

## 170th Knowledge Seekers Workshop May 4, 2017

(Mothers and how a child is born, How much Gans Water to take, Jim from Australia explains how he wants to spread the knowledge and teaching method for beginners, How the soul is created, )

(:11). break... (:15). (we went from breathing in liquid state to that of gaseous, can we go further to solid or even back to liquid ...

blood pressure and what it is ..

(:24).

(:27). .. take 30 mls of ZnO<sub>2</sub> just before sleep .. to balance the blood take 3 times, morning , noon and night, also take CO<sub>2</sub>.

(:32).

(:34). Jim from Australia teaches for half hour, Education Team. He wants to create a framework and syllabus for the KF Knowledge and to make it easy for the beginner. He started at workshop 79 but understood that he should start at the beginning, it took him 3 months to catch up. But he feels that it is too daunting for beginners and wants to find a way for them to learn. (:40). (:43). 3 Levels of Education, basic, intermediate and Advanced.

(:54). They will make some videos how to make the Gans and N materials. Mr. Keshe comes on.

(1:01).

(1:13). Back to the teachings.

(1:18). About childbirth.

(1:20). ... (some break in connection)

(1:23). (audio solid again). .... we have not been taught anything in the schools about the reality of life, about we as total as a group, who we are , we have not been taught the reality of how everything works. How we as people are responsible for a lot of things that we have done, like creating a life, a child, and then we think the child is there, born, now it's her responsibility, her job, her point of giving birth, then we think we did our job as men. Then we leave it to our partners to bear the life. (1:25).

(1:27). At the point of inception the child's soul is part of the woman's. ... post natal depression is when the mother can't accept the separation of the child at birth. The fear of giving life, and then letting go of what you have so preciously kept for 9 months, and not knowing if what you have created will withstand the course of life brings anxiety to the mother. This anxiety is totally an emotional dimension, will create mayhem in the soul of the woman, what we call the transfer of the energy from the soul of the woman to the child. When they give birth they go through the fear of loss, and would I be able to give life. We are not in the subconscious of a woman, so we do not see what they see, the anxiety they experience every step. (1:30). I have responsibility for what is inside me, if I eat the wrong food what's going to happen, is it happy, will it survive, can I give it education. The man is there, but with the woman she has to be there if the other partner is not, and this drains a lot from the soul of a woman. Men don't see this and then they say she has changed, she's different, she doesn't do this or that, she has become very aggressive. This is because we haven't understood what I have just explained. Woman at this time need support in their soul for the transfer of the energy. Post natal depression is like high BP or diabetic, it's psychosomatic but it goes to the point of E and then it manifests itself in all sorts of things, we call it depression, aggression or whatever. How do we support these situations. KF has developed a support system to go through the whole structure. (1:32).

(1:38).

(1:49).

When we come back after a break I will tell how the soul is created(2:00).

(2:15). In the world of Physics, when it's a Plasma we call it PI Physics or PI Technology. When a number of Plasmas come together and interact, like a proton, electron, and neutron we call it an atom. Interaction of the plasmas creates physics. When a number of plasmas interact with each others in a number together, we call it chemistry. When the elements added together create a dynamic flow where decisions can be made on how different members can move in different shape, form, and strength, leads to the creation of biology. What we call life. Physicality in ?? form that it can be moveable on its own, even a stone has a life also. When we bring the interaction of the fields in what we call biology, of a given strength but now it's the amalgamation of the fields without actual interaction of the entity itself, we call it a Principle, or a collection of all the fields, where this collection makes a decision for all the biological divisions. (2:17). We call it the soul, where it is independent of one biological section, where as long as the others exist that they can give enough to it, it can take from all that it can give to all that the Totality stays the same. This is the soul of the entity. Where non-dimensional becomes the interface, the receiver of the totality of the fields which are available, that the totality has the entity, what you call biological, has accepted what we call the final intermediary, that is a common denominator to all. That they can receive from and give to it, and they are part of it. This is the **SOUL of the Man**. When an egg and sperm come together you need the division of the cells that they can absorb more, like the cancer we spoke about before, that through its G and M mass can absorb more fields from the environment which they are in, that by absorbing more they can give more and this leads to the division, that by dividing at a certain point, now they need that central common denominator, that all of them communicate and stay in touch with, and they are a part of. (2:19). We call, they become the sun of life, because now it's the controller in the body of a man, we call it the soul of the man. What you have, receive, see is that what you started with, an egg and sperm, now you have interaction of the two. They bring all the divisions with all the information that each one is carrying their own soul into interaction with each other. The amalgamation of the two is now a heavier mass creates a new G pull in respect to the soup of the energies around it within the womb. Each section in the whole game has its own soul. Now the totality creates a soul for the amalgamation, plus what it has absorbed from the past, or from the internal liquid where it survives (of its environment). (2:21).

(2:39). Questions. The various levels of the soul correspond to different light of various intensities, which can be the food of the soul, how to use this material to build SS. In a way no, you have to understand that the filtering is 2 way. The way we would like to hear, then we change it to the emotion of crying. The soul through the same filtering receives what it needs also. So if the music is at the strength which the soul needs to receive, it will become part of it, because as a field it will feed it, and that is the secret. It's not a ? myth at all, it's the reality, the fact. We look at every thing one way, now we have to open our eyes and understand the work of PI, that it is 2 ways. As much as the soul gives it needs to receive and this is the way the soul elevates itself. In receiving the soul can give more. (2:41). Those of you joining the Mozhan program who are trying to create a SS for yourself using your body but you see you can't do it, it's because you haven't understood, the totality that was taught in the first book. It has never been understood. It has been looked upon as if it belonged to something else and not us, but

in fact it applies to us. When the fields from the center of the sun radiates out, until it reacts with another field which radiates from something else, that it creates the friction between the two, it doesn't show the existence of the entity, ?? the sun or let's say the earth. (2:42). And what that interaction releases becomes the food for the other, or (it becomes) the beginning of life for another. If you understood this ... that you need another strength (to interact with), in the path of another strength to manifest the existence of the both. Those of you who have been trying to create the conditions of let's say a SS, or flying machine, look at the structure of your own body or the structure of this planet, the answer sits there. I never teach to make them work (just how to make a thing), a sweet talk to show ... I teach to inspire that you understand (how it is created). It seems that nobody has understood. The soul of the man which itself is created from an amalgamation of all the fields of the biological part which themselves are created from the Physical part, which itself is created from the Plasma part, which itself is created from the fields, can only manifest itself from a dimension which is needed to be when it interacts, or you can create the interaction continuous of the mixture of the fields. It's not the G which creates the manifestation of physicality to the eye of the beholder, it is the interaction of the M's (2:44). which creates the boundary and manifestation of the Physicality and no one in the KF has ever understood this. It's in the books and I explained it many times but nobody sees. This is why people have problems in creating a tangible entity (SS), because you always look at how much G and M I can put in that I can create, but none of you have at looked at this, when you have a Star Formation, the base, the fields which are created and radiate up, it's very much like a stone in the path of water fountain (shooting upward, which then causes it to shower downward), the fields like the fountain will continue to shower down. If the fields do not come in contact with another M it can't show itself (manifest physically). When you put a stone on top of a fountain you create the shape of a dome (showering downward), and that becomes the secret of forming a SS. You need to understand the difference in the balance when the top is harder in giving, creates the manifestation of the Physicality of vision. If I put a heavy G on the top the fields will absorb in, but if I create a higher M I can spreads the upcoming fields like a fountain when you put a stone on top of it, it takes shape. No one in the KF or those working around the SS have ever understood this. (2:46). Earth is like a stone in the path of the strong M fields of the sun, in this spread it creates what we call the earth's atmosphere. If it were G then it would absorb the fields and there would be no manifestation. No you not see the strength of a water fountain when you don't put your hand in front of it, and then further push it closer. How many times have you opened the water tap and you connect a hose and it runs and runs, but when you put a finger in front of it, it decides how to splash back on you and creates a dome. The fields of your base reactor have to be M and the strength they produce if they hit the G, they absorb into it, this is what most of you do. Nobody has tired to make a much stronger M field in the top reactor that it will spread the fields with its resistance, it's feeding itself and creating its own soul, then you can fly. Because now you have gathered a soul, you created a dimension for the totality of the fields irrespective of the Physicality of the reactors. And this is where the soul shall sit (he draws in the center of the SF). How many times in the teachings have we said this. (2:48). And nobody sees it. I am the worst teacher because I know that my students are not ready. They don't have the ear to see that they have to learn the Totality. I am the perfect teacher when the students understand that they have to be the givers, that they can receive what they need. For us to teach it is easy to reach the soul, but in reaching the soul we don't cover the dimension of the Physicality of the man, but he must elevate himself, we can not do. We can only make it available. Like I say, "thy shall not steal."

And, thy cannot force also, because if I force the knowledge, then you create the fields stronger then it can be taken that it brings balance to you ... then somebody has to steal. We don't give enough, but we facilitate and provide for it, if you are ready to receive that you can give more. The knowledge of creation is the beauty of the teachers and ?? , and spread of it amongst mankind. We are hear to enlighten and not to teach, enlightenment brings wisdom, teaching brings structure. For the soul to evolve it doesn't need structure, but it needs clarity to evolve to the dimension it needs or it has to be, or wants to be, so that it can be part of. (2:50). You can't stop a child from mixing with drug addicts, if it's in nature, because there is stupidity in his behavior, that he finds himself part of. You can't stop a child from playing football, because those people who are successful at it need a specific character. They are opportunists, I call the most opportunist people in the creation, the footballers, because they use the opportunity to create something out of nothing, and they are continuously on the run, 11 of them from one end of the field to the other, to see who is the best opportunist to score a goal. Those who become footballers and become good at it, they are they opportunists, it fits them perfectly to be footballers. Those who are structured, work behind a desk where the same form has to filled out, because this is how much my soul is prepared to give and take. As an opportunist I take whatever anybody has to give and I make the best of it, and I give what I want. Because the point when I score a goal and make the right move that it ends up with me winning, I receive from the souls of 100,000 spectators in the stadium towards me. When you go to a football match and a player scores a goal, and have of the team (stadium) there they give, they clap or whatever is done, they give from their souls. That's why those who are successful footballers are those who take more in the ?? ground of the play, and those who do not know how to give become the failures, because they think all is given to be held, and the emotion of selfishness takes over the spread of the soul. (2:52). It's the same with the rest of the life. **The soul of the man is the "resistance" to the fields of the creation.** And ?? what it is, is the stone in the path of the water (fountain) which is running. If you put the (stone too far out, to the place where it's), just about to fall, then you only get splashes of water and not a dome). But as you bring the stone closer to the source you get more firmness (in the water flowing back to form the dome). You get a more solid "body". Try that with the SF in the way you place the reactors there, you'll get a spread of fields that pulls downward (creating a dome), you'll find out that you'll fly. It is you who decides what is loaded inside and how much you are prepared to give. Those who fail is because they have not put (given) from their side, in the dimension of understanding the Totality. Then you create a dimension which stays the same and you create a soul which is the positioning. This is how you become the captains of the SS. "I am detached and I give everything." And my wish, that is in giving everything that I can give enough that the other souls can survive within what I give. The position of the man of space, what we call the SS, are those captains who are prepared to give freely, (enough) so that the other souls don't have to give that they can stay in the comfort of peace. And we see 6 of them joining the KF. (2:54). We received many applications, but their souls were not ready, only their Physicality wanted to push the soul. In the Mozhen team we'll see 3 Chinese because why, it's the ethos of their teaching (? Chinese Taoist) of life, balance, Yin and Yang. This is what you have to understand. In the first group I taught in the Insano (Italy) only one is left. Because the soul is there to carry on, but it needs to find its position in respect to what it desires and what its real knowledge is. Out of the 7 we have Armen left, the others are on the wings, they listen, they come and go and see. In the second group we did the same, those who are of the same soul, we still see more of the second team around then I thought (would be). Sandie is one of them and she is still active in

the background. In this team (the current one), the 6 shall stay, because we work through their soul, and the soul has been chosen. Because with them we spread the knowledge of equality of the soul of the man across this planet. They understand that they are the stone on top of the fields and they are the soul which creates the dimension of existence of the entity. (2:56). One is the manifestation of Physicality and the other is the control of it in the dimension of the creation, as we said in the womb of the mother, now the SS is the womb and the soul inside is the soul of what we call the captain and has connection to all the dimensions and this is what we shall see. The soul of the man is pure, sacrosanct, when we call man, it is terms of existence, totality, you are the man of the earth, or Jupiter, or another planet. In a way what is created, the creation, it has managed to get itself in the manifestation of the control of its soul, that it can have a full interaction without harming, but giving enough that confirms their existence, not taking too much that it demises another's life. For those who understand the teachings of today, one thing is clear .. the man himself is the creator of his own soul and by creating his soul he becomes the dimension of the manifestation of his own existence. "I am the beginning and the end." I am the creator of it, which is the soul and by the strength I am prepared to give, I give it the Physicality, the manifestation, we call it the body of the man. The beginning is the soul and the end is the Physicality which manifests itself in the environment. (2:58). Now for those who are wise, might understand the terminology. The question comes again, is there a Creator for the life of the Man. Yes, the Man is the creator of himself, but is there is God as the ? terminology has put, that leads (causes) his creation? There shall never be. It is the weakness of the man in understanding the Totality which has created the terminology of the Creator as he himself is the creator of himself. Then is there a need for those who are supposed to be the filters between your soul and your Physicality, we call them the priests, imams, mullahs, and the rest of it ... no ... it is you who have accepted it, the terminology due to the lack of understanding that you have to be correct from the soul to the Physicality, from physicality to another physicality and soul. There is no room for religion in the Universal Community, because we have been given that terminology to create a filter of abuse, that we don't even trust in our own emotion that is the filter for the Totality. So we see the closure of the Vatican, Synagogues, Mosques when the Man matures. You close it to your own understanding, the physicality can be there and can call it whatever they like, because now you understand. Your conduct has to be correct. You don't need a pedophile to tell you, (3:00). because he will direct to where he wants you to be so that you bring your child into the hands of the priest so that he can abuse it, because he is only trying to feed himself with his own abuse. Then you understand that there is no need for religion, because the religion of the man has to be perfect conduct not only on this planet but beyond. It's very much when the Man was told that the earth is round and they hung the messenger because of their lack of knowledge, now the Man has to understand that, that messenger for the Man to bring to what it is, is the soul of the Man himself and the filters he puts in. There is no room for religion in any dimension of the creation, except those who want to force it to abuse the Man on the physical end. It will take time for Man to mature and not all the men mature at the same time. If it was up to me I would change the banner over the Churches and the Mosques and say, (this is the) house of abuse of the soul of the Man. I always said that when the Eastern Block opened up in the 1990's the Americans put a big banner up on the aircraft hangers of Frankfurt Airport, "Mission Accomplished, we got rid of communism in Europe."

(3:03).

(3:10).

(3:26). Questions. How many hours to do the breathing, before going to bed. Mixing the ZnO<sub>2</sub> with AA, because you give the emotion. Make the same with CO<sub>2</sub> with AA and mix the 2 together and then use the Liquid Plasma. Does the purity of the Gans matter? The body decides. A question about bi-sexual when the Physicality is expressing the opposite E then the person wants. For bi-sexual or transvestites, it's for them to find peace within their soul.... even those who are not at peace, the E of the totality has dictated the Physicality. (3:29). There is a tribe in Africa, well protected by UN, where at the time of puberty the child decides whether to become a male or a female. It has never been understood how this happens. Now we do, it's the soul of the community that knows the totality of what it will be in the future that decides whether we need more boys or girls in the future. For instance, if they know in the future they'll need more boys because something will happen to them, then they (the tribe) decides to have more boys. When they interfere like in China, they decide to have more boys and now they have to import more girls from Philippines and Vietnam, to be able to guarantee the survival of their own culture. But now it's a mixed culture which is good. These people have to be taught to elevate their own souls and then the Physicality will change. It's not strange if you are a woman in the body of a man and you want to become a woman. It is the same as what we said in the space, where you change according to what you feel the environment is there, it's like your soul. It is the understanding of totality which brings peace to the soul, ?? and so it manifests itself in Physicality. If you have understood you can change yourself in the space to what it fits you there, because your soul is happy to fit into that environment. So why can't man do it, it's because he hasn't yet understood on this planet. (3:31). You call them the Schizophrenics I call them beautiful people.

(3:35).

(3:43).

(3:52).

(3:54).

(4:00).

(4:06). There is a need to re-educate humanity on all levels.

(4:14). The infection women get from the antibiotic is Candida, you need to take a tablet called Diflucan, it covers your body for 3 weeks during the antibiotic treatment, to prevent Candida. It's an over the counter medicine, get the highest dosage and give it also to your sexual partner, it works within 3 days. Even if the Candida has been there for years. Diflucan for Candida. (4:18). For herpes you have to change the environment. In India the children get swollen belly's and the Candida was transferred through the birth canal. (4:21).

(4:26). Parasites.

(4:29). Herpes Simplex Virus on Wiki. The right combination of Gans' to change the environment. Virus is the key word it means it is connected to the emotion and to the neural system of the AA. When you see blisters on the skin around the lips tells you, around the mouth means it lies, the connection between the 2 sections, tubes of the life of the man, where the lips finish and the skin starts. The lip skin is different then the face skin, there is a very fine separation or interface and this virus lives in that gap, (4:31). and the skin of the man is part of his brain, then it imbeds itself into the brain through the neural S. Research shows that people who get Herpes blisters in the later years also show signs of Dementia and its side-effects, which means they can't remember things and ??. Because this has the strength which connects itself to the

memory part. This virus can be changed, but when you do because it's a virus, it interacts with the skin and touches the memory, and with it we see all sorts of side-effects we see in the later stages of life. We can handle it and change its environment by MgO<sub>2</sub>, it's not connected to the muscle tissue but to its environment so it needs separation from Physicality, which it attaches itself to the skin, and it needs ZnO<sub>2</sub> because it has gone through the E level, and CO<sub>2</sub>. So you have to change the environment no matter what shape of form it manifests, because it's a virus you have to change its environment and deplete its energy. (4:33).

(4:38). Nobody has asked a question of the nature of the soul, because you are all afraid of the very thing that created you. I was told not to make people afraid. I don't want to make you afraid, but I want to teach you something new, it's so beautiful that if you understand it you'll touch the soul of the creation. The soul of the Man itself has a structure and if he understands that he will reach to every dimension in the world of the creation. For the past thousands of years you have been afraid of knowing or you have been kept away from knowing what your soul is. And now that you know that the soul is in the center of the creation of the Physicality, now I'll teach you something new. The soul itself has a structure within it which is understanding and in connection with the rest of the organ, which is the totality of the souls of the Universe. The inner sanctums of the soul has no gender, but it is there to facilitate its existence that it creates comfort for every other soul within the structure of its interaction, be it internal or external.

(4:40). The soul of the man is the center of the Creation and in structure it's the same as the body, Physicality of the man. It has a condition, environment where it communicates, and receives like your ears, and analyzes what needs to be and where it has to go and in what strength, it has a brain as you call it in Man's Physicality the same. It shows its structure of the fields manifested in Physicality as the brain. Now maybe Man can understand why each part of his brain has different functions as it reflects the internal operation of the soul itself in communication with the structure of the soul of man. When you can reach the inner sanctum of the soul you'll have reached the essence of the Creation. This is a long, long way from the present understanding of the man, but those who are wise can understand it, that's why ?? equal to your soul, because the interaction of the Physicality sits within the structure of the soul with the totality of the creation. Now you understand that even the soul has a structure, and how it manifests its own structure in the dimension of Physicality of this planet, as it allows to be given to guarantee the survival of the entity but in fact it still keeps its own operation, (4:42). its totality within itself. Then you understand why you have ears, lungs and control of them within the brain. It transfers its field interaction to a physical manifestation, you call the brain. Its control S is beyond the comprehension at the physical level which is the lowest, transforms into the arms and legs control in the Physicality of the man and ?? gives, In the other dimension is the interaction, communication and connection with every soul of the entity within the structure of the U. If you manage to reach the work of the inner sanctums of the soul then you can manifest yourself in any dimension at any point. A few people have achieved, but our purpose is to teach it to ?? then you don't need a jet plane or SS. You can transmute yourself at the strength of the environment that you want to be in, manifest yourself in that environment at that point in time. The soul is slowing down according to what it has in its structure creates or manifests itself in the shape of the brain, but you have to understand that it's not the shape of it, it's the structure of the brain is dictated by what this environment, (4:44). allows the field strength of the soul to manifest themselves into and it's not the shape and structure of

the soul in the body of the man. Blessed are those who understand. Because if you have understood the meaning of what has been taught you have found the secret to the passage (travel through) of the U, where there is no time or dimension, and this is the virtue of the Messengers of the Universe where we travel down these passages to see and hear, and when we hear the cry of the soul, the being soul of this planet ?? The Second World War and the other wars have brought us to this point to change the course, as Man has created too much suffering for himself. When one body in the family suffers the whole family suffers. When there is war and conflict then the whole humanity suffers. When you fish a certain way and damage and hurt so much we hear the noise, voice and cry of the fish, then we have to teach the man not to fish that it doesn't bring harm and ?? division. This is why you are taught ... to stop. To learn, to use to come to the essence of understanding, the essence of food cycle through the Gans, that you will stop the killing. Not only the Man but also the animals, we must ?? feed to kill to be able to consume. (4:46). End.
