

189th Knowledge Seekers Workshop Thursday September 14th, 2017

(Wayne moves to the Earth council and tells his experiences in the Vietnam war and some of his life story, Man is passive and doesn't look deeply into his existence, why did we decide to have a bone structure, Each entity manifests itself in respect to its strength of soul, the solar system is an entity, When we detach from this planet we can control how we manifest ourselves through our souls and we can change our physicality here before going into space, Not everyone on this planet wants to change, We need to measure the strength of the field of what we call power, The Day of Judgment and Messiah come when each man understands and knows the strength and power of his own soul, Whether to kill to protect ones family, have 2 choices to face it with your soul or go away from it ,)

(:10). (:12). Mary Woo stepped down from the EC. (:14). Wayne moves from the UC to the EC for North America.

(:26). (:28).He tells his story of being in the Vietnam War as a child and refugee and to the US. and what he learned from war and suffering ... this moment is the best moment of life. (:43). ... most members of the EC are people from one continent and were forced to another due to circumstance, the brutality of wars for the greed of the man. ... man's awareness of the injustices and understanding and wanting to change. The science of the emotion and understanding the feeling comes from within the man, with his understanding and observing the injustices of incorrect conduct, no one can understand or appreciate these (experiences) unless you have been through it. When we see the people who cause these kind of injustices (:45). who insight wars, their soul is not at peace, many names can mention as the cause of war for their own satisfaction of ego. The war is not just with the gun but can be in any shape or form. This is the target of where we are headed to change the course and this is why we exchange knowledge for peace. The knowledge to bring peace to your E through the knowledge of the work of the PI, bringing peace to the planet through disarming through new knowledge. The armies who have no sense to exist. The KF work is heavily getting support from the different governments and organizations in the background, and in due course to support them to stand up in supporting the ethos of the KF. There are those who would love to be a part of it but are scared of committing their nations to it. My advice to you is to sign the Peace Treaty and commit your nations, the rest is the fear that doesn't exist. We'll start teaching more in depth about the knowledge of the PI. (:47). and in ?? reality the PI of the soul of the man. As we go deeper and deeper the teaching become very small (short) in teaching, because for example, last weeks teaching, not many people understood the depth of the knowledge. The deep knowledge comes in short bursts because it man a long time to even grasp the depths of what is being said. It is for us to make that difference and it doesn't come by one or two steps In the coming time we'll sow how the steps are gathered together to be able to complete the process of peace. The EC and UC job now is to write the books (of peace), ... it will touch every language on this planet. Is there anyone from the Councils who would like to enlighten us. (:49). Caroline speaks. 50 30

(:56).

(1:01).

(1:07).

(1:09). Not to get carried away with the emotions but have a solid base. I taught first the science of the plasma. Everything can be put on the table and scientifically and that this time peace comes to of understanding and not out of sentimentality. It has taken

years to do this, but as I said many times, the date, time and place was set thousands of years ago. As like when a man wants to make something he knows he needs so many days and hours to cook it out, it will not be there the minute you put everything in. The progress of the understanding and the enhancement of the soul of the life of any entity has a duration, it is known, it's like a painting, every color has to come on the canvas that the beauty of the final picture is seen (1:11). that it can be appreciated. the human race has been traveling down this path for a long time, different pieces and colors of the canvas of the life of this planet have been added and now more or less it is time to put this canvas in maturing the soul of the man in the future getting completed next to the canvas of the UC. Then you become a piece in the jigsaw which completes more and brings beauty to the totality. We have to understand the process and where the knowledge comes from and how we are connected in a very strange way. Let's polish the knowledge so you can see how you are all connected. the magnets you see on the table, they all have a connection to the board, which is the Earth and the magnets men. (they organize the magnets) if you imagine these magnets to be the soul of the man and the table to be the planet. Part of the fields of this soul in attaching to the planet has dictated its position of distance, 2 cm because the soul is still attached to physicality and is connected through the fields. You look at the white table as just a table, I don't look at it that way, (1:15). I look at the white table as a combination of M fields that my and the other souls shares with it, and that creates closeness and compactness, because we are all connected to this planet, this is the way it absorbs us and holds on to us, not only because our physicality is connected to it, but the MG fields of the atoms in that table are connected to our souls also which is the Earth. You see the surface of the ring magnet that is stuck to the table, if you calculate the area of that ring, it's the amount of attachment of the man to physicality of the planet. If you place the ring magnet on its side and reduce its attachment to the table, when you bring another magnet near it the distance to effect it has changed. (1:17). Now the distance is bigger and there is less attachment to physicality, earth. It moved to 4 cm but its still connected to this planet. This is our soul, physicality which is attached to it. If you remove that soul from its attachment to physicality which is the earth. (1:19). As you move the second one up into the air the distance further increases. If the magnet are off the table the distance increases drastically because there is no more attachment to the table or the earth. This is like how our soul works when we are detached from physicality in a different dimension. This is in the matter state, but if you look at the hollow ring in the center that is the soul and the ring is the physicality. There is so much energy in the center that dictates the strength of the physicality of the ring. the master energy sits in the center of the ring and not on the matter state of the ring, that's where the soul of the man is, that's where so much energy is absorbed or given that gives the dimension of the physicality to what it needs to be. These are symbolic but in fact they are not far from the truth, if you bring (1:21). more or less, weaker or stronger magnets they all have fields to interact we dictate the position and what we would like to give. the soul has a given strength which at that point, let's say the earth from the sun, or a given position in the brain from the soul, creates the property, the effect, the manifestation of the earth. The same ray in a different strength but further away from this planet creates the manifestation of Saturn or Jupiter. The biggest thing for us to understand is where the fields from the strength of our emotion dictates the manifestation of physicality of us in the dimension of existence. I'll go back to an earlier teaching, it will bring those who understand the science of the life in the U closer to understanding the creation. **Man is passive and he doesn't look deep enough into the reality of the existence. In our teaching we all understand for the first time that we are created out of the AA**

which is the gaseous part of this planet. There is a very strange phenomena, (1:23). how did some of us decide to have a bone structure with arms and legs, and others decided to have a mixture of bones and muscles, others decided in the conversion to have no bone structure, some decided on thicker bones to walk on the flat land, some decided to have very thin bones like a fish to swim, why and what state of the soul has created the desire of manifestation even though we all came from the same AA. I put this question to the Agriculture section but I saw that they weren't able to understand it the way I intended. Where is the soul of a tree that it manifests itself in the physicality of the tree. We chop the branches and leaves but it still survives, if we accidentally chop a finger of a man he still survives like a tree, (1:25). but where is the soul of a plant. Then this will teach us how in the space we have to learn not to just look at the physicality but the essence of the creation. How come man keep his soul above but puts his arms and legs down to be connected to the planet. But how come a tree embeds its soul in the planet but its legs and arms are directed away from the planet, exactly opposite to the humans and animals. Is it the attachment to the planet that dictates this or is it the reality that the soul conditions itself to the condition of the manifestation of the fields within the planet according to what it needs to be absorbed. Then we have to ask ourselves a major question, in the science of the deep space where do we look for the soul of the entity, in the root of the tree or the head of the being? If we look into the physicality of the plants life we see the same, the trees are like the human body with bone structure and they stand up, the scrubs are like fish, herbs and other vegetation (1:27). are like the worms and have chosen no skeleton as such. Then we have to understand what is the function of the soul in the manifestation of the entity in the structure of the U. Why has this planet appear in the physicality that it has in such a position in the structure of this solar system, where the soul is the sun and if you look these planets and moons are literally like the fingers, arms, and legs, which from outside man has not had the knowledge to look inside this, the solar system shows an entity of being. Our physical structure as a sun, as a solar system, is not what you think, the shape of an egg, it has a feature that is according to what it has inside it. "I made man in the image of Myself." When we see arms and legs, trunks of trees and branches, fish with gills and flippers, and everything else, **it shows the manifestation of physicality in respect to the strength of the soul of the entity which is the sun. When man moves into space and looks at the totality of the fields of this solar system, we'll see a creature.** (1:29). We see an entity with the totality of the length and the strength of his fields. Do we look for the soul of the planet or do we judge it by the manifestation of its physicality. We have kidneys, heart, liver, but we don't stick our head inside another's head to see what's inside it, we judge it by how it looks from outside and this is what the scientific world and cosmology haven't yet understood. In time we'll look at the structure of manifestation of the entity of the planet or star before we reach it, it's like the soul of the man dictating about its finger shape, color etc. There is no difference in the world of the creation, it's only man who has made this restriction according to his own intelligence and understanding of the intellect of the creation. (the magnets Rick is moving around on the screen), if we would have put a iron dust on the board and move the magnets we would have seen how the fields are changed as it moves. Some of the fields stand up, go down, some spread and others take shape, and this is exactly how it is with the structure of our life. How do we plan it and structure it, (1:31). **now that we have detached ourselves (from it), we are gaining the knowledge to detach ourselves from this planet.** But how much are we still a part of the structure of this planet, this is part of what we need to understand and it's part of what in the totality we haven't understood. "I made man in the image of Myself." **Now that we can control**

our own soul and understand that what we put into it we get out of it. What image would we like to be seen by the others in respect to our soul. This is the game changer for humanity, we always blamed and looked for the God to solve it for us, now we are the creator of our own soul, and how would we like to be seen, now it's us who decides, and not for us to blame. We don't need to be preachers but merely to understand the creation and that we are part of this creation and from now on as we go into deep space and decide how we are going to manifest ourselves according to the conditions of where we arrive. Now that we have managed to come to this point of intellect, why don't we strive make the change here before we go. (1:33). before we open the space for man, and see what these changes bring for us, would all of us like to blond and blue eyes or black and brown hair, would we all like to be Chinese or whatever race or chosen creed we have chosen to ?? ourselves, or can we change from a Chinese to a black man in Africa with the flick of a finger. In many ways yes we can, it's just a lack of trust in ourselves or the way we have manifested ourselves in our physicality that has changed us, otherwise we have all this in our hands. If we can do it outside then why can't we do it inside, or have we found a way of abusing the others from what we are doing inside, outside knowing that we can't abuse knowing that the book is open. This is the mystery that man has to solve himself. If you are going to be looking different in deep space and as we are all born in different areas and have taken different shapes and colors, which means is it our soul which dictates our condition then why don't we do it now. Why don't we choose the path of peace and become one race. (1:35). Their are no coincidences in the life of the man on this planet, so it s the same in the life of eh KF, it isn't a coincidence that we get Wayne as a member of the EC at such a crucial point. In the coming time we'll understand the reason. I know the reason and I was thinking about this 3 weeks ago, that in the choice of the EC there is a problem. I could see it, but I couldn't do anything with it because as a member of the EC we (I) couldn't interfere, and we saw the change in less then 10 days and it clicked in me, that is what I was thinking about to wish, and now the change is there. Because by knowing the need and what is to come, and what we have negotiated the position of a soul like Wayne's becomes very key to peace. When 3 or 4 members of the councils sit together to negotiate with world leaders collectively we speak from strength and knowledge. (1:37). This is important to all of us and for the negotiations for peace, because together we can make that change. 30

(1:39).

(1:43).

(1:48).

... Alzar long talk ... (1:54). if a man (who makes furniture) is already peaceful in his life and you knock on his door what would you tell him, detach from physicality? Very easy, what have you taught him, because by going to his door you haven't taught him anything, but you (yourself) have understood more. He has to understand that there is another position, dimension, then you give him the choice of what he can do, because to him that is all he knows, you haven't educated him. ??? that's all he has known up to now, but if you enlighten him about his soul, would he make the same furniture or change the furniture he makes that he embeds the soul of the wood in it. The Knowledge Seekers are so concentrated on trying to achieve lift and motion, (1:56).

that in the whole process they have forgotten the ethos of the work, can I have your blessing to be able to see the pleasure of ?? life, the whole target for them is just to see it fly. (It's time to show the flight system developed by them, I am just guiding). The one thing I do not see is the blessing of soul to the system, I give you my knowledge so that I see the beauty of the flight. You can't make a butcher out of a carpenter unless you teach him to be a butcher, how to do. ... to do the things you have to be taught ... **you have to inspire a carpenter about the soul of the wood, not his own soul otherwise he creates a different thing.** Or would he ever touch a piece of wood because now he understands that it is an entity. Or if he respected (the wood) he would think, what would you like me to show you as. It is a different way to look. Then you'll find out that the carpenter is inspired and then he can make a difference, in respect to his soul and in his life. **Not every man on this planet is looking for a change, because this is what they accepted to be.** (1:58). ... how many of these people across the world know about the soul, the teaching to be, and how much they can change, she said, why can't we reach them? I said we already have reached them because we speak their language through the soul. It's the way we have to look at it, can we inspire or have we forgotten how to inspire. It's the understanding of ourselves which is the problem and not them, how have we understood, this is the problem and what do we expect of ourselves, and how we think that we have learned that we can teach that by teaching we lead them to inspire themselves. A lot of the scientific world doesn't like how the KF has gone into teaching the science along with the operation and understanding of the soul of the man, because they haven't matured yet. They don't understand that the whole purpose of living, or that through living a peaceful life they can understand their own creation, and this is becoming a bigger and bigger problem for the scientific world. Because now, at the level they are at, they understand the change, but in the function of their life how can they match or change it, (2:00). so we see the change. We see a lot of people that would like to be (part of the change), but they can't because then it doesn't work with what they completed themselves (accepted for themselves) as knowledge. The depth of the knowledge transfer in especially the last 8 months is so huge that it will take humanity centuries to unravel. Everything that man needs to achieve peace on this planet is on the table. 51

... not sharing knowledge (2:08). in the verbal sense but sharing the peace that through our souls reaches the others. Recently I saw a change, but the change is so huge and the people who want to create it through the KF work have gotten into a panic, habitual, ?? panic, and they know who they are, My message to them is very simple, the only ones who need to panic are those who want to keep everything the same way as in the past. Those men of power who stand in the ethos of the peace and have found it in themselves by creating peace for their nation, every move will bring another fruit of peace. We should not be afraid of it but rather proud of it, that we can be the peacemakers. When we speak about "beautiful people" we have to understand something very strange about them, when one dies or the soul removes itself from physicality, ?? does that force the other souls to leave also, (2:10). as the collective of souls was the creator of physicality. A human body, as I call the 7 billion of us, plus the billions of other creatures on this planet, we are like the schizophrenic people, we are all beautiful, but we are all part of one soul which is the soul of this planet, it has a heartbeat and a "soul-beat", and the beating of the soul of this planet is a beating of the soul of the man. When one of us leave this planet in the dimension of the soul of this planet, does this planet die, or does it use our soul as part of its structure to show itself more beautiful and free. This is a question for a lot of us that we can't answer, because

we ourselves are not aware of totality, because when we face the totality, it is so beautiful that we ask one question, why, simply why? Why do we have so much guilt, destroyed so much, why have we created so much mayhem. (2:12). When will we be mature? Or can we mature that we mature the others, that through their maturity we achieve peace ?? When I see problems of what is on the horizon and what is to be done, and what is done to create wars, I don't look at it as a failure but why I wasn't able to reach them, and what these people are there to learn from each other and from the process, that it will bring a lasting peace that from it, for now on they don't need to do long. We don't pick on the nations because they don't exist anymore, we go through what I call the EC and others, to reach these souls. There are a lot of good changes around. My wish is to reach the first steps of world peace before the end of this year and we are on track. I know that there are souls that are working in that direction and I know they'll bring the first steps. There will be a lot of cries by those who think they're going to lose a lot to achieve peace. It's the situations we see that force us to change and we don't like to be forced to see changes (2:14). which because of us has been the cause of suffering to us and others. 06

(2:18). Please sign the Peace treaty.

Some members of the Core Team are always present in the teaching, Rick and Vince are some of them, (2:28). in time the 14 members of the CT and in the future those who they choose to be the members and replacements will continuously support our work in the same direction. There are 14 members ... we thank all of them .. the cornerstone of peace. Q: Can we invite the galactic community? We don't believe in that one but we allow them as UC to join us as we join them. The man has to become wise to understand his own position before he can go into the next step. Q: Jalal, you said before that the soul and the lamb want to experience in one way, the same way I want to experience because we are all connected somehow ... what do you mean by .. you said if you kill this lamb to eat and if you don't know that it is your son or father, (2:30). one of these souls, so that means that this soul went to a body of a lamb to experience something? yes, what about it... (he got cut off)... The lamb was symbolic, so it means in essence that man has to stop hunting and killing for whatever they might think. I had a very strange experience by the ethos that has been pushed around by some world leaders, "we have to create war to create peace." and to justify that they have to create enemies so that they can make arms and justify that there is an enemy. But the reality is what do these people get out of creating war, is a sense of power the field strength that we have to abolish in the human race and animals (2:32). or beings on this planet. This is one of the biggest problems man has to conquer, the strength of feeling of power, or being powerful over an animal, another person, society or whatever. **Our biggest problem is to measure the strength of the field of what we call a shame, a pain, and the power. If man finds this out and if it can be adjusted through the soul, then we have solved 99% of the problem with peace on this planet. What is the strength of the emotion of power. Each one of us experiences it through different experiences and tests and different conditions.** A world leader experiences it in how he can change things, a teacher, father, a sibling do it differently, or an animal or something else. (2:34).

... story of Stalin killed more than Hitler. Gorbachev was a great man...

(2:40). Jalal tells story of man in Iraq in 1960's ...

(2:42). But the party after him killed so much.

(2:47).

... eye for an eye, was tried for 2,000 years by the Christians and they killed more. I was talking to some people who think because they eat less due to the MaGrav system that their physicality will change. But change in physicality doesn't come by eating less, it comes in the eye of the beholder in what they expect from this change. (2:50). One of the strangest parts is that they don't see it, the expectation has not brought understanding. And this is one of the biggest problems around the KF they expect to see something otherwise there is something wrong with the KF and them. 37

(2:52). The biggest dilemma for those people who would like to be the man of peace, now you (truly) understand that you (were actually) waiting for a Messiah to come, for a Day of Judgment, for a final day that the peace would come, and now you see it was always with you from the beginning to the end. What happened to it. This is the biggest problem for most of the people around, now that they have come to understand the work, that they themselves are the Messiah's, the Day of judgment. The Day of Judgment has come the day you realize that it is your soul that is responsible for everything, and now you have to judge, you start judging your own soul, work, ??. Now what is next. All of you Messiah's what is your wish, command, what can you bring to the others to elevate them. I have reached many millions and billions beyond this time, and many times before (with other races). **I know what the outcome will be, I can see the end. The end comes when every person accepts the position and responsibility of his own soul.** This is the Day of Judgment when you become the Messiah of your own soul. (2:54). There are many world leaders who would like to be in power, but when you are in power of your own soul ?? can be a world leader. Then we'll ask for a universal leader, galaxy, unicos etc. **we are always submissive to something that we think is bigger than us, but we are the beginning and the end.** This is what we have to mature into and nothing else. This is the point you'll find peace. Q: if we are made in God's image dies He have the same issue with greed, if so then it's not God because He created everything, (2:55). where does the greed in man come from then? It comes from his emotion and physicality. it is the conflict of the man himself with his physicality, God owns everything, possesses everything so he doesn't need to kill for it to possess what he already possesses. Q: So who is setting our filters to prevent the shinning of our souls, is it a malfunctioning brain? **No, it's the interaction between the fields of the planet and the soul of the man. It's very much a field interaction and how it has been set to be. There is a very strange behavior in which our emotion becomes partially ingrained with it, and that is the submissiveness to power or to accepting guilt.** When you shake hands with people of certain nations you shake with all of them the same way according to the feeling, emotion and standing through the history of their life. I have developed awareness to assess (2:57). the person you shake hands with, as to where and how their mental state is in everything else, and one is 99% correct. Different nationalities hide their weaknesses and kingship in different ways, they show their national behavior through their physicality. .

... we show our structure through our physical interaction which is part of our talk. We are brought up to ??? judge whether somebody is the head of us or we are the head and we move on, we have a physical language to express this. .. (2:59). ??? every nation has a specific handshake, there is a submissiveness or power, and this we have to overcome. The strength of the power through the submission of souls, one being better than the other. We have to overcome this to be in the space with others creatures, we want to all stand tall the same, especially because they don't see our physicality so our

soul has to radiate so it doesn't show any weakness in it. There is a lot to learn. Can I ask a question? It depends if I like to answer it. Q: In the instance of **war starting what would be the right action to protect ones own family**, I don't want to harm another being but I would have to walk away or harm another person, what would be the right thing to do? There are 2 ways to ways to answer it, (3:01). and there are many ways to contemplate (it). You can walk away from it in a different direction or you can walk towards it and in so many ways understand that what you do is correct and there will be a good effect or result from it. I have been in that situation many times in regards my family so I know exactly what you are talking about I hope. When it comes to protecting your family there are 2 ways, walk away from the structure of what is set, this is not cowardly it is a wisdom and choose the path of no conflict, or you walk towards the conflict and understand that my soul's understanding can convert the other, you look eye to eye. A few years ago they sent an assassin to kill me, he sat in front of me with a hat on, I knew he was an assassin, we looked each other in the eye, I had no doubt he was there to overcome his fear. When I consulted our adviser he said I was correct. When he came to do his job I wasn't there coincidentally and because my soul was aware of it. (3:03). I learned a lot from this and in the second attempt to kill me the guy sat in front of me for weeks giving me poison and I knew who he was and what he was doing. These things go by the strength of the soul and if it is the time to leave the physical life you can't change it, but if your soul has something to accomplish you'll remain to accomplish what you are supposed to do. The fear is the problem, you don't need to be in any shape or form of dying because the death comes to all of us in the physical dimension, when I sat for 11 days in (Canadian) airport and every day he said he was going to put a bullet in me, I knew the guy had more fear then me otherwise he would have done it. I have been in this situation a few times because of the technology and nothing else and these people have more fear in them then you have **and most of the time it's better to face them because in your soul you know you are correct. Or you make a decision that, I don't want to face it and I have been in both positions.** (3:05). The inner strength in the soul of the man is the salvation of the man and you have to know your soul better. Do you have a question Mr. Keshe? I have many questions. Ask one. **The question I have always had is, why does man think that he can solve his problems by ending a life? Why doesn't man stand his ground and work it out.** This is what I don't understand, people walk away from a lot of things, or they destroy a lot of things not to face it, but what about if you stand the ground and see what comes up, and see what strength you yourself have, not to fight to change, (3:07). **but to understand why do people kill as a solution**, why do so many world leaders see killing somebody as the answer to solving their problem. that you can survive it. I met a woman who was very thin and she had a sister extremely oversized, she was telling me that they were both abused from the age of 4 or 5, and I explained something very simple, the reason you stay thin is this and this and the reason your sister is fat is because of this and this. (3:09). She said you are the first one who understood my secret and you are correct. Each one of us make certain decisions and steps, we accept certain things and we use it to survive or we fight it and reject it to also survive. At the end of the day what is and can be acceptable to is counts, as long as it isn't a power play, because she understood that she was playing a power game and nobody understood that. We all play (these games) in one way or another, it is for us to understand the process and then we can graduate with the right understanding. The soul is of the man is present even in the absence of the man because you are connected by fields to the others, and most people have not understood. We always look to be physically present so we can hear, when you come to my stage and level, and most of you are reaching that level, you

understand you do not need to be there to have the ear to listen, the soul will give you the information that you need to know, and they never lie. (3:11). Find an answer to my question, what makes man to thin he needs to kill for his survival, not only another man, but a plant, tree, a fish, it is all the same, it is us who have put different values to justify our existence

(3:13).
