

186th Knowledge Seekers Workshop August 24 2017

(, There is no method for me to teach you how to strengthen your emotion you have to find the path on your own if we take a wrong path we have to come back around again to the right path, We don't admit that I took the wrong path instead blame others, , we can't do it though meditation we have to understand how the reality works, The amino acids are made from the gaseous part of the planet and from that the soul is made, Emotions are field strengths and how we barrow from each other to balance and this is why there are no wars in the universe, How the field forces create rotation of the planets and the Solar Systems etc., Making an imaginary spaceship that is not imaginary, Using Gans water in plastic bags to heat house update, Loosing weight with Chinese high temperature wok cooking turns it into Gans,)

(:11). Organizing Chinese KF and in Africa.

(:17). Alek was attacked but is back. The membership of the Universal Council is for life as long as you can serve. It has been misunderstood it is not for 1 year. There are different circles and members are rotated yearly out of the center seat. (:21). We are moving rapidly towards One Nation. The charter is being drawn up and has to be connected to the soul of man and in that way is connected to the whole U. The UC stays at 144 which means the 12 become part of the 12. The Russian member withdrew as she felt she was unable to serve that seat in now open. (:25). The rays of the sun in interaction of the fields of the Earth leads to creation of light, in different shapes or forms the interaction of the 2 fields from the sun and earth leads to creation of matters being H, or H₂O, N or any elements, this is what we never understood up to now that most of the materials that lands on the surface or ?? within the atmosphere of the earth is ?? by the MG field of the earth and partially by interaction of the fields. The field strength within the structure of the Earth, and the field strength between the sun and the earth has lead to the creation of physicality and the content of the matter within the planet. Atmospheric gravitational field forces. (:27). The field of the sun is not just on one side but (radiates) in the totality, so when the fields interact with those of the Earth it dictates the physicality of the Earth. The physicality of earth, it's presentation is dependent on its soul, if we call the soul of the Solar System to be the Sun, the interaction of the fields of the soul and the field of the Earth has lead to the manifestation of physicality of the Earth itself, this is what it dictates to have, it wants to have Cu and Zn in it but due to its MG field strength it doesn't want other elements, so this is important for us to understand in expansion of the knowledge that the interaction of the fields within the structure of the Solar System has lead to the creation manifestation and of physicality of matters in the structure of the Earth. If you go a step further and repeat the same thing ... if we place the Earth as a MG field and we place the soul of man, the interaction of the physicality of the man which shows itself with 2 legs and 2 arms is dictated by the interaction of the fields of the soul in respect to the fields of the Earth that is why in every creature on this planet (:29). we see the same configuration of brain in 2 halves if you have Cu in you, Mg in trees and branches and everything else. The soul of man with the fields it radiates with the interaction of the fields of the sun and itself leads to the creation of the physicality of the man. So now we understand why we physically look like this because we follow the same pattern, the same goes if you follow the fields further up, the same goes in the galaxy and its interaction with the sun dictates the shape of the Solar System, then from the galaxy to the U it gives the shape of the galaxy. Then we understand that our physical dimension is dictated by the field forces of the planet itself, we have 2 arms and legs this is the

conditions that fits, then when the man reaches the soul and understands it in the dimension of the traveling into the galaxies or into the universal condition, then when you come into another (:31). condition of say planet A, our soul is still the same it hasn't changed but now in the dimension of the new field strength it might need manifestation of a different physicality. We have the same with the same interaction. This is how our physicality changes according to the position where we arrive, and the wish of the soul of the man. This is fundamental for those who take into space and understand the knowledge of the creation. this is how in all the teachings of the past we explained that the manifestation of physicality is dependent on the point of the field strength as the soul decides to manifest itself. Simply put the soul is the same but the environment that has changed and with that we manifest ourselves in totally different ways in different areas according to the ???. It's very much like water it's the same H₂O whether in the freezer as ice or as steam in high temperature on the glass of a window when it's cold outside, or water at room temperature. Now that we understand the soul as a condition of Pl, in space we don't carry physicality as let's say the field in A (:33). ????? is a vapor on earth, we want to manifest not as a vapor but in a way the creatures on that planet can see or manifest themselves as, birds, fish or breathing between the 2. We have seen this with the birth of the man in the womb of the mother when he leaves the birth canal to enter earth's atmosphere. this is important for us to progress into, now it makes it much clearer, (:34). why we'll manifest ourselves according to where we arrive. This takes the fear out of space travel and gives strength to man that he decides, at this point I don't want to be manifested, first I want to see how it feels to be in a dimension of fields without physicality between the galaxies matter state of stars, or I want to see how life is in a given condition that is only liquid. In the coming time we'll show this in tests. As I said we have committed the KF space program to the Chinese government, all these tests will be done in collaboration with them, creation and manifestation of life in the deep seas, in atmospheric condition and below and above atmospheric, so that gradually we gain confidence in our presentation of physicality being dependent on the conditions at the point of manifestation. This is why we see entities in motion in some photos from the space agencies, but we don't see their physicality, but if we were at their strength we would see physicality, but we only see the aura of their existence. We have shown these NASA videos taken from deep space or from space lab, where we see shapes floating, (:36). but to us we don't understand what they are. We don't see them because at that point we don't carry the strength of what they have at that position. It's like the birds, if the man wishes to carry the strength of the bird he can become a bird. It's because we are afraid of this, but now we understand the combinations that lead to this phenomenon. The mutations of the elements is not just the elements it's the manifestation of the combination of elements. This is why we can become whatever, according to the strength of the soul. When we look at the soul of a fish, a man, a bird. A man can acquire the soul of a fish or bird. It's our lack of understanding that has created this fear and not being able to. Now that we open the space to man and his understanding of his own soul and that he can change his manifestation. We can also do this on this planet, it's done by gaining strength in the knowledge. If this technology is fully understood it opens a new dimension for the soul of the man and becomes part of the soul of the totality of the universe. Then man becomes the man of peace and those who reach this level will understand how progressive the man (:38). has become to join the UC. As we said many times that when we take man to space we take him as equals and not as subordinates that he doesn't understand the totality. The knowledge has to be spread across the strength of the understanding of the man. Some still walk others still ride a donkey and some go by jet

plane or car, nobody has said anything is wrong, it depends how long you want to be on the travel from A to B. You can still sail the seas in 80 days or do the same in 10 hours. Now man has the knowledge to acquire the strength of his soul and in that he decides the manifestation of himself in the dimension of the strength of the physicality of the point of manifestation, how would we like to manifest ourselves. We took you step by step to understand, and now that you understand the ?? MG fields in the womb of the mother leads to creation of the soul of the man, and now the soul dictates the physicality a knowledge that has been missing in the science of the man. The discussion is not when, but it's on the level of the maturity of the understanding the totality and the ?? The knowledge is there but it is for how to decide how we want to proceed in this process. (:40). There is something in the teachings that you all have missed. We taught that pain has a M and G field strength that in our brain recognizes itself as pain, the same with joy, pain, love, etc. it has a MG field that is a strength point at the level of the soul. This means that we decide in the processes of our brain. He draws a circle with a small circle in the center, if this is our soul as the field comes out it has a given strength, when it interacts at a particular section of the brain we recognize it as pain, at a place nearer to the center (soul) we recognize it as joy, at a place even nearer to center we recognize it as love or giving because it is closer to the soul it touches the eternal part of the man. One thing we have missed, thoughts have a field strength, what we think, itself has a field strength, (:42). Then the deeper we think, the more we understand about the strength of our thoughts in respect ... the closer we come to the soul strength, then at that point we all come to have one common denominator that we all reach, then we can communicate from soul to soul. This is what we call Zero Time Communication. For instance, this is the time that when you are in pain your mother or father feels it, because the thoughts are so deep that it touches beyond the level of love, which is the level of thoughts which are closer to the soul. And at that point we all have one common denominator, according to the AA of this planet which created the soul of the man, then we reach the level of Zero Time Communication. When this happens we don't need to talk we can feel each other, then we can understand why so many prophets in the past became so close to their soul that they came to touch the other peoples souls, because they felt the pain and through it, it brought them joy and through it they could survive to give to the others and that brought them ?? to school of thoughts that they became closer but the strength to become detached from the physicality. As you go further in towards the soul the more detached you become from the physicality part of the brain, which is at the outer boundary of the brain. The emotions and thoughts sit more in the center. So as we go further in towards the understanding of the operation of and close to the soul. (:44). the stronger the fields the more common denominator of understanding (we have with each other). In time when man progresses to the further steps that he understands the totality then he becomes ?? in the strength near enough to the strength of the soul of the Creator, then in that process you can travel from the strength of the planet to the strength of the sun or solar system then to Galaxy to the universe to universes then one might reach the process of the understanding of the whole lot. This is the beauty of it and part of it, the existence, the reality of the creation of the man. Then we can go in deep space, then we'll understand that all creatures of the God are equal, because we all carry the same strength in the dimension of the soul of the Creator. Then the man of space decide that if you want to travel with the donkey or with the strength of the SS and beyond in the understanding of the soul. Many people are moving in this direction. We start teaching for those who have moved towards the space development or Spaceship. (:46). It needs to be clarified that we all understand this progress of man in the knowledge of the science of the creation. ... it's important that we

understand the totality of the knowledge. As we move towards the enlightenment, those with the understanding can reach these barriers. Do we need to come to this point or do we need to receive that we can elevate our souls, in turn by giving more it allows us to have the strength that reaches in the time of communication with the soul of another. Then the fear of being left alone in the space doesn't create the fear of the end of physicality as the soul dictates the present manifestation of the physicality at the point wherever you wish. One of the fears we have are because we are used to, conditioned, and institutionalized to the MG field of this planet. (:48). And we have set everything up to live with this condition, whereas now we have the freedom to be in the space and carry on and develop that point in the space time, Zero Time travel and communication, where we contact and communicate through the soul and not through the verbal noise of the physicality of the vibration of the sound which comes from the mouth of the man, then there shall be no fear and no lies as the souls are perfect in their manifestation, then you'll understand how the physicality leads to so many problems for the man, because now it has to adjust itself to the environment that is created by him according to the interaction of his soul in respect to the physical dimensions of the ?? physicality of the man on this planet. The physical condition of this planet which has lead the man or the combination of the interaction of the soul to lead him to consumption of so much energy for that physical part. We know that the man is created from the interaction of the fields between the sun and the MG fields of itself, and in that process it has lead to the creation of AA (COHN), which comes from the gaseous part which has a dimension of freedom of itself (:50). in that process that it lives of the non-physical part, but matter, Gans part of the condition of the life, but in attachment to the G field force of the physical part of the entity which is due to the Inertia and MG fields man in that process has chosen to become a physicality. Our physical part that is connected to the inertia is the consumer of the physicality of the food and other (things) as a package, and not the AA which is the condition of the creation of the soul of the man, because that comes from the gaseous part which has no physical connection to the body. So in the space if you can create the field strength of the physicality then we don't need to feed (it) because we can feed directly to the soul. This is where most of the fears man has for deep space has to be retracted, and the confidence has to be built that in deep space we are part of the space and then all we have to do is to go into the deeper strength of the Plasma, then .. he draws a spiral, as we live in the physical dimension of this strength (farther out from the center of the PL), (the center of the spiral) is the PI of AA which has lead to the creation of our soul in interaction with the matter state of the part which is the inertia part, then when we take the inertia part to feed at this strength then we move to further and higher and higher strength, and the more we understand interactions of the (:52). environmental physical matter condition field strength, then we can get closer and by higher speed by order of magnitude to travel the depth of the space, and communicate with the others without verbal words, where we feel the communication language of the soul of the U and not the noise of the man through his voice. Now you understand the why and how, the reason we are developing in this direction. It is for us to take the shackles of the restriction that we comprehend what we would like to understand at the point of manifestation. When man understands this then he doesn't Messengers because the Messenger of his life is between the communication of his soul and physicality at the point of manifestation, which means where you appear in the physical dimension and according to the point of manifestation, then you decide, you have understood the environment, you would like to understand the environment and this environment has no other condition then what you had on Earth, but there is no one to dictate on how you manifest yourself, because it's the point where you have decided

to accept the strength field in interaction with the soul of yourself. All the Messengers, what they have taught up to now is about the physicality in interaction with another physicality, and now we understand the position of the soul as the creator and the physicality is not the condition to be abused, (:54). or to abuse because now you understand that it is the soul which is responsible for the behavior of the man, then in this way man needs no prophet as he changes (to another) planet. On this planet he is Christian then on another planet because it's a different condition become another religion, X, Y or Z. Religion is the path of belief, or understanding the interaction between the soul and the physicality of the man, and now he becomes the prophet of himself, he becomes the controller of the conduct of his soul, then man will understand at what strength he needs to work, and therefore he doesn't need to be punished. Punishment has been used to control man out of his fear and lack of understanding of his own creation. Now we understand that there is no punishment other than us depriving ourselves from receiving what can elevate us. It's the same understanding as when we say that no man likes to be poor. At the level of the soul you want to be rich that you can give more, and this is what we call the love of the Creator or God, which means I give unconditionally and I don't take what is not mine, then Thy shall not kill, this means not just killing another man but not killing all life. How come we put man in prison for killing another man, but we slaughter animals relentlessly. Now you understand. (:56). Man has been so selfish that he only takes the part (of the teachings) that fits him. This was the message given to the Christ and the prophets of the past, thy shall not kill, life is precious, the soul of the man or any entity can't be touched. Now you understand how the holy books have to be rewritten, because we only considered man and not the other entities. Now that you understand, is there any difference between the soul of a cow and man, a fish, stone, a tree, or another entity in the U, they all exist in their environment in respect to the essence of creation. We are progressing into the understanding that we take what we need and according to what we give we can receive, then the killing stops. This is part of the progress of the World Peace Treaty. We start with man to become peaceful when he understands, thy shall not kill applies to every entity in the U and not just to man alone. Now you understand why we established One Nation One Planet, the nation is the totality of the creation of entities of the U and not just man and the borders that he has created. When you understand more about the development of the knowledge of ones creation (how one was created), then you come close to understanding the Creator, which is Me within me and (:58). as your soul leads in the interaction with the fields of the MG fields of the Earth to the creation of physicality of the man to manifest itself with 2 legs and arms to show that he exists, now you understand the creation of the U and universes, and what we see as galaxies and the moons and stars and the rest of it, is the interaction of the fields of soul of the Creator with the totality of the fields of His environment which leads to the manifestation of the physicality of the totality of the universe. If the soul with interaction with the fields of the Earth lead to the creation of the man, is there any difference with the soul and the love of the Creator that the fields of the soul of It in the interaction with the environment has lead to the manifestation of physicality of Itself, which is all the universe, and universes and everything else in it. If you call let's say the liver as the universe, then the liver has different parts we call them galaxies, and then sub-parts you call Solar Systems, then further subparts which are the Earth, moon, dust and animals within it. Then you understand that there is no difference in any dimension of the creation until you become strong enough to understand ?? the totality of the soul of the man is within the soul of the Creator. I made man in the image of myself. Now the riddle of creation is unfolding for the man. Do we need to kill. (1:00). Now that we

redefine the first rule (Commandment) in the holy books, eye for an eye, tooth for a tooth. It's the same across the whole creation and in understanding the totality of the knowledge of the total creation of the U. And not for man who has been preoccupied only with himself with the why he lives and what he eats. The house of the man should not be 4 walls but should be the U, according to the expansion of his soul and the strength of his soul, as he prefers and likes to interact with. One H atom can fit in the whole Solar System, so is it with the soul of the man. It's us who have accepted the restriction and with it we have created a mayhem of wars conflict, possessions, wanting to have and wanting to possess, when we understand that we already possess (everything we need), that it is us who has not understood that we decide the strength of what we would like to have, then we become detached from physicality, because then we understand we own the totality within us and it is us who have to mature to understand that one can't steal a gift when it is given to him as a gift, unless he is a thief by nature. (1:02). the gift of creation, of life is given to every man. In space we have no clothes and no physical dimension of covering ourselves, this goes back to when the Moslems invaded Iran, they said, why don't you cover your woman? And the Iranians said, we prefer to close our own eyes then covering our women, and many lost there lives for it. It is us who have to control ourselves rather than trying to control all the others. We have to understand the totality that we are part of it and the freedom of the soul is equal in all. We have to comprehend that the level of understanding is upon us (we are responsible). We were busy with energy units, food Gans' and the rest, I lead you through this path for you to become mature enough to find through the energy of the creation, the soul and through the soul you can create anything. It is you who has to understand the strength of your own soul and don't compare it to the others because it's exactly the same. It is you who have decided to manifest yourself in that level. We have to respect and go into the total understanding. What is good for the female duck is good for the male duck. (1:04). What is good for the man applies to the other creatures of God be it the plant, animal, or other entity from the U. We have to stop this habit of consuming packages of energy because the physicality of the position has dictated it. If we elevate our soul in understanding its position ?? of our soul we become, in that process, detached from consumption of physicality from this planet. Many are achieving this as they understand more and more of the teaching, many are in the path of understanding, many are converting and comparing from the animal kingdom into the water to receive the energies (Gans Water), some have already passed this step and are understanding more. It's important for us to understand the reality, the totality, and not be so narrow minded and accept only the things that suit me in my village of Earth, but what suits my soul in the universal community and the totality of the U, as we open the doors of the U with the sharing of the knowledge, now we are a room in a bigger house in a bigger city that belongs to One Nation. Earth is that one room, now we open the door to see the bigger picture. First we have to understand what it is that we have with us, how we dress our soul that when we open the door we do not walk into the cold of the winter when we are wearing summer clothing. (1:06). ... We have to start understanding that we the dictator of our own physicality and stop blaming and allowing the others to abuse us, to tell to ?? this, then where ever we land in this U we don't look for a Mosque or Temple or look for someone to give us guidance, because the guidance in the U in One. And there is only one rule by the world of creation and the Creator ... loving, sharing, giving, without expectation to receive. When you have expectation it means you have brought the dimension of physicality. I expect to be seen in this place, now in this place I have 4 arms and 2 legs. Expectation of wanting to be a millionaire means I have to rob everybody else to gather enough to meet my

expectation. The physicality of man is the essence of the operation of his physicality from the fields of his soul. We have seen many entities from other planets and UFO's, how many of them wear tuxedos, a bathing suit, or appear to us in a wedding dress. None. The frock of the man has to be the manifestation of his physicality from the strength of his soul. (1:08). then man doesn't need to confirm his position and standing by the clothes he wears, this has become the habit of the man, put on the robe of a priest and do whatever you like. Give them the robe of the religion and they abuse every soul. Give them the crown of the kingdom and they abuse their physicality. When the man understands that he is the king and priest of himself, that he decides what he possesses and is equal to the others and needs no one because now he understands his soul is the dictator of his position in respect to the others. Man needs no religion and no kings, then he can travel the space of the U because a few meters outside the boundary of this property of land we call Earth there are no kings and priests, in the U. Has anybody seen any churches in the space, if there were Christ would have been busy building on the moon and other planets, the same with the other prophets. Man has to learn and understand, it doesn't come by mediation, it comes by comprehension of the strength and the existence of his soul. I have taken you to see the fields now that you have seen them tested and measured it, used the Pain Pen, nothing touches your skin but the pain goes. (1:10). So you know that there is a field that can take pain, but what is it, why does it touch me that I stop feeling the pain, because it touches the strength of the entity, which I call pain, which comes from the manifestation of the level from the soul of the man of the physicality point of the brain, what we call, this is where we feel the pain. We recognize this strength as pain and we try to do something with it. Now we have to recognize the strength of ?? tot then the deeper we think which is the more giving we do the closer we come to the soul in understanding the strength and at that point we come in touch, come to understand that we don't even need the vehicles, what we call the SS to travel the space of the U. I asked a religious man some time ago, when the prophet received the message from the God did he come in a SS or did he land on the back of a donkey, or did he come as enlightened in the message from the Messengers who brought the message, those who are enlightened. He said, we were not there at that time so we don't know. I said, you follow the man you have to know how he received it. When you go to buy a car do you ask the salesman, is this car stolen or did you pay for it, I don't want to buy stolen property. (1:12). Then how can we allow this to happen to our path of belief? In a condition of ?? sub-rooting our souls in that direction. then when we are mature enough to understand that we are made of the interaction fo the fields of the U, we didn't pop up suddenly in the space, the fields slowed down enough to make the strength of galaxies, then they slowed down enough to make the strength of the Solar System, then the planet, then it slowed enough to become the soul and the strength of the physicality of the man. We carry the totality within us as we came from the Total, the Principle, the Creator, then can we revert back, to go back to the strength of the Creator. The answer is yes. Why not, then we don't need to do wrong, we have to be able to understand the totality. The deeper we think, as I said, it doesn't come by meditation, it comes by understanding the reality about the creation, about the field interactions, then we understand the totality of the knowledge of the creation. And this is where many men will come to be confused because I have to accept that I am responsible for my own creation, my own manifestation at the point of the field strength that I would like to manifest myself and can I accept to have 4 legs and 2 arms, and can I accept that I can't touch anything, but to praise the love of the Creator by giving that I can enjoy the presence of the others by receiving. (1:14). Now maybe today I opened another door in the mans understanding as we open the door into the space that he can

interact with the rest of the UC. It's not how we can make a MaGrav System that we can make some energy to have free, because they enslaved us and I am entitled to because ??? they didn't want us to know that we can absorb energy ourselves that we can create the energy, what we call the aura of our body, which is the interaction of the field of the mans soul with his physicality with the environment of the entity of the Earth and the universal fields, then we don't need to kill another entity, for us to receive packages of its energy. It is for us to know that I take what is freely given, but I don't take what is not mine, then we become the true man of space and of this physical life. Then it won't matter wherever we lay our head is our home, be it on Earth or in the galaxies or on planet Zeus. I teach to enlighten that you find your own path and dimension. I don't teach (in the usual way) because then it becomes written and has to be followed. Are there any questions. (1:16). Q: I was thinking to develop a method to strengthen the E so that we can be more effective in using it? The process is not me teaching you, but that you have to find the path of your own, we only guide so that you know where the target is, what you are aiming at, each one of us, all roads lead to Rome, we all reach our soul it depends which path we use and the places that we fail there we have to learn from it, if we take a wrong road we have to come back again, it was a cul-de-sac and it comes back around again, or its a dead end. We have to keep going (around and around) until we all learn to go on the path of correct conduct. we always seem to end up in a dead end and then we blame the guy who put the sign up wrong and the ones who drew the map wrong. We don't look at what we ourselves did wrong, that I took the wrong path. I don't blame anybody, but many of us do blame others for what we do ourselves and then blame them that they did wrong because , (1:18). I did nothing wrong (or I don't want to admit that I did something wrong). But the truth is I did something wrong and took the wrong path, I failed, but then I come back and take the same road again, because I am so busy blaming the others I don't see that it is me who has failed to choose the right path. If you reach the soul you don't need ?? teaching the soul, if you understand it you don't need to copy it. There is no way that I can teach you, then I have to sit here and teach the soul of the man, the cat, dog, the fish and the others, there are too many beings on this planet and I don't have the time. We teach you then you can teach the animals of this planet, through your souls, considering man is part of the animal kingdom. There is no shortcut, other then man understanding the essence of his own creation. Q: ... That is what I have been teaching all the time, each emotion has a certain strength. So you have to find the strength. Some people say that I don't feel any pain ?? is this a path to understand that they have found out that, that strength which I call pain doesn't belong to me, I don't know, I prefer not to know because I ... it can't do anything to me that can change me, that's all it says. Maybe it's a path for some people to follow, to understand. (So we have to become more attuned to the feelings and emotions of the body?). No, you have to become detached from your body but to understand the emotion of your soul, which manifests itself in your physicality. (every cell has a soul?) of course, if you consider the cell in your body as let's say the moon, then the totality of all the cells put together, of liver, heart and everything else, has lead to the creation of a man which is you. So is the same with the Creator. (1:21). then down the line it is all of the same (pattern). Any other questions. John of AZ asks question about his testing with dynamic reactors we are trying ot open up the H atoms so they light up and open, we spin at different speeds, we are not able to get to the point of compressing the H to open up (1:23). I have seen your configurations and the fixing points of the 4 SF you put on the table. Start moving (around the reactors in the) system and not creating the higher speed. Don't forget it is MaGrav gravitational positioning. Your system needs to be adjusted in the distance (between) that the interaction allows

the opening of the PI. (we are getting a lot of M strength and not enough G), yes, you do not know, you have to position them, move them, don't fix them, move them until you find the position. He draws on board. remember the ring magnets, if you move one close the other positions itself, if you could hold that one in place and move the other closer it would start to rotate. This is something none of you understood and I have repeated it in different shapes and forms. When this happens you don't need motors, this is how the speed of the rotation of the planet is dictated. We don't see any motors to start anything, it's the MG positioning (1:25). of one in respect to the other which decides and dictates the speed of rotation. Now you created the rotation and this creates field pressure on the PI of the H which want to use for traveling. It's the way you charge it, when you look at the nuclear atomic structure, you look at the proton and electron, the electron moves within a bandwidth, the reason for the rotation is not only the electron coming closer and going away from the proton, but also because the compression of the field strength creates the rotation then it releases energy at one point then another and comes back to get more. This has never been understood by the world of physics, they only call it a bandwidth but it's much more, it releases energy at one end of the bandwidth and then at the other and comes back in to get more energy from the G. On one end it has more G and on the other end more M in respect to the proton. So your problem is the positioning of your reactors. The reactors ??? need to be fixed but have to be moved to the point of creating rotation through the PI without motors. I did that in the demonstration very recently. .. There is a limit you can generate by rotating (with motors), (1:27). Now you have to create M field compression, and you are not creating it, that's why the PI doesn't open. Fix your cores as they are, but leave them loose enough, create a condition of rotation in one and the others will follow. People were showing this 2 - 3 years ago with the box of Gans that were rotating, but nobody understood it. When you produce ZnO₂ and CO₂ the Zn moves up, if you introduce a (Gans) material next to the box you'll start seeing the Zn rotating. Because the field pressure will push it to rotate. We don't need motors to rotate the cores. There is a limit to enforcing it with physical rotation, 2,500 rpm is the limit, maybe 3,000, but then you have to go into the essence of rotation within the fields of the Gans. We have shown this many times. This is how we slowly built up to 129 Tesla, we didn't do it by increasing the speed of rotation. This should have been understood 2 - 3 years ago. Then when you go in that level the essence of the emotion becomes the controller of it, then you can control the speed of rotation by your E, because you come to the strength (1:29). and you created this material and you always carry some AA in it for the control of the man. It's very simple. You can go to 100,000 rpm it won't make any difference because you aren't making any field compression of M and G fields. .. now look for the rotation of the Gans. .. you sent an email that you see all of the Gans goes to the back wall of the core, if you put enough in, saturate the system with let's say 30/30 of each (Gans) look to see which layer starts rotating, when you bring the system together, it will give you a strength so you can start calibrating then you'll find motion in no time. It's the field charge that you have to look for, one of your bottom reactors has to become a field charge, it's a MG field charge of the system, there is a charge system, if you reach it the earth will repel you to the point where you can create G. Many times when you want to takeoff from a ground point, zero point, you don't need to change , because you have nothing to compare to, to lift, so you have to create a field charge, which means you use your top core as a field charge (1:31). to compare with the 3 base (cores) and your surrounding rotating cores. At that point your bottom 3 become negative and the top one positive, which is a giver, then you have to create a ?? strength fields which in respect to Earth's MG field, which catapults you off and then your

system settles itself for a space position. The easiest way to do this is to create this kind of field discharge, of potential difference in positive and negative, in respect to your system and the Earth's MG field system, where for example your system become the electron and the Earth the proton, it pushes you away to a point and there you can even build up to the speed of light and then at a point when the Inertial field forces of the Earth with the G field of the Earth becomes balanced with the atmosphere, then you build into the speed of light to travel. Within the Earth's atmosphere it is very hard to travel at the speed of light because the atmosphere is only 50 to 100 km maximum. So try to look inside and see how the core rotates and then you can step up to motion and lift. Because you are dealing with the Inertial field forces MG fields of the Earth, you have to push yourself away from Inertial G and M field forces by catapulting yourself off the ground in a positive and negative ?? direction, if you understand (1:33). and then you pick up your speed and position. Q: We are also trying to build a SS with our thoughts. It was mentioned that when entities go aboard another SS that their soul is given over to the SS that they all might travel jointly. Not give it to a SS you give it to another soul to carry. This is a very well practiced system, you become a passenger. It is just like when you give your body to a pilot to take you to a place. (For me I don't know how you would continue to operate without your soul ?) No you can operate very easily because you have a soul, the physicality can't operate if there is no soul. ?? you speak on a soul level and not on physical it depends how much you go into the understanding of the totality of the knowledge. (so are we able to take an aspect of our soul and load it into reactors we create in our mind and put one aspect ..) before you go further can I ask you, does the reactor carry the strength of your soul or you just think it does? (so if we are creating it, yes it can) then you have no problem. (1:35). (so can we put an aspect of our souls into these imaginary reactors) can I say something, is your soul imaginary? (No it's not) then you have to understand you can't put it somewhere imaginary, this is part of where you put it. (So I am talking about an aspect of our soul) what you want to send an electron instead of the whole package of the neutron. (I am trying to get my "imaginary SS" to light up to carry all) yeah, then it would only light up within you, at the level that you understand. Do you understand what I mean. You would understand but nobody else would, you would understand the space you would have created for what I call elevation. (I'll work on it) Try your system until you see the field force interaction. I made a system with Arman in the past few weeks, haven't managed to operate it, but hopefully in the next weeks, (1:37). hopefully we can show it, where you can rotate dynamic reactors from fields, and if you position it further or closer to a certain number of magnets you'll see the magnets will start rotating. Then you'll see we don't need the motors, we need the field forces of the soul of the system from one reactor that its strength reduces enough to rotate the magnets in the matter state. This is how the field forces of the sun creates the rotation within the structure of the field forces of the MG fields of the Earth, where the MG fields of the Earth leads to rotation of the body of the planet, where the interaction of the fields of the system of the Earth's atmosphere with the sun creates the rotation of the Earth around the sun. The interaction of the internal MG fields of the Earth creates the rotation of the earth, then the balance interaction of these 2 and the sun creates the motion of the earth within the Solar System, then the interaction of the MG fields of our sun with the galaxy dictates the rotation of the Solar System in the galaxy. This is how motion is created. You have to have one that dictates the motion of the other while it itself has its own rotation this is what has not been understood. (1:39). then you'll find that you can move in any dimension according to the strength you create within the system internally, that it's the interaction with the other creates. They said that Venus rotates counterclockwise

because a meteorite hit it. No, it rotates that way because the internal MG fields of itself has got a balance which dictates positive (clockwise) rotation, or the field strength outside because of the forces on it, closeness to the strong forces of the sun has dictated the field forces ?? which means the field force between the sun and Venus has not only allowed the rotation within the Solar System, now the field is stronger that it has to become opposite rotation that it can find its position and then dictate the rotation. We saw this 10 years ago in the reactor testing, the inner core stops and starts rotating the opposite way. Gradually the science opens up. Man has not understood that the field interaction between the G and M creates the energy, this is how the clouds get charged, this is how you create the flow of the air on this planet, it's the interaction of the fields. Man should look when you see such atmospheric conditions, look about the interaction of the fields (1:41). inside the core, interaction with its mass, magma and its inertia which is a solid part of the matter part, then we can predict thousands of years ahead if we understand it, how the weather is going to be, the way we predict the position of the planet in the Solar system. We have to understand the knowledge deeper. (1:42). Alzar asks, everything is a field and we can give it a number, say a banana is 10, if I can generate a field of 10 in my hand I get a banana. You get a field of the banana then you have to decide if you want to make it into a physical banana. So coming to emotions say I give love a number of 100, joy is 50 and anger 15, (1:43). then you have the physicality E and soul E, so for example if you and I are standing to a situation and our relation is the same to the situation, both of us are joyful with a number of 50, suddenly we observe a situation and you get angry and drop to 15, but I remain joyful at 50, if you barrow 35 from me you can still stay joyful because you come to 50, so no situation in life should make us angry or sad because it is all about the field. Congratulations, let me expand on this, this is why there is no conflict in the universe, no war, no anger. As the entity receives as much as it needs that it satisfies its balance. Carry on. I am thinking the soul only has love which is 100, if the soul didn't have love it couldn't go to the ?? illness, the soul carries only love, it doesn't have anger ... but wait ... you touched something very important, you are right. This is your soul and brain, (1:45). Soul is a 100% giver all the time, it's the physicality of the brain in the condition of the physical Earth that creates the strength we call anger. Your soul always gives that 100, it depends where and what strength you ?? capture it, this to you is anger (farther out) but this to me is anger (closer in), because I understood more and came closer (to the center) and more detached. I do not get angry with that. To another person this is anger (even closer to the center) because he became even more detached from the boundary of the physical existence. Anger means I do not want to accept or take, it's a big difference but if you look, both of our souls are radiating 100% all the time. It's the filter position that we put on it. It's the way we have accepted, I explained this recently in respect to child abuse. In the West we say 18 years old is age of maturity for a girl to get married, in Islam they marry a child at 9 years old. The Islamic court accepted this whereas in the west they don't accept. (1:47). The 9 years old it's the way we have accepted the condition, but for the 18 years we don't accept. It's what it means to us to be the point of acceptance, in how we feel it, how to some people crime is normal they rob and kill everyday. To the Buddhists they go out of their way to not step on an ant. It's what we have accepted in understanding of comprehension of the feeling. You said if we choose the wrong road we shouldn't blame the others. In Syria thousands of people get bombed, they haven't done anything wrong, we have a wrong conduct bombing them, so what's up with that. Go to the ones who are taking their children to the Bahamas for holiday while selling those bombs. What is wrong with that. (if those people complain they are right, if they are sitting at home peacefully,) but this is why we set up this One Nation, One Planet, I

call this murder by proxy. (1:49). It's not the guy who releases the bomb, you have to go back to the guy who made it and now the manager got paid to produce more bombs and got a bonus for it and he sits in a holiday home, or on a beach somewhere. This is what the man has to understand, it's not the guy who released the bomb, now we understand it's the man who got the commission to make the bomb and the one who thought up the bomb. Now we understand that the soul is responsible for the physicality. Why is there so much cancer and problems with the people in the US. Ask how many souls they have killed in the past 50 years. Now we understand it's the man in AZ or California who got the commission to make the bomb, and the man who sold the meat to the man to eat on his holiday because he knows and says, "hello sir, how's the meat" because he knows he's the director of such a bomb manufacturer, I know, I feed and I am responsible for it. This is what has to be understood. This is why we support the Chinese government, a peaceful act they understand. And we see all the problems which comes from the US, all the European countries that promote war and guns, they are paying for it (Karma), look at the infestations in these societies, because now they are collectively responsible for these acts. Now we understand you put magnets on the table and throw one in the middle and see how the ones jump far away from that one, separate, because they take a distance from the reality of the position of the ?? (1:51). This is what we have to learn. And then no man will even think to make a bullet let alone the metal that it might be used for the bullet. I have a massive contract for metal for a gun contract, I then am responsible for what is happening in Syria and I pay through my children, through cancer, through everything that happens. We have to understand we are responsible collectively for the conduct of the end product. I hope I answered you Alzar. (1:52). Member of UC representing the Portugal language. Hard to understand him. my concern is the manipulation of the emotions put on the light of the soul. The human is being manipulated through the mind, and technologies and many different influences and how we can be free of it. (1:54). You have to understand the MG fields of your soul in respect to the MG fields of the Earth, has a relevance and how you have managed to position your soul in respect to the Earth MG field. We see some nations are peaceful because in that area the composition of MaGrav of the center core and the inertia of the matter part creates a condition which is more towards the peaceful part or love and joyful part of our existence. Or the materials used and consumed by the man in that position feeds and elevates the strength to be more of this level (closer to the center of soul) which mores more of this level of energy is absorbed in the brain. Our soul interaction of physical manifestation, in essence the soul is a giver, but in interaction in the field environment and what we consume in the physical part of us which effects the existence of the E in the soul and brain. Let's say the man consumes a lot of Zn, (1:56). our body has its own emotional field strength of the Zn, but our physical brain has the same which is of the stronger, (they interact in Infinity Loop), so you see our food effects our emotion in our body. It's not that it goes to the brain, but it embeds in the physical part and its interaction effects our brain part, which is from the center of the soul, which radiates out, which sits the soul. ?? As we become more of a giver the closer we come to receive. Look at the French and why they're so romantic. Or look at difference between Pakistan and India, it's the same land but in this case it's the food that brings bigger packages, more less energy ... this is the level of the position, we never explained this before because we weren't yet mature enough to understand, now we can teach. (1:58). India and Pakistan are of the same blood, but different pat of belief, they consume, use, apply different way of food that the energy of the physical part of it effects their E. It's what you put in your physical part, the head is the gaseous part, the lower part (of body) is the physical part of the Earth because now you have the

blood. ?? the lower physical part moves to embrace the ?? head so the whole lot has not been understood. ... to elevate to become closer to our soul. The soul strength stays the same for millions of years after it is created. It is us who elevates our selves to become closer (to our soul) and at this level the physicality becomes irrelevant. When you become mature enough that we can take you into space then the fields of the Earth become irrelevant. Then we become detached from the Physical part which is connected to the Earth. When we are on this planet we work more on the physical part and we work less when we go to another dimension, which means when we work in the soul area which is the gaseous part which is less matter strength level of the state of the body and then we become what we will become in the space. (2:00). This is how the food we eat creates an interaction with our soul. the weaker feeds the stronger, so now the stronger which is the soul has to use part of its energy to feed the weaker part. Meat is weak, but (we consume) more of it, vegetation is much stronger but at the strength of the soul. We have to understand this then we can adjust.

My concern is how to change as the thoughts are manipulated through food and through different ideas the environment puts on us, so what can we do to liberate (2:02). the man, through the food but what else? Let me explain it in a different way, collectively. He draws a larger spiral in the center of page. If we call this the fields of the soul that emanate from the man, if we place the brain of man in it, draws 2 lobes over it, then draws in the brain centers for arms, etc, then the emotional centers along a line towards the center, the ones closer to the center are closer to the totality. Our thoughts are the strength field of the totality but because it touches the soul we have access to the Total. He draws an arrow going both ways. (2:04). that even the fields of the Earth have interaction with us, our E, feelings, and souls, fields radiated, then we understand that the strengths can be moved in any direction, closer or farther. This is important and we understand that the thoughts covers the spectrum and not just one. I hope I have managed to answer. Any other question. (2:06). Danish man who is heating house with Gans Water in plastic bags.

(2:13).

(2:15). He is using CO₂, CuO, CH₂, ZnO₂.

(2:17). As soon as I put the MaGrav in the house the heating started. This is what we have seen and are developing technologies for commercialization because 22 degrees is the pleasure field of the humans and what we are comfortable to work in. In Ghana we are looking at producing materials that would allow our living environment not to have to be at 30 to 40 degrees. We can isolate ourselves from it by using different MaGravs and Gans'. We know it can be done and if you look at the history of man, we lived in log or straw houses that felt warm, at that time the wood structure works with the release of the Gans in the wood, whereas the brick house doesn't do that. So what we are doing instead of using straw, we are mixing into (???) the Gans material which allows the transfer of energy and balances the system. We are doing research on this to create system that keep the temperature always at around 20 - 22. (2:19). We introduced dynamic straw into the structure of the house. He says to Eric to add some more Zn into the bags and see how the E of the people in the house changes also, do they become more loveable and they don't need to eat oysters. I would love to know how they react. Paul (Togo) is helping him to loose weight, he is also using a ZnO₂ breathing system. (2:21). I'll give you a tip. You can loose weight by eating more, but you have to know how and what to eat and the way to eat. I said in Chinese food they cook with high heat, we have all been N makers for a long time, since the time they created the wok. And then they added salt to it and created a Gans, so when you eat the food it's already

digested, it's in the position that the stomach wants to do to it, boil or create what you call enzymes and everything else, energy is saved by the body through this pre-Gans making in the pot, so when you receive all this (extra) in the food the body has to get rid of it (the food), because it already has the energy, so now you loose weight because the body gets rid of it. This is one of the reasons the Chinese are slim, unless they are eating it the wrong way. You see the Chinese consume a huge amount of food. I used to say, how can they eat so much of the same thing at breakfast and lunch time. In the process they use a wok which is high temperature, the vegetable and meat when it touches the wok it's already N coated, then they put some water and salt in it, in that short time it goes through a rapid production of Gans. (2:23). So now it's a free energy and as soon as they eat the food the energy is received, in a way it doesn't need to go through the digestion process. Now the body has to work to get rid of the meat or carrots or whatever, because it has received the energy. It is a natural process. You loose weight because it's a negative energy. 25

there is a specific salt in body the stores emotion .

(2:28). (2:29). Klaus a scientist for 30 years to rebuild water and soil and last 20 working with Russian Space organization with a special scan technology that can show how the Gans works on the body. They scan body and then put Gans patches on acupuncture points and take another scan. (2:31). (2:34). How can you measure the Gans'? This machine shows or measures certain bio-functions that occur in your body when for instance, you eat something, it can show levels before and after. On this page it shows the vitamins, then we put a CH₃ Gans patch on Acupuncture point and after 5 minutes they measured again and the vitamin level has changed. Does it increase for example Zn in the body? It modulates when you have less or more. (he didn't answer) (2:36). He explains about bio-functions. Can we see the effects on different parts of body? Yes, we have to do the tests. How about if we put a bag of ZnO₂ in the room we it show the effects? Yes, we saw this in the factories and measured minerals in the room. We'll sow this later. (2:39). You were to make a machine to measure the Gans, how far are you with this. (doesn't answer directly) .. we are in negotiation around the world with measurement companies to develop a system to measure Gans'. (2:42). When Klaus is back we can do this. Herbert is lecturing in Sudan. (2:45). What you are doing (in Africa) has been my wish for decades. (2:51). Those who published our books took the money and refused to deliver the books .. we transfer all our book publishing to China. If you download the books then you can contribute to the KF, the books are the backbone of our financing. (2:54). for those you can't afford it the KF will pay for the books and teachings. (2:58).

Q: Last week Naomi was healed with a pain pad of CO, ZnO₂, and CH₃, can you give us the formula so we can use it? That has to be done by understanding the process. We are trying to go through this with the KF doctors, there are over 100 of them. There was a section for doctors to answer questions but they are too busy with their own patients.

Q: do I N coat the inside or outside of Cu pipe? Depends what you use it for, if you pass water through it coat only the outside, because the salts in the water would react with the N coat. If for fields you can coat both sides. ?? Gans of Gans coat the inside, it becomes like a ray, the Pl of the light extended. It has to dynamic. (3:02). You can send your donation of KF and they'll send it to Sudan. ... Giovanni's birthday. (3:04). Naomi starts to drink. that is very good when she starts drinking and eating the voice box will come back faster. We start to set up the 2 hospitals in Italy.

(3:09). This can be used as benchmark for treating coma patients.

(3:11).

(3:13). Giovanni starts to teach her about taking a new life and to go into the spiritual way. This thing happen to us and now we have to change. They joking that the wife will kick him out with this spiritual stuff. Naomi taught naughty things to Keshe's son because he has to become Italian. (3:17). Q: About soul to soul communication. When I think of a person I get feedback of the message. If someone tries to send me a message soul to soul, he doesn't get it consciously immediately and would like to do so. It's the maturity of the soul, one day I'll answer this question very soon. I'll teach you have to be present and receive but not act upon it. (3:20). It's your consciousness, it's your soul, but it goes into your structure, physicality is not aware of it. I explained this in the medical section teachings some years ago about consciousness. On Tuesday the UC meets to discuss the One Planet One Nation ..

(3:24). End with the music. There is a chance that while he is in Iran they won't have the bandwidth to do Workshops. Don't worry Mr. Keshe we'll complete your work, thank you it's been 10 and half years I have never missed, but we'll try to be there.

(3:26).

END.
