

193rd Knowledge Seekers Workshop - Thursday, October 12, 2017

(One nation ID Cards and how to use and in disaster areas, In space how you'll manifest your physicality through your soul, There are no wars in space unless man tries to start them but that won't be allowed, I am from deep space and we travel by our soul and not physicality, How to get energy in the space, the new banking system, Alzar tells about the poor street kids in Iran, To release the Power unit would be disastrous to the governments, Alex beat up for money in Nigeria and making a Gans swimming pool for the sick, He compares the Gans to the soul of the man, Physicians have to be givers from their soul to help people, ,)

(:11).

(:20).

(:29). Shows One Nation ID cards, on the back your signature is for the World Peace Treaty not the bank account. Any doctors who can help with the catastrophe in the Caribbean Islands. ... (:33). Q: When can we order the cards? A lot of work going on in the background. We hope within 30 days. These cards are for life. All the information will be on them, you education and expertise that in case of need the KF can call upon you to help. It's not a one way need but both ways. (:36).

... when we go into space these cards will be needed. They will give the position in the galaxy and planet earth as where one comes from. A lot of creatures in the U carry these cards that way we know where they come from. The Chip can't be read in the U but pictures in the way they are used carries a lot of information. Rick says that if one gets lost in space then they will help them get back to the continent they belong. (:40). Everything will be embedded.

(:42). In Africa you pay through the mobile to the mobile of the person you buying from. This is part of the "blue phones" I mentioned earlier. This is part of the progress. We'll do a test run to be sure it works. (:44).

.. we have to make it so good that nobody will want to commit a crime to eat. (:47). ... we have the technology, we have the numbers to bring the change, and we have the financial means to implement our work. No one can call us terrorist unless we are terrorists of peace. We make it available to everyone equally the same. Members of the Councils from now on you have to answer to your souls and the souls of the people who bring you new knowledge, even the request for help is a knowledge to understand how we can help them, is how can I find a way by talking with other council members or by bringing it into the open, how I can help and bring the change. We know we'll reach 144 members on the UC in the coming time. (:49). To be a member of the UC or EC is not that I want to be a volunteer, it will take all of your time and you'll be called upon to serve through your soul and whatever else it takes. This will put a lot of people to test, even the present members of the UC who came in and now will become full time.

(:51). Collectively we'll achieve it, not to make mistakes of to be in a rush. ... there is no point in putting man in space without understanding the knowledge that was given to him. This knowledge was given to the human race from outside and if he goes into space without knowing how to turn left or right, to find for or to interact. As we learn more and more space technology we'll start teaching the ethos of the U. How to manifest yourself, to access whether you can be physically present in a given position in deep space. What do I do when I reach a position in the U, I feel it through my soul peaceful, I feel through my soul that there is somewhere I would like to have a look at, somewhere pleasurable to be in. I find the balance in peace in my soul, this is how in the U we know where we can manifest ourselves. When we arrive at a destination the

physicality will not take shape the way we see it, we feel it through our soul, not taking or giving too much, so it means this is somewhere I can exist. If it is receiving too much it means (:53). I can't handle (or giving too much) it means this environment is not for me. Maybe I have to go to deeper levels of my soul to be able to see what is here, what I can see, how I can serve, be positive in the environment that I am in and don't just become something that I take from the environment. In deep space we work only and solely through our soul, we have passed the point of physicality. The maturity of understanding of the soul. We would like to reach a point in ?? certain position even if there is no physicality of the start or the planet. The man has the understanding that he always has to land somewhere and to get out and do something to show that he is there, the way we say we landed on the moon or the mars, it's over. Any point where your soul feels comfortable to exist in and see, is home. There is more beauty in the non-tangibility line of the vision of the man of today than man can ever imagine in space. We you are traveling in space and arrive somewhere, ??? you feel suddenly something like a wind of peace, this environment feels good, I want to see what is here but there is no place to land, no moons or planets, but life exists in that strength level, all you need to do is to want to rest, to explore, (:55). you increase your M fields, by increasing or decreasing your M field you'll find the interaction phase, at what level the physicality is understanding, if you want to transfer yourself into a physical entity to be able to see. Or you'd like to see at the strength of the eye of your soul, which means understanding the environment, when you come to these points you release from the soul huge amounts of fields of a given strength, it's like pulses, at what level you see, you feel distance, visibility, tangibility of the soul, and then you access whether you would like to be here. It's not taking too much from me, the gap to my soul to the manifestation of the understanding of the environment is maybe 1 meter or 100, I can sustain 100. On earth we can't sustain over 100 or 200 kilos because the body can't carry the weight on this planet. So the distance from the soul is fixed by the size of the brain and what it can do in respect to the G and M pull of this planet. In the space it's the same and you have to understand the limit and I don't want to give more because it will endanger my soul because it endangers my existence. So you find yourself a point and distance of manifestation, then you have to understand whether or not your soul will survive. I see through myself the color of me in respect to the environment and there is a zone which is a danger zone which means I can deplete, (:57). and not receive, it means I created such a field that I am not receiving through my G pull so I have to strengthen or reduce my strength in manifestation, then you'll find peace if it's comfortable, if the emotions of the soul don't create the winds of MG fields within the structure of the soul that it disturbs the working of it, then you'll manifest yourself. Or you become visible or you make in the condition that the environment becomes visible to your eyes, the eye of the soul and not the physicality. You can still go in deep space through systems, what you call the spaceships, but at the end of it (the journey) the systems you produce for these SS will carry the same knowledge, the same process, but collectively much stronger deeper. We have to understand how you open yourself to the understanding of where you come from, if you see you, come in touch, you feel another being. there is no sign language, or other languages, nobody understands English, German or French, you speak through the language of the soul, as we ?? thought before. The Universe is a peaceful environment unless you get yourself in what I call a MG field turbulences which are dynamic because another condition is getting created, then (otherwise) you are 99% safe. We have not seen any wars in the space. (:59). and I hope the human race doesn't start (spread) it either, and this is part of this teaching. As we saw the US President's speech shamefully spending 700 million for military application and not for

feeding the nation and the world brings a lot of pain. In the space, 700 million would be spent totally on creating more peaceful conditions for the U. It's only man that buys tools to kill more than he thinks he is peaceful. There is no terrorism in the space, unless the man gets in and tries to terrorize. And (if he does) it will be handled with very correctly. There are no tools for war and there are no foreign policy for peace. You travel with your own soul and you are responsible, there are armies because when you make a collection of the souls they all work according to the level of the peace which they all carry. Collective souls traveling together in the space like you travel together in the airplane is only peaceful. It means I don't take because I have what I need. I interact with you because I want to learn from you and because I want to take from you. Man is a taker and he has to change into a sharer and this takes a lot of understanding in how we share and understand. **In the space there are no wars**, even though a lot (of people) would like us to believe that there are because it sells a lot of stories. (1:01). **I come from deep space and I haven't seen any. It is our soul that travels and not our physicality.** The process has to be very clear, when you reach a point in the space and you feel through the center of your soul, you can extend your soul to the edges of the U and feel the totality of it. The time of traveling and seeing the horizon, in which the horizon of the soul of the man is the boundary of the U, and not the curvature of the planet earth. We have to learn this. What I teach is the Universal Community, which man can't understand most of it, but he can imagine what could be available. It is available and not something to be, but the knowledge of the man isn't advanced enough to see it. **But those who have knowledge of their soul can see (it) and operate. We all know the knowledge and it's for us to take the shackles of limitations and prejudices of wanting to only be on earth. The only thing that restricts us is wanting to only be on earth.** If you open the eye of the soul you'll see the soul of the U. This is how it works in the U. When we go into deep space how do we understand another soul? (1:03). How do we work with another soul. Are we going to keep with the habit of the man to take or go by the habit of the U which is to give. A lot of you have not understood this and this is why you are failing in the production of your systems. Because you have taken the whole principle the wrong way around. In the coming time we'll teach you more about it. recently I was told that I show a lot of "green gardens" and was asked if I can show the path to them. The path to what I call the pastures is the understanding of the soul and not a method of how to make a coil or a Gans. I have said many times that when you make a Gans don't look at the physicality of the Gans, which 99.99% of you do, but **look at the interaction of the fields which the Gans' produce, then you'll understand the interaction of the fields of your soul.** Because when you can feel the interaction of the fields of the systems you made it means you look at it and touch it through the strength of your soul, not the physicality and tangibility of the Gans or the body of man. This is the difference between the true man of God and the true man of physicality, and you would like to see the God, and if you understand the creation, you understand the Creator sees through the soul. (1:05). and not the physicality, which he takes in any dimension anywhere in the U. The Creator doesn't manifest Himself as a human on planet Zeus, but will be the physicality of the man there. This is what man thinks and what he gets, he makes (space)suits for it, and tries to confine the body in different shapes of spacesuits, because he doesn't understand that he has the freedom of the soul which doesn't wear suits in the depth of the space of the U. When we understand the reality we'll gradually become the creatures of the U. **What do we do in deep space when we see our soul needs energy, do we go and rob another or do we give from our higher strength that it allows us to receive the strength we need by movement, by changing the position.** We saw with the

magnets Rick showed a few weeks ago, when you put a magnet in a system the other magnets move. But you shouldn't look at the physicality of movement, **look at the fields that move at the point you put the magnet in, what you'll see is that it receives much from many with a higher strength, but it will give more through its lower strength in G field.** This is how we absorb fields in the U. From what I have seen in the teachings is that man's knowledge has not matured enough to be able to understand this. (1:07). **I explained this in many of the teachings in respect to the banana, the more of it you peel the more beauty and energy is released from inside,** which means you have access to more bananas to eat. The fields of the U are the same, the more you take from the outside which is protection, the more you receive from inside, the G fields which the others are there to give. This is the way the soul of the U works and man has to mature into this knowledge. It's not something you see and grasp, but you have to mature not only to grasp it, but also how to use the knowledge and how to appropriately bring it into the interaction that it gives you what you need. Those who get educated and slowly mature in the operation of your soul will test (this) and you'll see. **You need 2 entities of a large difference in field strength of G and M, that the interaction of the 2 leads to the production of matter state or field state. We see it in the operation of the sun and the earth, the sun is hugely powerful and the earth hugely weak. The interaction of the weakness which has become matter state in interaction with the fields of the sun.** It's like a knife you put on the grinding machine, it creates different size of the sparks. The interaction of the MG field of the (1:09). earth and that of the sun creates 2 repulsion forces, which are the fields that are coming out and 2 fields that are going in, this keeps the distance, then it creates M in what has been reduced or what it needs for one to reach the other, which creates a G, and in that process the sparks are ?? little part of the same, one spark you could say is H, the bigger spark (when you put the knife to the grinder) is the gold. Now if you understood the teachings from the beginning, the soul of the man is the sun, and from the teachings of last week, every element, cell within the body carries a soul, if you can gather together those souls who are so weak as one energy in the palm of your hand, now that the energy that you have created becomes the earth, the interaction of the sun (soul) with another sun but in a lower strength, which is the structure of the soul of the elements of the body of man in the hand of the man, becomes the earth, now ?? divide it, the emotion, which is the interaction of the fields of the physicality in interaction with the fields of the soul, ?? recreate the entity which the emotion wants, if the emotion wants a cancer in the prostate in creates that, or now it wants gold in the hand (1:11). this is the wisdom of the U. **This is the only time we have seen this wisdom which was just touched by or used by 2 people, Buddha and Christ,** one in physical and one in intellect. Why do we need to understand? Because then **in the interaction of the soul in the space with the dimension of physicality, you create the space within your soul, or you create the entity with the interaction of the fields of your soul with the environment and you manifest yourself.** Blessed are those who understand, this is how easy it is. You are looking for SS to fly, but the SS of the man is with the soul of the man. The manifestation of the physicality of the man is his weakness. If the man learns to travel the spans of the U with soul then there is no need for a SS, because the SS is the physicality of the man. I am the beginning and the end, the beginning is my soul and the end is my physicality with the wishes of my soul. (1:13). This is part of the teachings and those of you who have understood the past few minutes you have found the key to the U. We keep on teaching it in the simpler language and simpler versions until one or the other rings the bell of peace in the soul of the man. Try not to work with the Gans (as something physical), but try to understand the interaction of the fields of

the Gans, then once you have understood, then you'll understand that the Gans is the soul of the man, and the fields that it emits is the ?? fields that will come. I explained last week to the doctors that the **physicians have to be a giver, and not a certificate on the wall. That he is a lover and by the interaction of his soul with the physicality of the man gives to the point of his need, what it needs to find peace with its soul. Then the cancer will be gone within seconds, diabetes won't exist**, if my wish is to give you an arm I will create it. This is what the physicians need to understand because when you become a physician you become a lover of the creation. This is what it means. You sign a paper in the university when you become a doctor, but you serve humanity. Now learn that the signing has to be with the soul of the man, then you serve the U because you have understood the process. (1:15). Which one of you wakes up in the middle of the night or early in morning to help to alleviate the pain of another man, doctors do because they sign themselves to it. The father does the same to care for his child, he does it out of the love. Every man has to be a physician for every being in the U. Now you understand why I always emphasized loving and giving in my teachings and to give more without conditions. This is the essence of the creation. What is important is not what I receive but what I give, then we become true men of space. When we understand the totality then we move on and advance in the knowledge of peace. Some of us have to do what we do for the others to learn from it. (1:17). but do we need to understand that we do not need to learn. We have to understand the true meaning of the U and the teaching on the Gans was one of them. You all got baffled and puzzled at the Gans' and what they do, but one thing you never looked at is that the Gans is the soul of the man. It was for you to see an example of your own work. You are too physical, try to work beyond it, and try to understand the interaction of the fields rather than the presence of the Gans' water or the N material. You will have whatever you need. Try to understand what the Gans does in the presence of another Gans, but now change the Gans into fields, then your knowledge becomes complete. You have to understand the totality but be aware that you have a physicality, but do not get confused by the understanding that the physicality behaves this way, but that the fields have made this condition for it to manifest itself in this way. Find the operator, the source and not the end. Man always looks at the end, this is why in KFSSI we have no exams, because in the present education you have to see what you have learned at that point, but no one looks at how you might use the knowledge in the future from what you have learned, this is the exam and not passing a test, not creating a physicality to confirm that I learned (something). We all learn everything but we use it when we need it. In the first days of school they teach us how to use a ruler to draw straight lines, but how many of us carries a ruler in our pockets because we might need it one day. Once we know how to draw a straight line we can pick anything up and use as a ruler. This is what has to become the knowledge of the man in the space, we teach you so much but the time you need it is the time you'll use it. (1:20). It's like with banking card you don't continuously leave it in the machine, you take out the card when you need to use it to get money out. We have to learn this from the process we brought that the physicality of the matter into N then into Gans and the interactions of it in different ways. We have all the knowledge, the time we need it is the time we use it. When we learn this then everything will fall into place. You have all the knowledge if you live somewhere cold and you need warmth you have the Gans' to interact with, and once the warmth is created you don't consider that I made this or that, because it works in the background and creates the condition you need. Over the years I have taught many different ways to do the same thing because it enlightens the soul of man at different strengths, ways and times, but the essence is the same at the end. I am a lover of peace and I do whatever

possible to let my other side know how much I love. I love peace and through the teachings I'll create all the conditions of the different strengths needed by the different souls that all will become peaceful, but they have to understand why, and what is the benefit for the others when I am peaceful, not what is there for me to get (1:22). to become peaceful. In the past half hour of teaching, what I explained to you about space will take you millions of years to understand if you are not enlightened, but if you are enlightened then you have already become the entity or being of the space, because you have learned the teaching of space and you have practiced it. **The teachings from now on are very short, but there are a lot of different ways to open it and it depends on how and what you understand.** Any questions. Q: will the new banking system rely on the old fiat system or the new digital decentralized block chain technology? (1:24). The way we see it, we work of Internet Banking and not relying much on the machines that you have to physically carry notes with you. As One Nation we don't have different currencies, it will gradually become non-tangible. We have seen "Bitcoin" and that coin, but we coin with the peace of man and not with the physicality of gold or whatever. There is no need to have different systems or currencies. If locally they understand and accept they'll change it, but you'll find out because it's a free understanding of totality a lot of things will change and it will go very rapidly. The new currency will be one of One Nation and a lot of people will find their own way of what unit it will be, and a lot will understand that I don't need units because I don't need to pay anything because it's from the same bank from one pocket to another. I need it and it's there, or I grow plants because I love to do it and I respect the plants and animals that live with it because I know I have everything with the card I carry. The incentive is not which machine but how to create the peace (1:26). and knowing it is there if I need it. Alzar talks about poor kids in Iran. (1:28).

(1:32).

(1:37).

(1:44).

(1:47).

(1:50).

.. The structure created in Europe with social security has become the noose around the neck of (1:54). governments because they have forced their own nationals to become the thieves of their own nation. The taxation and the process of using it is wrong. We discussed this with 2 Ministers very recently, **they asked me why I don't push for the release of the Plasma Power Unit. The effect of it on European economy is disastrous**, you would have nothing to live with nor to put in your house the minute we launch it. What I explained to the Ministers, in launching the electrical system which can be used on electrical motors (we have already explained that). You would deplete your nations of millions of dollars of fuel tax revenues immediately. The effect wouldn't be next year but now. If you put 1 million generators in Italy along with the car units. Each car pays on average 20 pounds per week in taxes ... within days the national governments would collapse. (1:56). because they wouldn't have the money to support the roads, pensions, social security and the rest. First we have to establish the One Nation banking system we are talking in the background with banks to join us to become part of this One Nation, because they can't sustain the payments on national securities. The biggest payments are to the military and national securities, it means paying the pensioners. I have proposals to a couple of nations how we can change things. ...

.. the biggest problem I have with releasing the power generators is the destruction of so much (1:58). but some of it is good, but the loss of national incomes (on energy) which now they have become totally dependent. Mrs. Thatcher did this in the 80's increase the taxes on fuel to pay the debts of the nation. ... (battery failed) .. (2:00). People asked if we could released the power units just in areas needed for disaster relief, but it will leak around and the world, we saw that with the MaGrav Units people opened them up, and then it will create mayhem. ?? the release of the plasma battery ?? (2:02). .. We have left a number of units around the world that if anything happens to us they'll release it, I have made sure that this time no ransom is taken ..

.. the beauty of it is that most of you who have made the Gans' have in front of you but you don't see it, it's amazing that it is erased from a lot of you, from your understanding. Maybe it is the wish of my soul that it will open up when the majority of the human race is mature with it. It's not something strange from the ?? man. the structure we have to understand is that we'll change everything at the same time. As I said at the beginning we have responded, even though I have a lot of problems with what the Canadians have done to me personally (jailed in airport), but I close my eyes to it, because of what I have heard from the new PM of Canada. We'll respond accordingly, up to now we walked away from them because we were not sure of the governments behavior. The new PM speaks peace, we'll respond with it. ??? investment in indigenous people ...

(2:04). KF Manufacturing Canada is investing in indigenous people, okay they missed so much but now they get to the top. This is part of our work.

(2:06). .. the running of this planet is the soul of the man. I was told the master has come and you'll watch from the sidelines, those who planned it have sht to themselves in the ooft. The one who was intermediary was put out. The beauty of life is understanding the life in the U and not on the village planet of earth. We see in the banking system abuse, child and human trafficking and governments sponsoring trafficking because it brings them (whatever), it has to stop. (2:09).

(2:15). There are 100 to 150 million people ofllowing the KF, I did all the teachings now it's time for you to change. Q: Alzar asks about the change to space, that a time is going to come and all the kings are going to disappear. You see Alzar you are still looking for the physicality, **if your soul has managed to reach that point that you talked about in Iran, you have already ended the kingship for your self you have become equal to the others**, there is none for you (you have become one). We are equal to the others. (2:17). Q: I understand that, we are trying to get into space?. We are already in the space, we are trying to join the family, this is the point. You go to Iran to show the brass that you are from America, we show the end of kingship through our behavior and through the soul. It's understanding that all the souls are equal to each other. Then the others will join step by step. This is the change. When one changes the other also change. .. (2:19). You are already one of the first people to accept the end of kingship. .. when you don't want to be a part of you can promotoe your own ??? (2:21) (2:23). Q: why did you choose plasma as the name for this technology? Yes, it's very easy for me, I am a nuclear Physicist and part the structure and teaching of the nuclear industry, we always speak about magnetic field containment, if you look at the proposition in CERN or whatever. A plasma to a nuclear physicist is a soup of fields, but to a doctor is what you inject (blood ?). In the English language it means the essence of freedom to be able to have, this is what I understand as a N Physicist. It's the freedom of the fields for them to be able to do what they like. The plasma is the freedom of ??

what you get in the hospital as (2:25). an injection when your body has a ?? It's what influences the body to serve. And there is no more appropriate word then plasma in the N physics, where the energy is free and traveling in the space dimension of the magnetic field itself. This is why we use the term plasma. The common language uses it for ??? It means the transparency from the transparency of the point of origin that it serves or gives. It's a natural process that we are taught in the nuclear industry. We can control or contain nuclear material by heavier material or by ones that can slow down the neutron, but if you look at it, this is what I had a problem with my professors, what we use as intermediaries to slow down the neutrons or whatever, it's only a magnetic field, nothing else, it's not that w put moderators, reflectors or absorbers in the nuclear reactors, it's just how do we pack these fields. I can stop a nuclear reactor leakage by creating heavy fields, without any matter, we do this now in the Fukoshima situation. It's understanding that plasma in the freedom of the fields and how we want to compact it. (2:27). This is why it was chosen and it's a correct terminology if you understand the true meaning of the nuclear industry. Alex from Africa. You have to speak, how is your health, he is a member of the EC for Africa. Everywhere I go there is misery and I hope we can contain that one way or the other. (2:29). I have been trying to make a plasma swimming pool in the SSI compound in Nigeria. We need about \$20K dollars to complete the project here. It's a PI swimming pool for health, when you go swim in the pool your health problems will disappear. Alex I'll pay for it, the KF will pay, it will be in your account Monday morning. Thank you Mr. Keshe. (2:31). Have you recovered from the robbery incident? I was beaten with the guns and I still feel the pains all over me. I have the pain pads on it. (2:33). He shows the swimming pool, they're embedding oofd Gans' in the walls of the pool. Are you using the same principle as I used for your Malaria? Exactly. Okay. ... Alex was taken by gunpoint a few weeks to rob his account and beat him up. (2:36).

(2:46).

(2:52). Lynn and plasma energy station ...

(3:01). (3:04).

(3:07).

(3:12). Mr. Keshe has to leave.

END
