

162nd Knowledge Seekers Workshop March 9th, 2017

(, the evolutionary changes in the human species came through the emotions, the soul through the emotions creates the physicality and we have to learn to create our body in whatever environment we travel to in space, Many of the stars we see are really spaceships in there time 1 day is a thousand years on earth, , Why should I leave the body when the body and the universe are in me, the Sun is a plasma not matter its surface are the weaker fields that appear to us,)

(:12). ... When the temperature changes slightly we find out that we can't cope with it, our body doesn't accommodate for the change. (:15). In space we have to know how to do this. On this planet when we go from land to water we haven't learned how to reverse the process of where we originally came from. We came from the water but living on the land we lost our habits of using the body's systems for water, which are still part of us, to be able to live within the liquid environments of the oceans. The same is with us in the space. ... we haven't yet learned to be able to live again in the oceans. When flying in jetliners a slight drop in pressure gives a change in emotions, drop in balance with our fear. This is not what we are going to feel in the space. The transitions we feel in space will be totally different, not what we are used to here. (:17). The transitions are non-tangible but felt internally, because they will play with the field strength of our E, soul, that our physicality has to react with a change according to. A small change in pressure and temperature has created different races, heights, and features for the Man on this planet. Now that we are going into deep space there will be a massive change where we have to learn how to cope, adapt, interact with these new change of environment. The change will no longer be temperature it will be field strength, how will we react and protect ourselves to keep the integrity of the physicality and E and the soul together. here on earth when we interfere with the working of the physicality the E and soul separates from the physicality, we call it death. How can we live in space that we can keep the totality and according to the condition of the environment that we can adapt to it. Here it has taken thousands of years to adapt into different color of hair, eyes and skin, height. In space we don't have millions of years of evolution. It has to come within us in the strength of the transformation of strength of the soul to the E to physicality. (:19). This is part of the teaching needed for man to go into space. How do we adapt, is there a common denominator feature that allows us to live a life in deep space irrespective of the condition.

(:24).

(:36). .. We shall see each others soul by the strength of it through the mission of its soul by what it is giving and not what it is taking, it is giving so much that in comparison what it takes is so minute, which is what I don't need so at least we serve each other. The color of soul is the transparency of the color of fields of man's E. This is the biggest and hardest part for many of you who want to move into the SS program. It's not a space suit anymore or a weightlessness, nor training to become passengers of space, but it is training to become part of the space itself, knowing that in totality the integrity of me shall stay until the point when I see my soul, the energy which it holds, can become part of another to give it life (?? so it's longer) or become part of ?? that it can serve more. The fear of the man to hold onto his physicality is 99% the cause of his demise. Trust in feeling of the E, in understanding the strength of the soul for that which becomes non-physical is the key. I have to teach N material and how to make a coil. (:38). and the ball that they can make the fields, be you have never been taught in thousands of years and this is the path to universal unification of Man with the U and the souls which are

constructed out of the environment of this planet. The preparation of the man to go into space without the shackles of the physicality will be a very harsh one. Not many will cross the line because the fear of trusting their own soul is much harder than trusting the physicality of this planet, which can finish with an earthquake of whatever else, will leave the destiny of the Physicality, separation of the soul in the hand of the events, then us being in charge of it that the events become irrelevant at least on this planet. The understanding of the E of man will lead to the station of his presence, so let's go back into the E and find out at least how we can use our E to change our Physicality, can we do that. Or do we need to fine tune the fields which are coming from the soul which are buffering it at the level of the E we have the tangibility of the existence, then we can interact, that we do not need the fragile P world of the body. (:40). ... How much the man allows himself to accept the new according to the level of his own intelligence, and understanding of the truth about the world of creation. He accepts up to the point that he is comfortable with, but for me to show what you want to see is a flick of a finger but then I become a magician. Putting a stick on the ground, or opening a river (Moses), or creating some kind of manifestation that you can believe in doesn't work anymore. We have to guide the soul of the man that he find in totality the path to the UC, not a tribe that we become abusers like the other ones before us, because they have been present or the magic has been used by them to open the sea for them to be the causes of more abuse in the future. The teachings as you have seen in the past couple of months is more for the man to move to trust his own soul that there shall be no more temples for the man anywhere in the U to become the pitfall and the cause of the division of man from the rest of the UC. There are no Churches, Temples or Mosques in the U because when you understand the Truth the soul of the man becomes the Church of the man. (:42). Then what is believed to be the correct conduct becomes part of the structure of the physicality at the point of manifestation. How do we do this, to understand our own soul, to get in touch with our E, to start communicating that we understand that we can confirm at least by a tool that we feel a response from our E. This is the key. The man is too Physical, so he has to see something to confirm what he is doing and what is there because he has no trust in himself (as a spiritual being). Then we come across, prove it to me, show it. It's not that you are wrong but I am stupid I can't understand. If you say show it to me I don't trust it, it means that I am too stupid to understand, so I ?? you that it doesn't show my stupidity. This time it is you who has to trust yourself that you are not stupid to confirm your own soul, and this is the big question. It is you who has to find the wormhole into the life of your own E and through it understanding its strength to find the wormhole and passage to your soul, there are so many small passages and ways you can find to it. It takes time and comes out of total belief in ones E and that what you do is correct. (:44). Total belief that what you are doing is for the betterment of others and not you. This is the key. Not going out and physically buying a key for the path to the next world, but understanding how through the strength of your E you can open the key to your soul, an access to your soul, a way to bring the fields in level at the strength of the soul, E and P, more or less to a point by changing one slightly the other one changes, this is the hidden key in the whole structure in the existence of the man. If the change is too much on the soul side the physicality has to change a lot and it can't change a little, you can't put your kidneys on your toes ... ??? it can shrink so that it can manifest the self, and the E can accept the Physicality and the soul can accept the change ??? at the point of manifestation. One of the first steps is to understand how does my E effect the environment that I live in, how has the accommodated condition changed me. (:46). and use that to find a way to your E. There is a big problem for people of Africa, but it is a bigger problem for the ones outside of Africa, but in a way

they have a way to understand the change because they have to change to go from the dark skinned to lighter skin, to change their features, hair and whatever to fit into the environment of where they have accepted. The Africans have been here a long time and they have nothing to change, they are still the same ?? game, but they have a bigger problem, but they have an advantage in that they understand the work of the E and the soul in a different way and slightly more mature than the rest. Those who live in Scandinavia or N. America or China have seen the path of the change through their DNA and RNA to change them to fit into the environment. (I think he means that when they migrated out of Africa that these people had to go through an evolutionary change to adapt to their new environments. They changed their skin color etc.) So you have already seen the change. And that transition has given you specific features and emotions. Why do all the Chinese or Arabs or Spanish have this behavior. You have been not only through the evolution of the Physicality, man has been through the evolution of the E also, but he never understood. (:48). When you go through the evolution of the Physicality it comes from the essence of the E, when it feels pain, oh, this place is too cold, I don't want to be here it's painful, I don't want to feel the pain so much, I want to fit in, then I change the Physicality by changing the skin to a lighter color and I can stand more cold. You didn't become white in one go ???, you changed because the E felt the cold over centuries and created a condition to transfer the Physicality in order not to feel the pain of the cold. Now you understand that the evolution put forth by Darwin doesn't come out of the condition of the environment, but mainly out of the condition of the E in respect to the environment. We had many blacks as slaves for 3 to 400 years across Canada, America and elsewhere, have any of them changed to white. Because the accommodation of the living, the harshness of the environment in which they lived have not accommodated the changes needed. Would the blacks who were taken in chains to America in centuries to come become white? Yes they will. In time they will, unless they find comfort in their E to stay black then they don't need to change. Those who went through the transition of what Darwin called evolution (:50). of the physicality have in essence the E behind it, otherwise physicality would not change. All of you have been N makers, especially Chinese because they cook in hot Wok, which creates N materials, and you have been Gans makers because you put a salt in it and eat it. You all have done the transition without knowing that the E is the founder and changer of our physicality. Now we all need to understand this crossing point. Taoism explains everything in the physicality because the man has seen it and accepted it without knowing it. Now we understand that if the E had been fixed the Physicality would not have changed. It's the E that changes to be different to be more attractive to get attention, to become part of our P structure of the interaction of the fields of our brain, which interacts with our E. Go a step further. If I receive so much energy at a level that I can use part of it as E to change the physicality, now how can I get to the energy which sends the seed to become E, which is the energy of the soul. Then you find the path to the soul of the man. (:52). It's no good building a car if you don't understand how to build the road and how to drive, it's no good having the physicality of the man without knowing the road to his existence is the path through the E of the soul. when you understand this then through the E you can change the Physicality so rapidly that you become the camelian of the U. We have been there but we never understood, we never wanted to understand that the change in color of the Physicality, the race, color of eye, language, all has come and shall come through the confirmation of the changes through the soul which is handled through the E. Go back to the early teachings, and the medical, I always explained the existence of the man not only by the Physicality but by the E. .. the blood carrying the E, so you already had the

key, you have been shown for years but you didn't understand. It is the blood that feels the cold and gives the information to the neural system that it needs to change otherwise it frosts and causes infection, that the neural S through the E and confirmation of the change in physicality (:54). to the E, in giving the message to the soul, if you want to be on this planet the condition is so and I need something new, a different energy which comes from the soul to the E, which it in turn transfers to the physicality. Now you understand in total what you call the evolution of the man, not the P part which is Darwinism. I have opened the key in the past 20 minutes to man's life in the space and I hope, wish, and pray that the Man will see the path. This is the path to space, the reality of understanding that the change and evolution of Physicality in essence is triggered by understanding of the E and the soul, which is itself in interaction with the soul of the planet and the U, and accordingly changes the E and the ?? of Physicality, so man becomes ?? inter-dimensional, you don't exist in just one dimension but in total existence of the One Dimension, the totality in respect to understanding of the strength of the work of the position, which is the soul of the earth and in position in respect to the soul of the Physicality of the U. (:56). then you'll understand how rapidly you'll change according to the environment. This is the key, the master behind the creation of life, not only on this planet but across the U. This is the key to be able to live amongst the others who are (already) living amongst us, our soul is in contact and communication with them but in physicality we are behind a veil of our own ignorance, because we would like to be in the world of Physicality. Now that we become passengers of the U we have to accept the totality in all 3 dimensions of it, because without the one the other can't exist, with the Principle, the Transition which is the E, and the Physicality which is matter state of manifestation that the point ?? shall not exist. If you look at it a vapor in essence is still water, but according to its environment it shows itself in that way (a vapor). So does it mean that even a drop of water has more sense of its evolution than the man himself, ?? calls himself ?? evolution. So do we need to build a Ss to trust that we keep our soul in matter of Physicality or do we go a step further to understand that one can use his own soul to travel the depths of the U without the tangibility of the SS. (:58). As I said before we don't just teach the human race but we teach across the U, as my voice is my soul, it is heard across. For those who are in the next stage of the development of the crossing into another dimension in travels in the depth of the U. In time Man will understand the message as he matures. It's very interesting how we are teaching, at this time we have put the understanding of Man at the age of nursery, and we teach him along with the ones who are in the 6th class, and the ones who are with diploma , all in the same class while teaching the knowledge of the U. And what is not understood by the kindergarteners playing in the front row means a lot for those who are philosophers, etc in the back row. And Man is at the stage of infancy playing in the front row. As my blood brother used to say, it just goes over my head. Because then I have to understand it, then make changes, and what the changes will come to. (1:00). You have to start understanding the path between the E and Physicality and the soul, then you'll understand in what strength of the soul you need to have the perfect combination of the feeding that leaves you with the manifestation of Physicality at any point of the reference across the U. The soul is the creator of the Man, the only problem we have is that we called it a man, because the soul of the creator is manifested in the Physicality of the created. So is the soul the god of the Man. Has Man been in delusion of finding a creator (outside) where the creator sits in himself, through the creation of his own existence according to the accumulation and strength of the soul. I made Man in the image of Myself. I am the soul and through it I create the E which is transformation of the energy of Me, gives the Physicality of

Me. (1:02). Is there a need for a Church or prophets which Man has hung on to so fast, (so as) not to be able to go through the transition of understanding the work of himself and his soul. We don't teach any more, we inspire the soul of man to evolve and be educated by themselves. The Churches and Mosques to abuse the Man are shut from now on. It's the Man who has to find the path to his soul and to educate himself according to the point (place) in the U where he arrives, because not many others will ?? arrive at that point and there is no book of reference. You can't go back to earth or to a book in the library to find out what it says about this place, because you are at the place right then you have to understand that it is the strength of your soul which dictates your manifestation of Physicality in that environment. It's you through the strength of your E that has to be the negotiator between the Physicality and the Soul. But there is one point, the Soul shines all the time at the same strength, it's the E that is the filter to the dimension of the Physicality. Then you understand that all the souls are equal in the eye of the creation of the soul, it's man who needs to understand through his E how and where to position and which filter that it gives the manifestation of the body of the man at the point of manifestation, where you want to manifest or can you in different dimensions across. (1:04). This is what the stars do, it radiates its fields and according to the strength of its fields in different positions of its shell of its Plasma, you have Jupiter and Venus, so the energy of the strength of the star itself has not changed but according to the strength and the position it manifests itself in different features and structures. Can we through are E be visible and tangible in different strengths of dimensions, yes. So do stars and the essence of the central point of the U, as its fields travel outward at different field strength positions leads to creation of billions of galaxies, stars, planets, moons and dusts, but in essence they all came from the center. So can the Man to understand itself through the center of his Soul create and be able to live in different conditions within itself, the answer is yes. Man will learn this very soon once you become the passengers of the space. This is the breakthrough, the key, is what we have been trying to teach, but we have had to play it step by step. (1:06). What's the material, the Gans and how you make it, but the end product, we always focused on the energy, the fields, and now you understand those fields as the soul of the Man. Today we have written the science of the man which is ?? been accepted for centuries ... ?? what we call the evolution. Now we add to that knowledge and for man to accept these last 30 minutes of teaching will take years, because he has accepted something and now he has to add to it that the cause is different. So I have re-written the history of Man. Touch yourself, your fingers and understand what E was there to put the nail there, and try to understand the strength of the E which gives the nail, skin, finger, arm and everything else. Or understand the entirety of the total ... your Emotion. and then understand the totality of the E, all these tears, happiness, joy, fear, movement, all comes with different filters from the source which is the soul. The mistake has been, 'man only uses 5% of the brain and the other 95% is never used', because that was easy to fool everybody. (1:08). But now we know that every single cell of the brain works 24 hours a day without stop from the time of inception to the change of physicality to another dimension. Because how do you know when and which cell is time to change, which cell of the heart or bone, how long has it been there, whether it had an accident and now the energy is not there and not it has to be repaired in 2 years time from today, or you cut yourself and the skin was not due to be replaced in another 20 days but now there is an emergency and it has to be changed, because otherwise it bleeds and new skin comes. Prioritizing the E of the pain of the Physicality of the cut, find this the path to understanding of how you can interact with your E and through it you can understand the work of your soul, become the cut in the life of the Physicality of yourself that with

it you understand the cut and the path of your E and through it to understand the filters which you have created that with it you interact with its environment, and at the other end of the filter what is received from the soul. Then you become passengers of the space and you walk out of the SS where there is no land or what you are used to, but you see that it is a thriving community and you become part of it and you don't have the fear of falling through, as you have already fallen through the passage of the environment of the level of the strength of them. If I leave you in the middle of ?? and you try to survive before you hit the ground. (1:10). What happened if I leave you in the depth of space with a community that has no tangible planet for you to walk on, but they have their life and existence, and you want to be part of it, you're so beautiful and you never see any mountain waterfall but it just showers through, but it's not water it's a mirage of the fields showering through, but it gives your imagination the strength of the understanding of the law of water as you have seen on earth, that is the only way that you can confirm it. In the depth of the U the flow of the fields will confirm the rivers of life and not the waters. This is what the Man has to understand, we have to educate him in the new dimensions of the space to understand and see the totality, then ask yourself why do I have a shorter finger, what does it confirm in respect to my E, why was I born to be in such a shape with the structure of fingers, toes and eyes, what am I taking from the environment to confirm my existence and what am I giving through my E, if you understand that then you can interact with your own E and through it the soul that if there is a need to extend your finger you can do so, because in the environment at that point you need to. I have seen this happening in the lifespan of one young girl (the girl who needed longer fingers to play the violin). Man has the ability to change the speed of creating what he needs. (1:12). Man doesn't need the spacesuit to go into space, but we have to go through that process of learning to trust that we can exist in the space of the gaseous ?? of our part. How much can we trust our ?? to exist in whatever part of the U. What we make a filter of becomes the extent of what we can manifest. Souls without the filters of the E become the passengers of the Unicose, and not many have managed that because of the fear of not understanding the totality of the strength of the soul itself. Many souls in the U have tried to cross but the fear of demise have ?? become their demands. Trust in the existence is the key to the existence, and is 'I do not take and I do not take what it to be taken but what is given for me to exist. Now make tools to show the strength of your E and to measure it because you're a human and you still live in the Northern part of this planet and not in Africa where there is no scale. Find the scale of the E within the strength of the soul and not by equipment, (1:14). is because they fail in every point. Trust in the soul and believe in the existence of the operation of it through the Physicality of the manifestation of it ?? the Physicality of the man, tree, plant or whatever. Now make the tools to measure because otherwise you don't even believe yourself that you can transform ?? and to elevate your own soul. The trust of the man has been taken from him partially due to environmental conditions, initially when the man started moving, and then later by those who saw the fear and weakness of man in his environment and they became the biggest menace to the life of humanity in the name of the priests and god knows what, from the old times to the present. Man has to understand the totality to release himself from the shackles of the fear put into him by those who want to control. I am free in all dimensions of the U, because I have no attachment. I wonder how many of you can say that? Many times I have said that I am ashamed to be in the body of a man, because the body of man has accepted the demise of himself, by the subordinates of himself, he has not realized how much knowledge he carries. (1:16). in himself, then why should he become subordinate. It is us that allows our physicality to be "dimensionized" by those who want to abuse it, and it is us who

have to rise to the level of understanding of our own soul that we do not need to be ?? parted. Now I wonder how many tools of measurement you need to make, or you have found the measurement of your own E and soul. Blessed are those who understand. Remember 2 points, you pray the only bank which you are saving that energy from ?? the prayer, is your own soul. One point, if you are in the space and you say I have to go to Church or Mosque, etc. then they see that there is a guy there who hasn't understood, the village man is here. try to find a path in any shape or form ?? which in your Soul and E and Physicality, and in finding that path you mature to exist across the U. (1:18). Because then you know what you need from the Source to show itself in Physicality at the point of the need, so you become the camelians of your own Physicality in the dimension and strength of the Soul. This is the key. You are a car driving down the road and you switch it and you become a racing car at high speed, and there is no difference in the workings of the man, you have to know which switch, when, and what is the reason, and the essence of the change. Any Questions. What is the advantage to get out of time of the physical U when one exteriorizes by oneself through the tools of reactors and SF, etc. The advantage comes in what gives you the pleasure of existence and what dimension. In the UC and in operation of the U. There are no exams to pass or Masters to certify to get to another course. (1:20). The change of time and position is in respect to what you would like to have at that point. I have clearly explained this in the past year and I do again. As we enter into the new dimensions of the transformation of the Man to open the passages of the UC and in traveling in the depths of the U, man will come to understand something very strange, some of what you call stars, are in a way stars, they are existing entities but in fact if you translate it to the words of the man, they are Spaceships, but you say they have been there since the time I looked into the sky. A million years in the space is no time. When I park to watch the view, I park which to you is a million years, to the one in Saturn is 20 years and to another it's 1 second. To me I am a passenger, a viewer, I park the car and I watch. In time Man will come to understand that some of what you call stars are SS in the eyes of the U, they are carrying passengers, time doesn't exist the way man measures it. because in the soul there is no time. (1:22). In the dimension of physicality you have time because you have to transfer the energies which come from the soul to another in respect to the environment. If you understand, then why do you change your skin every 28 days, why not every 1000 years, it's because the transfer of energy in and out is so much that it takes so much energy from it that it can't exist more then that. Man never understood this. When you shower you wash the old skin off, but why every 28 days, the energy transfer of the Aura are continuous fields transfer that can not be more then 28 days (20 days) because the cells release all their energy. Now change it to every 1,000 years ?? then you find out it is still 28 days, but it's on the terms he wants to call it. Time is irrelevant, it doesn't exist because it is the E and the field strength which changes according to what it needs and what is available. So when we go to space we'll stop to see a new car, or have you seen this car with the yellow color, etc. we thought it was a star up to now but now we have the same knowledge and understanding, (1:24). the same technology of understanding the reality, you see there are not many stars on the horizon of the man, there are many ships. Q: I have been studying spirituality on a very high level, 20 years. the older religions are abusers. ??? (confused). when you get out of time, body. .. if you get out of body you get out of time, right? No, you don't need to get out of your body, you exist within new parameters and dimensions, which you call your new body, or new dimensions that you have created. You can't get out of your body because the body is part of your E and Soul. (1:28). Have you had the experience of getting out of your body? Everything is within me I don't need to get out of my body, to

get out to get to what? (they talk some ..) Let me repeat again, I am what I am. Yes, you are quite a great man, I can tell you, have you heard the proposition that we are spirit ?? What do you call the spirit or soul? .. I call it the essence of the creation, what you come from. Is it what you call the Principle Matter in your book? In a way, yes. What is the difference between the MaGrav fields forces and the Principle Matter? The PM is the essence and the M G fields is what the Essence radiates out and what it receives from its environment, one is the totality and the other is the line of communication.(1:30). MaGrav, M and G is the line of communication in respect to the totality and its environment, one is the tools and the other is the Essence of the existence. You mean the MaGrav are the tools? Yes, they are channels where you receive and what you give. But they are channels between what and what? It depends on how you understand it, you have the Sun, it's the soul, and the fields which radiate outward from the Sun leads to creation of different entities in the shell of the Sun, and then some of the fields return back to itself because of the pull of itself, G of itself, so one is M what it gives out and the other is G what it takes in, what is not used. Is the Sun a Pl or matter? It's a Plasma. The manifestation of any sun is at a point where its strength changes to a matter state of the strength of what we call the surface of it ... when the Sun radiates out within its G M fields the point of the strength of its matter state at the higher level we see the surface of the Sun or the manifestation of the P existence of it and then what we see as a shell is the manifestation of the existence in respect to its environment, this is what we call the Solar S. (1:32). or the shell of it. I have explained this in book #4, I hope one day to publish it, the manifestation of the light on the surface of the Sun is the interaction of what has been reduced from the Pl to the matter, the interaction of these matter strength, the full strength of the Pl field of the center creates what we call the light of the Sun. If the strength of higher order to the matter state conversion is not done on the surface there would be no dimension the light of the Sun's surface would go to the boundary of its own Pl shell or what we call the Solar S, at the point of the interaction of the field strength of the given strength in respect to the center is where what we call matter strength at that strength is manifested. You call it the surface of the Sun and once that is created then it interacts with what is created from the higher strength fields internally, and that interaction creates the visual effects of what we see on the surface and we call it the Sun. This is why we see Sun flares, it's very ridiculous what the plasma physicists say ?? about it. But in the spreading of the fields it's very much like the interaction of the fields of the Pl of the Sun with the Pl of the Earth leads to creation of the light on the earth, on the interaction of the phase balance b/n the 4 field forces. (1:34). and what earth MG fields pull to themselves creates the light what we call daylight, on the facing side of the Sun. The same light that crosses the Solar S doesn't come into contact with anything therefore we don't see the light, the same principle applies to the surface of the Sun, it's the interaction of the matter state at that strength with the fields strength of the MG field of the center which is of a higher order instead of interfacing at the surface of what we call the upper atmosphere of the earth, now this interact is closer to the higher strength so it creates a stronger light that we can see it radiating across the Pl of its own shell, which we call the Solar S. At the same time as it's weaker on the boundary but stronger in respect to the environment of the Galaxy, these fields are reflected back because these fields are strong enough to get through, they get pulled back by the G fields of the Sun itself, so it feeds itself. But at the same time some of these fields feed into the strength of the Galaxy, but at the same time some of the rays of the Galaxy penetrate the shell of the Sun and they enter and become part of the field forces of the Sun. We call what comes back G fields and what goes out we call M, but the Sun itself is the essence, the source. If you look at it the Sun is the soul. The time of transition of

the surface of the Sun to the environment of where it comes to touch the surface of the earth, or the upper atmosphere of the earth, is the E, which gives ?? warmer .. (1:36). further out it will be weaker and thus colder, then when it interacts with this part, earth, we get the residue, it creates the manifestation of the Physicality of the existence of an entity we call earth. So the Sun itself dictates how it is manifested in different dimensions according to its strength. That shall be the understanding of the man in respect to his own soul. There is no difference in the knowledge across the U, Man doesn't understand, we haven't seen the Sun creating a Church for himself to pray to. (the man interrupts to add his own views ..) Everyone is in their own universe. Keshe agrees. the man continues there is your own U and then another where you interact with plants and animals etc.. (1:38). Let me tell you something what has caused a lot of problems with religious people and me. The light of the Sun changes according to its environment and what it comes to be, how come Man is the only animal on this planet that goes to Church? ... we have created that out of our own feebleness. ... I have been in Church of Scientology, now they are the most abusers. Put it this way, when we drive across Accra we see so many Churches, we laugh and say we are going to open a Church of Gans. (1:40). You have to understand how the Christianities history went, the Catholics got divided into the protestants, the Africans have taken it a step further, now everyman in Africa makes a Church, and they don't pay taxes to government. There are hundreds of new Churches. It's the weakness of man that allows this abuse. The Africans got wise to it and now they don't need to send any money to the Church of England or Vatican. (1:42). (The man says) Ron Hubbard said that Africa will save the world, that they are more spiritual and open their arms to you. We shall see, the Africans have 2 Churches the Christ and the old voodoo religion. Last month the Gambian president had to leave and he took more of the old statues than the new. (1:44). This guy says that he watched almost all of Keshe workshops and that he says the same as Ron Hubbard, who said he will come back as a political leader, and when you say that you are the leader of earth, then I thought Ron Hubbard is back, I don't know if you know that the spirit can split in two? It depends on the point of view, it's always a male and female if you call it, but in a way it is always the essence of existence. (1:46). I was explaining to Armen that when you make a reactor, if you don't have another one that it can give to and take, you can't show the existence of its fields. It's like when you hold a magnet in your hand, you don't know it's a magnet until you bring something that it can interact with (iron) that it can confirm its existence. It's always existence of the creator. It's difficult to understand. It is very simple to comprehend, we have a soul and another one which we share our soul with that it can elevate the soul, we call it male and female, we need a partner irrespective of sexuality to be able to manifest or confirm our own existence. Yeah but this is the P part of man ... There is no way we can confirm the existence, creator, unless it can interact with something to confirm its existence, even though it can be out of itself. We can't confirm the existence of the Sun if we don't have another dimension of strength to confirm it or by creation of its own strength in reduction by existence (?creation) of moon, earth and the rest. ... I am so happy to talk to you I don't know what to say .. There is a Sheikh who says he is the reincarnation of Mohammad, I think he could help you promote KF through all the mussel men, if you want I could introduce him to you. No problem you can contact him. (1:49). Let me explain, ... you have to understand what is understood by the Islamic world very clearly, the beginning of the KF when we developed and spread the knowledge across the Middle East, it was understood that it would bring changes, come across the path of certain beliefs in the Islamic world. If you are not grown up in the Middle East you wont understand. It will change a lot of things in

respect to how they have been abusing the man. Originally he or a couple of them are listeners, in the beginning they wanted to send students for the first team, which Armen was a part of, people from Jeddah University. (1:51). The leaders spoke to me as to the effect of these teaching to the Islamic world, that this would bring changes. One of the questions we had from the Jeddah panel that were assigned to make a decision ... I had to explain that the belief in Mohammad has to be in the heart of the man and not on the map and position of Mecca. This was very hard for them to understand and from that point we started seeing a lot of opposition, from the Islamic world in respect to the KF. I explained it is very simple that when you go into space the earth rotates and you are traveling in many dimensions, how are you going to pray to Mecca unless it is in your heart. And this was too hard for them to understand. Taking that Physicality away from them is not something that they could relate to. I had the same problem in Iran, the problem is very heavy in Islamic world. In Christianity you believe in the cross and doesn't matter in what direction you put it. In Islam it is fixed, you have a compass and wherever you go it shows Mecca. Now you show me a 3D compass that can point to Mecca anywhere in the U. (1:53). Another issue is what happens in determining on this planet ... Man has to carry the belief and correctness of conduct in the heart and soul. Whereas now he sees his Physicality as his soul and heart and his brain, this is the biggest problem which KF has with the Islamic world. I had the same problem with Ayatollah Khomeini in Iran, they don't call me atheist but he puts a point that we don't have an answer for now, we don't know how to answer it. the guy goes on to say the Jews know the truth about Jesus that he was really a bad guy and a homosexual and something at the end of his life he got enlightened ..

(2:01). I have to stop you. When it comes to prophets we have to understand what benefit it has brought to those who made him a prophet afterwards in what shape or form. The guy says, when you say you are the light you are more than these prophets. ... We are going to end this conversation now and we can always talk in the future ... in the process of this cycle of educating man we have brought a balance b/n the science and the belief of the man and the soul to understand they are the same. In this time the prophets of the science and the soul shall be the same. Whereas before we had the prophets and they abused the man they way they wanted because it was hidden. (2:03). The well known scientists are still prophets but they didn't carry the pen of the soul to abuse the man. In this cycle we teach both the path to the soul, and the way this path works, you call One Religion and One Science, this is the way I teach, the path to the soul and comparing it to the path in Physicality of the ?? we bring the science and religion together as one, in this way there is no way for the man to be abused again, because this is the essence of the knowledge of the U. That's why there are no Temples in the U. We are the messengers of the U. Any other questions. (2:05). Polish guy draws a skull and some points, in the middle is our soul. he mentions the plasma balls when you touch the glass the rays go there. He compares it to the soul. ... Keshe says, everything ends up with the soul but it depends on what you want to pick up in the passage. (2:08). If you understand the topology of the brain, where you put your finger on the skull, inside is the P matter condition, closer in is the E part, in the center is the soul. So no matter where you put your finger you still cross the line to the soul. But it's how you understand crossing the line touches the E of fear or of joy. Can we reduce the boundaries so that the Physicality becomes very little. (2:10). If man is able to do this, then he can control everything directly from the essence of the creation in the center, because now you decide the filtering, where in this situation the physicality is irrelevant. If you put your hands on a part of the brain and see if this effects your finger, for example, then if there is joy then this point is the joy part of the brain. The man says we

know that the left and right side of the body (brain) is polarized, so if we put left hand on forehead and right to the back we'll get a crossing in the center of skull. Let me explain, this is the mystery of the P brain and the work of the soul. In the P life we have a proton and electron where the bigger dictates the direction of rotation or where the fields will go, but the operation of the soul is very much different. (2:12). Where the soul's strongest is sitting in the middle and it covers itself by its own tangibility. With an electron and a proton you have a point of reference, whereas with the soul you have the totality of the PI, both at level of soul and then the E. The E is the electron of the Principle or the Proton, but it covers it in its totality. This is the secret of the whole thing in respect to existence of the man, it's so compact with the matter that the reduction is so strong that it ends up with the P boundary of the P brain of man. then where the E touches in the relevance of the Physicality it leads to the creation of the P body. It has to be in 2 halves (2 parts of brain ?) otherwise it won't work, there needs to be a potential difference otherwise there is no flow. Someone in the office came, her young husband, 38, had a stroke, I looked at the MRI and didn't see any brain damage. She said he is paralyzed on the right side. (2:14). The MRI didn't show any destruction of any cells, there's a sporadic spread of the fields but no destruction the way we see with the normal stroke. He can close the hand, arm and leg but he can't open them again, I said, the life of the man is divided in 2 levels, contraction and retraction, or we call it Na and K junction, in contracting and opening. The blood tests showed a shortage of K and they have been giving a lot of injections for months. Yes, but they haven't solved the Na depletion because is has locked the gate (why he can't open limbs). The brain works the same one carries a slightly different fields strength then the other, otherwise it doesn't exist and through the E or the motion of the fields from one side to the other they their transformation of information through the soul. That crossing through has a point of reference, this crossing from one half to the other has the point of interaction (in the center) which is the point of the existence of the soul. (2:16). If you look at the shape and position of the brain, the side view, the bottom part which is missing to make it a full PI, has converted itself into the Physicality of the man. So if you reduce the strength of the Physicality, back in, it will add to the strength of the E and the soul. Then the soul has a direct effect on the manifestation of the Physicality, and that is what we were trying to teach today, then you don't need a spacesuit, or train like a fish for 7 years like they do in NASA to change a screw. You become a multi-tool of the U according to where you are. You have to understand how you can use your Physicality to reach through your E to your Soul, and this is what we need in the space otherwise you'll suffer. Man will forever change one spacesuit to another to survive one condition after another, like wearing a special suit to go into the deep sea. We are trying to teach man that wherever he rests his head will be his home. (2:18). Do you want help from European engineers in Ghana because you said that you want the African to regain trust in themselves. We welcome all help, but now we want to educate the people of Ghana in PI T so we don't become an island. (2:20). We have put 2 young girls in charge of KF Ghana both Nuclear degreed scientists. We want to start teaching a vast number of people in Africa in plasma technology. We will not teach them that they have to look to the white man on how to survive or develop the technology, but on the other hand the share of knowledge is needed to educate. Africa has been deprived of the Internet so they have not been so in-depth educated. We are color and race blind but looking at man's track record on what he has done in regards to the races it, but we have to trust, it will not be good. What causes most of the problem for me here is the putting of one race as superior to the other. We huge amount of support. (2:23). We haven't seen any massive donations from the public because they are too busy in whatever it is

they do. We will ask governments to support. The benefit of this will be for the whole of Africa. I am spending 20 hours a day to not repeat the mistakes of the past, so that one isn't ahead of the other, or become their subjects. Your support will be accepted, but your knowledge will be accepted but not as superiority of the race, and this is my problem. We need to change the course of humanity on all sides in respect to degrees, colors and nationalities and it's not easy. (2:25). KF does everything on our own and those around us are pocketing everything, we give our blessing but yes they need to mature. We need huge support in space technology because N and Gans is easy but space development is where my heart and soul and work, is the main part. I have help at this level from Armen and John in AZ but we don't see much help from the rest of KF supporters. We need help to develop ways to measure the PI. Once we finish the Ghana developments I will go back into the lab you'll hardly hear from me except Thursdays because this is where I enjoy to do and I can add to the knowledge. Go to the radio stations and explain the knowledge. (2:27). Now they go on the Google and see a bunch of rubbish and say the KF is irrelevant. The man in Ghana press who bombarded the public against KF, the government is now going to issue arrest for him. KF Gans water can walk people out of Diabetes in a few days. (2:29). One man under a king and a police officer have been responsible for destroying the most advanced technology for humanity. Talks about the opposition against KF ... we need to go outward... (2:41). ... you walked into the teaching room with the black man to kill me, the Italian police now know. Don't be afraid to teach, this technology is to free the man from disease, energy and everything else. The ones that have done the work in China will soon be on the news. The process is to share knowledge freely and understood how it will change our lives. We are not here to go against corporations and pharmaceuticals, we are actually asking them to make these Gans' so it makes it easier for the others to use. The scientists here are showing that with the right combinations of waters diabetes gone in 5 days, typhoid, etc. The technology is amazing for man. (2:44). I started getting sick when he started writing the book with me. I was given a poison, exactly the way John gave me the poison in the Insano (Italy), he was taking photographs of me in the hospital to tell his bosses that I would be dead soon his mission accomplished, then he mistakenly took the poison himself and had a heart attack. All the documents are in the hospital, the same way John gave me a cup of soup to kill me. Arsenic causes heart attack. (2:46). The biggest problems for humanity now is stroke and heart attack mainly through high BP. (2:50). Securities please release information on DL, Sylvester, etc. all the bank accounts in Panama. Letters from Knights of Malta. (2:58). (3:04). We have the technology on energy, health, etc... to save mankind, how we need to understand how it works and be open about what we have, to communicate knowledge across borders, nations, that we develop the next race of human to be independent, to be trustworthy of himself that he doesn't do a crime that he allows him to become close to his own soul that he can survive the span of the U. This is our (problem) vision of changing mankind. And these people (DL) have a lot of problem because this way doesn't allow them, the Ghana police are looking into how they traffic children out of orphanages, 200 a year disappear and found in Antwerp. (3:06). Look at the Matrix company in US and see how it connects with Mr. Smart, DL, set up to defraud Belgium's. We are going to release the names of the children you killed. KF Supporters be proud you carry the technology that can change humanity after thousands of years in spirit, soul, survival and everything else. Not to be ducking and hiding because of one man who has a paymaster and police officer who picks up children at the airport. (3:08). DL wanted to get rid of Keshe and then take over the KF. (3:11). (3:16). Understand one thing, until we wash what needs to be washed (these murders and pedophilia), we

can't go to the next step, because the burden of us not serving humanity will keep us back. We don't need conferences or to gather in places, we gather and spread the knowledge. If you are Dutch call and ask the police to fully investigate Mr. Slouch, they have a full dossier on the accounts to kill the compression scientist, this is our chance to serve humanity. They killed the man with poison, the family was poor and they called them to get the briefcase which was carrying the code of the compression software which is now worth billions, they said to the wife to bring the briefcase for 2 million guilders the rest is ours. The family being desperate they delivered it to the lawyer, the briefcase disappears and 19 years later the family hasn't been paid a cent. The briefcase appeared 8 years later in Belgium and they killed 2 people for it. Again fingerprints of DL on both of them. (3:18). Read about Mr. Sollot, they the same poison to kill him. The Backmann case. (3:22). .. they killed Fabio, we owe this to Fabio to put this into public, I put a lot of resources and time to this because I made one promise to the soul of Fabio in Italy that I will catch his murderers. I owe this to the women Naomi, that this man in Belgium planned the death of both of them, 2 Albanian drivers trapping them to get them to kill me. It wasn't one truck, 2 Albanian trucks trapped Fabio, now you know more and we'll release more. This is documented by the Italian police, they knew he was on the same route as me from the office at the same time, the informers told them, but somehow I passed them, and they (assassins) didn't recognize it, they were to shoot me while I was attempting to help Fabio, now you know the process, 2 Albanian drivers with false documentation. We'll do the job and perfectly, Stanley got 25 years in prison. Be proud of what you do and teach openly.

end.
