

## 187th Knowledge Seekers Workshop, Thursday, August 31, 2017

( , , , They ask Arman how he found his soul, he doesn't answer but says use the headphone and you hear the music not from your ears but a point in your head, )

(:11). ... we are responsible for what we do and no need to be afraid, now we know that the soul is the creator of physicality and physicality is responsible for the elevation of his own soul. Up to now man converted matter into energy, 13 25

(:15).

(:21).

(:26). ... it makes one understanding the art of life in the U. I give my life for the others to live. If we every understood in the life of Christ is the true meaning of life. Sacrificing and giving from ones life that the others may survive and flourish. Then it puts a question, was there ever a Christ or we change the name to the rest of man to love to the name of Christ. Then it changes a lot of things for a lot of us, it brings a new meaning, do we all want to be the same as the one who has been so generous. Why we choose these ways of elevating our souls is because we have always been frightened of confirming the existence of the soul within us, and this has brought us a lot of changes and in time will bring more changes because as we come to understand more we realize that we understand very little of the totality. My wish is my command, and my wish is peace on this planet and to unify the souls on this planet ?? and in so many ways we have achieved it, numbers don't count it is the strength of those who believe that the change has come, it will now grow and flourish in what we call a unifying peace force has been established. I think it is time to listen to the UC, we have allocated this morning one hour to each council in trying to explain and bring the discussion on the table to see how we can move on. (:28). how we can establish One Nation group of government, that there shall be no more war. My mission is to create the condition favorable for peace and for the world leaders to accept that this is the path of peace. We have to understand one thing that all this killing and wars over the past thousands of years has brought nothing but degradation to the soul of man. Let us go back on the track and go the way the whole U goes, which means we become the unconditional givers and not looking how it will benefit me, rather how can I benefit the others by sacrificing my own time and that by giving more I receive more to be able to give more. I close (my time) in this morning session because I think it's time to see the fruits of some 10 years of teaching, of the first blossoms of peace established through the UC and EC, maybe now we see the real process of peace. We step down and leave the 2 councils to explain their position and to bring you in to become part of it. Don't forget every member of this planet is a member of the council, it's just how much you want to serve to be heard through your action and soul, ?? thank you very much. (:30). Bengali language representative speaks from the UC. He talks about when the British invaded India ...

(:36). The Mogul's invaded to bring the Islam and Hindu cultures together. It was done by force they brought their armies, but they had a different intentions. As a result it created certain unities, medical, cuisine, and the bhakti movement and its poetry. So in a way that was successful. But yes there are some who are creating divisions but still the unity contributed to the Indian culture. (:40). Unlike the things stored in the British Museum there was a positive intention behind the Mogul invasion. The military in India serve the nation out of love and responsibility for the country. So with One Nation the

Military can still serve with love and responsibility for the people they serve, much like all of us can do wherever we are. As they serve with love so we can also serve One Nation wherever we are. And there is no border to defend because what we are defending is our love and responsibility and not the border. We can start doing it locally by sending our wishes to those who would participate ... (:43). We can also do it through conduct as KF members, we can use conduct as language, because that is how we will do it as we move beyond this planet. ... we can use the devices but it is much more than that.

(:51). Gatoah from Kenya. (1:02). Paul from Togo. Jalal from Iraq. (1:23). Portuguese.

(1:42). Lisa Australia. Mr. Keshe has taught us about the N materials and Plasma and how it connects to the soul but a lot of people don't get the connection. Wisdom comes when we learn from our experiences. .. We gain from everyone's experience on this planet, this is what Mr. Keshe does, he asks them something and listens, and he gains from that persons knowledge, and this is how we are going to help ourselves enlighten ourselves because only we can do it. He has given us all the tools and the way so now we have to do it. We have to start putting it together. (1:45). We have to do the work. ...

(1:52). I agree with all you say it's a beautiful message.

(2:10).

(2:16).

(2:31).

(3:05).

(3:46). Rick talks about devotional service to their Guru or Catholic Church.

(3:55). Armen speaks. A lot of beautiful talks but how to simplify things. ... Anybody wants to ask a question. (3:58). Q: Can you explain how to find and use your soul. I can't guess how you can find your soul, I've had that question many times. You have to find it yourself. You can use the stereo headphone method the Mr. Keshe taught. You are asking me how to find your soul, I don't know, but I found mine a long time ago. Okay tell us how you found yours. I'm not going to answer that question, everybody has to find their soul their own way. (4:00). You can use the headphones. You are not going to hear the music from your ears, but there is a point in your head you are going to hear it from, that is the position of your soul. (4:02). He shows a brain scan from the bottom, there is a dark point, this is where your soul sits, it's the empty space that you see is where the fields are holding in. He shows another one with a with dot in middle. When you put the headphones on this is where you hear it from and not the ears, I have done it many times. (4:04). Q: About H, Deuterium and Tritium. Armen draws a CO<sub>2</sub> box, consider what kind of elements you have around, Cu, Zn, C and CH bond, CO<sub>2</sub> in air, you are creating a magnet for C between the plates you attract it from the air, and the C in plastic CH bond. (4:06). This is why you have created so many Gans' under it on the bottom which are near the C fit. If you create CH<sub>3</sub> and put it in a box that has no C connection, (put it in the CO<sub>2</sub> box) and then you close the top, you still create a field of C and that draws the C out of the CH<sub>3</sub> and H<sub>3</sub> is left. Now you are dealing with the fields which are different, and then create a magnet of the fields. Since the environment (in the CO<sub>2</sub> box is closed it doesn't bring anything from outside, so you absorb the field of the C still in the salt water so a field of pure H<sub>3</sub> is left, but only a field. Now if you add in a tank H or even O, you create atomic H<sub>2</sub>, ??? not in this box but in your CH<sub>3</sub> box where you put your mesh, iron, and N coated material. ??? you are creating a magnet so atomic H converts to H field only. out of the fields you create matter, if you have 2 matters they interact, out of the interaction of the 2 matters you create a field of the material. We did this with a CO<sub>2</sub> and CH<sub>3</sub> Boxes and Zn Box (4:09). and the rest

that we create. If we put 2 Zn plates one N coated and one non-N coated, you'll create in between a Zn field, then each Gans carry individual Zn field. The only thing you have to remember is that H is acidic, a giver. Q: You showed us how to create Tritium, now can you show Deuterium, CH<sub>3</sub> can also be written as CH-D, How to create just H. (4:12). Do you remember the Coke bottle. Just create an environment of a gas of H. You can use a fish tank, then you don't have C in the environment. Matter is created from the fields, you have the sun and earth then the fields are converted to matter. The box is the creation of the fields, that's why you put 2 plates, if you put a Coke bottle in it you are dislocating the C in the bottle then the H releases. (4:15). You create the magnet of the C that's why you absorb it. Q: I was creating CO<sub>2</sub> Gans and it turned into greenish bluish and the N Cu turned back into Cu color, Did I create a CO<sub>2</sub>Gans. It has residual CO<sub>2</sub> in it but it's now back to Cu, because your N coating is not correctly done or I don't know how you created your box, it happens something you created a C field. You create a flow between the plates one is in a high N state and one in a lower or matter state. If our Earth were a little different when it began its journey it would have absorbed totally different materials. (4:18). Q: How can we create these states in our body instead of outside it? Have an understanding then a wish then you create the rest. If you hold your palms together then they can be like 2 plates. ?? it's your soul .. it's a little bit early to go to that, but you have to understand what kind of interaction and field you can get. We can learn to do that with our soul, learn to believe that we can do that. Q: Does that mean your body is the salt condition? Definitely, you carry 12 salts, our salinity is near to the earth's salinity. Rick, we all know about the saline solution they give in the hospital for shock to your blood. (4:20). You can't convert a matter without salt. Q: Is the Coke bottle empty, no filled with caustic solution. (4:24). What color is the ?? .... sometimes it's yellowish or sometimes reddish it depends on the environment you create. Does it depend on how much time? no, it's an instant transfers, it's a Pl. If you create the magnet of C it will be extracted, you don't have to wait for it. John's experiment took 2 weeks to create. (4:29). Q: Should the box be N coated to insulate it from the outside. If for Gans making, ??? I always use boxes that I already N coated. (4:32). How do I clean the N coating? Use Sonic (cleaner) ?? use distilled water and multiple washings then use Sonic. Remember your plate is still carrying a caustic field, NaOH. How to make matter in a static state. .. can answer how to make matter from the fields next time. (4:38).  
END
