

161st Knowledge Seekers Workshop, March 2, 2017

(,)

(:12). Architects have been hired in Ghana work is going ahead. International prosecutors have asked that we don't talk about DL case anymore they have taken over, bank accounts in Cayman Islands etc. (:20). The workshops and teaching across the world have to be not only making coils and Gans, but understanding what is to become of it because of it, (what is the main purpose). This is the turning point, what is this going to develop into, deliver to us as humanity in the progress in the understanding of the work of the U. This is where we are headed not just making coils and Gans', these are all a small part of the teaching. When you do workshops maybe in the first couple of hours you have to explain it and enlighten them as to what the T will deliver, how does it interact with my body, with a tree, a fish, the environment. In time we teach how we connect with the others beyond the boundaries of this planet. We are like a little fish in the ocean of the U. We always thought the whole ocean as our world but now we see that we were happy with a little pot. Now the pot has opened and we'll see other dimensions of existence. (:22). We went from individuals to village life, to towns, to cities, then we made the countries, then continents, and we made the planet. The next step is to open the U. It is your job to enlighten people to not just look for the energy or cancer, when that is over now what next. Now we have everything (we want through the P I T). Now it is your teaching that becomes the enlightening, into the hands of the people who can bring change for humanity. In the last teaching I referred to understanding of thoughts and impressions, the emotions. For example putting slightly different Gans mixtures of Zn, making them with a slightly different salinity strength, or maybe with 2 different types of Zn from 2 different concentrations of salinities of 2 different salts, so that we can see which one is the strength of the E. If you made one Gans with K and the other with Na would one be the strength of the E and the other would be the strength of the physical E. In the body the emotional expansion and contraction comes from what we call the pumps, Na - K pump, that is from the P side, on the field strength side of the matter in the pumps. (:24). It's time for us to develop the knowledge of the interaction.

(:30).

(:36). It's for Man to trust in, live by, and obey the rules of the U. We have been doing it for millions of years, if the Man learns what we know, Man will follow ?? in line because this is the promised beauty land. Deep Space is a promised land where Man will find peace in every corner. From now on this is our work. We have to raise the level of Man in (understanding) the totality, that one (he) does not fall behind. In the coming weeks my work will show this. ?? to make effort, pan-continental, to raise in one effort the whole of understanding. KF management team is getting prepared for it to be able to handle it in the coming months. In time we'll hand over the whole control to the World Council and then to the Universal Council. We have prepared the ground and it is our job, those of us who always talked about and wanting peace, not to fight the war makers, but to prepare the ground that they become irrelevant. When you don't produce arms you can produce as much as you like, ?? Something from the new president about AID's in Africa. (:38). Thank you very much, this is the wish of Africa. So much cheap food has been put into Africa that it's not worth for the African farmer to farm anymore. Don't send us any more aid (USAID) so we can go back to producing what is needed by this continent (become self-sufficient again). This is at least one sensible thing we have heard from the new president, we thank you for it, if you can

follow (through). If the American farmers will allow you to do it, because they have been making a lot of money out of this false economy farming. This is what has to be done to show that we do not need to be bounded by the physical material world for food. This is what we have to offer from the bank of the knowledge from the Pl T. The teaching must go on because among the ones you teach will be the future men and women who will carry the life and information of the existence of this planet into the U. Now we are proud to say I am from Iran, US, or China, but in deep space we will say we are from earth. When they ask us why do we have different colors and shape we'll answer because we have different environments. on your planet you have only one environment so you all look the same. The planet earth is beautiful, it has the diversity. (:40). Allows the diversity of existence but unison in thought and action. The way we invite people to come to Italy or wherever to show what we have, so we'll do this in deep space. Come to earth and see the unity of mankind. We have to understand how to see without the eye, to feel without touching and tasting, we don't need to eat another entity to see how it tastes. If he likes he gives us the texture of his feeling for us to know how it feels. I remember a movie I saw where there was a blond girl and a black man and she says may I lick you to see if you taste like chocolate. Man has to cross this border of needing to taste. He has to learn how to use his E and his soul to feel, share, and to give and take. This is where the real job of the SSI starts. (:42).

(:50). Romans

(:57). Where you put the orange (before) you put the AA, CO₂, CH₃ and CuO around it with the ZnO₂ and you drank the water and it tasted like orange. ?? your body is the water, contains the water, and the ingredients. If you are mature enough when you look at the orange you'll feel the taste of it, you take the energy that you are prepared to take without you even touching it. Now you understand the point of maturity. You had to transfer the taste of orange into the water that had these plasmas around it (AA, CO₂, etc), but your body is made of that Pl. The glass container is the body of the Man. Did you need to consume the orange, or the orange stayed intact with what it gave out, you tasted it, you took the energy of it, you had the pleasure of its existence without consuming it. This is the maturity of the Man in deep space. **Thy shall not kill.** You have done all of the experiments in the P dimension, and all that I am doing is connecting the P links to your E to understand that you are the cup, the Holy Grail. (:59). And you never knew. The body of the Man contains everything, it's the Man who has to learn how to tap into it. We have opened the knowledge so that you can see because you have tasted it. You have seen that when you put a few dynamic (reactors) things together you get matter forming (Peter in Austria). Do the same with the body of yourself, the blood (flowing) in both hands is a dynamic reactor of the existence with a current (nervous system), make you E to see the hand, if you wish for gold, there shall be gold in the palm of the hand of the Man. Peter showed this, the plastic that collected the metals is the palm of the hand of Man. Two cores is the hand of the man, and the brain from outside with his E dictating what he wants to see will create the material you need, even the existence within the hand of Man. Now you understand, you have been to the school that teaches the full knowledge. From now on, Man has every knowledge of how to do what has been his wish but has never connected it to himself and from now on we connect it. We bring you examples for you to connect, I have done this but I didn't see it, I know I can it. (1:01). Put your lover in front of you and see how much love you can give, and see if the love is reciprocated, or is there a true love, then you

don't waste your time loving an idol, where there is no reflection of the E back. Man will participate in creating new generations of beings in the U through interaction of the soul, of the E of the Man with other entities, which would otherwise be impossible in the physical life. The children of the U are made of every race in the U, for those who understood this interaction. Making love and the beauty of the offspring does not need physical interaction the way the Man has gotten used to it on this planet. I said many years ago to Caroline that we come to this planet, the P dimensions like this to enjoy the touch of physicality, when in fact we are committed to the dimensions of the soul of the existence of the U. Caroline and I see a lot of pain here in Africa, but we also see a lot of serenity and self control (1:03). and understanding of the E and through it the fear has ?? existed and confirms in their souls that they can control it, but one little man in the West we call it a Christ or Mohammed, here in Africa they call it witchdoctor ... control of the E through the soul of the Man. A miniature version of a bigger structure, but in fact it's the work of the same thing. The Man has got to go through this barrier, through the point where he trusts in his own soul and sees without the physicality. This is the job of the KF and SSI to bring Man to that level so when they come to the SSI they are mature enough to enter the next dimension, which is detachment from physicality but understanding the totality. Not many will pass this level or take the journey. When we said we are here to save the few, there was an outcry by Caroline and Dr. Kostova, you can't leave the children behind, you have to take all. We give the opportunity to all but it is for the soul to choose. Maybe now they understand, comprehend what is to come. The choice is given to the Man and it is for the Man to take the next step. (1:05). Stay within the confines of the physicality of this village of earth, or take a step to see what the village of the U in the world of the Unicose has to give. Once the Man starts to travel the spans of this U he will find out it is too small, I can travel faster from one end to the other, I have seen this many times, but because the life of the Man will not, being 60 to 100 years as you are used to it, it runs in thousands (years old) and you have time to be everywhere. You learn the speed of the transformation, transportation, then the shell of the life of this village of a U becomes too small. then you'll start ??? to see what is behind this U, then we have to learn the rules of the Unicose, which is very much similar to the rules in the village of the earth. You have to learn that in the Uincose each village has its own behavior, environment, it's like when you come to Africa it's hot day and night, in the North pole it's freezing, everything else is the same in the dimension of the Unicose, each U has its own composition, that's why it stays in that direction and dimension, it's for man in the future to learn how to adapt in the new dimensions, but you'll find out that by carrying the basic fundamental H as a part of the existence man has already been given a key into the level of existence into the Unicose, (1:07). but he has to graduate, to go through it to understand it. For some it will take a few seconds and for others it will be centuries of travel for millions of years and never succeed, because they have not matured enough to go to the inner sanctum of their souls to see the totality of the creation. Try to practice, make as many different Gans' and try to influence those Gans' which are matter level, or E level, or in the dimension of the soul and start testing yourself, then you'll be graduated when you come to the school. This is like what we call the "Evening Classes", you practice and teach at home and then come to the Institute to graduate, and then we teach you the final ?? , there are no failures, it's just the lack of understanding which gives us the limitation of the existence. Try to teach as much as you can, it's up to us to build the SSI, I have put all my effort into it and you shall see. The SSI in Ghana will become the focal point of humanity and the door into the U, I have made my commitment. (1:09). I stay here until my dying days, but I will teach the Man how to

enter the Universal Council and through them the World Council and through them the door opens to the U. You can't open to the UC if you have no respect for where you have come from. Understand that when you take into the U you are the ambassadors of this planet. An Ambassador means representation of your president and leaders of your nation so you have to carry his integrity and ethos. Now a days we have 180 countries, not many nations can afford 180 ambassadors in each country. Now that we open the span of U where there are billions of stars, gaps and cavities of creation in the U, that 7 billion men are not enough to put an ambassador in every corner. We don't want to be known as the wild guys from that planet. When the ambassadors of earth arrive we want them to say the men of peace have come and they understand how the U works and they abide by it. We stand as a beautiful rose and not as a thorn in the back of the UC. Slowly we teach you. (1:11). Try to practice, like in a sandbox, with your E and find out what gives what E of you in different boxes, then bring the boxes together, separate and feel the E and see how they interact, then close your eyes and make a recording of what you want and what you see, then make a further test in wanting to touch without reaching, and you touch and feel. The size of the body of Man will be the extension of his E, we do this on earth, now we learn to do it within the freedom of the space. The teachings from now on are at the level of the SSI level. You all have been around to upgrade yourself very rapidly. Playing in the garden of the earth is over, now you are in the first class. You have to learn how to hold the pen so it is the pen of peace, learn where to sit that it becomes the seat of justice. You have to learn how to speak that the soul of man speaks without the words of the man. Then I'll take you to step number 2 and I hope by God's name it won't take centuries. (1:13).

(1:30). prophets ..

(1:32). become the passengers of the U. There are many passengers on this planet but not the whole of mankind. Try not to exert your wish, knowledge, your E and your souls power, but be the recipient that in receiving what is needed is given. Never take but accept what is given and because of it you shall give more and receive more. Try to understand the totality, the essence of the reality of the creation. And now you have a sandbox, you have all of your Gans boxes start testing. Put it in your core and see if you can create with your E and E in the core without a motor. We saw that with the test John showed last week. You saw it 3 years ago when the decision was made that the P in the dimension of the E could stop the reactor #2. Now make that stopping of the reactor, the stopping of Man in the P dimension that he can work through the energies of it through the soul of the U, then you walk through. (1:34). Try to use your E to make contact with the Gans boxes you have already made. You'll find out the truth about yourself, and many of you will not like to see it. You think you felt good but in fact what you wished was opposite because your soul was aware of the reality, ... in the U there are no masks or cover ups. Try to understand your own E and your own existence that you don't need eye to see. You'll see through. Test yourself, from now on the race is on for Man to know his own soul and its connection to his E and P and how he wants to show that physicality. Many of you wish to become black will become black, and those of you who want to white will change your color overnight. And then you'll see that your heart is black even though the color of the skin has changed. The E in not in the heart but in the soul and you shall see. You'll become the camelian of the U because the conditions of the environment dictates for you to change to be able to survive. (1:36). That you don't give too much, then you would have no more to give and would endanger your own existence, and you don't take too much that you endanger others.

Balance is the order of the U. The Gans Boxes you made are now the judges of the level of understanding of your own E and soul. Then make boxes of the others and see if you are correct in conduct, then make then with the understanding of the inside of the Man, because now when you look at the E the box can't be made of those materials and fields which are in the soul level, you have to make a new box with the E level of Man. In one is ??? and in the other is Iodine and something else, and then you play with the P of Man ??? the matter state of the planet's Gans', then you see how you have ?? , then start playing the piano to see which key you have to press in order to get what. Welcome to the first lessons of joining the UC. You can't sit behind the drivers seat until you learn what is the ignition key, clutch, brake, etc. what happens if you press the wrong one and the engine collapses and you get pulled to the other side. This ?? is the E of the soul and you'll see how you stir the whole thing together. Start making as many boxes as you can and sit in the middle of it. (1:38). ??? fine tune the boxes that in a single box you become the true light of yourself, then you are ready to become passengers of the U. Any Questions. You thought that you just graduated in N coating and Gans and now you find out you are back in the school of holding a pen just to learn the alphabet of the U. (1:43). Alca made a Gans of all the salts K, Na, etc. are each of the Gans supposed to give me a different E? It depends how, what, the way you made the Gans. I made it the same way as I normally make CO₂ and Zn. Now sit in front of them and see what moves what E. I put them all together and also made patches and put them on the Cup of Life and measured their strengths, the Ca and K had higher strengths then the other ones. (1:45). You have to test and see what E (triggers). Don't mix the Gans' try to keep them separate, not even close to each other. You have to keep testing until you find the right strength and when you do then you'll know what you're looking for. Can I drink them? As long as you don't drink the Gans itself, yes. There is no problem with the Gans Water. When you make the Water of Gans you don't carry the matter state, only the Pl state. Vernie can explain how to mix the Gans, and how to get a result. (1:47). When mixing multiple plasmas to water it is best to add first the lightest strength. 11

(1:49).

(2:01).

(2:09). The different bodies of man are different strengths of the Pl. who is the one that talks

(2:22). We try to promote the teaching as much as possible because it's the time now for mass teaching. Those that object it is just that they don't understand, you give from your soul that they may get enlightened. Jackie shares his teaching conference in French, 85 people attended. he shows the photos. (2:28). Summarizes plasma technology. (2:36). ... This time around many people have been taught the T (? means last time the Egyptian priests abused it). Hopefully, we don't leave many people behind that it can be abused by those who think they know a little bit more. Use these teachings not only to make N and Gans but to elevate the soul of the Man that he learns how to help himself to elevate his E, that this can be part of his existence. ... the donations will go towards the space program we need 250 million. We have been approached by a handful of governments that want to participate as they can't do it alone, then they would be part of the space program and send their scientists. We will be transparent. (2:38). As a human race we started in Africa and maybe to go to space we start from there as well. I hope this journey of a few million years has taught us a lot to change our behavior and attitude. In your teachings try to bring the people to see the benefits by

getting in touch with their own emotions and to see the pleasure of it. We call Ghana the Gans Valley. (2:41).

(2:46). We get people at the presidential level calling and saying we have a cancer and we make emergency deliveries of Water. In the government they know it works, they want to know what the next step is. It's gone beyond the borders of Ghana. When we say KF then they say Ghana and we say even further the Philippines and China etc. Our hard work is paying off. (2:48). We have to keep on teaching the 7 billion, we have the Nano and now we teach the ethos of Space. The governments that opposed us are now inviting us but they want to know what they can make for their nation. In Europe, 1.4 million farmers have asked for help with contamination that is preventing them from selling their products. I am working on it and in the next few weeks we'll release it and we'll work through the Italian government but the products that we produced will be here in Ghana. Because nobody has a solution, the governments now see us as a solution. Let those who write the rubbish, let them they are bringing more and more people in. Man has tried everything invading, using force, building walls, and nothing worked, it all has fallen apart. Now it is time for the new T and world peace, we have no choice. (2:50). Where you are going to score with everybody is that they want to live a clean good life, you'll not do much with the Nano materials etc, that might help on the way with the P, but when you touch the soul of the Man you free the Man. In coming time we'll sell units that people can measure their souls, the extent of their E, and the strength of their communication with their P. Once people make the ZnO₂ Gans everything changes for them towards the KF. Those who oppose the KF have never made anything (N or Gans). Talk is cheap. We are all ambassadors of the UC. This process will take a few weeks or months. ... you'll understand everything once you understand the E. We don't preach we enlighten. You'll understand the strength of the light, then we'll take you into the U and you'll travel at the speed of light of the U, not of the matter state as what Einstein talked about. (2:54). Don't force it but let it come from the joy of interaction. ... the building of the Spaceship Institute is the target the priority and every effort will be made for it to be done and we free the Man. It will be interesting how the governments and the militaries will want to be in it. The condition for them to be part of it is for them to sign themselves to the World Peace Treaty. It is for us to understand our own, not look to our neighbor, then through it we'll become passengers of the U. (2:58). There are other ways that people can support other than money. We need 3 Raman Spectroscopy, instruments, etc.. Keshe goes to Italy in next 2 weeks for the conference. Interaction with KF and the governments have to happen rapidly. When we gave the USB stick the government of Sierra Leone with the first to receive the key, it snowballed to the Italians, Japanese, Chinese, then the Americans asked for it. We are releasing the space technology to the Africans, surely the Americans and Europeans are not going to fall behind. (3:01). when we showed the banners of space flights from Accra, the governments couldn't believe it, the Africans going to space. When we explained the simplicity of the knowledge they say why not, we are in it. We don't go to fight or make satellites to do this or that, we are teaching the knowledge freely and we are showing that it can be done. The nations can participate as long as they are committed to peace. Our biggest problem is where we are going to expand in a few months when we show that KF Ghana has a space center. They'll not want to be behind a 3rd World Nation that has become a leader in space technology. We cross the borders through knowledge, with it the governments will follow. We have enough numbers around the world to do this. We need to have the people who write against us for the people to see our beauty. When the say he wanted to go to space why didn't he do it, because you killed our people, what you did you Dubai. (3:04). The

surety of the success is in serving the humanity and we do unconditionally. For my family to stay here in Ghana is totally opposite to what we are used to, but the price for peace for mankind after thousands of years, is worth it. It's not a suffering, it's the pleasure of serving humanity. I have talked with the architects that nothing should be destroyed to build this, there are some big mangoes trees, I said no tree should be touched, build around them. We have to build to make progress, we don't build to say we are somebody, we build to make a change. The building have to be 1 story only. We are incorporating the Technology in the materials used in the building. We are incorporating Gans' in the brick work so as not to use air-conditioning, and using Gans' we know that can block the sun's ray so the building stays cool. The same with the power unit, we can purify the river water so we don't put pressure on the outside (local community). We will use all our knowledge to show a new environment using the new technology, but at the same time being able to go to space. To open man to the space so it is open to everyone. I explained to the scientists how simple it is and that we don't need 7 years training in a swimming pool to go to space. (3:08). end
