

## 154th Knowledge Seekers Workshop January 12, 2017

(Earthquakes coming in Japan and West Coast, )

(:10). (:16). We expect earthquakes in the next few days to week, in Japan and west coast of US, around 8 point. ... if they don't happen by end of February then it will be later part of this year. Everything will move in the next 14 to 21 days and we hope we'll come out of it safe. (:21). We see this effect on Tokyo and have asked our researchers to leave today. It depends on what happens in the Philippines and Tokyo, and whether it will extend to the West Coast US. It depends on the release of the deeper layers. (:23). If the earthquake hits before the 20th of January Obama will stay in power. The new administration will not have the power to take over due to the devastation. We hope we are wrong. I am getting a lot of questions about deepening the teachings and how to understand the structure of the soul. Man has come to understand the operation of liver, heart, finger, legs, but not the operation of his own soul, which in fact, have the same components that effect P. The change of the course in the knowledge of the teaching is for Man to understand his own soul. We started in matter, then N, then Gans, then the fields of the Gans, and the collection and operation of the fields which leads to a central point or focal point, what we call Principle Matter energy. (:25).

(:29). The faster and sooner I can teach Man the operation of his soul and how it has control over his P, then the Man can go into Space, then it's your decision in what form you want to go, through the SS or the strength of your soul. The strength of the soul will take man to every dimension in this U and beyond. The P of the SS has the limitation of the dimension and position. Those who mature will travel the depth of the U and for those who have fear for the maturity we will take in SS, out of the uncertainty of the operation of their own soul. In the coming time we will divide into 2 or 3 different sections, those who fully understand the operation of the soul which is the freedom of the existence across the U, and those who will take to SS because collectively they trust others to protect their P that they can take their soul across, and those who stay on the earth where P is the ultimate goal of the formation of existence. Let us understand our soul, how we can communicate, interact, and how we can shorten the transition point between the soul and P. This is all you can learn. It's like you are behind a mountain or hill and you hear someone shouting but you don't know who it is until you go over the top and see the other side, (:31). and find the maker of the noise. The closer you get the shorter the transition time and position. The body is the same on the side of the hill and hears all the time the noise of the soul but he has never seen it. It's time to climb the hill and look down and see the creator of the Man, which is the soul. How we want to see this ?? admits the understanding and fear of the Man and of the truth about himself. Some people feel happy to hear the noise from the other side of the hill, because it doesn't matter what is said but I hear the noise and can do he wants or I can tell him what I want to do. Some people will go over the hill and join the other side. When you join the other side you don't need to shout, you'll interact and sit next to each other, hand in hand, working together. This is where we are trying to take the soul of the Man, the P and the operation of the 2. The point comes, how do I move my hand, or ?? go from one place to another. What has that got to do with my soul? The soul delivers the info and for the substation to take action, plus what the substation (the P) sees in respect to its environment. (:33). We have gotten so much entangled and involved in operation of our work that we have forgotten the reality in acceptance of the truth about the line of communication. We have accepted messengers, we call Prophets, but have they been on

top of the hill to hear the noise of their own soul, to understand or at least come into interaction with their own soul, that what the soul has given has become the message. The problem is to understand that every man is a messenger, but it depends on what message he wants to hear. Those who have decided to work with the structure of their P confirm their existence through the non-existence of the soul. It's there but we are more ties up with P to be where we are. I was teaching you that in the movement of the finger to feel the pain on the finger and try to find the position in the brain, now let us go a step further. You touch the finger, or you decided that you are going to have a pain on the tip of your index finger. (:35). You carried the message through the PI of the body to a position on the brain to a place where for feeling that particular place on the finger. 22

(:44). Change the structure of light to the dimension of the E of the Man where the energy transfers from the Principle to the matter state. Change the creation of the U to the soul of the Man. There is no difference in the world of creation, it's just understanding the interaction and reaction of the body in respect to his soul and in respect to his environment. We have never sent an astronaut or cosmonaut without protective clothing into space to see if he survives. We assume he will die, that he needs the protection of the condition of the earth for him to confirm his existence. Man has never dared to take the next step. If Man understood the interaction of his soul with the P manifestation, does he need a space suit. Or within the skin of the P body, by changing its characteristic be able to survive deep space at any location in any U. The restriction has been on the Man himself and by those who claim to understand the knowledge of the creation, both have created a limitation for man to increase his understanding. (:46). How much more falsified knowledge do we have to accept. Is the ultimate speed of light the speed of motion? Now we understand that a bookkeeper has made a mistake because he didn't understand the totality. Do we need the P of Man to take him into space or do we need to understand the operation of our soul that wherever we lay our head is our home, planet Zeus or other side of the Galaxy, it doesn't matter. Try to stay open minded. the fear of the unknown has restricted Man to the P of the body and all the conditions we have seen. Once that we have submitted oneself to being inferior then the other aspects have followed race, color, etc. Try to connect your P with your E where you understand the E but not control it, then see where does it go on its G side which goes back to the soul, where part of its M side is the P manifestation of the Man. (:48). It's E is the change of the strength ?? Why do you change mood suddenly from happy to sad or rejoicing to crying? Don't look to the E but try to understand where the fields of E will create reactions in P and in the soul, then you'll find the path to your soul. Once you find it then you have to understand its full operation and control. We have biology now we have to do "soulogy" to understand the structure of our own soul, which part of it connects to which part of the P dimension in the brain and P, and the knick knacks, the positioning, and its colors, with all the compartments which it carries. What it gives out in interaction with other souls and what it gets back becomes its information. I said recently that the angel of death has visited the planet earth. What does it mean? The end, (:50). or the death of the limitations of understanding of the P in respect to the connection of the soul ... the angel of the soul will appear. How can you be an Angel and bring death, the reality is it is the end of one and the beginning of the better other. It's the Man who creates this limitation and it has to be taken away from the comprehension of the totality for him to be able to travel the spans of the U. It's you with your soul that tries to be part of the SS, to manifest yourself in planet Zeus, and you decides that the soul needs the energy, the E of happiness within the P that it can

dance. To show the E of the transfer, the laughter into the direction of the E into the soul. Then you have to find where in that soul that dictates the position. Everything which man does is recorded within the structure of the soul. If Man finds the operation of the soul he will be able to see the history of Man with his own soul. As all the souls of all times are collectively connected and are stored in the same place. What I said years ago, would you like to see the Crucifixion, the martyr of ?? Bab, (:52). see the manifestation of the beginning of ?? (Islam), to see Buddha? It is all registered within your soul. I said many times I will bring Man his own history for you to be ashamed of, you were waiting for a show, now you understand that the show is within your soul. This is the secret and the faster the Man understands his own soul the faster we can go to the next step for his own freedom of limitation of his understanding of the totality. It won't be very easy, it's a heavy task but the problem is that you can not show the others how to do it, because it works according to the strength and dimension of your own P and soul. You can guide but you can not say you go from this to this and mix so much of this with that and you get to your soul. I have said many times that if you want to find the path to your soul read the Hidden Words of Bahaula, it's a guide to find the path to the soul. But do not look at the riddles because he was the best riddle writer. Look at the essence of the knowledge, you'll find the path. Mohammed has done the same. (:54). You find the same in the writings of Christianity in those (books) that have not been tampered with. The Christian Books have been re-written to fit a few in the Vatican over the centuries. In Torah we see the same, the path of the soul has been mistaken for the work of the P. They shall not steal. You have stolen from yourself the carrier of information from the soul to P, so you pay the punishment of existence on this planet. In taking from the source you have diverted the direction of the P. (:55). Try to understand the deeper essence and then you'll understand the totality. Is life just eating, meeting, sleeping, peeing and the other thing, or is it a path to change the direction of the soul that it takes a new position. Why do we pray for the souls of the people who pass away or for our children, or is it the soul doing this? When you do you give directly from the soul to the soul of the receiver and then they elevate, and then in elevating according to the law of the Pl in trying to elevate the others to the same strength as we do in the medical application, it elevates the soul of the totality. This is where the praying goes. We back it with our own soul and no where else, but the banking has been hidden behind the buildings of the Churches, Mosques, and Temples. Because Man has not seen the creator of the Voice on the other side, the intermediaries can say whatever they like and play any Chinese whisper. This is why I say that there are no Churches or Temples in the U, because the man who travels into the space of the U has already understood (the Truth). (:57). To begin with try to understand the connection btn your E and your P and the soul, then you become enlightened to understand the operation of the soul, then you become part of the UC, in reality we are all Pl that are interconnected and keep condition and position in respect to each other, so we have (?are) become part of the UC. To become of the true UC is not to get on the SS and go into space and see a bunch of Aliens and shake hands and say hello because they don't speak your language. The true UC connection is in understanding the Truth. It's for us to understand ourselves by knowing the connection btn the soul, E and P. Over the years I have taught you a tool but not many people had the courage and audacity to take the step. Many of you built the transparent cores and rotated it and saw the emptiness in the middle, in that process you were happy to see some of the Gans' on the side of the ball, now try to play 2 games. Make as many layers of Gans' as you can, (1:00). then try to carry your E to the ball, feel happy and observe the changes in the liquid, the size of the gap (in center) and the thicknesses of the Gans'. Your E are connected to the fields, try to feel very

happy and see which layers change, and if the center empty gap changes in thickness, then you have made yourself an detector of your E, then try to find a way to connect with the empty space in the center of the core, what we call the soul of the Man. Then you shall see the operation of the soul in the ball. It's so easy. You were looking for the fields of lift, but I was looking at the structure of your own soul. At that time you couldn't understand but maybe now you can. Then try to transfer your P pain and E through the Gans layers, through the transition and see what happens to the Empty gap in the middle, if you observe closely you can even see sparks and lights in different parts of the empty space. (1:02). This is the position of my happiness within my soul. You were looking for lift, I was looking for elevation of the soul of Man. You were looking to see how you can P move it, how many times I said, your soul controls the S. You look at it and give it ?? which means you touched its soul, you will fly. it's time to look at all the tools you have made, the majority of them are for the connection btn your P and the soul, but you never understood. Many times I said the controller of the flight S is the soul because communication with wires and electronics is too slow. Electronics is like the neural S it takes time for the info to travel, too slow, but the fields interact directly at the speed of their strength. Again how easily you all have been taken for a fools understanding, you have been sitting and watching ?? in reality of the 2 but could not distinguish. (1:04). Maybe it's important for all of us to go back to the transparent balls with different Gans', Zn is the line of E, Cu the P, AA is connection with the planet and the rest of your P condition within the sphere of the ball will give you a rough indication of how you want to play the E of the P with the soul, and see the effect on the other 2. You already had the tools of measuring the soul but you never stood still to see when the ball was moving, when the liquid was there, how did your E change the size of materials in interaction with each other. Go back to when we showed the separation of one of the Gans in one of the tubes, you had a clear line and also an intermittent line, Gans' stay separated according to their strength. So does the body in respect to its E and soul. Any questions. (none) the process of wisdom comes from the independence of P. if you want to enter the world of UC. (1:07). Is our future in our hands? Or is it dictated by the others who position their souls in a specific position that our soul has to respond to? Like the magnets, when the stronger one moves the others have to accommodated. How much does our soul accommodate the others and how it enforces its strength on the others for them to accommodate themselves in respect to us. Do we see leaders through the operation of the soul of them, or do people live that the soul dictates the others ?? Many times we said is the soul of the Man his controller or does the P dictate the operation of the soul that it in return accepts the motion and P movement. How far do we need to go to see things, to know we can change things. (1:09). We have decided to ignore things of the soul because in the realm of P we have a problem to connect with it and understand it. Does the soul rotate at that speed which forces the brain to be ?? at a given position. Can we change a part of the E and place it in another part of the brain in the cavity of the skull and then with it move all the things which are connected with the P to that part. If you loose half of the brain to tumors, what happens to the line of communication btn the soul and P. What happens to the E which that part was controlling. Do we loose it? The answer is no. You can replace any part of the P in respect to the brain and the E in the brain with another part of the brain or even within the neural S. I have explained this in the medical teachings and we have videos of it to show people who have lost the soul part of the brain by tumor and the head is flat, been paralyzed for 5 years in bed. Through repositioning everything you, can get them walking again. (1:11). What happens if you have lost part of your brain that is responsible for your P motion, and your E in respect to that P part. How can you move?

Because of understanding the knowledge of transferring the energy of the P1 of the soul in another part in another tools, what we call the brain, then the info is carried (forward) to the [same] (the body part for motion). I can show videos of this, I couldn't explain at that time because people would have gone totally crazy, how is this possible. It's very simple. If you listen to the present fallacies of the knowledge of the brain surgeons. If you take the part which is responsible for the movement of the arm, or you have a stroke that damages the cells of it, and you take the E part from the soul to the P part, it should be paralyzed, how can you get a man ?? to walk with no brain? I have done this 2 or 3 times. To understand this you need to understand that the brain is a filter to the strength (?), you can transfer all the movement, all the E strength of the man to the spinal cord. Even though you have a man that has hardly any brain left, as long as the soul is not touched he can function as normal. (1:13). As long as you have managed to confine the soul, it is the fields within the matter strength of the structure of the environmental condition, then you can create the P. There is something that needs to be clarified, this is going to shock a lot of you that never understood, but if you think you've understood ?? because it was too much to even cross that line. Denial is the safety of the ?? job .. Let us look at it. You move from the earth to another position in the U where you know that you do not need the protective suits of the astronaut, where the P of the manifestation is dependent on the comfort of the operation of the soul in respect to the environment. Now hold on to your chairs because this is going to spook you off. (1:15). If your P in the new position needs the operation of lets say the changing of the AA, like N to K or another element, or creation of other dimensional P, do you think your brain still needs to be the same as it was made from the AA of earth, or do you confine the soul within the fields of the strength of the position of the E that it can manifest without the existence of the matter levels of the brain for the confirmation of the existence of the P. (Is it) beyond your understanding or can you understand? You always assumed that when you carry your soul the brain is still there and at planet Zeus you can operate with 20 legs and 14 fingers, but now on Planet Zeus the MG fields of the environment dissolves the AA of the brain of the Man which is connected to Ca. So are you going to loose the soul, dying from the loss of the brain, or do you understand the operation that you can place safe parameters so that the soul becomes independent of the transition of the E to the P, if so, then you have matured enough to understand the next level of creation. (1:17). I teach as a universal messenger to those who are beyond the human race, and this is a communal teaching. Those who have matured and understand the next step of intelligence of the interaction of the souls. Man might reach this stage in millions of years, as he can't imagine that there is existence without his brain. The whole secret of existence in creation is to create that soul and if it is strong enough, and just ?? incorrect it will exist anywhere in the U without the need for the transmission of the E side or the manifestation of P, unless it decides. Blessed are those who understand. In principle what do we need to understand, what is missing in our education? **We have been educated the wrong way because we are too much materialistic.** The whole donkey and cart, the jet plane .. Ask yourself one question, where does the soul go when the Man goes to sleep? (1:19). It's the P that shuts down during the sleep and not the soul, which is fully operating 24 hours a day, 365 days a year. Ask yourself, why do we die? Can I live an immortal life? The answer is YES, and that is how much you decide to create the gap btn the soul and the P that you control most of the energies. When Man goes into deep space you'll learn that the size of the soul and the E part of the creatures shows the level of their intelligence and understanding of the operation of the U. A man with a big chunk (?), like the human race needs the P, if you reduce the boundary of the brain closer to your soul, let's say

down to 2 thirds it means you have understood half of the E planes ??? bless you ... maybe we needed the shock to reconnect some points. (are we there ... yes ). (1:21). The question is have we wasted your time for 3 years in building generators, lift S and cores? Or have we chosen the path of gradually introducing you to the reality. In your cores try to reduce the liquid water and see the interaction of your soul, and how fast you can change the layers of Gans', then try to connect yourself to what you have created and have put AA in it, that you decide the size. then try to see ?? a new manifestation through your soul in the core and then you shall see a light. A lot of you have been pushing to put different Gans' and speed of rotation, and I have always said that it's the potential difference and current flow difference that it creates the ??? magnetic ?? difference. You will see as a glow is the interaction of the fields of your E which is given to the core and in its response back to you, you become the earth with the sun from the Man. You don't see the sun because you are stronger in the soul than the S you made but you see the line of interaction and the ?? others ?? (1:23). I was explaining to someone but they don't get it, They said, what we need the motor to spin the inside and one for the outside to control the speed. I said you don't need a motor, how many times. The Gans ball and your E and strength of your soul would turn the fields. Do not look for a P rotation because then exactly you have failed. Look at the interaction of the fields and what they create and then you'll succeed. As long as you look for the rotational part to be able to understand you shall fail, because you still have connection with the P but the soul is still strong in operation. The more you become detached from the P the closer you come to the soul. In the Chinese Yin and Yang the line btn the two is very fine. Questions. (1:25).

(1:47). He picks up fields throughout his house, he knows the T works. There is a KF group in London that you can connect with. We see a lot of people join the KF but after awhile their level of understanding stagnates, because it conflicts with a lot of things that were accepted and believed and now you have to unravel it and in trying to unravel your own understanding and accepting that what you accepted before was not totally correct. This brings a judgment point where decide that, "I can't go any further". (1:50). Or the conduct in response to the new T, they leave it for some time and come back to it later. ... the process we, not promote, but put forward for people to do things is showing a different path to the same point, be it the coils, cores, gas or Gans reactors, a mixture of different things. We are a vast society of different strengths of intelligence. So what I have done is to spread as many different ways (to enter the T) that anybody from whatever school of thought finds a point of connection with the T. Some people take the path of the SS, or the soul, or agriculture, everybody takes from it what they need. When I was in Theran, President (?) made a very clear statement about my stay there which puzzled me and even today I am still puzzled. They said, we don't want anything to do ??? .. you can't practice medicine here or energy, all we want you to do is to take us to space. (1:52). All we are interested in is space T. What puzzled me is why a nation that could have access to everything has narrowed it down to one point. In a way I can see through the puzzle and understanding, in primarily trying to promote the space part of the T they could see themselves to be elite, they could see an advantage to be able to do things that others couldn't, then apply it and by implication of it dictate a new position, and I understood this quickly when I was in Theran laying out my work in the background. They were trying very clearly to keep me out of the scene in Theran, but to bring the achievement of the Iranian scientists as a group. Later on I understood his

personal motive, which was a blocking stop, but we saw his plan was, but at the end of the day when I look at it 9 years later, the intention of the Space T for Iran has been a tool of peace for Iran worldwide. When we negotiated "5 plus 1", we did it from a point of strength we had. (1:54). We have the T and can deliver and we don't need you. All we got out of "5 plus 1" was to be part of the club. Can we join and have some of the knowledge, and in that knowledge "5 plus 1" Russia and China took part in it, ?? they understood and took part of it for the application, but in reality the rest has been sitting on the sidelines and even they have the patents in their hands. Many times I wonder when countries like US and the others have the same documents and things and yet they don't see it. It came back to the ?? enlightenment. I took the light to Iran, I enlightened the scientists and that is all I needed to do. And people come into the (KF) and they expect things and if it's not there then they say there is something wrong with it, this T or that. When see the big picture and understand the totality then you'll see how much you have matured and understood and then you can go to the next step. Many times I step back and look at the whole and think how I can guide humanity to be enlightened in one go, but in reality the humanity doesn't have the same intellect and that is the problem. We try to enlighten but not every body sees the light at the same strength as the others. (1:56). Try to understand according to your intelligence, but in so many ways, the soul is the best guide of the Man. My job it to take those who come to understand the soul into the Space of the U, because the soul is sacrosanct and doesn't get tainted and secondly doesn't kill or destroy. You say we signed the Peace Treaty, it means we want you to understand the operation of your soul. Because the soul is at peace it shall not kill, it repositions itself and never destroys anything. It's a contract btn the Man and the soul of the Man in a way that he doesn't create ?? with himself. Many thanks to the Man from Chester I hope you have many beautiful days ahead. John Caine is my name, sorry I didn't mention it. Keshe says I like the walls of the Castle you can walk on them and understand that they have no meaning anymore. John says that looking at the T so much is suppressed and we should have access to them. (1:58). With what we have opened up in Ghana and other countries you'll find that the knowledge will become accessible very rapidly. The Center in Ghana where they have a Masters program will become a center for worldwide teaching of the knowledge. Sharing this knowledge unconditionally creates a lot of problems for those who were planning to make money out of it, that's the problem. If you teach freely enough there are other people who can do other things and we'll go back into what I call the barter S. We all know it. What are you prepared to do for me if I do this for you. It's a new way of looking at it and operating in it. We have to see how we change our own understanding and don't let other people prey on our own weakness of understanding our own P in our own soul what we call our creator. Any other question. Rick is back. (2:00). At the moment we are heavily tied up in Ghana promoting the work of the KF. The work is going so rapidly, and the government has given us a building. I have to thank Benjamin without him it would have been impossible. The only problem we have is to give the Africans enough confidence in themselves to do the work, they have lost confidence in themselves, they feel that somebody has to do something for them. We lack a lot of management and they can be abused, so this is what we are trying to teach here. (2:02). Some people have paid for the stand alone power generator and they want to know how it is coming along. We are testing it and had a failure so hopefully it will go back on board in the next day or two. The design of the solid state generator is amazingly simple, we have to get the certification then we'll go into mass production. The problem with the Solid State is that it's an amalgamation of 2 or 3 S and there was an interface problem, some S can't take certain fields. A lot of people said we should not share this

in public because a lot of people will copy it and the rest. But we have always shared things freely and we will with this also, we can show it now. We will make a blueprint for it, because we will not be able to manufacture enough to supply the whole world. ... be patient that we get it 100% right. (2:04). I don't want the same mess that started with the MaGrav S, people said it didn't work but they got a reduction in their electricity bill. Millions of MaGrav have been made around the world and they all have taken the savings and walked away. There are a lot of rumors going around, we have changed the management due to progress, we have done this many times. But now we don't announce because of the people around who pressurize our management team. People like Armen will stay at the head of the organization. In Ghana the KF will run into 2 to 3,000 employees. We have seen people come in and abuse their position for their egos. We leave them to reorganize the KF. (2:07). (2:09). Italy is our home base. We came to Ghana to make a solid base in Africa and I will move on to the next destination. Those who say we are escaping Italy are escaping themselves. He talks again about the pedophiles and hypnotizing children and abusing them. This man is putting a lot of tools in the form of art. There is talk that Belgian men will have to justify their trips to keep them from moving around. (2:13). (2:15). Q: Why all ?? hammer religions worship Saturn and why the Iranian flying saucer T is named "Zo how" Parsee for Saturn. I don't know you have to ask them. It was the farthest man could see (planet Saturn). It's the path of ?? Abraham ?? it was historically kept, the truth about it is not there. A lot of the writings that we have go back to Torah, a collection of writings that came before Moses. The reason is the reaction of the man with the "man of space" is not something new, but understanding of the knowledge for the man of time that space is open and people live in it was the manifestation of the magnitude of the vision of the man how far he could see and still see P tangibility. (2:17). Saturn is what we see different from the others. 05

(2:28). We share knowledge but I don't like to cheat people, this is what we have done for centuries, when they get the respect then they become dominators. Try to transfer the knowledge locally. Keshe lived in Manchester for 20 odd years and has roots there. We will release products only for Africa in Ghana in the next weeks, soaps and oils, disinfectants. In Africa sterilization units in hospitals is a big problem. We are setting out to do a total sterilization unit in the hospital so when the doctor is working he just drops it in a box and the nurse takes it out sterilized, we know it works and can make a few second operation. Or they can put it to another part of the hospital and leave it for some hours. This comes out of the research in Tokyo University, there is a threshold band, it's not that you just kill some of the germs. The threshold band is for example with Cancer cells nothing happens for 5 hours then suddenly all the cancer cells literally disappears. (2:32). They did another test with a different culture after some time they came back and said it doesn't work, I told them to give it more time, then at 23.5 hours it suddenly changed, so there is a threshold level. In the Italian research we have seen that using the Gans in a specific order can do magic in cleaning up the environment. The results were released yesterday about the environmental cleanup in the highest Italian court for environmental control. We've become very powerful because we have submission by the government laboratories. You should look at what are the needs in your local area. Do you have a refinery, or whatever. In Ghana we have a problem with plastic thrown every where. We are not considering burning it but using something where you put the plastic in it and it changes the MG field and getting energy from the CH bond, there is H, sugar, energy in it. We won't come out with a bag of sugar, but rather the field PI energy of it. We create a field strength positioning that plastic automatically converts. These are the solutions we need to look for now that we

understand the science. There are 7 billion of us and none of us can become the controller of the others that is why we do everything freely. (2:35).

(2:45). Keshe leaves for a meeting. Rick carries on.

(2:59). (3:15). Caroline comes on. Don't make it so complicated that's makes people who don't understand that talk to feel left out. When you wish you already uplift everyone for miles around. Your soul is working for what you create, your creation is your intent. My wish is to go to the ones who are hurt and feeling short of something or are in no position to stand up for themselves. (3:17). I wish that a lot more people every day could wish for the change. Go back to the basics and why you are creating these Gans', the beautiful feeling when you start noticing that it is working, your joy and pleasure of seeing the benefits of it, and of sharing it with others. She talks about shantytowns in Africa, looking down it looks quite nice at least they all have a roof above their head, it's all a matter of how you look at things. What do you do with your old MaGravs do they sit in your house or do you share them with others so they can benefit. (3:20). This is a creation process for giving to help and support your neighbors. If you have empty properties you can let the cold and homeless people use them, put a MaGrav in it, don't be afraid to make the first step. Every soul that blesses you will give you the energy and courage to do more, to relieve more pain from people. Go back to why you are making the Gans'. Many of you have turned your bedrooms into laboratories, but please give it out, share it, hold onto nothing. There's not only human suffering but animals also, there is so much you can do. Just by handing out a bottle. Every body is worried about money, but when you generate you generate more. A lot of people get caught up in creating companies. ... you are supposed to create the connection btm the MaGrav with your intentions. Go back to what was the joy and pleasure you had from making it. (3:24). (3:30). As Keshe said when you create your wish and if it is just and connected to your E, as you know how bad it can be, within 14 days you should see an outcome. Some of my wishes are so big, but I keep on relating it to others so they can add to it and create a bigger and bigger Pl field so it can reach its target. If you see wishes coming up don't be shy, share them. Keshe said that one person's wish even can change the balance for the whole planet. It's just a matter of assembling the right direction with the right Pl with the right energy to achieve its goal. (3:32). It's in the intent of how you step out of your door. (break ... ) (3:39). People see the change but they don't understand and want to know more. (3:41). If you know people who can't afford electricity they don't have to make a MaGrav they can use Alek Beads which are easier and simpler to do. Even placing N coated Cu plates connected with a N coated Cu wire in front of the window and put a few bottles of the 4 Gans' in the corners of the room, you'll rebalance the house that you have a stable temperature with it, even if it is only in the room they live continuously. It can save them so much, you can spray the windows with CO2 Gans water inside and outside, it creates but it is the way you offer it that makes the difference. When they see the change they embrace the T. Don't just stick to Pain Pens and Pads you have so many ways that you can give a hand. Here in Ghana a lot of strange things happen. If I give someone a bottle filled with Gans water within a week I see a shine on their face, then they come back and I give them a bottle with some Mother Gans and tell them not to go below half with the Mother Gans bottle, and they are sharing. (3:44). They all give the same feedback they have changed. They don't even know themselves but they shine. I can just say go and do what gives you joy with the Gans and share because your results will triple. Connect to the wish. One of the wishes you all know about is in ?? Aleppo they made a ceasefire and the people can start living again. (3:46). In North Dakota their wish is still standing

there, but they are still standing their ground, and they are achieving so much that people are not aware of. After a hundred and fifty years the tribes are uniting, they are becoming one again. They have been shattered to pieces and now they are all re-uniting. One ceremony after another that they are joining back to their original tribe. And that's the beauty of it, it doesn't matter how difficult it looks but they are achieving. This was one of their prophecy that they will unite. And that is the most beautiful that they are coming together in peace after so long. Please keep on posting to the new and old link. Bring your experiences forward. I love you all and know you all have done a lot of sacrifices in time, efforts, tolerance and patience and all have contributed to something beautiful. (3:49). The only thing I ask, I know that there is a lot of turbulence coming, be aware and get prepared, ... stock up a lot of food for long term, get enough medicine that you need, get everything you need in the house, find a safe place you can go if it gets really bad. If you need to stay outside your house in this cold weather make sure you have enough materials, get your tents out and camping gear that at least you can stay comfortable. We know it is going to go in certain places so please prepare yourselves. Look after your neighbors and friends and inform them because not everybody is following the KF but they may have sensed the first signs that something is coming. Start to debrief them the same way as with the T so they can get ready. The people in Italy, Greece, Fukushima, Peru, they have already felt the tremors and it is not nice, it's a horrible feeling. Make a lot of Gans waters in reserve. (3:52). So when things go bad you can help your neighbors. The first things to be effected are the water supplies. Find a way to be able to cook if you have to go off the Grid. Move away from the coast lines. end
