

194th Knowledge Seekers Workshop - October 19, 2017

(Intense spiritual talk 1.5 hours, Man needs to learn about the energies emitted from his soul, The physical part of the teachings have come to an end, The micro and macrocosm and our soul can be compared to the sun of the solar system and the planets are like the organs of the body, and the sun confirms its physicality through the planets, The fields of our soul reaches the inner sanctums of the universe, our souls are like the stars in the sky, Rainbow and the interaction of different field strengths, Understanding our own soul will allow us to enter the space community of the universe, This time the human race will reach the point of maturity, The soul is so powerful it creates the body and it can also feed the body when we understand this then we don't need to kill anymore, Prayer means banking in the "central bank" which is the soul, One soul can change the totality but the rest have to be will to receive, The cloud traces in a clear night sky are energy transfers of the universe and we can learn to tap into them to feed ourselves, It is my body and soul that have to accept the energy of the Gans it cannot force itself on me, When the souls reach the point of knowledge of itself they'll amalgamate into one soul, ,)

(:11). .. we confirm our existence through the matter subjects, making matter state systems that are dynamic and can show us something. ... **Man needs to learn of the energies emitted from the center of his creation, called the soul.** Do we need proof that the fields emitted from our center, our soul, comes from the matter state physicality of ourselves. Is it any different then the machines you have made. (:14). Pl patches, MaGrav, Pain Pens, or have we at so early stages of this knowledge, drawn the line, this is as much as we want to know, we are happy with a Pen, coil, and some energies and that's it. **This is where most of the teachings have to come to an end, that is in the physical state of matter. and we have to move into the next step, which is the emissions and interaction of the fields and going beyond the physical state which we have accepted and educated ourselves over centuries and thousands of years, not only man but also the other creatures on this planet,** any other being like the plants, fish, or whatever. **We have to start trusting, understanding and developing the interaction of the souls, which is the inner strength of any being,** which is the star, the center, and the creator of the totality. What we can't see in micro we see in macro, and what we don't see in macro we see in micro. Then we understand how we should comprehend and where we should rejoice in the existence of the soul of the man. So many of us speak about the sun, the soul of the man, and reaching the essence of being, it doesn't matter in what state. (:16). or which position in the U. **For those of you who haven't understood the operation of the soul and you need to confirm it, even though it is within you, it's very hard to reach. You can look into the solar system, your soul is like the sun and the radiation of this entity leads to the creation of matter states of the different parts of the entity.** Let's say the soul interacts with its own fields and the interaction of the fields which are outside dominating and conditioning the size of its position in the galaxy, in a given position leads to creation of the earth, let it be the heart of the solar system. Even though the soul, in which the sun still exists, the heart still beats. For example, let Venus be the kidney, or put something else in the place of heart with all the subsidiaries and the veins and flows of the fields. **In essence the soul of the solar system has manifested itself in the form of planets and moons to confirm its existence and in that process interacts with other stars, solar systems, galaxies inside the system of the U.** It's not that it is just the sun on the wings of the Milky Way, its existence allows the field coordination

of (:18). of the Milky Way even though it's so small. Like in the body a scratch, boil, or a little tumor in a small part of the body effects the rest of the existence of the man, so does the solar system in respect to the galaxy, and so does the galaxy in the structure of the U, and the U in the structure of the unicos. We have to understand how the fields of the sun in emitting from its center leads to the creation of these organs, these conditions which we call planetary or moons or a cosmic dust or whatever e call it. the earth would not exist where it is if it were not conditioned by the conditions of the galaxy, so it has manifested itself in that condition, because the forces of the galaxy still pass through the earth, solar system, the fields of the plasma of this structure, so do the rays of the U pass through the body of the man. We have been brought up to think that just because we have a skin, we have contained everything within and nothing else goes in, but our body is nothing but a sponge for the fields which pass through the U. We stand outside and watch shotoing stars the way the fields of the plasma enter the solar system slows down and then in the atmosphere of the plasma of the earth reduces enough that it manifest itself as a light (:20). traveling for billions of years in the space of the U ad it changes its condition of the matter state to an energy of light, what we see. So it is the same inside the body of the man, if we could sit within the skin of the man we would see many shotoing stars, the way the energy passes through the skin goes down (reduces in strength) and then it releases its energy, its manifestation of creation in the U within the manifestation within the body of the man. How do we feel it, react to it. we have to understand this within the depths of the space, what happens to the fields of the rays which pass through the soul of the man. **The soul is like what we call a Principle Matter, its in the center, it's created to absorb certain strength fields that confirms and guarantees its existence, once it is established. So what we see in the depths of the U, we see in the soul of the man.** For many of the Knowledge S this is the line which they can't imagine they can pass and understand. But this is part of us, our existence, and a combination of the confirmation of the existence of souls and the reduction in the strength of the souls that leads to the creation of every entity on this U. If you stand still and think, on the planet earth we have a crust, interaction of physicality's, islands, oceans, land parts, and everything else. (:22). When looking from outside this U which part of the earth are we? Are we part of the magma or part of the shell. Are we part of the inner soul of the entity? But how much of the reality can we understand and how much would we like to understand. The soul of the man is (like) the sun, he radiates its fields, at a certain point with the interaction of the atmosphere of this planet creates a boundary, which we call the body of the man. **At that point ?? it life doesn't stop, the fields of the soul still spreads across the U very much like the light we see from the stars in the U.** If we could make systems in which we could see the faintest lights in the U then we would see the light of the body of man as one of these stars, because it still radiates . We see the soul of the man as one of these stars and in ?? condition in different part ?? fields the strength of his environment it manifests itself as the solar system, galaxy, and the universe we know. So what we don't see in macro we see in micro. As we see light reaching us, as they say billions of light-years away from us, it's the same with the soul of the man, it radiates, it emits its fields and it's for us to start to become mature in not looking for the physicality of the man but for the interaction of the fields of the soul. (:24). **In the space we have no physicality but we carry the soul. As we enter into the next phases of the space technology man has to become mature to the teachings.** It is part of understanding the totality of the creation and not being stuck with the material conditions of the present times. In many teachings you all looked for the Gans or a material that you can confirm that this is a CO2 or CH3 or whatever, and I keep on emphasizing look for the fields that they create,

what does this star emit and what does emission mean. **Look at the sun, it emits fields that we call light when it interacts with the atmospheric condition of this planet. It stays in transition, in the higher speed of motion and in that position travels the span of the solar system,** and those fields that are higher than the structure of the resistance in interaction with the other fields of the U it travels through into the other solar systems, into the depths of the galaxy. **The fields of the soul of man reaches the inner sanctums of the U, as it came from there and shall return.** We have to become educated to move on to the next step. (:26). I see a lot of problem for a lot of people to go through this transition because having a cup with a Gans in it is good enough, I am happy with it. Those who want to go to the next step have to understand the position of the soul, and how the fields of the soul in interaction with the other souls creates a dimension which they have never seen before. **The physicality of the sun and its surface doesn't finish the existence of the sun (there is much more to the sun than as it appears physically). the lights and rays it emits crosses the boundaries within the shell of the solar system and then interacts with other solar systems that at the point of manifestation shows the structure of the soul of the planet, and the structure of what we call the solar system. The sun itself is a matter of physicality, the ?? of the solar system is the boundary of the soul of the planet, the whole of what we call the star. Every entity has 2 dimensions and in different fields and different strength interactions it shows one of its attributes. It's very much like a rainbow,** at different strengths (you have) different colors, the interaction of the light doesn't stop at one line of the rainbow, but different strengths of it creates different colors of it. So it is with the soul of the man. The earth is the physicality and the interaction of different field strength (:28). of the atmosphere itself creates the different lines of boundary in what we call a rainbow, the different colors. So it is with the soul of the man, so it is with the sun, so it is with the rings of Saturn, which we see but don't fully understand, very much like the rings of Saturn. Every field interaction creates a boundary of the fields, without they are the matter condition, but a field condition. Where is the soul of the man, in interaction with the physical condition of the fields of the planet we have created the physicality of the body, but the soul and its fields goes beyond the shell of the skin. How do we detect the rest of it. **how do we watch the rest of these fields interact with other souls, with other fields, do I become purple (standing) next to another soul, but yellow with another soul. What does yellow mean is it further or closer to me, is it of hate or love, and can I bring it closer to become purple that to me it is safety,** I allow a certain amount of space closer to me. We have to expand understanding of the operation of the soul. And every tool to conform (its existence) is within the reach of the man. We know but we have never understood. Many people speak and show, this is the M field, some call it aura (:30). but does the aura of a man finish within a few inches? It's that the interaction of the soul of the cells of the man with the atmosphere. the soul which is within the brain has its own rainbow within the condition of the atmosphere of this planet and within the solar system. Does the rainbow confirm the existence of the planet in its physical state or does it stay, the fields of the planet in interaction with the fields of other matter state strength within the boundary within the field of the planet. How come we see it and it's not there, it's illusive but we observe it and to us it's so real. Planet earth is kilometers away but the fields stand in different shape or colors in the atmosphere of the earth and in reality beyond earth we see rings of different strengths. **It's the property of different field strengths which creates different color atmosphere in the U. What color means the distance ??operating from the soul,** what color means the position of the environment in that respect, then we understand the reality about the soul. this is the

step we have to take. **Everyone has shied away from (:32). talking about the soul, which means we never understood our own creation and now we understand that we have to study it and become mature in understanding it that it allows us to enter into the space community of the U. Without it (this knowledge of the soul) man shall fail in the space.** This is what all these teachings are about, we are maturing to the next level irrespective of what the physical matter state demands. **Those who mature to the reality of the creation and search for understanding the totality have to look into the fields of the soul's interaction with the rest of the U, then they'll see the depth of the U, to understand the operation of the U, and their own position and in respect to and as a process of the function of their own soul.** Man has been brought to this point many times but he shied away from it, but this time there is no shyness. **This time the human race and the rest of the beings on this planet will reach the point of maturity to understand the totality.** How do we interact in the process of interaction of the souls, and how do we identify our own position ourselves, in respect to another soul. We **have become very familiar with physical interaction, (:34). we stand in a crowd and we make sure nobody touches us, this is the boundary of our physicality.** But have you for a second ever thought, my soul is crossing his or her physicality and the guy next to her and beyond because the physicality of the matter state is me in this position, but my soul expands the whole lot (it spreads throughout). Do we want to mature to understand that when one soul is existing amongst the other soul and their physicality is in misconduct, how do the other souls which are within it, don't need to feel the physical misconduct, but see it through the strength of the body through the soul. Nothing is hidden from the soul and those who become wise to it will understand the totality and this is the purpose of the teachings, to allow you to understand the existence of **the physicality doesn't finish with the boundary of the skin.** You stand in a bus with your child separated from you by 3 or 4 other people. You see and communicate with your child through your eyes, and there are people in-between. Your soul doesn't jump to the child, (:36). it goes through the people in-between, because it interacts with you, this is the reality of the existence **and in that process you reach your child's emotion or the soul that it confirms to you, that I am okay, I am here, it doesn't matter that we are apart. In that process, the people in-between through the energy of the soul have come in touch with you, they become part of you** because in that process not only have you reached your child but you have gone through the souls of those in-between. **Once the man understands this, the color of the man won't exist anymore. It won't matter if one is black and the other is Chinese, a male or female, or a dog in-between.** We have to understand that the soul is color blind and religious blind, because it knows its own conduct and doesn't need a prophet. The soul is transparent because the others give and take from it even if the child is 2 spaces away. The sooner we learn this the less we'll spend on arms, and waste time for man to destroy his own physicality, as the soul in-between needs maturing, understanding and the space-gap of the 2 in-between, is the prejudice of man in respect to his own soul. (:38). We have to mature and look for as many ways as we can to educate ourselves, there are no universities of the teaching in the space and no professors of the soul of the man. We don't prophesize but we understand the totality because we don't need to. **The soul is the operator of the totality and even the physical body of man and the need of physicality.** If you mature yourself to the point of understanding, then I'll mature you to the next step. Stand still for a second and understand. **If the soul is so powerful that it leads to the creation of the man, then why does the soul need to be fed from outside the body. Do we need to kill to consume to confirm our existence or do we mature to the next**

level that if the soul is (the same as) the sun, then it can feed the physicality eternally. Those who mature to this step enter the kingdom of creation. (:40). This is what we have to move on to, this is the next step in the teaching to understand. We use Gans' to feed ourselves and meager matter states to feed the totality of the soul, but the soul has created such a beautiful entity called the body, and **once we learn the process of absorption from the fields through our soul we can feed this body of the man through his soul, without consuming any or killing** any (other being). This is the next step that we have to mature into. If the soul has created every organ to confirm its existence of its physical dimension, if we can absorb the energy of the U through our soul, through the soul of every cell, then we don't need to consume. **Or is consumption of the physicality confirmation of the weakness in the structure of the soul of the man, that it needs to confirm to the others in the environment that I need to exist and I ??** . Do we need to go through the space or come to understand once we comprehend the true essence of the creation, then we become true men of the space as our soul receives what it needs from its environment and in turn feeds the physicality of the body in any dimension and any space or time and at any points in the U. (:42). Many of the physicians have started talking about the soul and its evolution in their teachings, and are seeing the changes. **But the true physician of the man is his soul** and this is what we have to mature into, to understand that this soul has led to the manifestation of my physicality, that I can go back to it to feed the physicality without killing another entity or destroying another life, another soul. **For many of you, to accept the soul to be the inner being of your existence is a big dilemma**. Now you have to walk to the next step that you can feed the physicality of the man through his soul, then there shall be no war or killing. **Because in this way man will receive everything he needs according to the wish of the soul**. This is the next step of maturity to understand. Many of the Knowledge S created the water of the Gans' so they don't have to eat and just drink the water. Some have gone even a step further by sleeping within the fields of the Gans' and they can see they are being fed. But now go a step further and look at the reality and understand how much has not been understood. (:44). **That I am the Creator! I feed the body and I lead to the creation of this physicality in the atmosphere of this planet, so I can feed it too** (the body). the prophets of the past spoke **about prayer, which means feeding your own soul and banking in the "Central Bank", which is the soul of the man**. In some of the teachings I have explained that when you pray, that it is like the planet earth that was created in the boundary from the interaction of the fields of the sun and then it is re-collected and the earth returns back to the sun. What it released (the sun) is "banked" (in what) became the matter state of the earth and then in time it returns back to it (the sun). Because if it doesn't it guarantees no existence, because then it is lost into the space of the U and it will become the energy of the other entities of the soul of the other solar systems and galaxies. **Move into the final destination and then you'll understand more that the body of the man doesn't need to be fed, because it receives what it needs, and then through its own structure feeds its organs, that in itself it becomes independent of others. And then you'll become as humble as any creator**. This is what we target and teach from now on. (:46). In the deep space you understand that you absorb the energy from the U within the soul of the man and in interaction of the environment and atmospheres, with the field states of the position you are in you manifest yourself, and you also feed yourself. You don't need to wait for the water or be afraid to die if this planet doesn't have any, or needing food by looking for a cow for beef, or whatever, on planet "Zeus". You will feed yourself through the energy of the soul of the man. Then one will understand and the maturity of the soul should appear.

These are the steps that we have to go through and the way we mature to become men of space, without the spaceship or the shackles to the planet earth, without shackles to the environments that we have to manifest ourselves in. Our teachings have to be understood as the totality of the need of the soul and not of the physicality. **How many of us teach our children to look into their soul and into the conduct of their emotion in respect to the others. And to be vigilant of the energies that are emitted from them in respect to the others.** Many of you have made bottles and you put them next to something or put in something, (:48). or you take it and say that it creates such a condition. How many of you **have stood in a crowd and emit from your soul to the other souls and see how the whole environment changes.** If a small amount of water of Gans can effect the huge body of the man, can you imagine what a container of 50 to 100 kilograms of the Gans of the soul of the body of the man will interact with the others, now convert that into the soul. **One soul can change the totality but the rest have to be ready to accept, to receive it.** It cannot be forced. **When you stand outside on a clear night and if you have the wisdom of the light of U, you see cloud traces, which are the fields traces going from one to another spanning the sky, and we say there are no clouds, but why are there cloud fields, these are like channels, like the rivers we see on this planet.** This is the reality of what we need to exist. This is what we stand for, what we have to confirm. Once we look at the rivers and oceans of this planet, these (the traces in the sky) are the rivers of the U, field transfers from one to another. (:50). We become wise where to drink from the waters of the fields of the U. **We become wise in how to tap from these transfers of energies across the U.** In the time of the maturity of the man, very much as **you go to the rivers to drink, you'll go to (these) rivers of the fields of the U to take from of what you are short of, what you need. You tap into them and at the same time you put back into them what you don't need.** The reality of life is not just understanding the physicality but understanding the totality. The sooner we mature the faster we grow to understand the reality of the existence. This is the process and we have been shown the path but we never understood. "I made man in the image of myself." So I can feed the man also through what I have created. (:52). Those of you who were looking for oofd to take into space to guarantee your existence, now you have become a timeless and limitless source of life, but through the soul. It is important for us to mature to this phase of teachings, because from now on **those of you who are still entangled with others will still be there because those who come new will need teachers to be able to understand the basics of N and Gans and the rest. And those who understand the process of the N and the Gans and then move on to the next step, and those who taught have already moved up to the next step. This is a continuation of the ?? teaching until the totality comes to understand.** It's not that you just work with the N and Gans, now start interaction of the fields and understand them and don't just look at the CO2 water when using it, it does this. **Understand that it is my body and soul that have to accept that energy, it can't force itself on me. So I am a feeder, because if I don't give to that CO2 Gans inside the bottle, it can't give me what I need. So I am the essence of the creation. I create the conditions of receiving, and not what is in the bottle** (the CO2 Gans doesn't, it depends on me). Most of you have made this mistake in your understanding. (:54). Because man is so physical that he looks at the small bottle, but he doesn't stand and look at the ?? jug, if we mature in this process, and the faster we do the easier the whole teaching becomes. But we have to understand all the phases of it, and then that **Power Unit of plasma energy you are looking for sits within the soul of the man, it'll give light, heat, oofd, and one point which you all have missed and maybe it's time to open it up, all of you have been waiting for the Oasis System**

, **the Oasis S of the man is the soul of the man.** this is what you have missed and by teaching and understanding we are bringing man to the oasis. **The promised heaven is the point when the man understands the existence and true operation of the soul of itself.** The gates of heaven are the knowledge of the operation, **and heaven is operating through the correct conduct.** (:56). We teach in many languages, but in the language of the soul of the man, it depends on if you are in the orange band of the rainbow or purple, etc. , the color of the environment shows the maturity of the understanding of the totality. The one outside is more of the environment and inside of the soul. Once man matures to this point then you don't look for the physicality of the ?? body, you feel the fields and don't need to touch the field, then the every soul becomes the physician of itself, the desire of itself to manifest at any point in the U that it fits the environment that he would like to manifest himself. (:58). We have to understand the totality and in a 194 teachings, step by step I have brought you to this point. **The whole understanding of all the teachings has not been to make Gans', but to show the strength of the field that it leads you to the soul of the man, by understanding the fields that have been created that has lead to the creation of the soul.** Replace your soul with the sun and then look at the game **the sun plays on its own within its internal structure of planetary, and then look at the structure of soul which is the sun in the environment of the Galaxy, then you'll see the operation of your own soul.** "I am the Sun and the Sun is the creator of the light". This is what these teachings are about and the faster the human race (1:00). moves in this direction the faster we achieve peace, because then the physicality is irrelevant. **We compete to be a more shining star and not to be in the lines of the outer, but rather to the ones closer to the color of the soul. The beauty of it is that once the souls start to achieve this point they amalgamate and become one soul.** Don't forget that the **creation of your soul came from the mother which is the creation of the sun, which itself came from the creation of the soul of the Galaxy and the creation of the soul of the U.** The teaching is not about a patch or MaGrav, **it's about understanding the field interaction. The MaGrav System is the energy of the soul of the man, and a patch is confirmation of the boundary of his physicality.** You can't put a patch if there is no physicality. There are no factories, universities, restaurants, temples or churches in the U. **Those who mature to understand they decide what shape or color they (1:02). would like to manifest themselves in the spans of the U. Then in one rainbow you are black and in another you are white, etc.** The color of the skin of the man is the deception to the existence of the soul, as it confirms its existence according to the physicality of the environment. **In maturing to understand the operation of the soul ones understands the whole physicality as it is so low that it's not worth being entangled with. It's so much energy consuming, the part is there but it has nothing to do with my operation. You start ignoring the physical body and work through the fields** which are beyond the physicality and emitted by the soul of yourself. This is the maturity of time. Where **you understand there is a containment for holding the soul for it to be so that it can be and radiate, but the true life goes beyond the physicality, the fields which pass the boundary of the P body,** (1:04). Now many of you will start making machines to detect souls and their colors, where before you were happy with their systems of the aura of the man. You don't look for reduction in the strength but for the beauty in the colors of the souls in respect to interaction with other fields of the U, be it another man or being or another position or condition in the U that allows your soul under the decision of itself to manifest itself. There is no need for soul searching but for understanding the soul, it's operation and existence. **In the past times it has been kept far away from the man that he could not believe that he is**

empowered and in position of such a powerful essence of creation that he has demised himself to the condition of physicality. Do I need to make love in the physical body to enjoy and give pleasure to another physicality, or can I do it through the essence of the soul with another soul, which means giving unconditionally and then you become a lover of life, the creator, the god, as the Creator gave unconditionally by loving. (1:06). Man has become so physical that even the giving needs physical tangibility for him to confirm that he has given, where all he needs to know is, I give unconditionally, I don't need another soul in the condition of physicality to confirm my existence that I can give. In many research teams I keep on confirming to them to stop looking at the Gans and start looking at their fields. Until our own wise men in the research teams of the KF don't understand this, you remain entangled in the dimension of physicality. Go back to the teachings of these past years, I spoke about the creation of a SS that is made by one, and the creation that you are in control, that the pilot through his soul controls the condition of the SS. Now you understand the rhythm, the mystery in the words. The captain is the soul and the SS is the dimension which the soul decides to manifest itself. (1:08). The teachings in these processes becomes so mature that many of you will leave the KF, because it's too much too understand, I came here for a Gans for my cancer, but I found out that I can change the cancer with my own soul and emotion, myself, there is no need for a physician as I am the physician of myself. I have created the heart, I can repair it if I need to. Or have I become paralyzed in helping myself. We talk about Global Warming and Chemtrails and how they interact in our body, but stand still and look inside, what GW you have created through the interaction of your souls with the others, and what Chemtrails your soul has left, endangering the others. Man has to mature to understand the existence and operation of his soul, the control of itself in what is a creation of itself in physical matter. (1:10). Then man shall not kill.

(1:23). Workshop Closes.

End
