

## 174th Knowledge Seekers Workshop, June 1, 2017

(Schools have to teach about the soul at age 5 or 6, Making Gans out of other Gans is like creation of life in the womb, , Talks about homosexuality in terms of the soul expressing emotion in physicality, Carbon stick method of Gans, )

(:11). The Governments have started to recognize KF and that means the elites of this planet and the wealthy people have started to recognize KF and how to bring the changes to humanity. Collectively we are moving ahead. And it's the disease I spread to you and that is to share knowledge unconditionally. (:16). I have had many question about the soul and how it is structured. .. the soul was created out of the interaction of the fields, it's nothing more then that. Maybe the schools have to start teaching us at the age of 5 or 6 about the soul, the operator behind our Physicality. 17 47.

(:27). due to the condition of the mother's womb or the container with saltwater, you create a new dimension in the soul of the creation, interaction and creation within the environment of the Gans'. Try to use the Gans water as a medium instead of the normal water (distilled), because when you put a ZnO<sub>2</sub> and CO<sub>2</sub> Gans it goes in the direction of the ?? condition, because everything now is created out of the conditions of the interactions of the fields in a free dimension. The Plasma is a free dimension (of) fields. Those of you who have managed to make Gans' out of the interaction of other Gans' using the LP of the Gans', now understand that you are entering the creation of the soul of the system. If you look at the Gans of Cu, for example, it is the sperm, and the Zn is the egg, the interaction of the 2 in the womb which is itself in the Gans condition, it's (like the Gans water you'll use in your containers), and the creation of Gans out of Gans', which is the child, you'll create a new dimension ?? with the amalgamation of the 2. It is the work of the KF followers to develop these technologies, and then you'll come to understand how you create life, you'll create the soul without the Physicality. Those who have been with me many years like Armen and others, they have seen a box of life that I have carried with me 7 to 10 years now. I have created that condition out of the understanding years ago, (:29). but they look for the Physicality of existence but I look for the essence of the soul which has created (it). This is what we have to do and understand, go back to the writings of Bahaula, he says pray for your children 20 years before they are born. Now that you understand the process, in setting up your systems, go back to the original teachings, I said always pray for the soul of your S. Because the dynamic S creates free dimensional fields whose interactions leads to creation of new dimensions of the fields, what we call a Free Plasma (FP), If you look inside it, it is hollow, which means it has a soul. This is what I have been teaching, also with the Mozhans, to understand how to connect with that soul, not the Physicality of the existence of the Pl, this is where most of the misunderstanding has been because the man has been so P. You are looking for the rotation of the matter in your cores, but in fact, you have to look for the center of what you have created in the center that you communicate and give and take from. When you add to the soul of the man you communicate with his soul, giving to his Physicality for it to convert to the part of the soul is very, very cumbersome, it takes a lot, because Physicality is hungry to take most of it, but once you learn to work with the soul, it's very easy, there is no time waste, no energy loss. The only person who fully understood this was Christ, (:31). He gave life to the soul of Man, and rose from the death, and he did the same thing with himself. He found the key, a way to access the soul without touching the Physicality, so he could raise anybody who was dead as a P body in the ground, He elevated the soul, he gave

from his soul, it doesn't matter if the soul has already left the body, he could see the dimension of it and give enough to it that the dimension of the soul returns back to the Physicality, the dead rises. this is the beauty of understanding, once you know how to walk, then you know how to run and jump and the rest is just child's play. Very few in the world of creation on this planet have understood this, the man who got very close to it, but still not completely understand it was Buddha. He reached the very ?? yellow of the soul, that's why we said in the last teaching we have finished with the religions because they are all part of the mess man has created for himself in the P life. Buddha understood the soul and operated through that direction, which means he was one step ahead of those who call themselves ?? leaders of the faith. In his work he strived to explain in a simple language where the destination of the soul in the body of his followers, but they still could not see, this why in his teachings he touches the soul and not the Physicality, praying, bending and the rest of it. There is no banging the head to the Great Wall in Jerusalem. (:33). The banging should have come to put in the right way so that they could have found their soul. now we teach more and more in the dimension of the soul. the followers of Buddha will find a lot of resonance in your teachings because now you understand the totality and where Buddha couldn't complete. 26

(:38).

(:50).

(:54). then they understand that it's time to elevate the soul of the totality of the human race. For the first time the executives and director of what I call the soul of the man, as the Earth and U councils, they met yesterday. It was beautiful how they interacted and how the UC allowed the EC members to speak. There was nothing about the voting or whatever, it was harmonious and about serving. It is recorded and will one day be released, but this is the essence of what we established, bringing the two arms of the executive and legislation, which is actually through the soul of the man, accepting to work as one without any papers written has brought the condition which we said. We have already started the process of the unification of the soul of man on this planet, according to the language and the position they take in respect to the different environments of this planet. Yesterday was a fantastic day for humanity. It was the 31st of May, we closed the book of the past and by today they started a new day. We listened to Lisa in Australia and she was actually in the 1st of June date, (:56). and we listened to Dr Rodrigo where he was still going through the 31st May, we say the future and past, and the end and beginning at the same time. That day will be remembered by many in the future, because of the speaking and working as one the soul of humanity has changed and elevated as of yesterday. We see a new breath of freshness in the soul of humanity and we'll see new dimensions of the move. It has taken thousands of years to do this and it is there for man to understand. The members of the Earth Council have issued their first writing, it is for them to disclose at the time they feel as appropriate, today next week or any time. For the first time we have established a line btn the KF, UC and EC, the physical dimensions of the need of the 2 shall be met. Nothing is coincidental, there is a reason for it, because through the teachings many souls have been elevated, found peace, and by finding peace they have elevated their energy into a new dimension of serving humanity and now we see the change. Today is the first of June and the human race has taken a new dimension, what was planned in Physicality years and years ago by different prophets has given birth to the final stage of its totality. (:58) We spoke of the sperm and egg and the environment of the womb of the mother, we had the prophets teaching the Physicality and out of its essence we have seen the birth of the UC and EC to work as a soul and not in the dimension of Physicality, but

they know that through their souls they can reach the P man and elevate his soul and the process of what we call World Peace has already started as of today. They have been working in the background as teams, groups or individuals, but now they work as one. The meeting of last night for those of you who were present was majestic. The humbleness and the fearlessness of being able to speak about your own language, where it came from and be proud of it that it is taken with the heart and soul of the members to elevate it to understand it that in the language of the soul there is no division. One day the EC and UC will decide to release these recordings. Don't listen to the language but the essence of what was released collectively as one. It was very much like if the UN would meet with the World Bank and they decided that we give everybody the same amount of money that they are all free. When I listened to it the World Bank was the UC and the UN was the EC accepting the gift and sharing it amongst the humanity at the soul level. One day the man will understand the meaning of yesterday. (1:00). It is important that we connect everything to each other and to every point that we understand the totality and there is no misunderstanding. Today I have taught you a lot about the soul of man but it will take him thousands of years to understand what was taught in the past half to an hour of teaching, there is so much hidden in it that in every word you can find millions of solutions but it's for man to find out which solution is for him. We don't (just) teach the human race but at the level of the soul and the U is listening and promoting itself, because in their level it still applies the same as what is here but in different dimensions, as they did not know. I give my soul to humanity but I know that it comes from a very long time ago and far distances and comes from the essence of the creation of the U. So it will not make any difference if you take a little or the whole lot to elevate your own soul. It is freely available and it's on the table. It is for the man to take to elevate his soul according to his understanding. If you go back and see what our soul sees from the soul level once it releases its energy it comes in touch with the Physicality of the brain, which in a way created itself from it. In the essence of creation there is always a G and M. (1:02). The energy absorbed from the U by the P dimension of the brain which comes through it, it transfers itself through the soul of the man in a M way, as the G of the soul absorbs what is given to it, but at the same time it receives the spectrum of the total energy, because each part of the brain feeds the soul of different strengths according to its structure, and at the same time it receives so much from all dimensions, at the level that is in balance with the Physicality, then the soul gives what is at the level of the Physicality for the brain to filter out. In a way, the brain works as a G field, a pull from the universal (I think he meant the brain pulls from the universe), what I call pool of fields, it gives all to the soul and the soul gives back to each point of the Physicality in what he wants to be seen at to feed the arm, eye, leg and the rest. So what do we see and how do we see if we sit in the soul and look what the Physicality, which is the brain and the first point of interaction btm the soul and the Physicality, then we can understand the structure of the brain, because it's the brain which manifests itself on the feedback of the soul, with the structure of the Physicality of the brain, then it can take us to the next step of teaching, which is once the soul interacts with the Physicality, what is missing in the soul that ends up with a shape and a condition of Alzheimer's, MS, ILS and the rest. (1:04). Depression or expansion of the knowledge through the dimensions of the Physicality. In the past 2 or 3 weeks we explained the interaction of the Physicality with the child when he is changing from the womb of the mother in the world of the water or liquid in a Gans state, to a thinner Gans state, what we call the air. The air of the planet exists in a pool of the Gans of the Solar System, so even though we call it a matter state in respect to the energies of the sun it is still within a Gans of the system. In switching from one to another we see problems in

some children, we call it lack of O, and we see disabilities in Physicality. The same thing can happen in the conversion of the energy from the soul to the brain of the man. As we saw disabilities created by the change of the environment, because of the feedback on the Physical life of the man, the same thing can happen on the creation of the man by the transfer of the energy from the soul to Physicality, in what I call the transformer b/n the soul and Physicality, which is the brain, where it transfers and transforms the energy from the soul to the level that the Physicality can understand that in the dimension of the P structure of this planet. (1:06). The brain is nothing but a transformer, it transfers the energy at different points to the arm, or to the sections that have to do with the pain or happiness, and all that energy comes through the soul, at the same time it feeds the soul itself in a ?? more mass mixture of fields from different points of the brain to the center. If you understand the job of the transformer, as the soul due to its strength receives more energy from the U .. as it goes through the brain, but in fact reaches the soul at a strength much higher than the Physicality of the brain, very much like the light that was seen in the eye of the astronauts as we explained before, then these transfers of energy to be filtered, sometimes part of the transformer brings the E into operation in respect to Physicality in a way it filters a little bit more or less, and then in the p life in the dimension of the E from Physicality, which every cell of the body carries, be it arm, heart, lung, etc, then the 2 have to interface and find out where, what is not needed, and what needs balancing, and in that process of the balancing, sometimes in interaction in a P dimension, we have it in the form of cancers, we said cancers are E but in fact the seed has been created from the interaction of the pure energy which comes from the soul, unconditioned and untainted with the E of the P dimension of the ?? soul or cell of the body and which interacts at the point of the E, and we see different cancers accordingly. (1:08). In the same position (1:16).

(1:20). Those who suffer from Alzheimer's

(1:30). In the medical teaching we have already taught,

... Parkinson and Dementia, (1:36). the daughter was in medicine, I think she must be listening, in those days I created Cups ?? from the surroundings, and we went walking with this man for the first time on the street outside the house and it was recorded, she says it's the first time he has been walking in 15 years, and he started talking and doing things. This came about through the process of creating all the materials that you use (need) for the development of the brain or replacement of the cells that were destroyed. A few weeks before he was paralyzed in a wheelchair, they had to put him in chair and car. The wife usually went through the front door to the neighbor, but for some reason she went through the back this time and saw him getting up and walking to get the things he wanted. (1:38). And she knocks on the window and says what are you doing, I left you paralyzed but when I leave you walk? She called the daughter who called me, do you know what has happened? Of course, he has become a sucker and wants to take attention. From that time we refused to accept him as someone who can't walk. He did this a few times. Later we saw him riding his bike 2 to 3 km. What I explained to the wife is that he was used to abusing the soul and now he has learned to do it himself (feed his own soul). This is the beauty of the T when you give a gift of life let them see that they have done it themselves and not you, otherwise you become another prophet. These people who we see with these kind of behaviors, we call the detoxification of the soul of the man. They don't feel good because not feeling good means now I know to do it myself. I don't need to become a soul sucker. This is the habit of the man, we need to

extend everything that always in the back of our mind is the elevation of the soul in the dimension of both physicality and the brain or what we call the E and the then the soul. Maybe now you understand where your toxicity comes from, it is you who would like to carry on with the habits of the past. and somewhere in between the E needs filtering. (1:40). You do the work of the kidney cleaning up the Physicality of what is not needed, you have to also clean up the soul 12

(1:44). Giovanni says the MRI shows that the brain of Naomi has completely changed and the doctors said it was impossible. (1:46). they start to listen to your teachings because it's impossible. She start to open the jaw and can stand up alone, and everyday she is improving. There is a problem with her taking food because they weren't feeding her and not exercising her jaw because they had her in a place for those who will die and not recover. (1:49). She understands now when you talk to her. She can show her thumbs when she is happy. Thank you again Mr. Keshe for all your instructions on how to change, she has grown literally a new brain it shows it on the MRI. (1:52). Giovanni runs the KF factory in Italy. Q: What about the toxicity caused by vaccinations? We have explained this before, it comes mainly through the mercury (in the injection) to the brain and that's what causes the problem. This needs a knowledgeable doctor to do it and reverse it. They have to extract the mercury from the brain cells. It is very dangerous to work with or be near to. It needs a development like what Dr. Rodrigo and the doctors in South America did. The mercury is in a minute amount but effectively (devastating) in the brain. It has to be extracted from the brain cells without introducing a new material into it, but at the same time, (1:54). ??? it doesn't matter how many new brain cells you produce, the removal of the mercury is paramount. These injections (triple vaccinations) introduces mercury directly into the blood cell and we touch the E of Physicality and the brain. There is a procedure that takes very little time but needs an expert hand. ... the doctors in South America know how to remove Fe from the tissue and Ca from the breast. It's of the same order but has to be understood fully. You don't need to touch the mercury but can work with the materials near to it using the same process, that in the spectrum part of it will touch the mercury and it will get depleted, then you'll see the change. But at the same time you have to go through the process of developing the new brain cells that have been damaged. As I said before, keep away from (the triple vaccination) and do the single ones, we see new forces coming to Northern Europe that are even trying to take the parents to prison if they don't go with the triple injection. Tell the Ministers to inject their own children and grandchildren and watch them for 3 years to see if anything happens to them. The ministers themselves are avoiding having their own children injected, these are people at the highest level. (1:56). Why then should it be for the others. This is a complication we have to handle, and at the same time I see a way it can be done, the doctors could, without opening it, put it through a Gans water that allows the mercury to be extracted from it, and then give it to the child. I keep on suggesting different ways to do it because it depends on how it suits the parents. Let them sign the cap (vial with the injection) that they'll not touch it, then put it through a process to extract the mercury from it and then give it back to the doctor to give the injection. The problem is not the injection but the level of mercury in it. The combination of the materials. I don't see why it is getting pushed so heavily, unless the Pharmaceuticals want to get the money they invested so heavily in, or inject to kill. As I said we received a message a few weeks ago that the world population can't be more then 500 million, we have to control it. I said, okay if you want to control it, then put your own life first, then you're not there to control the rest. He said, no we have to be here to control so it means Anybody from the groups that want to

control the population, say okay, everything has to be by example, (1:58). you kill your own family, children, daughter and then yourself and then we follow you. This is what I said to the Illuminati's recently. .. I said, no you are the freaks, a bunch of criminals sitting in the organization of the governments. The same position is in the Iranian government, the president works under a very clear mandate, where the power of the military says that those who served and gave their families for going to fight in the war against Iraq have a say, and those who haven't they have no say. So anybody that says the population has to 500 million because there isn't enough food, we say okay, we'll start with your family. ... let them see if they can withstand the loss of their own blood, then we have found the answer. Until it doesn't hit home they don't understand. ... we hear this a lot coming from Bill Gates people that they have to control (the population). Please put your own family on the first line. This is a very fundamental point. It is just the exercise of power. ... the mental disorder and grief in you will not talk. (2:01). The Senate opposed the Iranian peace 5 plus 1, I said to them in a meeting, with Mike Harris, you show me a senator that can oppose 5 million jobs with such a depression in the US. The following Monday the head of the Senate group resigned and was finished and we got the signature (to pass the Bill). Now we do the same. ... talk is cheap because it pays for the Pharmaceuticals to do what they want.

... as you know there is a big problem with the amount of N released by the farmers and nitrogen contamination is very big problem. We have shown that we can reduce it by 59% in a few minutes with the new development that we have done. (2:03). We go into the second phase and reduce it by 95%. The end product becomes a very good fertilizers. Once we build the center in Ghana we can take the research to detoxify the mercury in the injections further. This is the only way we can do it. Meanwhile it has become part of the structure of the brain in the atomic and nuclear level. In a way it's very easy to decontaminate it, but hard to remove it. Because if it is in one position we can extract it, Dr. Rodrigo's has done it for the metals and Ca. But mercury is a very tricky game, so it has to be done before the injection or just stop using it altogether. Why they use mercury to link up the 3 injections, I can't understand. I haven't done this ?? yet. Maybe we don't have a criminal mind and that's why we don't see it. As far as the emotions go how does sexuality play in it, how come some people are gay and others are straight. Caroline is laughing. I have to answer this very carefully because ?? of life touches the soul of the man and what we see in the dimension of Physicality, is what our soul has decided to have. I have never seen anything wrong with which way the humanity decides to express itself in respect to its E and his sexuality. It's the way our soul decides, (2:06). and our P body follows, but in so many ways our soul doesn't always see the needs of the Physicality in the environment of existence, or in the process of the development in the P part, the Physicality takes a different shape than the E and this is where the conflict comes. So in fact there is nothing wrong because it is us who decides from the beginning to have a male or female outlook, the way we decide to walk or be paralyzed in the future in the space if we decide to manifest ourselves in different shape or forms. Maybe on earth we like the physicality of the woman to be in the body of a man with the behavior of a woman, then on another planet we become visa versa, because it feeds what we need in our level of E. You find very strange things if you look at the true, what you call homosexuals, they understand the female, or the female understands the male and they behave the same way. We say men are single task and women are multitask, those people are truly, what I call take pleasure in the E of a woman but in the body of a man, they can multitask exactly like women are. There is nothing wrong in how we express our E in the dimension of physicality, what counts is whether the soul is at peace and not what others perceive. (2:08). There is nothing

wrong with being whatever you call it, homosexual, lesbian, straight and gay, or however you want to do it, as long as the soul of the being is at peace with itself and it can give more than it receives. What we see is that the Physicality has taken a form of what the E did not want to be in the level of the soul, so we see the E different from the manifestation of the Physicality. There is something needing slight adjusting in the transformer, what I call the brain, either behavior or preferences doesn't change the level and understanding of the E and life in the P dimension. It's very much like what I said with what I call the beautiful people, in this essence it's the same thing but inside one body, where one wants to be physically different than the E or soul, the E received from the soul manifest itself in a different level or strength and we see complex behavior. It's natural, not everybody is A or B, you have A, A and a half, then B and there is nothing wrong with it. There is nothing wrong with homosexuality if the soul is pleased, but if it is used in a different way as we see for promotion of ?? different target, because you get more out of it now a days, then that is not the way it should be. We this a lot in the musical world, we see a huge number of, (2:10).

.. these things should not be tabooed ... (2:17). this is the problem of the humanity, sometimes you find men who are very macho and women who are very feminine, the more you are the more Physicality and E are in line. 18 18

(2:20).

(2:23). Zane (2:25). Cary asks about C stick whether it is approved. We don't approve or disapprove, we have to understand the difference. C is 12 and Cu is 60, so it's a force of 5 to 1, this is where it comes from (why to not use C stick), with the Zn and the N coated Cu we create a magnetic field from the nucleus point of view. (2:27). This is the difference, where with the C you create the atomic structure of ?? withdrawal, where in that position the process is so rapid that you produce C, which you have to support it with the O, and if you produce CO<sub>2</sub> from the physical element of the C, then you are connected to the physical dimension of the material. It's very much like the Fe which is in a metal or P matter condition coming in touch with the Gans of the AA and produces the blood, but if you put the Gans of Fe in a different shape or form into the AA you produce a pure blood, the real hemoglobin, you still produce the same but it's not of the same strength or order, there are 2 different things, the Fe you take as a tablet is very much different than the Fe you digest from eating meat. The tablet is in a matter condition and you absorb all of it, but in the form of meat your body will only take what it needs, this is the problem with the food and one of the reasons that when you take your Mg, Zn and Cu, you take it with CO<sub>2</sub> and ZnO<sub>2</sub>. (2:29). because it creates a condition of entrapping it or delivering it in an environment of the body, and the body only takes what it needs, but when you take a Mg tablet all of it goes in (?? body and blood), because it is stronger and it therefore enforces itself. When you take tablet of Zn, Ca, Mg, and the rest, and in CO<sub>2</sub> it's in the environment of the CO<sub>2</sub> (Gans) it is a totally different process. Now you strip it as a molecular Gans ?? where the others are different. The same thing with the CO<sub>2</sub> (Carbon) sticks, you have a huge massive force sitting as a Cu, 5 times more, and you literally strip it out, like taking the clothes off yourself, or you are standing in a huge wind tunnel and getting everything striped off you very fast. That's all it is, but the essence of the C you create in a Cu plate is a Gans state M field and totally different structured Pl, whereas with the C stick you still create the CO<sub>2</sub> and it's very fast, but it is not recommended to use (this method) for drinking the LP of CO<sub>2</sub>, unless your body needs it. It is a big difference, a Rolls Royce and Ford are still cars but it depends which one you want to drive. (2:31). Some said the C stick is a N material, burnt bamboos sticks and very pure???. There is nothing wrong with them

they are both CO<sub>2</sub> but what do you expect to operate on there? That's the difference. You'll find out that when you work with a Gans Pl of Co<sub>2</sub> you have the natural effect, with the CO<sub>2</sub> made from the C stick you have a different dimension strength of the Pl. Do you think your body creates that kind of condition? I don't think so. How about using N Cu wire instead of a plate. (2:33). You already have access to pure C which has been converted, the ashes from wood. If you make the Gans of the ashes of wood, because the wood has already gone through the process, as the same as the C stick. ... the South Americans years ago used to burn wood for heating then when they threw out the ashes they found out they get very good results in growing food, in places that it never grew before, then they started burning the wood to get the ashes so they could cultivate crops. you see there land which is totally black. For centuries they burnt wood to create ashes to create N material to absorb energy that the vegetation could grow on. This is done by the Israelis after the 1960's war, when they took over the Sinai desert they came up with a fantastic system, they covered the desert with tarmac and brought new soil on top of the tarmac, (2:35). The big oranges you see from Israel come from the desert, they isolated the land and put a lot of things on it. We try this now in Africa to change a desert into a food center, by (using) Gans material. This is what I suggested to the Chinese government, as you know the central desert is heavily moving towards Beijing, and they tried everything. The simplest thing to do is to water the Gans and put seeds on it, it will grow and solidify the desert and it cost nothing. What you are talking about is the same thing, creating a Gans or the environment of a Gans. the desert will over take Beijing in the next 50 to 100 years, most probably. But by changing the environment, you create a condition in the sand so the trees and plants can root and that will stop the movement of the desert. There is no other solution and it costs literally nothing for the Chinese government. You say you are in Mexico in a remote village, the ashes are your best Gans process because they are already converted to a N material, then you have to find a way to convert it, putting the (different) salt ratios and connecting it with ?? electrical discharge and you'll see the Gans' will be produced in the middle. If you understand you don't need to do anything. (2:37). If you comprehend the T in its truer sense you can always adapt it to what you need. A lot of people just copy, but if you comprehend it you can change it. The central bar of the batteries are fantastic for what is needed. I always said the gift the Europeans gave the Africans was a pure 99% copper sheet in the batteries that they couldn't dispose of in Europe and they thought they'd dump them in Africa. It is now the best resources for Africa, to open the batteries and take the pure Cu sheets out, and use them to feed the nation. We have to find a solution with what is on the table. Caroline and I used to go around Belgium and buy the old batteries for 1 euro each, they thought we were idiots, but they didn't know that I can make a 1,000 euro system out of it. We used to wash and clean them, even Arman can tell you, we did this in the Insano, in these kind of conditions you have everything. All the batteries around have Zn and C stick in the middle. (2:39). It lost its energy in the P dimension but if you understand the power of the Gans and what it can do, the center pin the pure graphite in the center, you wash it and the Zn casing, then N coat the Zn and you have your food. 20 (2:50).

(2:58). Question, if there are 50 tons of gold on this planet in relation to the sun, and there can't be anymore or less, then if we go to another planet the gold will disappear after some time, and the gold that was taken from this planet will replenish itself from the fields, am I right? Your assumption is 100% wrong. The planet absorbs and converts energy from the environment of its solar system and it has no limitation in what it absorbs. It absorbs according to the strength of its central fields MG fields. So if we are

in an environment where there are such Gans M fields available it will convert it to gold. (3:00). You can take as much as you like. But if we are in a position in the environment where a given specific MG field is available that converts in to gold then it will convert itself back to gold. It's the same as you say that the energy of O on this planet is constant, but it's not, because the interaction between the fields of the earth and the sun continuously produce H and O and everything else, where do they go, it the breathing system in the process of life in the fields of this planet we convert it to another field strength which is needed by other planets or structures in the U. If you think of it the amount of energy produced H, N, by the interaction of the fields of the earth and the sun we should be continuously blowing up with a new size atmosphere, but we don't, because there is a limitation of what we convert, what we use or don't use we release it back into the atmosphere back into the planet's solar system so that the others can use. So if we pass a position where the fields are available then at that point we convert all the material, it will be raining gold, which in reality it does, if you could measure the nano structure of a given strength of a field of the planet that is equal to the gold you'll find out that you'll be collecting gold. This is the reason why the oceans are holding more gold than the solid part of the planet, because it's dynamic it continually creates diverse field strengths in which some of it is gold, it get attracted from the environment of the solar system. In the future man will understand that we even create gold from the structure of the galaxies. (3:02). We are not educated well enough to understand. With the knowledge we are gaining man will be able to tell you that this gold is from the conversion of planet internally, and this gold has come in from the space of the solar system and that gold in from the Pl of the galaxy or the solar system, because when you transfer the time doesn't exist. My concern was that with the new T we would produce too much. No, what we don't need we release, it finds its balance. (3:04). I was concerned that when a thing is taken and not given that it will go back to its original place. When you live within a structure like the planet in a way you have been given a freedom of the rights as the others use you, if you look at it, you think you consume everything, but you have to understand that the body is a converter, so you convert the energy of existence of the others to feed but you only look to what you put in your own mouth, but in that process of conversion it's not just that you create heat, but you create huge amount of heat which other elements may be visible or invisible for man's need for existence. We are all conversion systems at different strengths and you always find that other things exist because of the conversions we do with our bodies. It's not all one way traffic, if you take o much energy and it all stays in would become a balloon, by the time you are 50 you'd be the size of a nation, but we don't because we give energy back, we are all part of the conversion, (3:06). process in one shape or another be it a brick or the body of a man or a bird it is all the same, and there is always a taker for what is given freely. In the garden you have all the birds but each one eats certain seeds and certain parts of a plant so that there is enough for the others. At the same time the body of the man is like the body of the earth, so you can't diminish it, it takes and gives energy, and when it gives it gives the freedom of the right path to use, it depends how much we need that we take, and at that point it is the same. When you see a tree growing it is not that you watered it, it's the energy that is freely given by the earth, or the entity that it allows it to take what it needs at that point. It's the receiver who decides what he wants to receive and not the giver. I always say to Caroline I give everything, my life, my love, it depends on who wants to take what from it, and then they elevate to that level. (3:08). Jelub focused on Rick and got promoted. You have learned the language of the soul. Today we learned how to make high Gans, are we also making high level AA? Yes. Are we using salt with it to make 9the Gans)? It depends on what

kind of E and Physicality you want to make because each (salt) carries a different E level. Are there any talks with Arabic nations with this T? You don't know what happened last week, I wrote Mohammed what they are doing in the background. .. At the time of Moses when any male child was killed and somehow he ended up in the basket and was brought up by the Pharaoh, .. then he became a king. (3:10). ?? nurtured by the Belgium kings to end the monarchy, but they don't see it. The same has happened, I was brought up in the culture and understanding of Islam, Christianity, and Judaism, this way by knowing they understand not the weakness but the points of mistakes and we can correct it. So for you what we do in the Islamic world is very simple, as the term has finished, the Ayatollah said once, we don't know what to do with this guy. I think now they know they could have done a lot but they didn't do because there is a time and a term. We don't look at them as Islamic, Jewish or Christian state, we look at it as One Nation, so as we see that every child has different behaviors and it's for us to understand it and give it enough that itself comes back to the father. That is the whole structure, they can kick and shout but they can't change the course. A group in Iran asks to collaborate with KF on free energy. (3:12).

guy asks about using his body as the 4th reactor.

(3:18). he was going to use ZnO<sub>2</sub> in the center reactor ... advised not to it will drain your soul ...

(3:20). The Dutch are making Gans of narcotic mushrooms and putting in dynamic reactors and are making whole districts high.

(3:22). As more Dutch are producing these reactors we see changes in the Dutch mentality and freedom to use the mushrooms has created a new dimension, because the field transfer is very high. It has become a (problem). Please do not make Gans' of mushrooms, cocaine, or other drugs. You are making your neighbors high and they don't want to be in that state. Please refrain from using these (drugs) just because you have the knowledge, or speak to the neighbors and see if everybody wants to be high 24 hours a day 365 a year, because these systems go beyond the dimension of the house. But if you understood then it is the end of drug trafficking, one shot gives you everything for years and you don't need to buy. (3:24). And we get rid of the drug dealers who are the biggest menace to mankind.

(3:31).

(3:34).

(3:36). Even one particle of Gans carries the whole information.

.. a test done in Ghana with Gans, by diluting the Gans water the strength and ability to purify the water diminishes, however if a particle of Gans is in the dilution then the strength doesn't diminish. ... it's important to use glass container for Gans.

(3:39). You said the soul is pea size in the center of the brain, and how to train children, and how to go deeper and practice with our emotional center. if you're trying to go through the P part (to the soul) it is very difficult because of the food, but you'll still achieve it, because the plants and food we eat does that. **The early part of today's teaching, through the operation of the heart and lung, you decide or dictate what can be received by what level through the soul of the man, or through the E, that it feeds through the Physicality part of the brain. So you can go the old way to try and find it, or understand the further understanding of the knowledge of the feeding of the soul and absorb directly from the environment of the whole body of the man the energy that is needed and then feed back through the soul to the dimension of the Physicality, then you have done your job, done the whole thing.**

(3:42). The whole process from now on is how to feed the soul of the man, now that we

know that the soul is within the structure of the brain and that it feeds at the level which is the satisfaction of the existence in the physical dimension, so we feed the soul so that through the soul we feed the Physicality, and those who come to understand this don't need to eat anything. Those who go that path understand that the Physicality has a connection with the operation of the circulation of the energy with the dimension of existence, which is the blood, with the operation of the system that circulates it, plus the condition of the confirmation of the environment in which you exist which is the air, in bringing the 2 into balance you find peace within the soul, and then it becomes detachment from Physicality. (this is what the Chinese Medicine calls the Qi and Blood) ... What I just said is the key to existence in the U, and not many people understand it. It's the maturity of the soul and this is the key to be able to exist in any dimension in the U, because as you feed the soul according to the environment in which you are breathing, in conjunction with what the Physicality of the environment has given you, gives you the extension of the what soul needs to absorb that it can raise (itself) to confirm its existence. Blessed are those who understand. Because that is the secret of the creation in how you manifest yourself in the physical dimension, but from now on instead of using the Physicality, because I said thou shall not steal, which means to kill a plant or an animal to feed itself, man taps the universal energy through his soul that through the soul the way it gives you E that decides the feature of the man, now the same soul releases energy at that level that feeds the Physicality. This is how you survive in the space for millions of years. (3:44). Now find your soul, nourish, feed it and you'll feed the man and the rest, then you can expand the strength of the soul beyond yourself to the others then in that way your E becomes theirs, and these people are the captains of the SS of the future have that understanding and it's a gift if you receive it. Or first to understand it and then to receive it. As I said, we have to start teaching about the soul in the schools then the Physicality will follow, at the moment we are too physical only learn A,B and C. .. the Earth Council has finished their first communication about what needs to be done for mankind. end
