

## 195th Knowledge Seekers Workshop - Thursday, October 26, 2017

( , )

(:11). We have entered a new way of teaching, not a new way, but going to the next level of understanding. A lot of people couldn't understand because it has gone to a level of self-evaluation, -understanding, and self-trust, that we have the knowledge, power and confidence and everything and now it's us who have to make the decision. As I said in the past couple of days teaching, the transition from the matter state to the power of the soul of the man is one of the most difficult parts for many people. Physicality is easy we can reach it and touch it, and because (:13). we have made these senses we trust them even though they have oofled us. Now we have to trust our soul which is the creator of these senses and we have not been educated to do this, we have never been told about this, we were told it was something imaginary somewhere, but we never stood still and tried to think that it is within us. It is us. It's us who makes the understanding of these feelings, us who creates the emotions, who decides with the interaction of the other fields with the field of our soul, how to react. This understanding of ones inner being, what we call the soul of the man, it will be one of the biggest revolutions in the history of mankind. We had the Industrial Revolution, now this is the Soul Revolution, it is so powerful that it frightens many people, but it is so friendly that many nations, many people of the different lines of thinking will grasp and run with it, because it has the missing dtos, and now the story is complete. Many Messengers of the past tried to explain, but man was not ready for it. This time we educate from the base that now every man is ready for it. There is no gap in the knowledge, no point of ignorance, there is no point that we don't understand and then make somebody else a prophet of it to tell us. We become the prophet of ourselves, the guidelines for the standard of our own work. We become the true essence of the creation and with it we understand more. There are no tools, (:15). mankind hasn't created measuring tools for measuring his own soul and its power. The only thing he can do ??? call it a wish, or my decision, I can change, or I am the creator of the conditions I wish, but understand that the wish has to be neutral, it cannot be imposing. The decision can't be that I want it, it has to be (a certain way), because now you are in a mosaic of fields and all have to agree, and what is agreed upon is your share, because everything is equal, correct, and according to the understanding of the balance of the fields of all those who are involved, the wife/husband, the dog, the house, trees, plants, and now that we join the Universal Community every other entity in the U has a say in our wish. I like to take your wish, I don't need your wish because the fields you give , because if I take what I don't need then I steal and I want to be correct. For man to come to this point of maturity it takes a lot of understanding, self-confidence, knowing the master is me, trust in understanding that it is my soul who runs my life and not my life running my soul. We move away from the dimension of physicality but to use our soul to become physical at any point in the U as we need. In the U there are many nomads, those who lost their homes due to the interaction of the fields of the (:17). environment be it the planet, space of the U, the moon of the satellite or whatever. Because they never went through the full process of understanding the transition of the soul. They (only) went through the process of what you call the spaceship, but they never understood the next level which we are teaching here. Many of the human race will become passengers of the SS, because in the SS you create the condition which is relevant to the creation of the AA of the man on earth. In the dimension of the soul you travel the depth of the space in dependent of the origin, because you understand that you work within the fields of the plasma and not within that of matter state plasma. You give manifestation of yourself at any point, my

home is where I lay my head. I decide where I sit, where I transfer. The writings of Bahaula come into operation, the mutation of elements, we mutate to what we want to be. At this moment this knowledge is beyond the understanding of the man but as we teach gradually in time man will understand what to do with it. Those who decide to be man of the earth stay here to work, those who decide to become man of universe and travel within the structure of the planet earth?? preset condition of AA, we'll take them in SS, some might even go a step further. Those who understand the true meaning of the (:19). work of the soul, which is itself a star, they become a star within the span of the U, this time you decide the position, a ?? moon, planet, galaxy or a U. Transmission and transportation amongst the universes, this becomes easy because now you understand the inner being of the creation of the U. Not many will achieve, but many will pass, there are many in the U who have already achieved. In time man will understand the meaning of these teachings. We have to teach and set up guidelines. On the other hand those who want to be the passengers of what you call , UOFs, and those want to be the users of MaGravs and Power Units, or Pain Pads, that is the level of their understanding, there is nothing wrong in it, they'll catch up. .. You have to understand how and what state you see the state of your soul. I am happy within the matter state, I just need a little more comfort, I am happy to be without pain or damages to my existence, without being worried about oofd and shelter, or whatever. With this new knowledge there is a big problem for governments, the lifespan goes into 3 to 400 years, this is known because now you repeat (:21). you replace, you understand mutation, but you still want to be in the state of physicality. The present governments will have a huge problem with this extension of life. We have seen how life has extended with the new materials of the past century, the average lifespan is stretching from 40s to 80s and 90s, with the new technology of the Gans you'll stretch 3, 4 500 years. It'll become known but the problem for the governments is that the pension line is 60 years, I work from 20 to 60 or 40 years and the government pays for 400 years. You can see the flow in the structure of the society. It comes to the point due to the advancement of the T and what is to be introduced. the death rate will drop and birthrate go up. We will be productive into 2 to 300 years. Our number of offspring's will grow many times, the population will run into 40 to 50 billion in the coming time if man doesn't understand what to do with the new T. These are for the future governments to sort out, but at the same time it has to be looked at in this moment in time. New technologies gives access to new dimensions of life, it is us who have to understand it, this is why we have setup the new One Nation banking in the background. This way everything be set in course, it will be looked after according to how it comes. (:23). We have to understand what it is and how do we extend life, where does the mutation come and to what extent do we want to mutate. Does the mutation mean for me to be present the whole time or does it mean that I am present when I want to be, and the other time I preserve my energy, so that others can survive. I give that I allow through my soul that by giving I nourish the others and that is the purpose of my life. In the teachings of last week a lot was taught but not many understood. In time the story of last week, 193 will be understood, 194 will change the course of humanity once the man understands. Today we try to go more in-depth in understanding the structure of our own soul and the structure of its work. Those of you who have understood the structure of the AA, now we'll go into more details because now we have more time, ?? the doctors that have understood have gone deeper so we can open the path for them that they can expand their knowledge in a given direction as they choose. We do not set the course, we teach and it's your decision how to use it. Many of the physicians have started looking into the ?? effects of the soul and the see that they get different result then when they were just working in the matter

state of the body of the man in the matter state of the earth. We need to go into the next step of understanding the creation and knowing how we come to be what we are, (:25). and how we decide what to become at the point of destination. If you look at the AA structure of the body it is made of 4 basic elements which is the gaseous part of the body of this planet, but every planet, every entity has what you call gaseous, what we call flow field plasma condition, that means it has not changed into a matter state tangibility, but it has effects that it can change itself to what it wants to be. The C, O, N, and H are in the air. The condition of the environment that we create in for example the CO2 box, creates a condition for the creation of AA. What do we do with this AA, if we add Fe to it, it becomes blood. If we add Mg to it, it becomes the structure of a planet, then we can change different ways with it, and it becomes red or white flesh. We can mutate it by changing the condition for it to become the fish or the cow, or we can change it to become life without physical structure, but is a field of Pl which has no attachment to the matter state of this planet, what we call a free soul or entity above the head of the human race in the upper level of the atmosphere. If we can live of different strength of it we become passengers and life within the span of the solar system. If we extend it to understand it further we become in the galaxy and in the U. (:27). It's the condition which dictates the physicality and the faster we understand this the faster we can move on. When you collect combinations of field strengths and they come to interact they always create a condition, that we call a "common ground" that all can tap into. It's like a bank, if I have extra money I can put it in the bank so the one who needs it can come and take it. The other one who wants can put it in and take it out, and the other one says I sit in the Central Bank and you can come and take whatever you like from me because I give to everyone unconditionally. Another example is, in the condition of AA the guy who looks after everybody collectively is like the O, the guy who is a provoker of releasing the energy of whatever is needed, I come and release a lot of extra energy in the bank in mainly Nitrogen, but the N has to give and find a way to deliver that they all can be balanced, C plays the game, but there is a guy who is a spender, the young boy in town who wants to spend as much as he can, he doesn't care where he comes from, that's the game of H. So one gives and one takes, one gives and one holds on to, on this planet due to interaction of the fields of the U, the sun, the earth, leads to the creation of AA on this planet. Every part of the U has its own AA, its own level of the creation of life. (:29). And what you put in that AA, with it, around it, inside it, in its proximity it dictates how that AA is going to change and manifest itself, then that AA can mutate. The mutation of an AA in its environment is the key to its existence, to the life. If it mutates field strength and not matter strength, it can reach the strength of the Creator. What does this mean? The fields of the sun and earth are free floating, their interaction creates field packages, what we call for our convenience, the 4 elements of life, of prtoein. There is a variation in the field strength, but the package in the center is of the same. So you don't have an O, rather you have a Pl which is of the field strength bandwidth, and the interaction of different bandwidths creates different AA, which in interaction with themselves leads to creation of new field packages for those who free. What does this mean? You have field strength of H, C, O, and N, which with the interaction of the field strengths (:31). of this planet leads to creation of AA creates a new opportunity, because there are some other Ns, Os and Hs which are free but can fit into the O but they can't fit into the AA, they can fit into the N, but they can't fit into the AA, but the interaction of these 2 creates a new field strength which ?? it attaches itself to it. This is how life started on this planet. Now you have AA with Na, then K, now you have AA whose collective M field of it can be Ca, Mg, or K. Look at the structure you have a H(1), C, O and N, about 43 of one level, but in the matter state

we call it isotopes. Look at the isotopes of this AA, 14, 38, 41, 42, (Ca, K, Mg) now you can see that life doesn't need the matter state of the K, and the AA and the variation of the fields creates fields of Mg and Ca, (:33). in which now the interaction of this Ca with AA and different strengths of these packages of let's say Ca with AA, or K with one of the elements of the AA, can create a new life. K 40, O 16 you have Fe, the MG field of the Fe of the Earth ?? locked into this gives manifestation to hemoglobin, you do not need the body of the earth to create the condition. Now you understand the mutation of elements. Now you have a new game in town, a new understanding. Now let's play the game. You have the AA and K, and you have created next to it in conjunction with another AA the elements of the package, Mg, K, Ca. Now you start the advancement of the creation of life of a higher order. Now you understand the process of creation, you don't need the matter state to have the field strength, the interaction of the fields of the U can lead to any life in any position. Now you have the Mg which is created out of the interaction of the fields of the U (:35). with the AA which in conjunction with the H surplus which is linked to it and the O gives it liquidity. The blood you created, the hemoglobin fields now has a free flow which in man's world we call liquid. Now you can see that life doesn't need planet earth to survive or be created. the interaction of the fields in the U without a planet for the ?? creation of the conditions of life is absolutely normal. Once man understands the creation of mutation of fields man moves beyond the teachings of Bahua, and moves to the understanding of the teachings of Buddha. This is the secret of creation. This is the level of the understanding we need to have to be able to travel within the space of the U. Then a lot of other teachings of the past 3 years comes into play and a lot of understanding of the past now comes to bear fruit. When you created the AA of Fe in a PI state, and Mg and AA (:37). in a PI and field state and now you have the planet earth which carries the matter state field of this, and is much bigger and stronger, it will feed the weaker and lead to creation of life. Do you remember the 129 Tesla, a powerful source and a weaker one, in trying to feed it creates the flow, and energy absorbed pushes to the next step. Life on this planet was not created because the AA touched this planet, it was created in the process of transmutation of the fields of the plasma of the interaction of the creation of itself, with itself and with the solar system. If you understand this knowledge then when you go into space, wherever you lay your head is your home, because then you ?? walk through the field energy of the soul, which is the creation of the totality, then you mutate to the position of the strength of the environment that you want to be part of. This is one of the secrets of life in the U. This is way in the past teachings I have explained many times that you don't need a planet to exist, you need an interaction of the fields, and many lives exist in ?? of the universes and planets and galaxies where the interaction of the fields leads to the creation of the conditions (:39). in which a n entity can manifest itself as a creation of life without physicality, but the soul that can make the decision of what to interact. The soul of the man is that bank, and the interaction of it leads to the creation of physicality. What have you collected in that bank from the interaction of the fields, that it can show itself in the dimension of the physicality or the essence of the interaction of the fields at that point in the U. The teachings go beyond the understanding of the mutation of the elements, it goes to the mutation of the fields of the U which leads to life in any dimension, this is where the man of wisdom understand the true understanding of the work of the U. This is why in the past teachings I explained to the physicians, understand the work of your soul and work through that, then you don't need a Pen and definitely you don't need FDA, they have not managed to make a standard for the soul of physicians. They can control the water, milk, powder which you inject, but not the ?? at this moment in time for the soul of the man. We have

to become wise in understanding the work of the fields which we call the soul, the Central Bank, the Principle Fields, the Black Hole, or whatever you call it. It's important to mutate into the position. Those of us who don't (? do) understand will go to space, (:41). but they travel within the fields of the fields of the origin of life. They become travelers of space and once the earth goes through the cycle of life, they'll become the nomads of space as they'll have no home. If in that process they manage to understand the teaching of the past half an hour and the last 2 to 3 weeks, then they can create a home where they can lay their head. Because they understand that the center which is the creator, Central Bank, what you call the soul, will manifest itself into any dimension. We see many of these souls amongst us who have taken home on this planet. We are not alone and have never been. We are amongst those who understand the work of the U but have left it to the human race to mature, and now the time of maturity has come. We have to see the interaction of the fields and understand what it means to possess the energy of the life of the U and become the creator of the condition. When I say that you are the creator it doesn't mean that you are creating a U, but that you create a condition for your own existence that the soul finds its home, anywhere in the span of the U. The knowledge has to come from the essence of the interaction of the fields and not from the matter state of the ?? (:43). There is a huge difference. In the nuclear industry we see these but we have ignored it because we have never understood it. In plasma technology of the present time scientists see things but they ignore them because they can't understand them. Now for the first time the students of the KF can explain to the leading physicists that what you ignore are the interaction of the fields that you have created inside, and you are looking for a matter state but this is a field state of the creation. Now you understand why I always said that when you start a system, be it a CO2 box, a dynamic reactor, or the interaction of fields, pray for it. Give from your soul that it carries the intention of your soul, that's all it is, it doesn't mean that it takes you with it. But it takes from you those points which are advantageous and correct, that it can nourish, and find life. When you make the SS and the fuel for them understand the condition of the PI of the soul is the controller of the fields of the PI of the fuel of the system. My wish is my command. The step up in the process will take time, but many of the followers of the KF have reached that point, (:45). but they still have to work within the matter state to confirm to themselves that I (they are) am correct. They have not yet realized that they are correct without the need for confirmation. The intention, wish the creation of the conditions of the soul in respect the fields of physicality, and the condition of the fields of the earth has already made the decision according to my wish and manifests itself as me. Those who can go a step further in understanding of the present teaching can go very far, have no fear and rejoice that you can understand more. Have no doubts and test your understanding. Use your energy for peace. What does peace mean? It means giving to the soul the level (it needs) so it can find its balance. It doesn't give too much that it brings its demise, and it doesn't take too much that it makes itself non-operational and blocks itself. Try to understand the interaction of the fields of your soul with that of the fields of the other souls, then the physicality is irrelevant. For those work in the world of medicine, or the conversion of the pain and suffering into easiness and comfort and no pain. Understand one point that I have within me what my patient in front of me has within him. This patient (:47). can be across the table, in another city, or across the U, I hear the call across the table by ear, in another city by telephone or communication line, and in the space it is through the soul of the existence. I know one thing, if it is from earth it carries the same process and system as myself, it carries a kidney, liver, blood etc. If the liver is affected, I also have a liver, but liver is a combination of the interaction of the fields and it has gto the soul, and if I can

understand that I lead to its creation, then I can use mine to transfer to the others. You don't the coils, rotating system, or a patch, because it is made of the same I can use my own soul to elevate the soul ?? and through it we can elevate the soul of the organ, thus I can use my own soul (to heal others). For many of you this is beyond imagination, but this is the true essence of creation and its the true way for a physician to interact. Those of you who are looking for the space travel, understand this and then you can create the same condition. (:49). What I said Tuesday about what they are going to do for the rescue and relief (Caribbean disaster), getting a ship or a boat, sending patches to the islands, we have done this for centuries, has it worked, man goes from one suffering to another. If you can reach (them) through the soul you will give them everything. Remember the saying, give a man a fish and he eats for a day, teach him to fish and he eats for a lifetime. These rescue boats are the fish, teaching and elevating the soul and for those who have been elevated you have taught them how to fish. We look at the physicality of the house, the warmth of the fire, we forget that within us we have created a home. The skin of the man extended becomes a home for the family. My soul is the giver of the totality and I feed through my soul my fellow man. Go back to the teachings of Christ, 'this is my body, this is my blood.', the flow of the fields and their conversion to matter state, (:51). the body of the man. This is the strength of the fields of my liver through my soul for you who need the elevation to move on and change the condition. We have to learn to have trust in the strength in the fields of our creation, and to understand that it is us who are the creator of the condition, and not the condition the creator of us. The sooner the man realizes this the sooner he'll open himself to the Universal Community. You have to go to the next step to understand that once I arrive at the point of destination how will I manifest myself, how will I trust the environment. Many nomads of space have not managed to do this, because once they understood the creation of lift and motion through what you call the MaGrav system, they didn't go on to the next step which is the creation of the soul and its control for the presence of manifestation, and they got stuck on their SS or on planets or other places in the U, because they have not yet understood, ?? like the man on earth, they are in the process, and sometimes it takes millions of years and sometimes they're enlightened within seconds. ?? Transmutation of the fields into the elements (:53). will bring a new dimension in the work of man's understanding of the work of the U. Transmutation of the fields into energies that then can create a manifestation of the conditions -- is the new boy on the block. AA interaction with its own element leads to the creation of the Cu, which leads to the creation of the physicality, 43/44, O of 16 gives you the Cu stages of fields, add let's say, Cu of H fields strength to it, and you have Zn, but not in the matter state, the Zn matter state of the fields of the earth now converts this to the Gans state of the same matter. Now you can see that you don't need matter state. Now collectively add different combinations of interactions, you create Plutonium, Uranium, states of the energy which you call the highest metal elements, and then keep on going then the mutations will lead you to the strength of the fields of the Creator. (:55). Because once it's created it has to interact and find balance, and it creates a condition to give and take to confirm its. Go a step further and understand the flow of the fields within the structure of the body through the soul. How does it work that it gives man physicality, and at the same time gives the understanding of the mutation of the fields in giving and taking that confirms the existence of the process, what I call the full circles of the winds of the fields of the planet. Consider that the earth creates a M and G field, the interaction of the fields of the earth with the sun has led to the creation of the AA. The interaction of the pure part which doesn't go into the matter state but stays within the first cycle of the fields of the work creates the brain, the part which comes from the

interaction of the second generations of interactions which, (:57). are the AA, 43 , with lets say O or N or any of the others, with interaction of the fields of the planet of its matter state leads to the physicality of the body. You have a weaker state which is a combination of the AA of the brain, you have an intermediary which is a higher strength which is the matter state of physicality, which is the body and you have the central field which is the earth itself. The field strength of the earth going through the structure of the physicality trying to feed the weaker as we have seen in the process of the Star Formation (SF) leads to the flow of the fields which leads to the creation of giving of the soul, it's a tunnel within the structure. In the past many scientists have explained them as the Chakras, the point of the change, less of the matter state and more of the gaseous state, from the bottom to the top Chakra (:59). and where there is a field interaction of the organs, change of a step, more of getting the fields of the planet, releasing more of the fields of the PI of the ?? fur, which is the atmosphere, which is of a higher order in interaction with the fields of the sun. Now you can see the circulation of the fields within the body. Now you understand why the soul of man has a limitation, because the MG field strength of this planet dictates control of the field strength at the matter state level, but the soul of this planet, itself is dependent on the matter state from which it was originally created from, so now it dictates the condition of the soul of the man. ?? is it stronger or weaker. In the deep space we are not connected to the earth as such, the further the distance the weaker the field interaction. Therefore, at the point of destination, (the fields there) create the conditions. Now you can see how you can evolve into the being (at the point of destination anywhere in the U) at any point of interaction. The field interaction of the soul with earth will never die because it was its creator and is always connected. Mutation of the fields into matter and Gans state and the condition of creation of matter state is the new understanding of intellect for man. (1:01). This time many who have understood will run with the knowledge and change the course of humanity for themselves and the others who are privileged to be able to receive the knowledge. The process of understanding this new knowledge changes everything of the past. If you want to be in the matter state condition, you can. The next choice is from those who want to be in the condition of the transition space of the U without commitment. Then comes, would I like to see how it feels to land on planet Zeus, will I be amongst the creators or would I reach the home of the Creator. This is the level of the understand of the man, this is the next step that we have to move into. This is the teaching of the "Messiah", freedom from physicality, to be able to live unconditionally and at peace, to give to every being so they can be in that position that they can elevate and decide on their soul, this is the true peace, not in physical terms but in bringing the soul to be at peace with the conditions he has accepted, (1:03). be it in the villages of Africa or the backwaters of New York, it is all the same. A tramp in Washington has the same soul as the President inside the Whitehouse, the same soul as a black man in Africa, etc. It is us who have to be, to understand the strength of our soul and how we have ?? forgotten it. Peace will come when the soul can manifest itself to serve and not to be closed. Be in that tunnel of the fields which absorbs from the U or the planet that it becomes a terminal, a point of giving to the others for them to elevate, become a tool of progress through its peace and understanding .. the path to give for the others to elevate. Understand the transmutation of the fields of the U, then you can become anything in the U. Understand the interaction of the fields during the ?? transportation (1:05). then you can produce anything in the ?? universal. You can create conditions that it rains gold, or acid, you can create a condition that within the flow of the liquids of the fields that we call blood, you can run with any element of the U as long as the soul receives what it needs, and that it can elevate itself. The process of the

mutation of the fields has nothing to do with the matter state interaction, but the matter state creates that field, to the flow of the fields. You can give it or take it, if you give it you call it acidity, taking it alkaline, come closer you take more go further away you take less. If you come closer in the right direction you would be giving more and if you move away you'll be taking more. (1:07). and giving less. For those who are working in the space technology, if they understand this then they'll understand that the matter state is irrelevant, as the container is the body of the man and the soul is the giver. The space travel in the future will not work on engines, but on understanding the soul and its operation that creates that engine of the U. Those who joined the Mozhan program were taught but many never understood. In time they'll mature. They need the time to mature because the step gap is the time to mature for those who are ready to become the true Mozhan of the space, but they don't see it. ?? the wisdom of the teachers ?? but allowing for the student to understand to mature and not to force, no punishment but the time of growth and maturity is needed, even for many of the K Seekers. You look at the interaction, I can sell you water but you ?? look hundred times at it ??? you create the Gans of Zn, because in that water that you carry, carries the intention of my giving, by buying or taking the package (1:09). you decide where I want to place the wish. A patch on the pain, or on the head for the E, or I want to use it to increase the fields from your soul to interaction with my soul that you understood my pain, to the little muscle tissue in my neck which needs my attention, because I have ignored it. The physicians of the space become the true men of the U because they don't need a core or a coil, they only need the essence of the creation within their soul. The teachings from now on will bring a lot of rapid maturity for those who understand. My wish is the peace, I like to look at silencing the guns and finishing with the arms, but the true essence of my wish is peace of the man in his soul, that with it he'll never manufacture the guns, nor think about fighting, because it transmutes my E and the interaction of its fields with their E. The stronger changes the weaker. The wish for peace in me is so strong that it will feed anyone, and then they'll elevate, it has its time and its space. There are many aggressive fields in this planet and they all are gradually receiving. (1:11). Talk, voice, smell, sight, ?? feeding of the environment is all part of the attributes of the soul which itself has converted itself to the physicality of the man, I made man in the image of myself. With the soul I can smell what is needed, with the soul I can touch another soul's field and see where the suffering is, I can breach and see how beautiful the other soul is, I don't need the eye of physicality to see, nor the arm to touch, if you can touch or feel something, remember I made man in the image of myself. The soul can touch and feel and it has converted that essence in interaction with the field of this planet, and in interaction with the essence of the AA which created the physicality to convert and convey its field strength ?? of the matter state ?? strength, then you can see how you can change everything by understanding the work and strength of the soul to any ?? strength which you feel (1:13). In time man will come to understand that there are many more senses, and not only 5, because the work of the soul doesn't rely on 5 it has many more. Now that we become men of space we create new ?? words for these emotions, new ??, new understandings. The process of the mutations of the fields is the ultimate understanding of the creation, then the interaction of the mutations of the fields leads to the creation of any matter state of the U. On earth we need water, but for a being of the U water is poison to them, but they still need the liquid of life, it could be whatever, when you create and provide the fields, they convert it to what they need. It is the same with the physicians of today, once they understand, they'll see through the soul better than X-rays or MRI. You see and you fly through the soul better than any aircrafts or UOFs. It's the captain who has to create the conditions (1:15). it's his ?? disposition that has to be

able to understand the work of the fields. the man himself has to understand that he has the capability to become the pilot and physician of himself. then the 4 or 500 lifetimes here, multiplies into 4 or 5,000. What am I going to do with all this time, once you become wise to the wisdom of the life of the U, you become the giver, the hungry soul who travels the span of the U ready to give to whomever needs. It'll be so busy that the 5,000 will not be enough, there are too many needs and too many changes. This is why in the past talk I explained about the ?? first plan of the ?? creation of new souls on planet earth. Now you understand the purpose of the human race. Those who understand will elevate to the totality, but this time many more ??? will join soul cycle.. To understand and understanding are 2 different things, when you understand you have to comprehend, and when there is understanding it become part of my life. The process of mutation of the fields is what man has to progress to. (1:17). Maybe we make systems to use men to show it. If the physicians of today reach the point of maturity, that is every man is a physician of himself and if you saw for example how putting 3 rector together leads to creation of the matter state of Cu or Zn, when these souls stand next to each other and create the interaction of the sun and the earth, their soul's field friction can lead to creation of life without physicality. So be it the child of the soul of the man. Many people have asked about the virgin birth and I have explained it in different teachings in different ways, maybe now one understands that there are billions of virgin births at any time in the U, go back to the teachings, read the books, fundamental elements conversion, what you call a neutron to an electron and a prootn, where the electron is the new birth and the prootn is the mother. The ?? size of the past couldn't be explained to man but it was hidden in a way that man could understand it. The creation of new life out of the fields of the U with new life, not the physical intercourse that the man sees, as a man and a woman. (1:19). The creation of the life through what you call virgin birth, is the cycle of the life in the U. The scientists call it the splitting of a neutron to an electron and prootn. ... it's a new cycle or life and it's possible anywhere in the U. In the holy books they call it Adam and Eve, by the sperm or by the rib of Adam. ?? Metaphorically, now the scientists can explain it as splitting of a neutron, the division of the neutron into itself and its child, what we call an electron. ?? energetic or active, more dynamic then the source, so is the woman compared to the Adam, multitasking, more understanding because it came from the essence of the creation. New life, generation, cycle in understanding the totality. We don't preach, we teach the science on the edge of creation, and to many it sounds foreign because they never understood it from the beginning. You can't understand the story going on in a movie if you walk in half way through it, you have to go back to the beginning to understand what the end it. (1:21). This is the way many men will try to come in, they never understood the beginning so now the rest is meaningless, they just have to sit and watch. With the teachings of the past years we took you back to the beginning of the movie, or actually the end to be shown at the beginning so that you can see what will come at the end, in the true ?? How the cycle was developed and how man can produce anything through his soul in interaction with another field with itself. If you understood this and you put many of these virgin births together you have the mutation of elements, or what you call H ?? to He, interaction of the fields to Cu and gold and the elements that man calls exotoxic because he never understood the true sense of it, because man entered the movie of the universe in the middle, and the creation of everything, being there but not understanding where it came from. Now you understand the full process and we become true men of space. Those who want to stay and work within the fields of the U will become the new students of the K Seekers. (1:23). During the process of the teachings even today we spoke the words that the ear can hear but we teach through the soul to

reach those who can't hear, that the love of the Creator shines and loves all on this planet equally and not only those who sit and listen, this is the true way to teach and not by voice. You will have to become the same. For those who listen through the ear of the man, if understood will listen through the soul and then you progress to the next level. There are many levels in progressing to become part of the soul of the creator, that then the knowledge of the man will, becomes the transmutation of the elements, the creator of the physicality at the time of space. For those who understand and create the opening, what I call the field flow within their soul, they will look inward that they see the light and not outwards to see the physicality, by seeing the light you become part of the light and then the physicality becomes irrelevant, but the interface between the light, or the creation line to the Creator needs the interaction of the physicality to its dimension, size and position. One works in both dimensions of (1:25). the soul understanding the field interaction which leads to the physical manifestation. There is no shortness of time, but there is a lot of need for understanding the true essence of knowledge of the work of the U. Those of you who will go to test to understand have to be humble enough to be the weak(er), but knowing that you are strong enough that through these steps you become the strongest. Then as men of knowledge you can stand on 4 mountains, and through the soul of the man feed the whole city below you, this is the true knowledge. This is where hunger eradicates and there are no droughts, where you don't need dynamic machines to elevate the soul, but you understand the need of the soul, you become the process of the feed, to give without needing to be present. The spans of the U becomes your communication time, of the fields on the path of the connection There is a lot to be able to understand how from the H it can lead to gold. There is an old Persian proverb, (1:27). ... halowa is sweet and the grape is sour, it means if you allow me the time that I can mature I can create for you what you like to have, but it depends on whether you have the time to mature, you have the essence to grow into the understanding of the work of the universe. Some of you will eat the grapes because you don't have the time, but for some of you if you allow the grape to mature you'll create enough sugar that you can use it to mix with the flour to make the halowa that it is so sweet that you can't even take more than 1 or 2 spoons. This is what the soul of the man have to mature into, because the physicality will not allow it because then it has no essence for confirmation of its existence. The biggest enemy of the man is his physicality. The sooner the man understands that he can elevate his physicality to be part of his soul, then the man becomes free from the shackles of life, then the life cycle is omnipoent. (1:29). There are a lot of in-depth teaching in today's teaching it needs a lot of maturity and understanding through essence of the creation, it needs to be understood that you can use the knowledge to become the tool of peace for other souls without actually being part the physical operation of the peace. This is what those of you who understand will use to reach the world leaders that there is no need for arms or conflict when there is peace in the soul of man. When there is understanding that I can have what I need, it's a strength that I didn't know that I need to have. In one understanding you look for the fire to keep warm in the cold, if you understand that the interaction of the fields of your soul with the interaction of the fields of the soul of the elements of your physicality, can create so much heat that you'll not be able to stand, or the creation of the field from the soul with the environment at the strength of the given wish of the man 1 or 20 meters (1:31). can create a heat in that envelop that you don't need to cut a tree to burn, do you need to burn the oil which is itself an AA to destroy more lives, to benefit man. Do you need to consume another body, where the interaction of the fields of your soul with the environment of the existence will feed you enough that it feeds the physicality. I wish you could understand

(whispers again). There is no need to kill to survive. The soul with the interaction of its environment is the feeder of the man, but man has never understood. In the past in a hidden way I have tried to teach you, but nobody understood. And they keep on telling me, why do you keep on telling us we don't understand, because truly you haven't understood the work of the fields (1:33). When I explained that you can hold your hands and by transfer of the ?? energy of your soul with the interaction with the fields of the elements ?? with you entity you can create any matter that you need, then you'll understand that the creation of the physicality was part of the essence of the creation that the soul sees its own strength and the soul understands the operation of the U, but the man took it totally the wrong way, the interaction of the fields of the U were for the benefit of the man and not the destruction of the planet and other life. Try to test your soul not to physically see that you can change things, but try to test yourself and see how much you can give to elevate. Elevate the soul of anything, that it is in peace, that it comes to a point of peace. We call it peace but in reality it is the balance of the fields to create a condition of existence, continuous existence without taking from the others for them to lose their life. (1:35). Once you learn this process when man goes into space he'll never look for war or conflict but will become a giver and then you'll understand the purpose of life in the space. We have not come to teach man how to make a SS, but to teach him how to make a SS out of the soul of the man to become the rescue point for those who need the span of universes. This is the true understanding and purpose of the teachings. The nursery of the U is very much a virgin birth, it continuously expands and divides and leads to the creation of new life in the nursery of universes and the souls who mature are what we call the guardians and nannies which need to be there to give for those who need to mature. Many of those who understood, now understand the purpose of life on this planet and many others, it needs someone to care, what we call a mother to feed and nourish the baby into a child and then a man. And the soul of the man, once we mature towards peace becomes that mother in the span of the U. There is a purpose for life on this planet and man hasn't understood. (1:37). There is a purpose for creation and he hasn't understood that either. He got entangled in physicality and then in the creation of false ?? beliefs, now it's time to clear all this and move in to the next step. It's time to understand that the soul is the interaction point between itself and the U and not (just) the village of Earth in the ?? time of physicality. Now one might understand why life is created to be the nursery for the creation of the fields of the soul that in turn they become the mothers of the U. There is nothing more precious than a mother, that is the creator, nourisher, feeder, as is the garden and the kitchen. Try to understand the work of the soul, not by pretense but by true understanding of the motion of the fields, then you'll understand that as long as the wish to eradicate, move and develop another soul, you'll see the beauty but understand it even if it manifests itself in another pain and suffering. Try to understand why, because from that point you have to mature to understand ... (1:39). drop out.. ... you'll understand why there is pain and suffering ..(1:42). The process of these teachings are not to have a workshop but to have the knowledge how to work that life of the man becomes a shop that everyone can walk in and take what they need. the soul of the man becomes the provider. We need to understand the purpose of creation in the essence of the creation. The whole work of the U is to understand the interaction of the fields what it needs to be given that it extends life, and what needs to be taken that literally allows, the clogging or blocking the flow of the fields away from another entity that he can live the life and flow freely, that there is no stopping or blocking. When these changes come in the physicality of the man we call it diseases. How many of you have looked, when there is a disease into the soul of the man and see where is the blockage in the soul and

emotion, to move that stone or blockage (1:44). in the soul and instantaneously the physicality responds. This is the purpose for what these teachings are, for man to become the physician for the soul of the U, then man becoming a doctor of the physicality. For us to progress to that step we need to understand that we don't have to sacrifice anything, we just need to understand everything. The lack of knowledge we have about our soul has translated sacrifice into pain and suffering, where there is need for none of it, in the span of the U for those who have understood. I am a lover I give, but for me to love there is a need for a recipient, but that recipient has to be clear that he has no blockage so that he can receive and transmit to the next one who might need. I am the tool. Many times in the past the tools have been changed in name (1:46). for whatever reason to suit one. There is no clairvoyance, magic or prophet, rather it is totally understanding the work and function of, and operation of ones soul, then man is free. It is us through the lack of our understanding that has put the shackles on our ankles and feet, of the work of the knowledge of the U, but in fact, we are free, there are no prisons for the soul, no handcuffs and no shackles. We have to understand and test it. Put 3 - 4 dynamic reactors next to each other to create gold. ?? have 3 -4 men of peace stand together with the understanding that the gold is the solution for the greed of the man. And it will rain gold amongst you. Your soul is so dynamic but it's you who have to create the condition. ??? this helps you to create, to use the soul of your elements of your physicality for another soul. These are all the reality that man has to open his eyes to, because now it only works at the field strength of the matter strength. Now you can work at the field strength of the U that is above and so matter states become irrelevant. (1:48). Teaching oneself the true knowledge and understanding that it is time to rejoice to understand the new knowledge, there is no shame in it. It's the addition to the knowledge of the present time. To understand the totality start with small steps and graduate yourself to the University of the knowledge of the U. No one will give you a degree, but they will also not give you any more or less. Accept the pleasure that you become a lover of life in every point in the U, which means to giving unconditionally for that life to elevate. Then start understanding the smaller principles, try to bring all of the teachings we have done together now and transmute the knowledge of matter state into the field state. Understand every step of the conversion of the fields. (1:50). Understand what every conversion gives in the fields strength and not the matter state. Then understand that it is me who is the giver and creator of the fields, so I have to be correct to give to the ones I want to receive so that don't miss it .. they'll receive it as they need it. When it rains we drink it, the plants take what they need .. through it, it creates a condition for life. It's the same rain but it's the entity and the condition that decides how to use it (man drinks and plants absorb). So should it be with the soul of the man, rain down (on everyone) and with it you give life. When the life is given there is no ?? ... when you are thirsty you'll do anything to get your hands on the water to survive, even to kill. When it rains freely you don't have that pain and suffering (to take with force), and when it rains too much you give a cup to the next one who is thirsty. This is what you have to learn from the operation from the soul. That's why one has to clear the ?? blocks and stones in the path of the ?? one soul (1:52). to be able to give the totality, this is why you have to start testing yourselves, slowly because you are so materialistic as a man, that you have to see something, don't sit there ??? ... look in the palm of your hand, and say if I have water I can give to the thirsty man, and see, you will create water in the palm of your hand, and then you can put your hand in front of the man who is thirsty, if the wish in the palm of your hand is peace and that there be no killing, you'll feed the soul of those who do. This is not a fairytale anymore, this is understanding of ones responsibility in respect to his soul in confirmation of his

existence. This is where we are going and why there are no more laboratories, dynamic cores, or coils, that is for those who are trapped in that cycle of life. For those who elevate to the next step, you become a Messiah, that others can be saved and live a life without obstruction. When their physicality is obstructed you call it diseases, in their emotion you call it a mental condition, and in their souls that they can't elevate themselves. Now the N coating (1:54). the coil, Gans, dynamic cores making, their effects, energy, fields, all has come within the structure of the man's body. Now you see what we have made of you. The N coating is your skin, the Gans is the body, dynamic reactor that creates the hollow center that is the essence of the creation is the soul of the man. Now you understand, use that Gans to become a pain patch to relieve the pain of one man, or use the soul to feed that of another that it dissolves the physicality of the pain of another being. When it is a patch you have to put it on the physicality, but when it is a dynamic core you can put it across the U, but it reaches the same point. Then split the attributes of the Creator, then you'll understand that if you are dealing with the physicality of the patch, the Gans of the fields, or if you are dealing with the fields of the dynamic core, it's the soul of the man. (1:56). Then you'll understand how easily you are educated in the work of the U and you never knew it. You created prophets to tell you how that patch has to react with the other patch called the human beings, not to steal and not to kill, but now you become the creator of the messenger, that you give unconditionally that the body through itself, through its soul decides what it needs and doesn't depend from outside to be given in the physical ?? The knowledge is complete, it is the maturity of the soul of the man that has to bring the transition. It's the maturity of the understanding of those souls who have been touched to transfer the knowledge for the others to elevate themselves to that level. the understanding of all these workshops, what is life, except a dynamic fields in a collection of a box, that we call the brain, or another entity that works in the same function. We need a casing for it to confirm its existence, we call it a brain. It's like having an element inside a (1:58). kettle and holding the kettle in their hands to see if the element works and the waters gets heated, then you know there is electricity and a flow, that flow has to be the fields through the soul of the man, that by its radiating it warms up the environment and gives a warmth and comfort to the man who holds it ?? through his physicality. He doesn't need to see the element, he knows it's radiating and soon the water will boil and I can forget about my physical suffering. This is what the cycle is, the reason we teach and have taught this way. It was like making the wine, you need ?? the grapes to let them mature to become the wine. the grapes are the uneducated soul of the man, now we have taught it and it has taken time and now it can become the sweet wine. This is what the essence of the teachings have been and now that many more have started to understand we'll teach more about the interaction of the soul with the U, in understanding the conduct of the souls in the U, (2:00). and understanding the language of the soul in the U, then wherever you land you'll communicate in that language, you don't need to go to school to learn English or Spanish, you'll learn that in the Spanish environment you'll speak Spanish because you'll understand the soul of the environment. This is why we created the Universal Council (UC) because the soul will travel and manifest itself without needing to learn the language because in that environment it will come across (as) the language of the soul. The UC is not called the EC, it means understanding the language of the U at any point where you manifest yourself. This is what the teachings are, it isn't anymore prophecy, but understanding the fields. But when you don't understand go and set up the cores and try understand that you can convert it, but don't get shackled down to the cores, understand the fields and how their interaction leads to the creation of a dynamic soul, dynamic fields that their interaction gives the condition.

Those who always look at the physicality will have a long way to go. (2:02). Those who look at the interaction of the fields will reach very fast to ?? and condition. The education of the soul is much easier than the education of the physicality. To understand the E of the soul, that gives man the fields of the physicality. The one who goes and lies to get what he wants., then through his own lying and what he lied about will receive the condition of his own, according to his physicality. When you say I am damaged because of this just to get something, you'll come to be damaged by the same thing, and it will be more painful than where you started with the lie, and what you came to achieve will become the noose around your neck for what you have done with it. I gave many examples in many of the teachings, now maybe some will come to understand exactly what it means. Try to understand the operation of the fields which is the soul, which is you. Try to understand the soul of your physicality which is a condition of the environment, (2:04). and the interaction of the ?? 2 with the ?? of the fields of the environment, from the physical structure of the environment, which you call the E of the man. The E is the conversion of the interaction of the fields of the soul and the environment of the physicality's soul and the condition of the environment which is created out of ?? a condition. How do we react, it doesn't need to be a planet, it can be another man or being, the interaction of the fields of the soul with the interaction of the fields of the physical dimension of another entity gives you the joy, pain, suffering, the elevation of the soul to give more. Now the condition is not just the earth which is created, but also the condition of the E of the joy, but the condition of the fields of another entity in respect to you and in respect to the fields of a man's E within the structure of the physicality of the man. We feel the joy of our child thousands of kilometers away and you call and say, I feel your happy and he says, Papa how did you know. (2:06). Because now the ?? of physicality is like the center of the earth which creates these fields, then you feel the earth now that earth is your child, now that earth is another being in the depth of the U, which you feel. Now you understand where the E comes from, that the E is a reflection of the field strength of the man, and the understanding of himself of the strength he carries ?? in respect to that field. This is the progress and how you interact in space, the interaction of the fields of the environment with the interaction of the fields of the soul gives the feeling of the man, and his emotion. The creation of the condition to feel, to understand, you don't need to see because now the environment itself has created that brain. The physical brain of the man in the space as we have it, when you come to a different strength AA level, of let's say higher Nitrogen, will not exist anymore, now the interaction with the other entities which creates a condition of interface becomes the position of the soul of the man's emotion. Now you understand that man can exist in the U without physicality. (whispers) I wish you would understand. then you'd become the true man of the space. Now you understand why i have said so many times that I am ashamed to be in the body of the man. (2:08). Because it carries nothing but pain and the condition of physicality, which is ???? .. it ages, gets painful, sees death and suffering of the others. Try to understand that when we travel in the depth of the space how the other entity wants you to be so that his ?? are at peace that with it you will find peace, and not peace for you that forces him to change his position. Don't be a magnet that is placed amongst the others and forces them to move, but position yourself to stay at the position of comfort, it's you who have to position yourself. This needs a lot of understanding in the depth of the knowledge of the creation. This needs understanding of the total attributes of the Creator, which is you. You need to look inwards to understand the operation of the soul, then looking outwards to see its physical manifestation after its been interfered and tampered with, and mishandled by other fields which we call emotion. Physicality

reflects the emotion from what is received from the source in interaction with the fields of the environment (2:10). of the others. Now you understand the emotion. Is there a need for the physicality to suffer, or create suffering, or is there a need to understand the fields which create that E. Now you can make tools that eliminate the field strength or in a way increases it to become acceptable fields, for example, from cry to joy to laughther. This is what our body does, it converts E because it understands the feeling of the soul and not the feeling of the physicality. We go through these transitions in our physical life, from laughing we go to crying, ?? and crying we turn into laughther. There is nothing better then this to understand the field interaction of the soul with the interaction of the fields of the environment and then measure it. Then you don't need to be an actor to pretend, you become the giver to create the condition, then it is always laughther. These (things) are part of the development of the soul that we have to understand, then in the space no one becomes our guru or prophet, because there is nothing for prophecy but understanding the steps, understanding where the losses are that create the condition (2:12). or where the gains are that it promtoes and elevates the others. Now that we undersnad the teachings to go to the next level to understand the work of our soul and not the physicality of the matter to confirm the existence of the soul. We cannot put a value and measure on the soul of the man because all the souls have the same capability to achieve a full maturity. Maturity is not to grow but to understand 49

(2:28).

(2:47). end with music
