

202nd Knowledge Seekers Workshop Dec 14 2017

(Keshe stayed in China for 4 months secretly, We look at the brain as protein based with Nitrogen, but when we go into space that may change to another like K, The space gap between the Sun and Earth like the soul and the brain which reduced to 10 cm, Describes in detail how the Amino Acid of sperm and egg rotate to form the soul which starts to absorb energy from the womb, environment and the universe, The CRUCIAL point to understand is that we absorbed energy from the universe in the beginning before the umbilical cord and then we feel under the physicality as a leech on the soul so why can't we do it now and become totally independent of physicality, The everlasting peace on this planet has started, Keshe says he owns the soul of the man that it belongs to him and not the others that is why he can't make the mistakes of the prophets of the past, He gives how to create a new soul from the Gans of Amino Acid and warns that no one can abuse it, If your intention is not pure the reactor will become black, Definition of what is plasma, He has a twin soul for millions of years, We need a twin soul to confirm our existence but man has used the physicality as his twin and this he doesn't yet understand, The animals communicate through their souls, The crown of thorns was for the man to see that he is nothing but claims to be the king, Christ was crucified because he violated the commitment of one soul to another and the position was balanced, He resurrected himself in a new physicality for Mary to fall in love with him, We will do this when we travel with our soul to a new place in the universe, We use fast energy sources like B12 and Oflic Acid that are radioactive based so that we can give that energy to physicality to match the energy that is coming from the soul if there is a mismatch then problems develop, Molan or Rumi was one of the true scientists that understood the process but they could not teach it to man because he wasn't ready, Clarifies about the Gans getting drained but actually they are still present but have come into balance, In manufacturing we feed the Gans back into the mother tank to replenish the strength that we used up, he talks about the Soul of the Earth Council and collectively they have the power to change all of humanity but man has to be ready for it, This work of the EC is the collective soul of the man's cry for freedom from pain. Reach them and you'll find salvation.)

(:10). Rick shows photo of Chinese KF, thank you for your beautiful nation and people. Keshe stayed there recently for 4 months, they kept it quiet. (:14). The 5th year of teaching starts Jan 18th 2018. ... the ambiguity is not the understanding is lacking but the connection to it so that it starts making sense. (:17). In the next weeks and months you'll see a totally different approach to the teachings. We talked about the systems, went into the direction of the space, now we went in the direction of the soul because it was important to be understood, now gradually we'll start bring operation of the system with operation of the soul with the work of the man's body, this will be the biggest switch for KF KS and those we work around us. The reason we went in other directions is because we had no other way to teach and all of you have learned from scratch and the people who come to KF in the future when they go through the KS ??/ some people start at 200 and go back to 1 to see what they are missing. Now we are bring something all together ?? ... **bring the old teaching to relate it to the new so you can see the coherence and a pattern that you couldn't see but you could understand. We brought in the E and soul and then comparing the line of connection to the Sun.** (:19). **Now you understand the slowing of the fields leads to the strength you need.**

When we go to space it changes. We are looking the brain tissue which are protein based, what if we go into space and change the N into K or Ca or go higher up and work in the same order of the link but different magnitudes, now that we have a C, O, N, .. it's more or less the Star Formation of the cell. We have to understand new dimensions. With K and the same combination we see these in our structures, in the lower level we have H, C, N, O, and then you have another stacked layer that comes with Na, then another stacked layer just about double by weight, atomic mass, or MG field strength, then you come into K and Ca, then a 20 gap and you go straight into Zn and Cu, what about the next 20 gap, and the next 20 gap, then you see a pattern and understand in deep space where the human brain, we go to the first level conjunction of the action, C, N, O, (:21). where you go to the Na 20 up and down, K 40 up and down, then you see a pattern in life in the U. **If the space gap between the Earth and the Sun to reach formation of O level in 70 million kilometers, that the man in his brain by absorbing the energy of the AA has reduced the size of the brain for reduction to a structure of E and physicality in say 5 or 10 cm of the brain at the lower strength.** If man gathers the intelligence or he comes across another cycle of AA pattern in Na, K, Zn level and above, now you see the **size of the brain of the man doesn't need to be 10 - 20 cm.** When the strength of the higher order AA, what we call the structure of the beginning of life in the U it gives you a different dimension of understanding, development and manifestation. If the AA MG field has led to a physical body like ours, 1.8 meters, 40 cm thickness, and a brain, emotional reaction can you imagine when you'll be able to go through the mutation of the strength of the elements by order of magnitude from present AA to K or Zn level barrier. You don't need that much, but you have more in level of strength in order of magnitude to be able to do things at the AA level of the present time, of what we call N level, it's not possible. (:24). Then you can understand how you can manifest yourself, generate and gain speeds beyond the physicality of Nitrogen AA level, intelligence, observation of the existence or what you call the vision, comprehension changes totally. Open spaces of the fields, millions of km in the solar system. The brain is a few cm at N level of the AA, **then there comes a point when you mutate that the strength of the soul in its totality superimposes the structure of the physical soul of the entity, then internally you exist in comparison, where we exist externally in respect to our soul.** In the time to come we'll see these by the mutation of the elements within the structure of the AA, within the E and soul of the man, **we can move our physicality, not by moving it but by changing the mutation of the elements by strengthening the STM the in encompasses the physicality, then man's travel in the depth of the U becomes Zero Time.** This is what is coming. (:26). There is always a line of communication in MG fields strength between the STM and the soul of the physical part of the man. Then a lot becomes much more clearer and transparent to all of us, **that it is us through our E decides how much of the banana we are going to peel, how much of the energy we are going to show.** How much of this will effect us in totality in our future understanding of the space, creation, and our interaction within the U Community. **Many of us will chose a different path of understanding because we want to still be human but we don't want to live in what we are used to. There are those of us who will adventure to go beyond, they'll go through the transformation of what we call the transmutation of MG field strength** to find out if it is possible and when they find out that it is, they endeavor to go further on, then they become travelers of the space, then they come back to the human race and say that there is such and such a place, with such and such things, we have been there and it's so nice. Sorry I can't take pictures because at that point pictures aren't matter state, the cameras there don't work the same

as here. Then we understand, do we need to trust, we see the soul the shyness and brightness of the soul and it tells us what we need and it is for us to elevate our souls to understand (:28). more of the new understanding. If you go back to our original teaching and explanation of **the creation of what we call, the fields within the structure of the matter states that it leads to creation of what we used to call in the bubbles, in the spheres, the empty space in the center of the rotating reactors, and transferring the knowledge to the creation of the STM then we see the exact combination, work. But now with this it gives us a very powerful tool, so powerful and it's for us to understand how to re-manifest ourselves in the dimension of the physicality of the man when we return back to Earth.** Transformation from one dimension to another will become one of the trickiest games for the human race to understand. It's not that we won't be able to, but to understand that process once we learn that on this planet that we can test it and replicate it across the U. He draws on the screen. What this means, do you remember the existence of the Sun in interaction with the existence of the Earth, (:30). the interface position of the fields that lead to the creation of the AA, what we call Mr. COHN, has a great game to play. We can't miss this, because in the scientific world at the present time we talk about AA, life and creation on this planet, and everything to do with it is connected with Mr. COHN. You have to understand that **the 4 elements of the AA (he draws 4 interlocking circles), in balance interaction when in the composition become part of the egg and sperm, which in totality, let's say 8 of them, lead to creation of dynamic processes, which now tries to find a balance (he draws another 4 interlocking circles on top of the first ones), in trying to find a balance it creates within the structure, even it looks physically dimensional, matter division, but it creates a field rotation.** (:32). Now you have a circle and sphere, a rotating sphere of the energy which is not from the father or mother but in totality is a new combination, **where all fields in all have a balanced connection with this center (he draws a center circle of green color and 4 circles on axis with green dots and lines connected to each other), what we call the STM, even though each one of them has its own center of operation. Now that I have created it, the energy absorbed, I also take energy from the environment, where this environment is the womb of the mother. This is how I can divide and have more, it doesn't come from nowhere. This new soul, center, starts absorbing energy from the liquid, the plasma from the womb of the mother, from the environment, and through its strength from the U. It is absolutely crucial for you to understand this.** (:34). This picture that I just drew, could be one of the most important of all teachings. It's very simple but very direct, it brings in the totality of 200 teachings. Because now that you understand, you have created the soul of a man, the central energy that can absorb energy from its environment, that by receiving this energy it balances back with those who created him, it feeds them and allows them to divide. The division of the cells as we see in the present life in the videos, that **the egg and sperm come together and then after awhile they divide. Why do they divide? Because this central point, what we call the completion of the soul, absorbs energy that it becomes the feeder to the physical structure. The umbilical cord and the rest of it comes later because this has already established it and with it, it connects itself to the physicality of the mother.** Then there is a crucial point in this. This is absolutely important for all of us to understand. **It's my wish that you all understand what is about to be said,** (:36). because this is what we as the human race have been craving and looking for, and we have killed many things without understanding this. Listen very carefully and comprehend what is about to be taught, because if you have understood it then **you have found the secret to life in the U.** If you miss it you need to go back and

understand what you missed in the whole of the teachings. **The creation of the soul in the center allows the absorption of the fields from the environment of the womb of the mother that allows in receiving more for each cell to have received enough energy that they can't hold on to and therefore they go through the division. This is how the cell of the man is fed. The umbilical cord is for the clearance of the surplus energies that it needs to be, once the physical part takes over. Before that time, the life is independent! This is the point where the umbilical cord is made and is the point when the physicality becomes a leech on the back of the STM. But what is crucial to understand is that the soul is now absorbing from the plasma of the womb of the mother and the environment, (:38). and in turn feeds into what lead to its creation, the cells and as they don't and cannot divide them themselves what they have created now becomes the feeder of them. But the crucial point is if the STM from the onset managed to absorb energy from the environment why can't we do it now. What stops any one of us to go back to where we started from, that is to be a Free Plasma (FP) within the plasma of the womb of the mother, and be a FP within the womb of the U. Then anywhere in the space you can feed yourself without the need and terms of physicality. Then in this structure man can exist anywhere in the U, because now you decide as a STM what to take as food as an energy, as a way to live without killing or destruction. This is the whole purpose of these teachings. When the man learns to go back to the origin of his own creation, before the leech of physicality attached himself to it, that man learns to exist in the depths of the U without ever looking at another energy source as a life food. (:40). Then we become the giver of energy, of life in exactly the same way as when the center soul was created, it started feeding them without taking life from them. This is the change of the position of the man where we understand that now we become the creators. This is where when our soul is freed from our physical condition in the spans of the U becomes the feeder, a star, a new life in the span of the life of the U. As I said before, we never knew that we were already Nano makers when we cooked the first meat and started using a Chinese Wok. In essence within our soul we have the knowledge. I always said, **the brain has no connection with the physicality of the man**, because even today the brain with the soul at its center is still feeding itself from the environment of the life, and proportions itself with the physicality to accommodate the physicality for its physical life and the physical soul of it. **Even today when you think that you need to eat food to survive, when in fact your brain is getting fed by itself from the energy plasmatic fields of the plasma of the womb of the Earth, solar system, (:42). and in the womb of the U.** It's for us now to understand and tap into this then we become independent of time, position, and strength. **Then we become independent of physicality, then we decide where and when to manifest ourselves in the terms of our own condition to create the balanced position with the rest of the entities, souls in the U.** I bless those souls who understand this knowledge, because then you have matured into understanding more, then you comprehend fully from the point of inception. In the womb of the mother we always knew how to absorb energy from the fields of the U and became the feeder from what we absorbed for the soul of physicality to take shape, and this is the way you convert yourself in the spans of the U from the Pl of the creation to the Pl of physicality, then man doesn't need to kill another. **This is the knowledge that was given to Moses but he didn't deliver it. (:44).** Trust in the STM because it's the essence of our creation and it repeats itself anywhere in the U. Then we don't need to take energy as packages to stop or to absorb another cycle, be it the fish, lamb, tree fruits or whatever. Maybe now you understand why we taught about the gases in the beginning, then the Gans. **the essence of the teachings about the****

Gans was to show in the totality what the physicality of the man is. How the physicality is created and how we can lead to the creation of our own physicality anywhere in any point in the U. **If we manage to create the STM of the become the center that he absorbs the fields of the U that it doesn't need, that the balance it is transferred to the other souls, we call the soul of physicality for them to manifest themselves, then you understand the total teaching, that we are here to serve and not to be served, because this is the purpose, this is the only essence of the creation of our soul. Collectively we receive, that collectively we can serve, that collectively we are here to repeat the same process. (:46). In totality life is a mirror image of the existence of the Creator.** Because that is what the Creator does. We all came to the KF and were served knowledge and by understanding the knowledge we started to serve the knowledge in a bigger way that more could be served, we received a gift and gave it back in a bigger order to those who were ready to receive it. **This way man is ready to enter universal transportation/communication and existence without ever leaving this planet as a soul, because it carries all the information and strength needed to be in communication or manifest itself in any dimension according to the strength according to the wishes of the STM.** This brings us to a very important point and my wish and desire is that no man will ever abuse this, and as is my command no one shall be able to even if they try. Now that you have understood this (what was just taught) a new game has come into play. (:48). And that is, if you remember inside the Gans balls that you rtoated, when we put any of the Gans in side (CO2, ZN etc) when we rtoated it at a given speed it transferred the energies to the center and they took a physical position, with the liquid transition. **If you look at it this is the STM (in center), the brain in the middle, and the physicality the outer edge, but in interaction with the physical structure of this planet, MG fields both Inertia and gravity, the skin (around the top) has dropped (became the body) to create its own balance, which leads to the shape of the man.** In essence the brain and the STM do not need this change, then if we go a step further in the knowledge, (:50). Go back to the core we made and put the Gans' in it, we created different dimensions of it, then I have a very big surprise for you it might shock many of you. All of you who made all these Gans you saw something very funny floating, and you called it AA. In the new understanding of the time, **instead of loading your reactors with the Gans' or liquid Gans of the matter state Pl, with the AA Gans'.** Now if you understand this you understand that **man can create life anywhere in the U.** Because as you are not all experts so when you took the Gans you brought some of the AA with you but you were not aware of it, in all my teachings I repeated it. **Now this time if you take AA and make Gans of the same AA (:52). you can generate life. You become the creator of a new cycle, which in its rotation creates a new soul and this becomes a way, those of you who are in the space Technology physical dimension you'll control through E or non-tangible line of communication through your soul to the craft. this knowledge was hidden from man because he wasn't ready, now that we have made a peaceful man out of the human race, according to our wish, man is ready to understand.** Because when your soul is freed in the spans of the U in conjunction of the AA of the environment which the STM will come across to, it will manifest itself in the physicality of the dimension of the environment of the manifestation. The soul is created out of the AA, not out of the matter state, but with the AA's interaction with the other elements within the atmosphere of this planet has dictated the ??split of the shape to the physicality of the man. Many of you will test different AA in your dynamic core reactors, (:54). but be aware of the E which touches you and not the physicality of the core. Rotations over 10 to 20 rpm is even too fast, those of you who go to 2,500 rpm

plus, because you have to have confirmation of physicality look at the rotation of the combination of the physical dimension of the protein of the womb of the mother, some rotate as high 100 to 200,000 rpm. The faster is for the weaker and the slower is for the stronger **because as you go slow you can absorb all the energies**. When you go fast you don't have enough time. It's very simple I'll explain this in a way that you are a marathon runner, you run as fast as you can but when you come to the places where you can take a water off the trays, if you go very fast it is very hard to pick them up, but if you go slow you can pick up many. To be the STM and understand its operation and to be able to operate **you have to be a turtle that runs as a rabbit, but in different dimensions and strengths. Now you understand how important the teaching of today is. (:56). You could not come to this point if you don't understand the teachings of the past 200 teachings or past 4 or 5 years**. It's the accumulation. Then you come to understand something beautiful, if you take for example, the hand of the man, then you'll understand something interesting, do you remember the (Alex) Beads, **he draws dots near the fingers and 2 circles around the body, it's the totality of the MG fields, we all look at the physical part and not the field part, if you understand this then you have found the secret to the universal energy absorption**. Those of you who wrote to me very recently and said, I do this and that, yes you are correct. Now you understand. We showed this as a dynamic system on the platform when Marco made the system in Barletta, and I said this will become the center point for the education of space technology. Now we move to a new dimension that we become the creators. (:58). And with the dimension of the AA of this U, this galaxy, Solar system, Earth, gives the need for 10 fingers, 2 legs and a heart. **Where when we change to the AA of the new dimension because we are in the center of the STM we have the full spectrum we'll manifest ourselves as the entity of the U at a point of interaction. I made man as an image of Myself, depending on where the man is what image he wants to manifest himself as**. Then you come to another point which is very easy, he draws an IL. When you release a given strength, then here at this point you manifest yourself as one thing, and here with a different strength as another. **The emotion of the STM dictates the manifestation of the physicality of the man**. Now you understand those of you who said, 'when are we going to ?? use these AA'. Take the AA from CuO₂, ZnO, (1:00). take the AA in a combination of either side of the structure of the 2 and then add H to it. Then you'll see how you'll for example, manifest yourself here. Because the system which you start will become part of the structure in combination in interaction with the STM, the dimension of the physicality will be out and the man will travel and live through his soul, which **means the everlasting peace on this planet has started. Because now we reach the STM through his own creation**. It will be a very scary point for those who have the wrong intention because they'll lose their soul. **Those of you who attempt to make this make sure you are not, and I mean NOT, stealing and lying to your own soul, because now you have begun to play with the essence of your own creation**. Remember what I said, those who have the wrong intention will not be able to board the flight because their souls will not allow them because it knows that they have the wrong intention and with it, it will be its demise. (1:02). I walk off because I want to live with a lie and the cheats I lived with on this planet. It's very much like what I said before about the lions mouth on the wall in Rome, you trust to put your hand in it and you know **that I have done nothing wrong and I will take my hand out without the fear of what going to happen. When you have that fear don't even start because your soul tells you, there's a red light, you have done so many wrongs. Those of you who reach that point, the soul will shut itself down. It means the end of physicality, the Day of Judgment, when there shall be no**

god to judge you, except for you own soul against your own action. This is why we won't see may people traveling the span of the U with us, because they are afraid to put their hand in that (lions) mouth, because they don't trust the conduct of their own soul. **We will not ban man from entering the U Community, man will stop doing it because he has no trust in the work of his physicality** but not the STM. There is no theology in the world of science of the Universe. It's very simple, you took the souls, you made the dynamic creations or all those Gans' and AA (1:04). If you look all those AA's in the dynamic reactor, is a copy of the egg and the sperm and the STM, this time instead of bringing the egg and sperm together to bring the pattern, or mosaic of prtoeins, now you have brought in a new game, and in it you have the MG field Gans of Cu, Zn and if you produce Cu and Zn in different ways then different dimensions of the structure of the man in different parts of this planet, so there is a Zn in one part, higher Mg in another part, makes you Chinese looking or make you African, but in essence all the rest is the same. Now for the first time man learns how to create of his own essence a copy of himself in the dimension of physicality and travel the spans of the U through the strength of his own soul. I wonder if you'd like to eat yourself let alone another. How many of you have seen many cows being absorbed from the South Pole and many elephants coming from the North Pole, because the Earth absorbs what it needs in the field strength and transfers that to the existence of life within the surface, equal to what is needed to create balance in itself. **Now you understand why we have different creatures in different parts of this planet,** (1:06). and how it comes to be, but in essence all have AA prtoein as a base. This has been one of the mysteries of creation not given to man and now you have it. **And my wish is that no man will ever try to abuse it. This is a tool of peace.** It is also the ultimate weapon of peace. Knowing that I can exist and can create more beautiful things then myself that the others can enjoy. It's not a sacrifice, it's serving through the STM in the way that the STM was served in the womb of the mother to gain new life. This is what these teachings are about. We are reaching the pinnacle of understanding of totality. **Now when you use the AA of different combinations of Cu, in different tanks you created, and Zn or whatever. Understand one thing, I created them so they are connected to my soul. It's me who puts them together and it's my energy that is part of it, so it's always connected to me. This is how we control the space reactors in the deep space physical conditions.** I keep on saying that **the present computer and even the faster ones are not as fast as the emotion of the STM, not even the thought and the E of the man, (1:08). in the strength. According to the intention of the E of the soul, man dictates the speed of his travel in the span of the U. And then in interaction with the conditioned fields of the interaction of the strength, dictates the manifestation of himself in the U where he decides to release, or as I call, peel the banana to the level that the strength that he is, is exposed that he can interact and the interaction of the fields of the STM with the MG field of the environment of the destination leads to the creation of the STM and the strength of the environment in the physical dimension or what we call the STP, that is the way you manifest yourself. In the teaching of this morning in the past few minutes I have opened the secrets of the creation to the man.** Many of you will never understand and those who understand have found the key into the U Community. And those of you who have thoroughly understood the technology from the beginning then you understand the physical dimension of the existence. **I shall never make the mistakes of the prophets of the past and cross the line, because I have already owned the STM, which is mine and not the others.** And if I respect my soul in the dimension of the physicality I will do the same with the others. (1:10). **And I create a gapped distance that they**

can have the pleasures of existence, but not stealing from or not to be stolen from.

Understand these points very clearly, I have given you another key to become, Man of Universe. Those of you who dare to test the AA be aware of the physical dimensions of the existence within the physical soul of the man. You'll understand soon but make sure that the tongue of the man doesn't speak another language to the emotion of the STM. God help you (if you do). You can't shout, I am a man of peace when you create the dimension of your soul through your own AA and the intention is not (peace). This is how man will be recognized in the depth of space that he speaks and lives and thinks one and the same. Not out of fear but of understanding his own existence. We are not preachers we are scientists of the universe and the man has to learn the true knowledge of the creation of the U, and this is part of it. **Those of you who develop and understand this fully, (1:12). you become the captains for those souls who do not want to cross the physical line. And you don't become another god but they understand that you are ready to serve through your soul that their physical soul can see the dimensions of the U,** that they can trust their souls with you that you can bring the strength that they can see more of, because each one of us has different strengths and it allows us to see a better spectrum. We travel the depths of space collectively because then we see more of it, (if) it allows us to see. Would you like to eat the same food breakfast, lunch and dinner, day after day, see the same thing day after day or you say, **I serve you with mine that you'll take the pleasure without the expectation to receive anything, but in that process as they get elevated, they create the vortex of the field flow and they open their side to your side.** It is extremely important to understand the teachings of this morning, listen to it many, many times because if you think you understood all of it the first time, you are still in the same dogma, as you have been for thousands of years. Comprehend the essence of it (1:14). not the word of it, **understand the process of it, not the physicality of it. Now you understand how everyone of us can create a replica of their soul of itself, and we can be in the essence of soul where we do not need the dimension of physicality. I wish that many of you understand this, it makes my job easier to transport or to carry the humanity across this threshold of animal behavior. What I said about one of the ingredients that was missing from this planet that (causes) everything to behave so much in an animal behavior was one ingredient, and that in reality is for the man to understand the power of his own soul and that he is in charge and he can give to change the others in different shape and direction, as they wish to accept and as is available, then they will change accordingly.** When you kiss me and I bite you, how many times can you kiss me and I'll bite you, until the energy of the source of your love for me changes my mind to kiss, and to have the understanding to feel shameful for what we have done. (1:16). How many times as man of Earth we have gone into talk, shout, cry and then in understanding how we cry (the reason for our crying). When you reach that point with the essence of your soul you have matured to enter the UC, not because of crying but because of understanding the totality of creation. **Why have I been biting other lives for me to survive when the love of creation was within me. It's a shame to be within the body of a man.** Now you understand. **Take from my soul to elevate yours but don't steal from it. Understand the process,** comprehend its potential and live through its operation. We could not teach more, but we open more knowledge from different aspects from now on. But in fact, (1:18). those of you who have been trying to understand your own soul and not to eat (?meat) or to do this and that, **remember that you absorbed the energy of the plasma of the womb of the mother and the U to create the physicality, it's the same soul, it has not changed.** It has submitted itself to the pain of physicality of the dimension of

the manifestation which is there. become detached from it and become that soul who started the creation of physical life, then you'll understand how to manifest yourself in different points on this planet, inside, outside, or on it or anywhere in the universe, then do we need Jumbo jets, or calling you to say I am coming to see you or I am here in front of you would you like me to manifest myself in the same physical dimension that it gives you the pleasure of seeing me. **Not I am here, take it, you better swallow it because I am here and I do what I like. I manifest myself here in front of you if my manifestation gives you the pleasure of elevating your soul with the pleasure to give to the others.** We should change part of the words and writings it says, I made man in the image of myself, change the word "man" to the soul, and myself to the soul also. (1:20). then you'll see yourself and how you interact with the others. There is no theology in the work of the U, it's the understanding **of the process of creation in the essence of the Creator, and not the Creator in the essence of creation. Work to the point that collectively you can create these souls that collectively now you elevate the STM through the use of the prtoein and AA which you have collected, but understand that you all have to have the same wish.** In the interim of today's teaching you see a ball hanging in the middle of the table. Those of you who have been with me or around you know what that ball is. I created that ball and I hung it in the center in the first Knowledge Seekers teaching and I said to the K Seekers around the table, **when you enlignthen in understanding of the soul and the wish is one, the ball will shine, because if you release through the pleasure of giving knowledge to the other people at the table,** in interaction with this ball in the middle, which carries the essence of physicality, ?? as its Cu, will create the light and the manifestation of the physicality of this planet. And as we know it went black, (1:22). because the intention of one was murder. **If your intention is wrong it becomes black.** If you see black in your reactors when you try such a thing, understand that you have submitted your soul to the new dimension of understanding. (if you) falsify your intention of wishes, that are spoken (they will be) compared to what has been sent by the STM. In the present time we call it a lie detector. Thy shall not lie, was one of the commandments (given) to Moses. **We cannot lie to the existence of the dimension of the physicality STM in comparison with the interaction with the STM. Black means taking, it means it doesn't allow the others to receive, so you become not only a liar but also a thief, and are stealing and this, you by yourself, have blocked the elevation of the soul and the transmutation of the strength to a new dimension to become the passengers of the U.** As I said before and it's in the writings, no man will take the crown of kingship because this means I have to steal. No one wants to be a true servant, to be in the term of physicality to steal (1:24). so there shall be no king as we are all equal. Such a technology has a lot of implications. Implementing it the correct way brings new implications, new way of living, new standards, new understandings, new comprehension of the totality, and it takes only seconds to do and not thousands of years to go to theology schools to analyze everyone. There are no languages or translators in the U. Now most of you understand **the purpose of the teachings over the past 4 years. It wasn't the purpose to make the N coating, plates, and Gans, as I said, I brought you through the magic path. We were looking for that prtoein for you to understand how man can create the physicality. As I said to you, I am a perfect teacher and a beautiful magician, it's right under your nose and you don't see it.** Those of you who endeavor to go on this path, understand clearly, you are not playing with the fire, but you are putting your own soul on the stool of judgment. (1:26). It's you who judges yourself, there are no gates of heaven, but in fact, if you are true to yourself, no lying or stealing, you'll enter the dimension of the soul of the U,

then you'll decide how you are going to manifest yourself. It's in the writing of Bahaula he says, **pray for your children 20 years before their born, so that they will receive the soul of perfection, that they are already elevated to the dimension of the creation of the Creator, and not the physicality of the man.** (1:27). Any questions.

Q: What is plasma, the field of plasma? There is a lot of discussion going on about what fields strength and plasma really is. **Plasma is a collection of dynamic fields that only attracts the strengths which it needs itself to confirm its existence and at the same time it's what I call a washing machine to absorb those which are available and they need refining to be able to be available to the others to complete the operation of their souls. So in fact, plasma is nothing but the dynamic combination of plasmas that in rotation, in trying to reach perfection that it feeds itself to become balanced, it creates dynamic motion, or what we call spherical dynamic rotation of itself.** (1:29). In the video of the initial teachings we showed 2 fields, they move together, then 1 turns (towards) the other, why do we use this picture. **I am of a higher order and I want to feed the lower strength of you, that by elevating to the higher order you feed me, or you give to the others, not necessarily me because I know I receive what I need.** The choice of arrows given in our books has a meaning, higher strength to feed to the lower that in that process I elevate you and we find balance (he draws an IL between the arrow head and tail of the other). In that process we create a dynamic process of the plasma. **A plasma is a dynamic field, in a way a dog chasing its tail, in that process the higher strength in trying to feed the lower strength, and at the same time the higher strength of the field you are trying to feed, it's feeding itself and others.** If we go into details of these field connections, it's very easy to understand. He draws an arrow and tip, the field looks like this, but in fact it's like this, he draws smaller points down along the shaft. Each of the points are of a different strength. It's the same with this (1:31). each point on the 2nd arrow carries a different strength. When the first one tries to catch up to the other, the tip of the first arrow doesn't fit into the tail of the second, in one order it might fit into here (the tip feeds one of the points along the shaft) or another order might fit into here (field lines are drawn to different places on the arrows). **It's collective, in trying to feed each other they create the speed of rotation. Higher always tries to reach the lower and in that process it creates a turbulence, a motion of the flow of the fields. So a plasma is created. But this itself is a target of others (from outside) of varying strengths. A totality of all and this one trying to feed that one creates more, it creates a dynamic motion. This is what we call a plasma, collective interaction of the fields that it leads to the giving, (1:33). not receiving,** but in the process we receive that we can give more to create the dimension of existence. Any other question. Q: Is it possible to visualize the PI? Is the PI invisible? What are the fields versus what is the PI? If you look at it, now that you know what the PI is, you see all these arrows, and the field carries the full spectrum of the strength of it. **You have to feel a PI and not see a plasma. In the space we don't have eyes or lips or anything else.** We have a dynamic PI, (1:35). this is the strength of the E, for example, of a PI, or this is the strength of vision, or it's the strength of the presence, then when you go in that dimension you feel the E of different strength which the PI carries and relates that to the feeling, this is the vision it looks so beautiful. Those who know me, I always said that **I carry a twin soul and it has been with me for millions of years. Because I feel the existence of it and have a connection with it, the sun has a twin, without it, it can't confirm the existence and dynamism of itself. At a point at the essence of creation, we can only confirm our existence in (through) the presence of another,** otherwise how can we confirm that we exist. **Our twin soul is the confirmation of our own existence, but in**

the dimension of physicality, man has chosen the physical life as a twin soul to the existence of his soul and this is what is not understood. Does it need to be physical to confirm or does it go back to the teaching, through the E of the soul I confirm the existence of the physicality of it, which is the physical entity at the point of manifestation. Do you need to see a soul, or a field, (1:37). or does the strength of the field give me the E of it. There is one thing in the full spectrum in the field of the soul, **fortunately we do not see things like sandess, it becomes so low in matter but by that time we have already passed the dimension of the soul.** What we call **taking E** at the matter level doesn't exist in the dimension of the STM as such, unless we go to much lower at the back end of the soul strength, where it becomes more matter state we feel the physical dimension strength, then the soul feels it but because of the high order strength of itself, it's there but it's not created because it doesn't need it and it never feeds it, because it's part of its structure, because when he feeds it, it elevates. This is what we need to/ have to understand from the process of our work of our soul and the fields. Q: Could you explain more about feelings, (1:39). for example, you mentioned the eyes and we can't rely on our vision for seeing fields and have to rely on feeling. **Are the fields originating in the physicality and limited to it? Not really. In the level of the STM we still see/feel the presence, it's very much like a bat that is blind** but it knows where the other animals are. It doesn't see with the physical eye, but there is a mystery even in that. In the world of biology of animals they say these animals are blind and don't see, but in fact they see, but it's at the strength the man has not yet realized, so he says that they fly in dark (blind). A bat is never blind even if he doesn't have eyes he still sees through the field strength of itself. It's makes no sense to create an eye that has no vision. God doesn't create anything that doesn't have a use. Our soul doesn't create anything that doesn't have a use. When science says that they are blind, it's really that we don't have the tools to see what they see. They say they see ultraviolet or feel whatever through the noise. **They see through the vision of their eyes, (1:41). but we don't see at that strength. They communicate through the souls of its cells,** that it ?? don't bring manifestation of physicality. I was watching the BBC's "Blue planet". I love the way Lord Attenborough explains the emotion of the knowledge it transfers a lot of feelings and understanding, but he misses always the soul structure and he looks for physical interaction. In episode 2 he shows (1:42). **a pack of lionesses are hunting a giraffe. The strange thing is the head lioness is like a half kilometer ahead of the rest, but it knows that the giraffe will come down this path directly in the line where the lioness is waiting for it. You see how the other lions have positioned themselves in order to push this giraffe in the direction of the waiting lioness in such a precise way that she can jump on its neck.** You have to understand that this is a huge habitat of many square kilometers and the giraffe can go in any direction. The strange thing is us as human beings we call ourselves the king of the creatures. What a misguided man. **We don't hear the lions shouting and giving each other instructions** or orders to go here or there, we see no vocabulary language of them setting up a strategy on how they are going to work together to get the giraffe. And yet we call ourselves the brain of the creatures on this planet. **The lions speak through the sequence of understanding through the emotion of their souls at the strength that none of understand at this point in time.** Humans are so isolated that if we wish to see our son (1:44). and he turns up in front of us, we think, oh I wished and he turns up, God is with me. But **the animals through that strength plan a strategy and they see the whole environment overall, like a satellite** above would, as to where this giraffe might go, and yet we don't see them sitting in the "war cabinets" planning it out. **It means that us as humans haven't even reached the level of what we call the**

animals. We are the animals and we don't even understand that part yet. And when the son comes we say, oh it was my wish and it happened. **Do we need the eye to see or have we chosen the eye to lie to ourselves, to steal.** If animals are so advanced in understanding not only their physical position in respect to each other, they understand the whole geography of the land, the emotional environment and that we have to have ?? more force exerted on an object will cause it to go in a given direction. The animals in their language they know that if I give this soul a push the physicality will oflow, .. **We haven't even reached the animals level of understanding of the communication of our souls, the visualization of the environment, and then we rely on the eye which oofls us all the time.** We have brought ourselves so low and we are happy with the lowness and then it's like a peasant, a man who has nothing and he claims to be the king. (1:46). **Didn't they do that with Christ and put a crown of thorns on his head, you call yourself a king and that is all you deserve. But isn't that the truth about the human being and not the Christ.** We are nothing and we claim to be the king of animals. We need a satellite GPS to see where our car is and where the train is and where we have to turn. **The animals know where the train is and how they have to guide and even assist the E of the giraffe to go that way. The lioness doesn't move a meter, the giraffe walks right into that point, precise planning position.** The Americans would need 10 drones and 50 satellites to get that giraffe in that position and guess he was going to be there otherwise they'd miss it and the drones would end up somewhere else. **This shows that man has not even understood the level that the animals understand. The symbols of the thorns on the head of Christ is the symbol of the man in the dimension of the creation, seeing himself as a king not the Christ,** claiming to be a king. Do we need an eye to see or has it blinded us or reduced us to be more attached to physicality, (1:48). that without it we would be better off because then **we'd use the emotion of our soul in the detection of the environment.** When you watch these programs like the blue planet and the cameraman shows you the reactions of the animals, from now on become the soul of the animal and look at it from that point of view and not the physicality of the position, then you'll understand how much more we need to learn about the work of our own souls to reach even the level of the animals and forget about the "vertical people" or plants which are even ahead of that type. **We have a long way to go and these teachings are a bridge gap to bring you above so that you can see the others and then you won't eat the others.** When you see the operation, that **the giraffe in the essence of his souls he doesn't want to be there because this time I am going to be available for a herd of lionesses in the future, but today my soul is not mature enough to the level I want to have, therefore I'll find a way out.** If you see the giraffe kicks, in a way we kick ourselves into the run so that we can go further to mature ourselves. So do we need the eye, not really, we need the vision of understanding. (1:50). ... I always explain it that in fact the crown of thorns is not for the Christ but it's the stupidity of the man for not being the king. It's for the man in the dimension of physicality who has not understood the truth about the soul of the creation of himself. **A lot of truth is hidden in the mysteries of the conversations of the man, because otherwise he will never understand, at least this way he is attached to it to the point that he understands.** Maybe for the first time he understands why the crown of thorns was put on the head of Christ, it was symbolic for the man and not for him, that you are nothing but you think you are everything. The eye of the man has oofled the physicality of the man and not the vision of the STM. Any other question. **Q: If the soul of every man is part of the soul of the Creator and of the same order, why would the Creator allow the division of the soul of the physicality to manifest itself as a lying or stealing situation?** Because then the STM

sees his weakness that he can cover it. Because it understands the totality. (1:52). For example, you sit at a table with a man or woman who is married, you have a feeling that you create through the soul, understanding that you would like to extend it to the physical direction but there is a consciousness of the soul, I am married and I have given my soul. You both see the desire of physicality but you also understand the strength of the emotion of the commitment of the souls. **How many times have you been in this position. then you understand that it is the man who decides to cross the line of physicality and not the STM. When you cross, you steal and take from another soul that is already shared with another. Man has to understand that most of the understanding of the work of the soul in his interaction with his physicality with others, and understand it in full. As I said the reason why Christ put on the cross was because he shared his soul with one while it was committed to another. This is very harsh for Christians to understand but this is the truth. It is written in the Torah as part of Jewish history the true life of Christ. You call it punishment but it was the balance of the position,** but it created itself in the essence of creation of understanding. (1:54). This is what I was explaining in the past few days about the manifestation of Christ, what you call resurrection, to Mary (Magdalene), as a new physical dimension, but she only recognized the soul of the Christ and not the physicality of it. It took a lot of convincing for Mary to understand this new physical life is carried by the soul. If we go to Mars and we manifest ourselves as a Martian, **Christ managed to manifest himself in a new dimension on this planet the way he wanted because he was aware that Mary was going to fall in love with that physicality the way she fell in love with the soul and he manifested himself in that direction. We wait to go into a new dimension to manifest ourselves in the condition of the environment, whereas Christ did it for the love of Mary.** There is a lot of deep understanding in the true essence of the creation in the life of Christ. Man is not mature he just looks at the physicality. Because people don't understand, it has become mystic, but now you understand it's no mystery and you understand the work of your own creation. **Create with what I taught you today the strength of the soul of the Christ and you shall see the soul of the Christ and understand his work. And then you will see the truth and you don't need any intermediaries. Today's teaching was part of that and gradually in the future teachings I will get you there because now you understand the creation and the strength of the level where one of the arrows I showed you carries the strength of the soul of the Christ.** (1:56). which carries within the structure of the STM and **you'll hear the voice of the soul,** it depends on you if you want to translate it to the voice of physicality, that "I heard", and not I felt the E of it. There is no theology (in this) I have taught you in a way that you become aware of the total physicality and the operation of the soul. Today's is very important because for the first time it teaches you how to absorb energy in the span of the U that you decide at what point to give so much of it to create a dimension of physicality in respect to another environment to manifest yourself in. If the other environment is the soul of Mary and of Christ which manifests to give itself that Mary sees the STM the way she likes and is committed and not the playboy of the past, through its soul and physicality. It's very harsh for those who have believed in fallacy to accept what a load of rubbish we listened to believed in, but there was no choice it was shown (presented) to us as the fact (and we believed). As I said in my past talks, I shall return the stones of the Vatican back to the Coliseum, because the true essence of the knowledge of Christ will be known by the man so there is no need for a house of false messages. (1:58). **Committing human race to a peaceful life needs the understanding of peace by the STM and not by teaching.** Q: Alzar. When I was

growing in my mothers womb the cells were dividing and my soul was feeding my physicality? In a way it's an energy source that you need (for division). How do you divide, you're a doctor you were trained in this. Where does the energy come from for the cells to divide? Stand still and ask yourself, you talk about the rapid division of the cells from 2 to 4, **how can you divide and still be of the same size and dimension if you don't receive energy from somewhere. Nothing transfers, part of the cell itself absorbs energy from the liquid of the womb of the mother, but partially due to the dynamic structure of itself creates the center point that it absorbs energy through itself of a higher order and then in reducing and dividing it, it receives it back.** It's very much like neutrinos that go through the earth and then they manifest themselves somewhere else. So this neutrino of energy that comes from the womb of the mother and the environment going through the cell of the sperm or egg, (2:00). which is trying to divide to amalgamate to become more, slows down and gets absorbed in this new higher order that is created by us or the cell. .. Q; because at one point when we are born our soul doesn't feed us, we steal through our E to feed our physicality? No, that's when the physicality ... **no way your soul doesn't .. nothing is stolen.** Q: so if I feed my physicality with my soul it's okay, but sometimes I feed my soul with my E which is not correct conduct? **No, we don't feed by E, we interfere with the feeding line ..** Q: At what age do we do that? **From the point of inception. If you look at the prtoein structure with 3 and 1, we call in our teachings that because it was the easy way to be able to explain it. If you look ate the SF you have 12, 14, 16 (MG mass) and in that process you have 1 (the top reactor).** In all of them in creating fields to balance among themselves, then they try to feed the other (#1 top reactor) to collect collectively they create a field, a position, where collectively they find a position, (2:02). okay we stop going everywhere (else), we put everything in the bank and everybody takes from it, but this bank always gets drained by this, so it creates a flow. If the doctors and scientists of today look at the M field structure of our AA, they'll see this shape (like a flying saucer), because these are not static, they are dynamic and they rtoate, The H on top and trying (?to feed the others), it creates the Spaceship (SS) here. The shape of what we see, is a dynamic flow of fields. **In reality when you put 2 of these together, this imaginary balanced field and the other one (mirror image), they try to balance each other and it creates rotation and leads to the creation of life.** And to be able to maintain this as they give what they don't need, they take more from the environment and that is how they divide. **Our life in essence comes from taking energy from its environment, but then we forget about it because then it doesn't fit into our structure of understanding.** We always look for something physical, we have to put food in our mouth, then we are alive. **Our soul receives it's energy from the U, from the environment which it lives in and there is so much of it that in feeding back it leads to the operation of the creation in interaction, (2:04). with the soul of the physicality. This is where the brain is created when collectively the souls of physicality's want to balance or control with the soul that created it, then it leads to the creation of the brain of the man,** what we connect to is easier then going there so this part of the space is for my arm, I want this part, I connect to this. A twin system within a twin system, and the physicality absorption of the fields within the structure of the physical matter of the brain. As I said, in the space if we go with the prtoein body of the man and they say, okay we get rid of our physical body dimension, to absorb it into the physicality, and then we go with only our brain, then it's at the AA level, which means then we have no brain, because now in a planet like Zeus this field strength is, say gas, **but your soul is still there, the essence of the creation of the totality is still there. It doesn't matter how it manifests itself in physicality, so in**

that way we understand that man needs to understand the essence of his creation, it's so small that it's demeaning to him to accept that this is me, small but sweet, but with all the power of essence. it's the pride of man, you have to go 10,000 rpm's that you think you are doing something, but look at how fast your body rotates and **how fast the elements in the blood circulate that it collects all the energies of all the souls**. If we understand and get rid of this arrogance of the pride we would become happy beings in the essence of our own soul. And this is what (we) cannot (accept) because everything to us has to be big, to be frightening that I am something, then we do in the (2:06). matter of the soul, but (the reality) it is the totally opposite. **We receive energy and upon receiving it we chop it up to the strength that the other pieces in the egg and sperm can use that they develop and when they develop then they have to split otherwise they can't hold to the size, so that the division comes in.** We do the physical part through the absorption and the work of the soul, the soul feeds the soul of physicality on the physical side we use B12 and other fast energy sources, B9, folic acid in the structure of our body so we can give that energy to physicality to match with the energy that comes from the soul, that the 2 can match the physicality essence of existence with the soul of it, matching growth and they do. **When the mismatch comes then you get problems.** That is why we use a nuclear based, radioactive based (substance) to give that energy which is needed for physical division to match the energy that is now coming from the soul, which feeds the soul of physicality. **We haven't ever understood this and we made all these biological, mystical, scientific, theological games with it.** Now that we understand let's rewrite the book of history of the man and see how many mistakes we made and where we can add to it. this is the beginning of the opening of the knowledge. **Let the man rewrite his history and how own science, this is what the purpose of these teachings are.** Then you understand why people like Dr. Rodrigo who understands partially (2:08). a fraction of these teachings, in essence of physicality are so successful, because if he understands more, people like you, like Dr. Paris, and other scientists we have with us, **then they find the key into the essence of the creation in the U and eradication of all what man calls diseases. We haven't managed to become the pack of lions that can hunt without talking to each other, or to find the mistakes in our physical existence.** Instead, you start hunting for the other souls to steal from them so you don't have to show that we have not understood our own existence. This is the problem and **why I have opened the door. Now try the plasma Gans of the AA, but be aware that it touches your soul. And if you are strong enough to stand the change then you'll see the true life of the U, because then you know you can only take from it what is yours.** Recently I received some writings from Molana (Rumi), I put it to a couple of Iranians. It's beautiful, Molana is one of my favorite writers and in his writings **he understood the soul but he couldn't teach it to man in the essence of the understanding of physicality, because at that time they couldn't understand. He says you only see what you are yourself. You call somebody a liar when you lie yourself.** If you don't lie you don't see anybody else lying, like an innocent child. (2:10). When you are not racist you don't see the color of the man, like a child of 10 or 11 years they don't understand what is black or white. Molana (Rumi) puts it in a beautiful way and this is what we are in essence. Read the writings of Molana most of it's translated into English and other languages. Was he a Sufi, did he understand the philosophy of the STM. **Do Sufi's actually understand the soul or just offlow the pattern of the rotation of the STM and then at that point they reach (it). That's why they rotate themselves. Jews bang their head against the Wall and Sufi's offlow the pattern of the U, and rotate their ?? bodies in the direction of the soul.**

Jews make it out of the confusion between the soul of physicality and the STM, whereas the Sufi's turn around and dance the cycle of life of man in the essence of it, with their hands out, you have those dynamic systems which you bring in, where your feet stand as G points of ?? and your hands are M, or is it visa versa. There have been many scientists in the world, real true scientists who understood the process but they couldn't explain because the man was not ready for it, and Molana is one of them. Q: from Libby who is now called Elizabeth. (2:12). I would like clarification if what I understood when you told us that the Gans' get drained, was it to help us be free of our attachment to the Gans' and recognize that it is all within us. repeat .. that the Gans come into balance and they no longer have the strength. Can I correct this please. I had this discussion yesterday when somebody got upset that the Gans' ... they don't disappear. As I showed in these arrows, each Gans has multitudes of composite M fields, and when they give all the given strength to the environment to balance themselves, they are still there as a PI but not the strength which is manifest to us, what we see. It doesn't mean that they come to the end but it comes to a point of balancing at a given strength with the environment. the plasma still carries, it's like when we die in physicality, in the physical dimension, it stays in the physical matter strength, but the STM which is of a higher strength still carries on, it doesn't come to the demise of the STM. I think people misunderstood this. The PI diminishes in strength because each environment extracts given strength PI, in that strength when you become balanced, become visible, it doesn't mean that the rest of the PI is gone. Even in our manufacturing, we re-feed the Gans' back (2:14). into the mother tank and then put a new one, because if you carry on using the same Gans, because we have it in the tank we rotate it a million times, then you have absorbed the majority of the given strength. This is why we replenish it. In the cycle of manufacturing, even in Accra we do this frequently. It's not that the PI disappears, it makes available all it has in a given strength and the environment takes. This is why when you put Gans' in the freezer and sometimes they freeze, because they give so much to the environment of the freezer that it creates a certain given strength, which is not a PI anymore, it's just a water that is left in there and you freeze the water. **But a certain amount of the Gans' that are still of a lower strength they are there because they are a part of it, mass will take over. We have to understand the totality and not just look at one picture frame. Q: Can I also ask in regards to **Dr. Rodrigo**, because his soul is so pure, is it his intention, his desire to help all of humanity that keeps his units going even if he hasn't changed the Gans Waters. In so many ways the souls of the members of the Earth Council which have chosen are all at that level. I explained to them recently and wrote to Dr. Paris that the souls of the member of the EC, Dr. Rodrigo is a member of the EC for S America, these souls have super passed the physical condition, they can reach and it's a gift to their soul. (2:16). **They just need to wish, the system is just a tool for the physical man. The members of the EC have such a soul that it will take man thousands of years to understand their operation. Collectively they are the Messengers of the planet for the development and the evolution of the man in the right direction through his soul and not through physicality.** At this moment in time they use the physical systems that the man feels happy that I can change. **Dr. Rodrigo's with the power that is in his possession, he can just think it and it will do the job.** It frightens the member of the EC so when I speak to them I usually hold back for them to **understand the gift given to them. The gift given to them is not as a gift given, it allows them to see more of their own soul, which at the higher order reaches the lower much easier way.** Dr. Rodrigo, Dr. Paris, Lisa, Wayne and Alex, these are gifted souls. **These are****

the souls that some of you might call, which are beyond the soul of the Christ and all the prophets of the past, because now they reach the STM where the physicality of the prophets of the past could not explain. Being a member of the EC is being a special breed of souls, it even frightens themselves when they get results and they see things. I set out with Dr. Paris months or weeks ago to bring peace to the Middle East and I had to guide and cajole with him. We met in Istanbul, (2:18). I always give to his soul, then we again in Indian Ocean. **The soul of the members of the Council is sacrosanct and is beyond the understanding of present man. Collectively when they meet as a Council they have the power to change everything for humanity, but they have to understand that the man has to be ready for the change.** If the man is not ready for the change it becomes like the man who said the earth is round and they put him on the noose. It takes time. Dr. Rodrigo especially with his work, is a man who has devoted himself to serving humanity and as a member of the EC he doesn't even need to make a system. **He uses the talk of the child so the child can see the magic but in fact there is no magic, everything is on the table. Respect the member of the EC as they are the guideline for man to enter the U Community. We don't make idols out of them, but we make them in the body of the man so that man understands that we are all equal, but in soul they can change. They have the power that is invested in them by seeing more of, it's not the gift they have, they already possess, and now they can use higher order of the strength that in 1 strength it equals all the souls of the beings on this planet.** Now you understand the power, but they have to be graceful (2:20). and cautious that they do not mix the 2, otherwise they become magicians and then we know what they do with the magicians. **This work of the EC is the collective soul of the man's cry for freedom from pain. Reach them and you'll find salvation.** Shall we call it a day I am exhausted. Try to understand the teaching of today, because I have opened the door to the man to understand the creation of life, of himself and of the lives he can create, and how he can feed his soul in the space without the need of eating or killing another. (2:22).

Video and music and
the END.
