

192nd Knowledge Seekers Workshop Oct 5 2017

(Topic on plants and what they feel and have soul, The process of converting energy from the universe and not consuming and killing plants, fish, and all other life forms on this planet, stop hunger not by eating but by allowing the body to absorb the energies it needs for the pleasure of existence through the correct conduct by absorbing energies from the universe, How plants reproduce just like human and the rest of creation, the soul in the cell of a plant is the same as a soul in the cell of a human, Every cell has all the information needed to reproduce, Manure is like a Gans but in solid state and less giving, No one in the universe consumes energy (killing) like man does and we have to correct the system, Talk about Chinese culture and Yin and Yang in plasma terms, , Rick demonstrates how the plastic balls charged with static electricity reposition themselves, An question about neutrinos or energy hitting the earth they are just packages of energy and man has put a special name to it, Keshe Foundation ID cards connected to a bank account,)

(:11). The topic on Vertical People. Today we go more in-depth how we look at the plants as food, flowers to look at, or the trees body for different uses by humans (wood). How do they feel, how has their soul come about, and do they create themselves in a way to be used, in a way they sacrifice their lives for us, to give us a chance to survive and have a comfortable life. Do they produce themselves knowingly that they elevate the soul of the others? For example, we know that plants can literally destroy themselves, they die or create a condition that they don't want to be anymore. But how come they exist and know that through their existence they give life to another being. The plants give to others like sap for a bee or grass for a cow, or be it the food man eats. Where is the soul of a plant, where does it start and how does it come about. How do we understand it and assimilate it into the knowledge of the space. Understand that the life of the man, (:14). of the plant and animals all started from the same point. Why have we taken different directions and what process has made the new creations. ??? at least 6 different generations of life exist simultaneously then we'll come to understand the process of the creation in the U. We have to understand our own companions on this planet that were created at the same time as us, the human race and the other animals. We understood the presence of Cu has led to the split of the body of man into 2 halves left and right, because that is the behavior of the Cu, it has a balance ?? energy in comparison and presence of Gans', but what has happened with the plants. We have the life of a plant that we as totality have accepted, but what of other lives. We know we are in the middle of the stack, and not the top of the animals, the horizontal people, but there are those (beings) who exist above us, the floating people or floating life. WE are aware of them and talked about them before. We are the bottom eaters, we use their bodies and existence to elevate our own souls and bodies. We never considered this before because we only looked at our own creation (:16). we called ourselves the king of the animals. The faster we find the reality and confirm and conform to the universal systems, the faster we as a race become part of and understand the totality of the operation of the Universal Community. The UC is not to go into space and find others, ?? who we are the bottom eaters of, the floating people. ?? the verticals, the fish, those who exist in the center of the planet, or within the layers of the planet. Things are not just as we see them, there are worms and beings who live below the surface, scientists have found life 10,000 meters below ground inside the earth, which means life exists in every level. It's that we have to understand the conditions that these life forms have come to live in, how it finds the conditions of its environment to confirm its existence

and mutate to be able to exist within that environment. Once we understand these layers of life in the human mental condition of knowledge, then we see that it's the same for every other race in the space, then the space opens its eyes to us. (:18). because now we have become unconditionally accepting that it is not just what we thought that life is limited to fish, trees, some worms and some other species and that's it. If we see that the atmosphere of this planet can support composite life forms from the center to the outer atmosphere, then it will be easy to understand that there is life beyond the atmospheric conditions of this planet. Then we have to understand how they are composed and how they live. The moment we respect the life of every being on this planet and beyond, it is the time that we mature. We'll become true human beings and true members of the UC. It is difficult because we have been used to eating (:19). consuming, abusing every living thing on this planet as our right that we have lost the insight. We have lost the right of being a human being who is in charge and control of our own existence, we can go a step further in that we don't need to consume or destroy. But is this justified, because what is going to happen when I learn to use only energy from the space and not energy from within the planet which is already prepared for me as packages of energy. As long as we don't understand or try to understand the totality and work of the U, and understand that we have access, the pleasure, the knowledge, and everything that goes for man to use the universal energy without killing or destroying another life, then we can go to the next step, but as long as we don't understand this we will not progress. It's a habit of millions of years, if I stop eating what about the cat, fish, the tree that is eating. Can we adjust the process, they might like to mutate to a new condition, but they will have stopped what we have stopped. Or do we just change the system for ourselves that we don't eat other beings (:21). and entities and we leave the fish and the lions to do what they like. Then it will become unbalanced and when the next generations see the animals they want to eat them and repeat ?? because it has a different pleasure, it brings a lot of other things to them. So we have to understand the totality of life on this planet and why today I would like to teach to myself and maybe others with me to learn the process of the soul of the plants, then we go one step further. The mankind has to change course and understand that he is not the user but the protector and in that phase it is when we will really change the course on this planet. We have (:22). considered ourselves as kings of animals, we have done everything to them, cage them, tame them, we cut them. Once we learn the energy consumption, would it not be better to teach them and accommodate them that they don't eat, kill and consume. **Is the planet earth the only place where people eat each other? To me a plant, fish, dog all count as people and they are the population of this planet. So is this planet the only place, more or less with a few exceptions, YES, but they consume in different ways. Yes, we need to pass this point! We have to learn how to change the course, teachings like this and from the others has been the prelude for coming to that point. Go back to the writings of the prophets of the past, thy shall not kill. Not kill a lamb, cut a tree, kill other things to eat. And that by killing them you end a cycle of a soul, not the physicality of a body. Can we kill a soul? Yes we can. Those in the future who gain that knowledge understand that, that is the last thing you ever do. (:24). Can a soul die, as I explained before yes, but can we be the cause of his death? It can be done, but it is done only through the position of balance when the soul sacrifices itself, and not for man or another soul to end its life.** These are the things we have to understand. First we have to mature as a human race then we can understand these processes and how we can change the course, **stop hunger not be eating but by allowing the body to absorb the energies it needs for the pleasure of existence through the correct conduct by absorbing energies from the U.** It is so

easy to do and when you learn how you don't want to go back to eating (food) and destroying life. For this process we not only teach how to make systems in physicality, but we have created structures that by teaching we elevate the soul, so you understand the operation of your soul and then through it you bring systems and conditions about that not only teach the others but collectively we set an example for that process so we don't repeat the mistakes of the past. Part of the process is to understand that the soul is our creator and of physicality, then we have setup structures like the EC and UC and other organizations around the KF, (:26). to gradually convert everybody to that point. It's very hard to change billion years of habit over a few day or months. It takes time but in due course no one on this planet will destroy another life. One animal will not consume another, because the correction in the process which is a lack of a few bits of energy and materials, we come and bring that process about (satisfy that lack). In the beginning the Councils will take over for mankind but in time they'll be the guardians for mankind going into space, and for us to understand. The UC will be the translators of the Universal Community to the level of the soul of man. They'll become the translators of the information. We see the EC coming into position to bring about the change .. they are learning themselves and slowly coming forward. ... in the past the prophet came and setup things, but now as we all understand ourselves, collectively we are setting up the soul for the present lives and future. (:29).

.. by educating the soul the physicality follows, then all the killing stops. In the past no one could see how the prophets receives the messages and the changes they went through to be able to translate the message. Now we see the evolution of the EC and UC as they grow and share the messages they receive with us. We share everything together and then we see the evolution of the totally of what I call the Messiah of the human race for the whole planet. **Once we learn we become Messiahs for other races in the space we come across because we show them through those who have first hand experience of the damages that these things do (what happened on earth), so that they themselves will not do it.** This is the beauty of it, when you apply for a job they ask for your experience to see if you qualify, and want to know what you have learned that you don't repeat the mistakes of the past. (:31). As the human race we have experienced all the devastation of all the wars, when we go into space we know what it means to loose and we teach the others not to do what we did. We become the best messengers the U has ever created, because we'll talk from experience and that counts. We know what destruction and loss mean. This is the beauty of this process, from the material state we come to understand the process of the soul and through that to become responsible for our conduct. We ourselves become the Messengers of the Past. Now we see the connection between science and what we call faith, which is us, believing that we are the creator, and control everything through our conduct. These are a lot of responsibilities that we don't want to accept, that we refused to accept, but now it is on the plate and we have to accept. We have allowed the growth of organizations around us and like a child we watch and see how they mature. The maturity at the point of completion is the maturity of the human race to understand and enter the next step. I would like to give a chance, as usual, to any members of the Council to speak to enlighten us before we go into the knowledge seeking part ?? (:33). Caroline from the UC speaks. (:37). Christian attributes of God. and Muslim 99 Names for God. (:39).

(:45). The Universal Community has other attributes to add to these, but we're not yet ready for them.

(:51). We all come from the same energy, same manifestation, and this is us, whatever you read on the board, The Most Gracious, The King, etc.. In Catholicism they say Mercy, Grace, Love. It all comes to the same point, this is us. up to now we understood working with the matter, we melted it, forced it, shaped it in to a cup, plate a machine. Now we can use the energy to do the conversion. Now we understand that the energy conversion from my soul has been forged to be my skin, eyes, lips, liver and everything else. This time we have a say, like with the cup now we can forge our souls to be physical, practical and visible on this planet or on the other planets. This is the process of the progress that we have to understand. And a lot of people would have a problem with this, because accepting the responsibility for ones soul is the biggest opposition to this cycle of the knowledge for man, because up to now I was provided (with knowledge), made to fear (certain things), I was institutionalized in the name of faith. And now I am in the faith, the path of belief, (:53). I believe I am correct to do it this way and I do it. A lot of people will have a problem in accepting responsibility for their own conduct, and this is where the game comes to. We'll come to it, we have to, and by accepting it we'll bring peace. To understand and accept the position of our soul, this is the key to peace. ..

(:56).

(1:00). Alzar member of UC for Farsi. Talks about language and when we enter the UC we'll communicate with our minds. She says language is just a temporary stage until we get to communicating through the mind and not get stuck on the words. Manipulation using language and not communicating in an honest way.

(1:09). Ursula speaks.

(1:15). In Spanish. ... Mr. Keshe says this is how we elevate ourselves. (1:18). We keep speaking about the different Councils and languages, but what we have to graduate to is to understand the language of the soul. this is the ultimate goal of this work and the point when we don't need languages because the language of the soul is universal. The sun is a soul, all the suns in the U shine the same, but they have different brightness and slightly different colors, but they shine through the same principle, likewise it is the same for everything, to be the light, the language is the light. It's for the recipient to decide what he wants to convert the light to. Your soul radiates and by intervention of your feeling converts that to anger or the same field to joy, the same fields are the beauty of the eyes, to pleasure, or pain. It's what we convert according to our emotion, that light, source, sun, soul. We have to understand this, why we started with the matter state for you to see the fields, you tested it and know it exists then you put it in a core (rotated it) and seen the fields (interact). (1:20). All of this is to bring man to one point, to the language of the soul and when we understand this we'll progress very rapidly. The beauty with this cycle or process is that we are not creating monks, priests, mullahs, or anybody else. We become our own guideline and have to judge our own progress and determine how we want our soul to progress to the next level that we become part of the totality, otherwise the (old) game will carry on, but not this time because many people have been enlightened and will carry on very soon. We have seen some TV and radio stations are giving air time to the KF technology. It means the breaking through has started, but this time it will go like a ball of fire, because once national radio and TV stations start broadcasting it will carry on. Many of you who have learned the technology will unknowingly will become the teachers because you're a step ahead and you can teach the others so they can teach themselves. ... if the teachings come from us in the correct way then we can progress to the next level. (1:22). Q: When I cut the

parsley (it continues to grow) and pick the apple that falls on the ground is this killing the soul? We have to understand what is the apple and its function and why did the plant create it and give it different colors and tastes, otherwise there would have been only one apple and that's it. Is the process that I provide this, this is what I said, freely available, it's made available that it allows for expansion, because it has a purpose, for the animals to eat and take the seed somewhere else that it expands. It's the cleverness of the plant and not that the man, animals, or the birds want to consume it. The plant has valued its soul to understand its function and it wants to expand so it can create more of itself. Plants are highly intelligent. (1:24). **They have a beautiful soul. If I want to expand so I can have my child, humans make love, animals mate, so what does a plant or tree do? They can't throw the apple so it falls within its own shadow, it will lead to its own demise. So it create something that will be taken somewhere else.** What is the seed of an apple or a grain of rice? It's a womb with a food supply. He draws a grain of rice. There's a section that **is the seed and around it the energy pack which provides the food for it when it wants to grow.** Change the name call it an egg, it's the same story, there's a child already made ready, in the same way the mother has provided the food for it to grow. This is the soul of the apple ready to grow, the same with the egg yoke. If you expand it, it's the soul of the man but we call it a brain. The cycle of life is the same, it's us that could not understand, but now we do. We create children, (1:27). the tree has created the child and so has the rice plant with the grain of rice. **The whole thing is exactly the same process and they all have souls.** .. And strange enough (all 3 of these souls) speaks the same language. They have the same emotion, it's us who have been blind to it. If you nourish the egg the right way you get a chicken, nourish the rice seed and you get another life called a rice plant, and if you nourish the human egg you get another human being. It's all life, we just weren't aware of it and now that we are we are responsible for it. **We don't go and eat our children, but we go and eat a child of a chicken, or a child of the rice.** Because (we feel) it's our right and we have done it so long we have to do it. Now it's time to ask the question, is it my right? Has it been my right, just because others have carried it on, it doesn't mean it was right and that we should carry on with the wrong. (1:29). If you go to space would you like somebody to come and eat your child, because you are another ?? Or is it correct that you can't consume other lives and in the space you don't do it so it shouldn't be done to you. To be able to fly you have to train a pilot, and to take mankind into space you have to train the man to understand the rules of the flight in space, and this is part of these teachings. I am teaching you everything about the soul, energy, and everything else, and the whole target is ?? we are literally walking you through a funnel with a very small hole at the bottom and mankind has been way up here at the top doing every kind of damage that he could. Gradually he is getting trained that he shines through like a torch as one ?? in the U. Mankind isn't unique he is like everyone else in the U. To th e?? in the U, when you shine you do it like the other stars, and this is the whole purpose of these teachings. The only way to get you going was to give you some sweets, have some free energy, you can do something with your soul, N coating for your heating, or whatever. (1:31). You all have walked the path. This is a mastership of a teacher and **I am master at what I do and have done it many times in the U.** I understand the weakness of the student but I don't punish him for the weakness, I glorify his beauty, which is the soul and he tries to get to that point but in fact, it walks him through the door. It's not a catch, it's the education of the soul, the freedom for the soul. When you talk about the plants, as we did with Vince and Rick before about the celery. Do you first ask the celery can I chew you or kiss you first and then chew you, or has the celery created itself for you to chew it because it had to have these leaves that

it allowed the plant to grow to create seed. **Not all of the seeds need to grow, but the leaves are there for you to come (be attracted to and spread the seeds around). The plant has already calculated that it gives something in order to get something.** They shall not steal. Who makes that decision, where is the soul of the plant, or the soul of a tree. As with a tree we cut the branch and take the fruit but the tree is still there. You cut off the arms and legs of a man he is still there, because the soul is still within the structure, even though every cell carries its own soul. How come the plants have become what they are, where is the soul of a tree. When does the point come that a plant doesn't want to grow anymore, why do the plants have roots, why does the soul of the plant change from the soul of the man, in a way of guaranteeing the survival. (1:34). The position of the soul of a man and that of a tree are the same, but mankind decided to go (towards the earth) and in the world of vegetation they went the opposite way. The soul of the tree is (in the roots under ground), the soul of the plants, the position of, the creation of, is slightly different then that of the man or the animal line. **In the man we kept the freedom of our soul but with some attachment condition to the earth, which means we still would like to be free but we accept certain connections.** If you look at it your souls fields are very much like a sun radiating downwards and in interaction with the earth MG field, and in composition of changing of energy for this soul to be independent it has created arms and legs. Our soul which is its own AA from the condition of the gaseous part has decided to keep its ratio mass to use a specific field strength of the O, C, and H of this environment, whereas the soul of the plant has decided to use a slightly different strength of the same thing. (1:36). and this allows it to be more dependent on the matter state of the planet then the soul of the man. **The soul of the plants sit just between the roots and the stem where the life starts.** When you pull a plant out the roots are its connection, its legs, how it wants to be connected, and the soul of it sits just below the surface. It itself decides this is what I want to have so that I can make more of myself and spread my seeds. The apples tree does this also and so does the man. Due to the AA which is connected close to the strength of the earth level, the seeds on the trees or vegetation have taken this position, whereas the soul of the man has decided a different way, I stay independent, I still shine like a sun on earth but I keep my distance because I choose a slightly different strength, and choosing a slightly different strength from the gaseous part allows me to connect to Ca, Mg and to many other elements of this planet, and what is above that man doesn't yet know about. Whereas with the plants he can only connect himself to Ca (in the earth) or Zn or whatever. (1:38). If you look at it in reality our soul sits above in our head, in the plant the soul sits between the connection to earth and the use of the environment of above, in fact it has 2 ways, it has grown in longitude, where without ?? we have decided to grow in a different way in altitude and longitude, whereas the plants decided this is my longitude I stay at this level and I decide my altitude by what I can get and how much I can grow, and how many fields are available forcing me from the earth and the fields available from above to become what I want. The existence of a soul of a being is the same, without it, it shall not be radiating anything, be it the soul of the man or plant. **Then I decide to have this condition, I like to wear a Chinese hat and chopsticks so anybody that likes these things is with me, then I can have a Chinese partner to create Chinese children that it shows I am Chinese and with it I allow him to marry another one to spread more of me. The apple tree does the same.** Man has gone the wrong in so many ways. (1:40). in not understanding these things and we see in the history of man we see a lot of abuses like this due to misunderstanding, but those who did understand it abused it as well. There is no difference between us and plants, but we think that because we can speak and made the

computers and a microphone that we are more intelligent than an apple tree, a celery, or a wheat. Because we don't hear what you call the frequency of their communication, we think they are just a tree, but very soon when man as a race opens his eyes he'll hear their voices of the soul of every entity. In hearing means respecting and understanding to accommodate, this is why we say you can't steal but are given. Do plants give that through it the energy they have created gives elevation to your life, so that has now become your soul, to give from (through) you to elevate the others. If the apple gives a red color and is sweeter it is eaten more, through it he can spread more of his seeds. It knows it has to have the pleasure of sweetness so it can spread its seeds more. then he has given the right, (1:42). or has he given the sacrifice to give to take. What about if you come to the point of understanding the soul of the tree that I give you freely what you want to spread and take your seed where you want and that it gives you pleasure that you expand, then you don't need to eat the apple. In the mythical language of the apple and Adam and Eve, has the meaning of when man betrayed his own soul, that was the poison. that was the chalice (Holly Grail) that everybody was looking for, betraying ones own soul, then you understand more and it becomes part of the theology because then you take the fields off without taking the essence of the life off. This is what the man will face in space and this is the biggest dilemma for those of us who have been active around the U trying to get this race corrected. To you it might be funny about the apple (?? asking) where would you like me to take your seed. You don't need to speak the language you can feel the fields of it. Look how trees speak together, how when you walk in the woods plants accommodate each other. This is the space I need to live, or I have to grow taller to the left or right to get some light. They accommodate each other. Walk in the true jungles made by nature through plants facilitating (1:44). each others souls and you get a different feeling. It is very different from walking through man made jungles, where you feel the pain of the trees because they are being forced (to live in a place). It's like imprisoning a soul. Man will soon learn these things and understand it. We have seen it now in the world of food. Fish that are free have no diseases, the ones man confines to boxes we see diseases. they don't want to exist. 47

(1:46). Fish are talking to us, trees are getting diseases because they don't want to be in that position. Then they say, the trees are all getting decimated because of the disease. Have we seen or allowed for the understanding of the feeling of the tree. They say I need more space, 1 meter is not good enough for me, you locked me in a prison, I like to have 2 meters. If we understand this and plant them that way, we'll see that trees are without disease, we'll see agriculture without pesticides and fertilizers, but you have given them the (correct) environment to grow. We have shown this in our agricultural teaching, when we add Gans to it, it's not just that, but the Gans creates a new environment for the plant. It creates a condition that a plant can take what it likes from its environment so it grows bigger. How foolish we have been that we haven't seen it. We try to force them with fertilizers, you can give me as much as you like, I'll blow up but my soul ?? I don't put the right things in my seed because I don't have the right emotion, so when your child eats my seed it doesn't have the right (nutrients). It's just you have been brought up that way. We have to understand the whole process, and the position and work of the soul of the plants, then if we understand that we'll understand the soul of this planet. What does this planet want from us to be. So many times I say, the earth is crying blood, (1:48). through his soul for what man is doing to its entity. It's like a father watching his child destroy whatever he has made, his life work being destroyed and destroyed until the child realizes that he is destroying his own ?? what his

father has left for him, it's for me to elevate myself but I have destroyed everything how can I elevate. If man could hear the cry of the soul of this planet for he and animals are doing to it, man would stop, he would freeze in his step. This is what the purpose of these teachings are to open man's eye to more knowledge. .. In Kenya I teach with Dr. Gauwta agriculture and about the Gans, but at this time I can only teach them about the Gans and how they can increase their profits. But I can't teach them ??? deeper things, to increase the environment by being correct. ?? Would a plant give me what I need directly that I don't even need to consume it and enjoy its beauty. This is a new innovation of the new systems. When you make a food system you are all happy to get a CH₃ and get energy, but what about the soul that, that entity creates that it gives unconditionally to you. ?? what I nourish. (1:50). **We have the same problem with our flight system, they don't see that to fly it needs the understanding of the freedom of the giving by the entity you use and not by forcing it.** I give from my soul for you to give me (the flight) and to show me the beauty of flight, and for me it would be a pleasure to be able to fly. Then you'll find out that everybody will walk to the king, which is the soul of the man that with it, it becomes generous to give, not to take. When we understand what this technology brings us then we'll understand the structure of the soul, the we don't need to go to the (Wailing) Wall and bang our head to it to become elevated in our understanding, because we are just banging against, what i call a solid wall, which the soul can't accept. When you speak about agriculture understand what is the soul of the plant and why does it operate this way. It doesn't matter if the energy of the plant that you need is in Africa, Europe or Asia, while you are in America. Man has a lot to learn. We saw the magnets Rick showed last week, look beyond the immediate fields to where these fields will end up, who takes what they need, (1:52). When we understand the agriculture in what was just explained there are 2 points, first we don't need to eat the plant, and secondly we give respectfully for the existence of that soul. Because if at the end of the day the AA turned out to be the soul of the mans container, becomes the body of the man, ?? so it is for the plant but a different strength. The AA of the body of man creates, needs the iron to create blood that it can it can flow that it makes it as a ?? , the same AA of different strengths with Mg and other things creates the green leaves and the rest of the things that gives what we call the vertical position. All these plants talk to each other, they communicate in the language of the soul, and once we understand the soul of the other, (some will do with the other space that they need to ?? space themselves in). Agriculture, the soul of the plants, ?? should become a ?? rhythm for the soul of the man living in the space. We have been ignorant of it. We need to understand how we can elevate the soul of the plant that with it, it grows the plant ??? , then it becomes other aspects and understandings (1:54). It's for us as the human race to go a step further, so that every pack of energy in the U doesn't become food. Q: How do we stop the lion from eating the lamb? How do you stop your physicality from destroying your soul. So if you translate it then you'll understand it. It's for man to understand to be able to teach and convey the message in a way that the soul of being has a different packaging in the brain of the man in receiving energy from the U and a different way of packaging in giving to the U, then it receives and gives what it needs (without killing). **No one in the U consumes energy the way man does. It is the malfunction of the system which we are trying to correct,** but (1:56). it has to be corrected from ... there are 2 ways to do it first is to **literally destroy everything that this planet has created, destroy this Solar System,** bring it to a point which happens many times to bring it to a point that nothing goes out of this place. ?? wipe out the whole planet. But within it there is a soul and there are souls (living here), but these souls (that) have not changed will manifest

themselves in another dimension, then we have the same problem. This goes back to the story of Moses, a lot of people look at Moses and his life and call it Judaism and from it has come Christianity. When you at the behavior of the Jews today, one which we all know more than others, like Hitler, compare it to the training of Moses, didn't he kill all the species of one race, those who grown up ??? Didn't Hitler kill most of those who were his lovers. Don't we see the same pattern with killing with the Jewish State, but wait, it didn't start with Moses himself, didn't the King order the killing of all the male species (1:58). because he knew there would be someone to take his position. He looked at the king to come as a king of physicality and never understood that the king was supposed to come in the soul of the man. Haven't we seen the repetition of the same in Hitler's time, killing all the men of one village. Because it is ingrained in the conduct. Haven't we seen the same thing with Islam? The same things with Mohammad is now repeating itself in different names and shapes ?? Why does every race see killing as a solution. This is what we have to change and this comes from the knowledge, the education that you can have everything and you don't need to kill or commit a crime, which means devaluating your own soul. This is part of this understanding. Now when you create a Gans or Gans machine, a lot of people followed but then stopped, which means you are not mature yet. If you understand the soul of a plant and what it needs and to elevate it and comfort it. You have been taught how to make Gans, (2:00). or create a free energy and to convert the energy for what you need, which means you wouldn't have to kill for it, many of you have started, but it is a process of learning. A lot of things that have been taught, but the 129 Tesla is the best example, but nobody has picked it up, nor understood the full meaning of the test I set up years ago. He draws 3 boxes each slightly larger than the previous one, representing 3 systems of progressive strengths. By the understanding of plasmatic magnetic fields we created an Infinity Loop (IL), the stronger fed the weaker and took what the weaker didn't want, and we created such a commotion by feeding more and more, because the (weak one) was a hungry one, and we achieved 129 Tesla. The weaker one was the soul, the stronger one is a system you can create, the one in the middle is the physicality of the man. Soon the soul of the man will grow. It depends what you put in the machine (stronger core), (2:02). then it doesn't need the physicality nor to feed it or to kill for it. It's so simple. I said this to government officials recently that I can create a system that I can feed the whole nation. We know what needs to be in the machine (core) and we know that the soul and physicality of the man is weaker than the machine. They can take as much as they like, the more they take the more receive of what they don't need and can convert back to ?? The problem is that when you feed the man then he has got nothing to do now that the hunger is over. Would the man go violent to get more, now that he has no worries about how he receives the energy because it's always there. **We use the physicality to elevate the soul, so when the soul is elevated the physicality will also change. When you go into space you always have to consider the strength of your soul and if at the place you arrive its strength is at the level ??? where you have everything you need to manifest yourself.** This is why many places in the space he goes to are not suitable for the man because he can't manifest himself. Because by manifesting itself it can create its own demise which means it gives out its fields (?? totality out), he doesn't want to, but it happens due to the strength. (2:04). All the teachings are connected to each other, it depends on the understanding of the Knowledge Seeker. it depends on how you can connect and understand the totality and the faster you do the faster you grow. It's the same with the medical section, I went there and they wanted to know how you connect the medical box, I explained it very simply. If our elite in the medical field and sciences are still entangled in how to make a box

they haven't seen. **The reason for the teachings is the doctor has to a creator that he understands every need, that it (he) becomes the machine (the stronger core), that can give to the soul so the physicality which is with disease can walk away. It's the soul of the doctor and not the machine that he makes.** In the space there are no machines, reactors, Mg, or K. The sun shines and the interaction of the rays with the physicality of the earth produces O, N, C, H gold and everything else. The soul of the doctor has to become the sun, and the interaction of physicality of the being (doesn't matter what species or part of the U) feeds the soul and elevates the physicality from its position of pain or what. This is the true knowledge, the real essence of creation and somehow man (2:06). gets entangled with physicality too much and as a patient teacher I take my time. When you work with test tubes you change something to achieve something else. We have the same problem with the people who are trying to fly. I have given them everything for the flight system but they can't get it and are running into frustration. There is something wrong they say. Yes, you haven't understood, the machine is the weaker, and the stronger is the soul. If you want to fly you have to understand this process (the stronger feeding the weaker in IL). It is me who feeds, it's my wish to see the flight, and then everything is done. But they are still after rotating and the same non-sense. It's time to unite the knowledge with all different aspects of the teaching, those who are science, agriculture, fishing, art whatever, to understand, and that the teaching is for all of you the same, according to your understanding is how you translate it into what you need from it. The agriculturalists are make CO2 cores, the doctors are using CO2 cores, have you every asked yourself, but it's the same CO2 whether for agriculture or medicine etc. (2:08). **The love of God shines on all equal. If it rains and your a man you get wet and run away so as not to get wet, if your a plant you say thanks fro receiving water, but it is the same.** It's the same water and same knowledge it depends on how you want to use it. You hold out a cup to collect the energy that comes as rain, you drink it and rejoice in your soul, or you hide away from it because you don't want to get wet, it's your decision. **When I teach I teach the totality and each one of you looks at it from the point where you are at and what you're interested in.** None of you stood still long enough to see that the knowledge is common between all of us. The knowledge of the Creator is like a sun, you have to understand which ray you want and where you want to be. Then if you change what you understood as a doctor to use for your patient you are behaving like an "Mozhan" , your soul becomes the converter of the soul of the emotion in respect to where it comes from the Creator, you become the physicality of it that it feeds the soul that is weaker for it to elevate through you. In one part you play this and another part you play that. It doesn't matter if you are in Agriculture or in Health or whatever. the sooner the KF K Seekers understand (2:10). It's the same song, do you feel like rejoicing, sadness because of the past memories, or does it make you think, I am wiser because it's the same song played by the same recorder and it's the same music, it's upon the beholder to receive and to what he understands from it. I have taught mankind the totality of the knowledge, do you want to filter with one name for the creator or the totality of the names of the attributes of the Creator. It's all the same sun, it depends on what filter you put (in front) that it gives you that emotion. **When man travels into space he'll understand more names or attributes for the Creator, of which at the moment he has no knowledge of.** Any questions? (2:12). You showed us the position of the soul of plants, but how is it that trees can grow from cuttings and not just from seeds, because you drew the location of the soul between the stem and the roots? What happens? No nothing happens. **Now we can take an egg and grow it into a man without the mother and father, they mix an egg and a sperm and we get what we like. And I explained that**

every cell of the man has a soul and from the saliva you can tell a man's RNA and DNA and the rest. When you cut a plant (a cutting) **every cell of the plant carries all the information of its creation, and when you put it in touch with the soil, the fields of this planet, then it manifests itself the same as a life** (2:14). another being. This is why in every medical teaching I always explained that every cell has a soul, **but it depends on how the soul has been adapted to convert itself, if you take a cell in the arm of a man and you plant it will not grow, but if you take a cell of the man in the right way, if you can conduct it the right way you can create another man. It's the same with the plants but they have made an accommodation that they can do it, they accept certain fields because they are connected to the earth, they create a MG field of what they need.** When you put a plant down you just look at it as a leaf or a stem that you just put in the ground, but there is more to it. Every cell here (at the ?? outer edge of the stem) carries a soul and it creates certain fields that in interaction with this planet creates roots, it brings what it needs to it and it doesn't go out to reach it, and that allows it in a genetic way or whatever you call it, to grow in. It's not that you planted it and it grows but you don't know how come, because all the information for what it needs is here (). **When you put a cutting in the ground and it doesn't grow it means its fields do not match the environment, for the materials which it needs in that environment, because it has a preset soul level in interaction with the physicality of the plant.** So simple. (2:16). Q: Just to make it very clear you taught that the egg and sperm each have a separate soul and through interaction create a condition in the mothers womb that makes it possible for the soul to come from the unucose and then we have a fetus, with the plants is it the same that the soul comes from outside? Soul what? ... **no, no the soul comes from the interaction of the fields of the egg and with it, it creates a stronger field which takes from its environment. In the case of the plant you create one condition and the other condition is the soul of the planet, and the interaction of the fields and what is available allows the root to grow.** This is how I like to connect myself to you. And in that process the 2 fields create a condition that allows other souls to be created. If you look a soul in the cell of a root has the same soul as a cell in the body of the man. (2:18). Q: How does the manure work, is it like the C in the CO2 Gans that attracts COHN or AA in the atmosphere and brings to the plant, does the manure act like a magnet for AA to the plant? Go back to what has been taught, what is manure? It's something that has gone through a process of Gans and in it is the same process. ... the energy which is embedded in it that gets absorbed by the matching of the plant. Fertilizers are a different way (form) of Gans but they are in the solid state. Because all entities are made of magnetic fields but when they are in the solid state they have a smaller field, in a Gans they have bigger fields, that's why there is more effect, there is more giving, that's all, there is no other difference. ... (2:21). Chinese man talks about plasma as universal principle and yin and yang theory and the 8 trigrams (BaQua). Ancient Chinese used this method to predict what would happen. (2:25). (2:28). With 6 leads to 64, the I Ching. (2:29). Mr. Keshe, when you speak about the IL this is what we see here. The strong and the weak and the intermediary is just the point of interaction. I have so much respect for the Chinese cultures understanding of Yin and Yang, the way of understanding the balance, this is the way the U works. All the people who gathered this knowledge over centuries understood this balance. Others have just followed it, some study it to understand more. (2:31). Two to the power of 3 is 8 and this is most precious number. In Chinese culture they don't have 4, no building with 4th floor. (Yes, 4 is considered a not good number) It's because it sounds like death, in Chinese hotels there is no room 104, nobody wants to be in the death room. The understanding of Yin and Yang comes from the deep

understanding of the soul and you like to be generous because you are a giver, so you feel good, the giving makes you wise. This is part of the cultures understanding. (2:33). Is it the number 4 came in the middle or that you ?? jumped that and just look at 1, just not by name when 2 is not good enough, there has to be 3. the way you look is the balance of energies not playing with symbolism or numbers. You have to look at the essence of the knowledge, and Chinese culture in the ?? regions of the time understood this. Look at the shape of yin and yang symbol, one side is weak and other is strong and at the border line you see the difference and that is the physicality. One is the doctor the other the patient, on e is the soul of the doctor and the other is the patient, and the physicality is what will reach it. A lot of the (ancient) teachings even in the writing of the symbol for thunder, until the recent past you always thought the thunder comes from the top, but actually the thunder originates from the earth and travels up. Why? (2:35). It's the same with all our teaching, when you receive so much energy the surface of the planet absorbs as much as it can. It absorbs a lot, but at one point it releases a much greater amount and that is what we see as lightening. It's the way energy transfer has been changed into symbolism and numbers, for people to understand but in fact even if you look at this, look at the one it goes, there is always the point of giving and the other receiving, it needs to find the balance and so adjusts by giving and taking. But I have to give more to be able to receive more. Otherwise I can't give if I haven't received. .. if you go to the wisdom of the Chinese nation and culture you'll find it's nothing but explanation of the soul of the man. Even the wise men of China couldn't very easily explain the wisdom to the people, because they couldn't understand ?? the depth of the culture comes by the strength in its knowledge, ?? it's a lot of symbolism that even now we still don't understand most of it. Because the people who became so wise could understand the work of the soul. (2:37). When you look at the symbolism or numbers it all talks about the same but the people of that time couldn't understand the maturity of their wise men. They had to hide it in symbolism that some people could understand, but now it has become fashionable, but go to the essence of it. If you take the whole lot of yin and yang signs, it's the same thing a line of transformation. Look at the essence of the knowledge behind the symbols. I appreciate very much the Chinese KF because their approach to the knowledge is different then the rest of the world. (2:39).

(2:41).

(2:48). Any other questions.
talks about book publishing in different languages.

(2: 57). Q:

(3:00).

(3:04).

(3:08). Neutrinos or whatever you call them are one of many packages of energy in the U as energy is transferred,

(3:12). Rick shows plastic balls rubbed with static energy, reposition themselves.

(3:23).

Any other questions. (3:31). Q: if the Books could be edited in English? Mr. Keshe says, they had an English speaking book editor do it, but she started writing it the way she understood it, so they had to change it back to how Mr. Keshe wrote it. Her job was to correct spelling and grammar mistakes. The First Book is the original version, historical version. (3:34). Ella has a draft version of the KF ID cards connected to the Banking system account. (3:36). Q; regarding souls of vertical people ...

(3:39). For the first time we see doctors, housewives, children, all kinds of people, and we are gathering the knowledge and elevating our own souls. ... I hear the different people tell what they have learned from the teachings and I have achieved what I came here for because every soul is getting enlightened irrespective of physical position and condition. What I said in 2005 or 6, to Belgium authorities sitting across from me, that I write my papers that the black man in the back villages of Africa will understand it the same as a white man, scientist sitting in front of me, that one can not abuse the other with the knowledge. And this is happening. (3:41).

(3:43). Jews deny the Christians and Moslems, because if they accept the ?? presence of Christ there is no Judaism. the Christians deny the Moslems and the rest because then Vatican can't make money, but they accept the Jews because they came from it, but they call their book New testament. the Moslems deny the Bahai's because if they accept the return of whatever they believe in, then it's the end of their people to make money, but they accept the Christians and Jews because they wrote it (came) on the back of the belief of the other 2. The process goes now with what you call these Bahai's to accept the new knowledge that the soul of the man is over (above) everything else, they deny the work of their ?? and everything else, but they accept the Moslems and the Jews. This is how it ends up, (3:44). there is nobody for you to accept or deny in the future, and to not deny the ones from the past because you are the totality. You are the beginning and the end, so there are no more churches or donation boxes to the god's bank account. And no fear of punishment of physicality because now you know that you are in charge in of physicality and you decide through your own emotional balance with the other fields how you position yourself. You call it a gift or a punishment, but from now on it's your decision and we (have) come to that maturity. You it explain it any way you like but from now on you are the Moses, the Jesus, etc.. and everything else in the essence of the soul. What they told you not to do in physicality, now you are in charge of it through the soul for ?? damage. Because now you understand it's you who'll be positioned different to receive, and who likes to loose. We can call it, explain, define it, deny it but the truth is it's the reality and you can't change it. How we put it in words is how we like to fit it in our physical body so we can handle it. **I came the right way, taught the right way, and it the coming time there will be no more religion except the temple of the soul of man (3:46). who is responsible for his own conduct ?? of the universe. When you go into space there will not be another religion because they don't exist there, unless you are weak enough that you don't comprehend and you make the entity your guru, because he is more intelligent than me, but you understand that he carries the same soul as you, ???same understanding as you ,** what he says in the level of the soul or comparison on the physical dimension, or manifest yourself. In our teaching, we want to be done with the idea that man is below the others so he doesn't become subordinate, and the only way to do this is to understand that a man carries a soul of the same strength and level of every other creation in the U. 59

(3:52) music.

End
