that you can open the door of the U to yourself and humanity. (2:40). There is the achievement in Italy where the government is accepting the medical application. They have seen the effectiveness and now the Italian scientists have to write the explanations of how it works. end
