

203rd Knowledge Seekers Workshop Dec 21, 2017

(Talks about current science understanding and how it is divided whereas the new technology everyone will understand the totality and can still specialize in an area the desire, We understood the creation of the soul through the interaction the field strength of the AA, now the question is how to feed it, You feed yourself in the space by giving from your soul which leads conversion of the fields that become the food of physicality confirmation of the existence, You can absorb energy if you have someone to give to, this is the ethos of the understanding of the life in the U, There is a planetary DNA and RNA also that which dictates what is needed on this planet, If we replicate the conditions of this planet we can transfer life there the same as it is here on Earth, Are we a copy from another planet, maybe, If you give unconditionally to any environment it will change, In the mythology of man, Adam and Eve means to give, In space we can create the conditions of existence at any point in the universe, No one dies in space, The universe is one community, , Video of the work of the past 5 years with the Gans and the creation of life but we didn't know what it was at the time and now we can explain it, Keshe said I have come here to enjoy the pleasures of physicality and understand life and why man kills for physicality and by him going through it and he can elevate the soul of the man to a higher level, To give and in giving to understand that there is a need to receive that I can give more, Read the paper, "The Creation of the Black Hole", We can only manifest matters that of the field strength that are within the structure of the planet otherwise we can't absorb them, I teach I do so for every living thing on this planet, We need to create doctors who understand the emotion of plants, The process of healing in the U is through the true giving through the soul of the entity, Are there ways to learn how to give from the soul ... not really you have to feel it, you'll find 99% are takers, He talks about the stages of brain hemorrhage or stroke between young and old and emotionally related, All souls are the same throughout the universe but manifestation of strength is different,)

(:10). Today is the solstice the longest night of the year and different cultures they celebrate it in different way. (:12). Our teachings are going through a new phase. We see people who have been around the KF start to see the Gans technology while denying it is the technology because we said that they can't sell things without certification. 50 (:17). The scientist who invented the water engine that uses no oil, 2 Belgium's at the table he died instantly. Keep away from these people.

(:20). We have to go further. We have to be able to cross ?? from one section to another this is where the expertise comes. I met some people from the UN they explained something that is for us, where we are at, is becoming more and more critical to us. They said, there are millions of people who understand only 1 small part of one topic, then there are 100's of thousands of scientists who understand in depth of the same knowledge, let's say in 2 topics of chemistry, 1 good and 1 not so good, then there are thousands of scientists who understand a small part of let's say chemistry into physics or a connection of physics into biology, then there are very few thousand people who can understand some bigger parts of one science connected to a part of another, then there are a hundred who are good in mainly in 1 topic like biology and part of chemistry, then there are a handful of scientists who understand 1 subject and can relate to 2 subjects like they are good in biology and they understand part in chemistry and part in physics, then there a handful of scientists who can know fully about for example biology and understand (:22). and physics and these people we will see 1 every 10 to 20 years, then there are very few who understand the totality of knowledge and they come once every

500 or 600 years. De Vinci was one of the last ones we know. In our subject we are coming into the same thing. Some of will become expert in Nano, in fields, in plasma, in products, in the effects of PI on the body, and some how to use the technology in respect to the soul of the man. The technology is getting a full spectrum of these understandings. Those of you who started with us years ago have a better understanding of totality, those who joined more recently see one part that has attracted them. Some of you will start opening to see the spectrum. It doesn't mean to become a doctor or professor, because now we are writing totally a new language of science. **We look at the interaction of the fields in the chemistry of plasma differently then the present chemistry, where we look at the interaction of the fields on the structure of the body through the STM, through what the physical soul creates in the matter direction.** (:24). We go from PI to matter content and the rest. This is how it should be and how the totality will refer to all of us. Some of us want to specialize in certain areas ... etc.. some of us will go into sections **where there is a mixtures of plasma, this is the chemistry of the plasma science**, then some will go to the next step and look at the line of AA and interaction of part of the reaction of the structure of the life, this is the new science of the biology of the plasma technology, then some will go to the next step of the science which is the interaction of the PI in the matter and Gans state and the condition of the AA ?? fields, which leads to the creation of physicality and life and E and soul. Now we have gone into the next step because we have seen how PI controls and dictates itself and what and how it produces, now allows us to look at the science of the creation in a totally fresh new angle. We have no professors, doctors, we don't give PhD's, or say that you are a housewife or layman and you don't understand, with this technology all of us understand. (:26). And in balance with our own intelligence and mainly through the dogmas we have and the knowledge we gained from the past, does it fit into what we learned or do we start it fresh and look at it in a fresh way as a new cycle of knowledge. **In the past few weeks of teaching ... I have started bringing part of the technology together that you all come to the level of understanding that you wish and become the De Vinci's of the present time.** With the fresh understanding you'll not get locked into one area. You may become expert in N material but you'll understand what consequences it has, cycle of life it creates, plasma chemistry it creates, and what kind of soul (from) the N material you make leads to the creation of. All these are important for us to understand. These are what I call the enlightenment of the knowledge of the present time. ... In the new knowledge you don't have to be a specialist in one thing, as you undertnad the totality you become a specialist in all aspects of the knowledge. This is important and what we need to bring forward so we don't become narrow minded. (:28). because at this stage, time, and part of the development of the technology of the man can create problems for us in the space because when we look at the totality we see everything, then we don't need to be the scientist of chemistry or the physical part of the PI or Gans or whatever, but **we need to be the scientist who understands the basic fundamental interaction of the plasmatic fields that it leads to the creation of the matter state, to AA, leads to us to create the AA. In space we can't go and find a Zn and Cu plate** and somewhere that has O2 that we can create CO2 and the AA on top of it that we can create the soul. We have to understand how the interaction of the fields has lead to create that AA. In the space we decide what AA we produce from the interaction of the fields of our own soul, in the dimension of physicality. From **last week we understood the creation of the soul through the interaction the field strength of the AA, now the question is how to feed it.** The biggest problem we have and some of you understood last week and others are still trying to understand, and that is how do I feed myself. We taught all of

this. It's important now that we go back and compare it to the physical teaching, the physical matter or matter state of the PI, (:30). and the PI free direction of the field interaction. What does this mean? If you look at the teachings of the past few weeks, we said that **the field strength from the STM, in the interaction with the field strength of the planet, the gravity, the inertia, and the conditions of the fields created by the interaction of the fields between the Sun and the Earth leads to creation of the STM, and then the soul itself in interaction with these elements, by radiating its fields and how they interact leads to the creation of the physicality which is the weaker part. Weaker in the matter state field strength compared to the strength of the STM, but not compared to the soul of the physicality which is a smaller of the same.** then it should have become very transparent for all of you **how to feed yourself, it goes back to the principle of the teachings of the KF, we are here to serve and not to be served. What does this mean, a very simple fact, when you have a soul which is of a higher strength. All you need to do is find the condition, position where by giving from your soul leads conversion of the fields that in that process, the gradual fields have become the food of physicality confirmation of the existence.** (:32). We always said, the stronger, bigger PI always feeds, gives to the lowest strength and gives to the smaller for them to elevate to the higher that they become balanced that what I give, you take what you take, you take what I don't and I take what you don't need. **And it should have been understood that this is the process of feeding, this is how you feed and how you absorb energy from the space of the environment when you are in deep space.** There are no cows, steaks, or hamburgers, so you have to learn how to absorb energy from the space of the universe. **You can absorb if you have someone to give to, this is the ethos of the understanding of the life in the U. You can't just get you have to be able to give that you have a space to receive and in that process what you do not need of the higher or lower order you give.** To be able to feed the body of the man as any entity looking, 10 legs, 14 arms, or whatever in one position, or no legs and a fish life in another, **all become the totality of the PI floating in the space of the U, all need a point of feed, a point of giving and in that process of giving what is the residue becomes the food for the STM.** Now you understand the ethos of the teaching of the KF. (:34). We are here to serve and not to be served, **because in space you can't absorb if you can't give, because there is no flow through. In that process of giving what comes to you to give, becomes the food for the STM, then in interaction and direction of the lower strength it becomes the physicality of the man.** In fact you give from what you become your food space to create your own physicality. If need be, if the interaction with the environmental field strength decided to be. Remember that there are a lot of teachings in the present time that come through the lack of understanding, we say that in this process of life we go on the DNA and RNA, there is a physical DNA we call RNA, **but there is a planetary RNA also. It's that which dictates what is needed on this planet.** All the time you say we have RNA DNA, 2 kidneys, 1 liver, 1 processing, and 2 eyes, but you have to understand that the information about the creation of such a system is embedded in the structure of the soul of the RNA of this planet. When you are conceived in the womb of the mother they say this part has to do with the RNA, genes this or that, but they have not understood that there is a field forces in effect that has become part of the structure of life on this planet, (:36). which is the RNA and DNA of this planet, which in interaction with its existence enforces life in the conditions that we see, sensory vision, 2 eyes, sensory touch, disposal units these have all come. A very good of example of this is what we see in the rivers, that when there is no more life in it, then the rains come and suddenly fish and

life appears. Transmutation of the field strengths and confirmation of the existence of the position is the reason for the creation of the new life in these conditions. **Where there has never been fish, then fish appear, because the salinity of the water dictates the conditions and reflection of the RNA and DNA of the planet to create life in these waters.** Now that the man becomes educated and he can understand more and unravel what has been the mystery. You get a system, create a CO₂ in the Gans of it, then the fields of it, you put it in a patch and then on your body and it reduces or stops pain. Or in the knowledge of the current masters of this technology, you can create or remove entities from the body or introduce them, so it's the same. the field transfer in comparison to what it is, in the condition of what you have created transfers the DNA and RNA and confirmation of the new life. (:38). **If we can replicate every condition of this planet on another planet anywhere in this U, we can replicate life the same as here, because here we have the atmosphere of the earth which replicates the fish, we are part of the universal ocean of fields, in balanced strength, the same applies. In balanced strength we can replicate. There is a very big question, was life ever transported to this planet in this way. Are we a copy or part of a duplication? Maybe. But due to the interaction of the fields of this planet it has its own characteristics and dimensions as well. It has its own structure,** we are all human but if we are from one part of this world then we get blue eyes and blond hair, if from another part we get black eyes and brown hair, **because the conditions of the environment has dictated, and not the mentality of the man. (:40). In this process we have to be open minded and clear enough about the totality of the knowledge and not be restricted into what we think we can't understand. If man stays open minded and gives from his soul, even to his enemies, his enemies will also change.** If you give the same to your friends they'll also change, or to anyone unconditionally they'll also change if the intention is to serve, and it's the same across this planet and the U. If you understand this **you can receive the energy of certain fields that are not available on this planet, from another position in the U, if you understand the absorption of energy from the space of the fields of the ocean of the plasmas of the universe.** Last week in the teachings, in a very open way we explained that **the STM receives the majority of its fields from the depths of the U, the depth of the planet, of the higher strength of it.** It's not that it absorbs very little, anything that is of the strength of itself it will absorb as it needs (:42). from the dimensions of the U. It doesn't take the lowest or the medium, or higher than itself, **it takes what it needs from the space of the U, it transfers that energy as a plasma into the dimension of the physicality and then it leaves it to the brain, or what we call the transition part of the life, for it to decide what this energy is going to manifest itself as an end product.** It's like a dough, once you have made the dough then you decide if it's going to be a bread, cake or cookie; an arm, leg or liver, according to what is needed, otherwise it's the same dough, the same field strength from the STM. This is what is and it has to be understood by all of us, then we become the scientists of the U, with no restrictions to become a chemist, biologist, or a farmer, because you understand the operation of the soul right across whole entire understanding. Now we understand the totality and now we have to be open minded to understand the totality. (:44). **The point which we decide that this is going to be my liver, ?? this is where we want to be, there is nothing wrong in it. It's the pleasure of the STM to serve at that strength and point.** It's for all of us to be aware of the totality but choose which part we want to be with or function through. This is the key and the process we need to understand. **Even if I stop the talk for today you should at least have an insight into how to feed yourself in the space. We need a second entity to be able, by the confirmation of it,**

to be able to receive that we can give. In the mythology and the history of the man, we call it "Adam and Eve", by giving part of itself, as we say Adam created Eve, not only to confirm the confirmation of his physicality but to confirm that he can love, which is giving, which confirms, I exist. Adam did not create Eve for the physicality of life, but for confirmation of (:46). I exist, I can be a giver, and by giving I lead to the creation. The creation of, symbolically a woman, but in reality confirmation of my own existence that I can exist but I need confirmation of my existence, I can love but I need to have something to love, something that can love me back that I can confirm I am a giver. The process we have seen in the mysteries of whatever (? culture, Greek myths for example), is in fact the story of life in space. It's what we call existence, feeding oneself that through feeding we need to feed another that what comes to us, becomes our food. **As long as it is only us there will be no existence, and as long as there is a lover for us to give to then we confirm our existence.** I made man in the image of myself, I needed to create an image for me to love, that by loving it I can receive back life to confirm my existence. this become very clear **how in the space we can create the conditions of existence at any point in the U, because we receive the same field strength but according to the condition of the environment we find ourselves, and our soul decides to make itself appear then we allow the field strength of that environment to be created that it leads to (:48). to the confirmation of our existence.** We have Adam and Eve anywhere in the U, it's our destination and wish to create what Eve at the point of destination of the manifestation. This is the secret of life, the way you would exist in space. **No one dies in the space, just because we have seen here on this planet, that if we don't have air we die, if a fish leaves the water it dies, but in fact if we live through the soul of the being,** you can live in the water, the sea or the depth of the magma of this planet, or you can live in temperatures hundreds of degrees below the temperature (limitation) that the man has made for himself. This is the for us to understand the totality and these teachings are for this purpose, to open the horizon of understanding and the fear of the man, from what has become a fear but doesn't actually exist. **If man leaves this planet through the existence of his soul and understands that it is the soul that dictates its manifestation at any point in the U, according to the fields which he releases in interaction with the fields of the environment that he likes to appear in, then man has become free. Man will have become part of the UC because the universe is one community.** It's very much in the larger scale the teachings that we have started, One nation, One planet, One soul, (:50). One universe, it's all the same. It's for the man to decide if he would like to be a physicist, chemist, farmer or a candle stick makers, otherwise in essence all have souls and exist and they decide in what dimension they want to exist and manifest themselves as. Now you can see, once we understand, that **it's the soul that becomes the creation of the manifestation of the soul of the physicality which in interaction with the field environment of the existence leads to manifestation of the physical life in that environment.** And sometimes you have part that fits and other parts that don't, then we see a mixture of the manifestations. This becomes very frequent for the man of space. **We see entities with the creation of the soul that we can feel, but the physicality is not there, or we see the physicality but can't see the soul, in the dimension that we are looking for, but in fact, if we look in another strength and dimension we find life existing there. then we decide if we want to match that or we want to reach that level of our soul to be able to manifest ourselves at that level, what we call, we become the lover and we change everything to fit that we match with our loved one,** which means we become the givers, (:52). we give up and we give to the level that compared to them, we become

manifest to them, but not necessarily to the others. **Those of you who entered the dimension of Gans technology in the AA level, and then the fields beyond the AA level you start feeling and seeing in the dimension, because now you start feeding the soul because you have learned how to, and you'll see it, then you'll become interaction and you'll interact with new dimensions.** For a lot of you confirmation of the existence of the soul through the water and Gans of the body of the man has been a problem, where we see when the egg and the sperm come together and create what we call the Center, the Essence. In the teachings of the past we had this, those who became the masters and developed it, but they couldn't understand it and they had to wait for the right time to come. **They have recorded their work in the teachings over the past 4 or 5 years and now you can relate to it. For example, creation of twin souls, what we call "beautiful people" (schizophrenic), creation of twin souls of ourselves one of our physicality and one of our total essence, and the interaction with each other.** I have asked our team in the background to look for these recordings and Shandor has found them, they are about 6 minutes. Rick can you play them. These are part of the teachings of the past which at that time we could not make sense of them. (:54). And now we can. ... Listen to it for about 6 minutes. You see one or 2 elements mixed and what has been created. Then you see the interaction of a mixture of Gans' which leads to creation of what I call Principle matters in the center.

.. Video from 44th Knowledge Seekers Workshop Jan 8 2015 ..

... shows the bubbles that formed in the center of the core. There is a double bubble (2 cores) in the center of the rotating ball, the 2 "cores" are because they mixed 2 elements, 1 is CO₂ and other is CuO₂. They each created their own central core and because of how they were mixed they have a line of connection with each other. (:57). .. that's why you have two twin center, in time you'll see light within these cores because the plasmas will interact by layering inside each other, and that interface I explained about the create of matter in the PI over the MG field of different strength, now in the coming time as you mix with materials (Gans') in time you'll see light within these center plasmas. These center principles because they'll radiate different fields and in attraction and reduction from their environment you'll start seeing light, they'll become like light bulbs. The interaction will come from inside, not as a light bulb that you see from outside. the light from inside will come from the same structure of plasma, then you'll start understanding how you can control these centralized plasmas to create different matters. This double PI separation that you see is the beginning of your understanding of the creation of life. If you can mix and control the CO₂ and the Gans in a specific order in your reactors, I'll show you in the future how to do it, then you'll create 1 reactor and the 2 plasmas will merge inside each other and as they have different strength fields they interact and you'll see the light inside the ball. (:59). In the second video. Mr. Keshe says, what we see here in the central plasma is what we call the soul and this goes back to the teaching of nearly 3 years ago, the bubble in the center holds that position, exactly like the STM. It's the interaction of the cells, the MG fields of the AA which have turned to from an egg and the sperm together, which has lead to creation of this center point, so is the same with this. **This is how you can see the creation of what we call the Principle Matter, or STM, or the beginning of life, if we allow this fields to transfer then we can find the matter of physicality within ?? at the point of reduction. These are not empty spaces, they are created by ?? and push?? the fields of different strengths.** You can see the little bubble in the center. That is totally created out of the interaction of the fields of the matter inside. If you create a condition of the mixture of AA's, of the field strengths you'll see the structure of the life, maybe feed it as a field strength, or as the totality (1:01). .. **when**

you start rotating at a certain speed the field separation occurs. This goes back to a lot of theories people have about there being a hollow center in every planet. Yes, there could be, from the interaction you see it very clearly.. This is done by KS and have experimented ... when you understand this You see the soul right in the center then you understand that there is a soul within the structure of the body of the man, which was seeded from the original platform of the AA's which created it. It just adds to it layer by layer as time goes, as what he absorbs from the U and its environment. We don't need to put more Gans in it. It just creates balanced condition of fields and **from then on it's more powerful, in the future when man looks he'll see fields which goes beyond this system. In the body we call it the aura of the man, it's created the same. In this system with that bubble, change in the size of the bubble will create different auras around this ball. (1:03). ... now we see if there is a doubt in some of you about the Principle Matter in the center of the Gans liquid. When you try AA, when this center is created you'll feel the E of it, but learn that the AA Gans is to be of different materials and different strengths for you to have or to be able to absorb ?? observe only part of it, if the field created in the center point is not at the strength that you physically might feel or emotionally accept, then it is just another ball. (1:05). It could fit in the strength that your dog feels and he starts crying, running or laughing, or if it's at the strength of the fish he might start to swim rapidly in the tank or swim upside down,** because that is what the thing (PI) creates. We have to put aside all restrictions which we make for ourselves to be able to confirm that we understand. If we accept and understand the totality then we understand life, emotion, intention, can be developed, exists in every dimension on every point on this planet and the U. If you listen to part of the 44th Workshop, if I remember correctly we referred to the existence of the soul at that time, it was mentioned just a touch, but we had the knowledge 3 years ago but if we would have told you this then it would have shocked you. Listen to it, I touched on the creation of the soul in these systems, because at that time we couldn't explain, you were all in the nursery of the knowledge. (1:07). **The knowledge was there even 4 years ago, but the students were not ready to sit for the exam of life.** It's not something that we have come up with, now you are ready for it and you can understand more and develop the rest. You can understand, explain, expose different beauties of the knowledge according to your understanding. If you listen to 30 through 50th workshops it was saying then literally what I have been teaching you now in the dimension and direction of the STM, now you can connect to it. **It's my wish that none of those who listen or work around the KF ever put a rule down saying, this is how it has to be. the minute you have put the rule down it means you have stopped understanding any further. (1:09).**

... This is what we have to elevate and promote through our own soul to the others to reach the elevation of our soul. In a very simple way, today I have taught you exactly how to feed yourself. If you are among those who don't want to have physicality, try and you'll achieve. **The very first time I declared my position to Caroline she said, what are you doing here. I said, I have come here to enjoy the pleasures of physicality (1:11) and understand life. She said, aren't there thing like this in other places in the whole of the universe. I said, no, here we can taste, smell and enjoy the physicality until we don't go through process to understand why man committed so many crimes for these physicality's. We can't take man out of it, and it has taken me years to understand it, to see the weakness and the strength, to be able to see why man kills, falls in love, becomes physical to another. Once we understand this we can merge it, elevate the soul of the physical man to understand**

the dimension which is above physicality. How can I teach if I haven't tasted it myself, how can I tell you how delicious a cookie is unless I have eaten one or made one myself that I have tasted it. **Many Messengers of the past made the physical mistake of getting involved in physicality, and I said I will not make the same mistake, unless I decide that it is not a mistake.** But their soul was given the message to deliver the Message of the Soul, they converted it into the physical dimension and not the message that came to them. We have to decide what is acceptable at the point of manifestation (1:13). and what is the condition of the manifestation at the point we want to manifest ourselves, but **we still carry the ethos that we have to be at the level of the giver, level of the receiver, and being both at the same time. To give and in giving to understand that there is a need to receive that I can give more**, if you keep on taking water out of a cup spoon by spoon soon there will be nothing left in the cup, unless you put some more in, so is it the same with the STM. **The soul, a beginning, what you call the Principle Matter or Black hole or whatever, needs to receive otherwise it has nothing left to give in time to come.** In receiving there is interaction of the fields of those coming in with those going out, the difference creates life, at the same time there is so much taking that we can't see the giving. **Read the paper, "The creation of the Black hole", if you have understood that principle you have understood the essence of creation.** This paper (1:15). is the backbone of understanding the creation in the U. It's not if you are narrow minded and are looking only at objectivity of an entity, then you will get stuck. If you understand the essence of that paper then you understand the totality of the creation. This is why it was written as **one of the first papers, because it explains everything in the life of the creation.** The example I give, **when the energy goes in you see a light, that light is created, it means it comes out slowly, it is the beginning of creation of life**, is giving, but we do not see it. Now you can see how we go from the physical dimension teachings of the past to the present teachings of the presence of the soul. **This makes life easy for all of you, because now you can relate to everything, your creation, you have been the creator, you have to be a just and correct creator that in what you create doesn't end up by mistake to the demise of yourself, unless this was your intention.** The only apple between the creator and the created is the wish, the condition which the environment creates, that you have to work with it. I hope that it has been made much more clearer. It comes to, (1:17). **how do we communicate with each other, what we need and what we receive.** In the language of the man we use the voice, signs and letters but what is and how do the souls interact, how do you understand the feeling of the soul. We know the emotion of joy and laughter and sadness, but go back to, I made man in the image of myself. **Your soul feels the pain of the loss, or the joy of gaining by others from what they give, what I give for you to exist. The E of the STM to lead to the condition of interaction and creation of the physicality of the STM is the essence of the creation in the physical matter dimension, in which we speak about the weight and the mass, but we never considered that the weight and the mass are from the interaction of the fields of the entity on its own by itself, or in interaction with the fields of the environment of the entity by itself, but then again according to the inertia MG field and not the mass G field of the center. There is a big difference**, because we always can only manifest fields of the given strength of that field (1:19). **is within the structure of the planet. If the element is in space and we don't have it, then we can't absorb it**, because we can't absorb it we can't create its physical condition. We can't create Cu on this planet if within the structure of the MG field of this planet, (part of it) Cu doesn't exist. It has to have that field strength that it can absorb it, then by absorbing it, according to the field strength of the environment it

transfers it into the matter state of Cu, then we see it as a matter. **So shall be the presence of man, confirmation of the existence of the man, according to the environment which it manifests itself in the physical dimension, if physicality is part of the inertia of that entity. Otherwise it can't do it.** If we don't understand this we miss **the whole process of creation, created, and at the same time being able to feed what we have created. You can't create a life in a soul physical level if you can't feed it.** It has to be at a strength that you can support, feed, give life to, and this is what has to be. This is part of our work. (1:21). This is part of the totality of understanding the whole creation, not part of it. This is exact understanding of it, how we want to manifest and where, and **there has to be one condition only and that is the intention to give and not to take from the environment. If we enter a dimension to take from an environment then we are back to what we have on this planet. We become takers of packages of energy because we have no confidence in ourselves that we are the givers, the lovers.** It's in part of the writings of Bahuala, that **one should not love his nation but has to love the whole of humanity.** And some governments and people who wanted to use this, are not nation lovers, but it doesn't say that they are the world lovers and loving the world means creating peace. We have played with the words and their understanding the way it suits us. (1:23). **In space if you play with these things then you playing with the fire of the soul of the man, which means the soul will not allow and with it, it demises itself, because these (intentions) don't exist in the level of the STM.** If the MG fields of the Cu didn't exist in the Cu (??earth), but not exist in the body of the man. **The elements that are not part of this planet are not in the physical strength of the body of the man ??either, but they exist in the STM, which carries the full spectrum of the field strength of U, but in this condition and position as a physical entity of the body manifests itself as a man. If the strength level is in the condition of the fish you'll manifest yourself as a fish, or as an AA of a tree or a plant.** If you understand the totality of the teaching, **when I teach I do so for every living thing on this planet, and man thinks the teaching is only for him because he can hear the voice as a man, (1:25).** but we teach as a soul so we elevate the totality and those who understand they become **part of the process.** You want to see **how the fish feels in the cage that you have built him and want him to live, then you have to become part of the soul of the fish, feel his pain and condition and then you change.** We had a recent case in Accra where the fishery has a huge problem. They put 5 by 5 meter tank out of mesh and put them in the rivers or the ocean, and they want to grow them. But 80% of the fish don't want to be in cages, so they create a cancer to kill themselves not to face this imprisonment. **The fishermen lose 85% of their fish growth to this condition. They don't understand and say that the fish are getting a disease. I explained to the Ministry that you have to understand the soul of the fish,** it doesn't want to be captured and live next to the guy who stinks and the other who is too fat, he wants to go where he wants. We have a condition to elevate the soul so the fish is happy with what he has, he says, I accept the condition that through my soul I can give my strength to the guy who smells and the one who is too fat, that we are all happy to be together. And when you understand that **the E of the fish comes from the strength of a certain type of Zn, (1:27).** that it gives him that present satisfaction then you'll find that **the fish change.** They said, oh, you found a technology that it can change the fish that it doesn't get the disease. No, we have understood the essence of the soul of the fish and not finding a cure for the physicality of the fish. **The father gets prostate cancer because of the conflict with the son, the mother gets breast cancer because of the adulterous life of the husband. Now you understand. Do we do chemotherapy on**

the prostate cancer and then the father still dies because the pain of the emotion with the son is too big. Or do we elevate the soul of the father and the son to the level that the physicality of the father sees that there is no reason for the destruction of the body, there's only a misunderstanding. Or do we teach the man to leave the adulterous life because it leads to the cancer of your wife and the loss of the mother of your children. Or do we teach the woman that if you are correct the man doesn't need to look outside. **Elevation of the soul that the 2 fall in love is the point, not the physicality of the adultery or the cancer of the prostate.** This is where **the next level of the application of the health system comes in**, understanding what leads to the condition and not (1:29). that the condition is there and how can we eradicate or change it, because the present tablets tries to interact on the physical matter level. Nobody has made a Gans or plasma of the disease that you can give and elevate. The new dynamic systems do, for the first time we managed to go into the next level. The present doctors have a huge problem with it because they don't understand it because they have all been taught at the matter state level of the tablets of the pharmaceuticals and the check in the bank. The process of the change comes from the understanding of the totality and not all of us are capable to do that because we have too many other things that are ?? tied up (1:30). Try to expand your knowledge but do not take sides because that limitation can become your demise in the space. Learn the knowledge in its totality, at least hear it, you don't need to understand it because when the time comes, you will understand. It's the same as with rtoating balls we showed them 4 years ago but you were not ready. I am a master of teaching and I know how and who to teach. Some of you learn fast, last week when I started explaining about the mixing of the AA's in the core, I received a text from my Arman, he said didn't we do that 3 years ago, I said, you are too fast. (1:31). the rest were not **ready I had to slow you down. Some of us get enlightened before the others but they will catch up**, but the problem is not for those to catch up, we are a live entity humans, in the physical body of humans, we create new souls and the teaching has to be for those also and the ones these souls create and the ones after them and the rest. **These teachings are not just for us but are for the future generations that they understand more and more from an earlier age and eventually from the time of inception that we need to teach the STM not the physicality of the man in the cages of the schools of the man.** If you teach the STM the totality of the knowledge you don't need to put him in the classroom of today and torture him by a teacher who himself is ignorant of totality and in turn creates a bunch of ignorant children by the education and patterns of his own life. We give pure souls to a bunch of whatever you want to call them, who have no knowledge but are there to confirm their existence. There are no schools in the U as what we see here on earth. **This is the teaching and torture of physicality and the confinement of a bunch of people who themselves have no understanding of the totality**, how can they teach. How can we allow an illiterate person teach graduate PhD's and claim to be a doctor. We have to teach the soul of our children that through the elevation of the soul when they see the knowledge of man on earth they understand it here, when they see the knowledge of man in another point in the U, they can understand how to fit, and when they see another life in the U according to our knowledge and strength of their soul they can appreciate the beauty of the new life ?? We should take the schools into the souls by us who understand rather than giving them into the hands of ignorance that they create more damaged souls in the hand the future cycles. Any questions. (1:34). Q: Can we use the AA in the salt without washing them? **You have to wash your AA. Some salt created on the AA let's say K or Na are of different strengths so you have to take the physical level of it out that it becomes the Gans level of Pl of the AA which is of**

the strength of that salt, but you don't need the physicality of the salt with it, it will carry it. (1:36). In so many ways as a human race we have conditioned ourselves, pushed ourselves to limit our own understanding, nobody else has, it is us who decides that I want to become a physicist or a doctor or a farmer, because this is what is expected of me or what I better understand. It's good to be a farmer but understand the work of the medicine of vegetables, the same as human beings, and understanding the essence of it can give me the same, it doesn't matter if I am a farmer or a doctor, because I understand of what I call the vertical people. **We haven't grown that much even to understand that we need to create plant doctors in the same way that we created animal doctors. To be able to understand the emotional illness of the plant.** At the pharmaceutical level we change things the way we want it, but do we ask the soul of the plant, is this what you are happy with, or what are the consequences when I force changes on you by changing your conditions. We have animal doctors but we haven't created doctors with the knowledge of the plants. That's how ?? we are, because they are educated ahead of us, we don't want to show how ignorant we are of the knowledge. (1:38). I said once in the health teachings, what am I going to do if I bring an entity from planet Zeus in front of me. Because he has never created children by not teaching them from the soul level and has taught them from the soul level and they understand, they have no prostate cancer, but in terms of your own knowledge it must be a prostate cancer even though the guy doesn't have a prostate, but it looks that way to you, why. **Because you haven't understood the process of the interaction of the physicality with the interaction of the emotion of the STM, in comparison with the soul of the entity from planet Zeus. The only way you can do it is to be a lover, a giver, don't ask questions. Instead, I give everything that you need as you are a patient in front of me. Take what you need. And what comes back from it tells you the source of the problem,** not what you are trying to give to him, because the prescription for the pharmaceuticals is what they have paid me to do. **The process of healing in the U is the true giving through the soul of the entity and not the force of the physicality of the entity, in the condition of the man's level of understanding.** This is the key, this is how all of us become man of space, because we understand what is the matter condition of the physicality of our life, belongs to us, we have to educate ourselves (1:40). to understand the level of the soul, then we become educated in the world of the universal community. Q: **Are there some clues of how to give from the soul of the physicality** or the higher level central soul so as to enable them to merge or for us to be able to maintain the soul of physicality ? higher level central soul in space? **Not really. You have to feel it. I presume that you want to teach yourself. If you have a lover or wife or children, when you lie next to them, try to feel their needs and usually you find out that they are takers. They are 99% takers, very few are givers and it disturbs you.** You get up and you leave the bed, because you are there to give but they want to take more than what you can give and that is not acceptable to you. We have to feel the emotion. **This is what angers me a lot and puts me to silence a lot of the times, is that I see that they are takers but they pretend to be givers and they talk as if they are givers. (1:42). Deception by the physicality of the man, but seeing the truth through the STM.** There is no method, you feel it and you understand it. **The only method is to trust in ones soul.** There are many thieves of Baghdad across the U and especially in the race of the man. And they call it, I love you through the love of man, but through deception of the physicality. Q: So trust, I will know, give equals take.... **You just give, don't ever take.** There are a lot of things we don't understand. There are **stages of what I call a stroke or brain hemorrhage. If you offlow people who have had a brain hemorrhage, at a young age you see different effects. In ages**

18 to 25, and if it's at a point that so much information is created in the brain that it's going down to the physicality it stops receiving and giving more in the E, you see stroke in the upper part of the spinal cord just at the point of the interaction of the fields of the brain with the physical part, or the interaction of the STM with the physical soul of the life. (1:44). It usually leads to heavy paralysis which ?? and the rest. If you have a stroke between the age of 35 to 45, you get a different stroke, a behavioral stroke. And it changes due to position and understanding. ... In the ones past 45 you see physical damage type of stroke, but there is a hidden emotional damage stroke that we are not aware of, but you can analyze it. It bring people a lot of anger, people who forget damages, positions, forgetting ?? Anger by misbehavior of the youth, because we don't understand, I have been good and have done good, then why am I in this position, and this is huge. The world of science has never studied this, but people who have a stroke around age of 40 will have a lot of anger, and a feeling of a shortness of time, not being enough time. I have been hit in midlife so I might not have time. They tend to jump in conversations and not let you finish your sentence, because 'I don't have time I want to say what I have to because if the next stroke comes I am gone and I won't be able to say what I want to say. At the same time it brings a shortness of understanding in the younger generation because they are wasting time, there is no time, 'I have had it at the age of 40 so I can die so I don't have time for nonsense. We see behavioral and sometimes physical changes. If you have stroke in 50's you already have had the time so psychologically you accept it, that we have lived our lives. (1:46). Therefore the stroke creates a massive physical disabilities, usually on the left side because it hits you in the direction of the heart emotion. Or it hits you on the right side, it depends on the level of the E ?? and the position of the heart. But the man goes calm and quiet because he has already accepted demise to be around the corner ... **The world of science never looked at the emotion of the stroke, the level of not wanting to live in the physical dimension, but the force of the E of the STM** had not yet finished, there is still something to do and learn. None of the medical research ever looks at the stroke through the STM and what condition of E it creates in the body. We haven't even mastered this part of our lives yet. We have to become aware of our own physical life and be part of it (1:48). to understand the work of the STM with the physicality. Why do we become forgetful, agitated, why not remembering when we have a stroke around 40 to 45 years old, and why the same condition in the later ages, because of the acceptance. **I was ready to die, even though I have anger for what has happened. Why at young age stroke the physicality doesn't respond to the E of the soul. Why do we see Alzheimer's at young ages, or ILS with different effects and ages, exactly like the stroke. Do we have to blame them for what has happened or are we the creator of such a condition that they go there ??** What we have learned up to now in our sciences are not wrong but we have to go further and put things right. Some understand the interaction of the STM and STP which leads to the physical condition we see. Then we become the physicians of the U. Every single one of us has to become physicians of the U because otherwise we will not be able to exist. (1:50). We are not training a bunch of space doctors but souls who understand the work of the soul of the entity and not the physicality. We study these because we have to adjust our understanding we have to add to our knowledge that the process of change comes in a deeper way and faster otherwise we can not. Any other question. Q; Do the souls of other galaxies have the attributes, are all souls the same in their internal structure or are there different nations of souls? No, **all souls are the same, this is why you can manifest yourself in the shape of another being, in the environment of that being. You don't go and import it, it is already within you, you decide at what strength to**

expose. You manifest yourself at a point of environmental condition field strength and that condition tells you to have 20 arms and 16 legs. It doesn't mean you couldn't have it on earth but it's not applicable. (1:52). You try to be a centipede and try running, shopping, etc. on 100 legs. More than 2 is enough. **But in that space (the environment you manifest) because it allows you to function in a certain way that is necessary for that environment, but it meant that you already had it, but if you come to earth and you try to copy that 14 legs and 16 arms it doesn't work, you'll be falling all over yourself,** and with it will you be able to carry the weight of it. We carry all the ?? all the souls in the U carry the spectrum of the field strength and manifest themselves at the point of manifestation. That's why I keep saying in the teachings from time to time, that there are many of us who are not from this planet, but they behave and look. This Sunday is what you call the Christmas for the path of those who chosen to find a way through the Christ ?? **When you look at Christmas look at the essence of the soul of the Christ and not the Churches, books and crosses that are put there to deceive the man, then you might hear the voice of the Christ in the essence of his soul.** (1:54). Try to free yourself from attachment to things that you don't have a need to be attached to in the physical dimension of the physicality, but understand it through the STM, then you'll find out that living becomes very easy. You can walk away from those who have the wrong intention and let them live within the structure they have made for themselves until they receive enough from you to elevate their souls. They call themselves your lovers but in fact they are not, they are the lover of their own physicality to confirm their meager existence. We don't preach, we enlighten you to see the truth and ?? and that is the purpose, when you see and understand it then nobody can abuse you and nothing is magic. Q: Paul from Togo asks about a road that passes by a mountain in Togo, (1:56). In that place we have a lot of accidents where 1 to 2 million people have died by accidents. At midnight they see a lot of "dead people" are moving and you can see them but they dissolve when they are 10 meters from you, how can we explain this. You have to understand what has happened there, what is the condition and what is the position of it. We have many places in different parts of the world, because of the configuration of the MG fields, they effect us in a certain way and create certain conditions. You have to understand what strength is created in that environment which effects what part of the creation of the man. (1:58). What does it elevate or reach. We had a scientist with us in Italy who said that since she has been using Gans that she loses time in the same area when she travels. 31

(2:04).

(2:10).

(2:12). Q: **from Togo, when I give, someone feels things, and I say by my soul level I can give a help for that person.** I don't understand. ... ?? with my soul I can relieve others pain ... Maybe you share because you don't want her to miss the class and the knowledge you are teaching. I have seen this happen where people instantaneously come up with a pain, and you don't understand it, (2:17). but if you stand back and analyze how and when it happened, and the reason, then you see it was made through emotion. I was witness to a sudden attack of pain, and they say why, and they come up with all excuses, but I say no because I was there witnessing it. Why do we manifest pain? Is where the pain manifests in a given part of the body the result of not receiving enough emotion that with it we want to confirm it. I have seen this recently where out of nowhere someone comes up with pain, but it has a specific ?? which means it has an emotion tied to it. If you explain it to them then they understand that you know why the

pain came and was felt as a pain, but it was of the emotion at the level of the soul of the physicality and not the physical pain as a pain. If you get poisoned or hit on the head you feel a pain because of the physical interaction, but these kinds of pains means, ??feel what I can ??? you still have to understand why it does that. In other ways it means that I have the same strength as you have and I want you to be here that I want you to receive the knowledge I give you (Togo man) so I take your pain. (2:19). I become part of it that you don't feel it, you become the pad, you transfer the energy to yourself. We do it because we are emotionally connected and it's very common. A lot of us do it with our children, if your child has a pain you put your hand there and take the pain way. ... you transfer the fields of the emotion through the body. One thing you 2 are from Togo and you speak clear but when Paul speaks we have trouble understanding, you 2 better talk to each other and use your system. Paul says they have solved the internet problem. (2:21). **Q: Man feels uncomfortable when people see him as unique because his view has changed.** .. since I embraced the ethos of the KF ... they say nobody is like that these days. ... the souls are lacking in real love .. why am I feeling that discomfort by uniqueness. (2:24). ... **I don't know I am not in the environment you are in, depends on how you are seeing this process of giving, are you seeing that you look generous and this gives you a pleasure to be because now you are part of ... or do you need to give in the physical dimension, where at the level of soul you can give more. It just depends on how we see it, perceive ourselves** and what actually gives us the satisfaction to exist. It's very personal and depends of what gives you confirmation and what you are happy to do. The teachings are very compact, what I have been doing in the last weeks is the first 20 to 30 minutes of teaching is so much condensed and it needs a lot of understanding. We explained about the soul ?? how you can feed your soul that you can live in ?? the universe. When we are left alone in the space (2:26). the physical dimension existence according the Kelvin temperature of minus bla , bla , bla has no relevance on the STM. When you fall in the volcanic magma it doesn't take the STM but only the physical condition of the man, the STM is free. When we understand this it makes us men of space, it brings us ?? in the physicality of the U ?? and the UC. It's not that when we say we are going to take you to the UC, ?? that a bunch of aliens are going to come out and say that we are here, would you like to see 20 tails or whatever. No, it's to elevate the man to see the truth about the creation and the STM in the dimension of the soul of the universe. To understand that I am a part of, I belong and understand the totality. Those of you who are sightseers you are quite welcome to call them UOFs, those who universal seers enter the soul of the universe ?? STM. There is a big difference but to a lot of you it's just words spoken, but those of you who understand will take the path, and see the universe ?? strength of the creation and not thorough the dimension of the physicality of the man. As I said may times, I am ashamed to be in the body of the man. (2:28). because it has too many restrictions and too many things that force it to do wrong because of its physical existence. What has gone wrong on this planet, we have never understood but there is something inside in the grain of the soul of the physicality which has caused this problem. Why man has become so self centered, why he has become so much that he is everything, and the beauty of it is that all the men feel the same, so there must really be something that needs adjusting in the total soul of the man in conversion of the emotion of the physical side of the STM. This is the problem. If you look at the teachings, I have given you many choices, stay as you are you don't need to reach your soul, whatever you ?? need 10 generations down the road, I already know this part, but where, oh my great grandfather 10 generations before heard it, you have been given the option to become free from the physical attachment, but to still be here, you have been given the

option to become passengers of the physical life ??? transportation, what you call UOFs, and the option to have understanding of your soul that you become passengers of the universe, then you are given the option to understand the totality work of your soul that you understand the work of the Creator. And every man has the capability to enter any of them. It's you who has to decide and that is what these teachings are coming up to. We taught you the physical condition and a lot of you have a problem with the flight system. (2:30). but as I said many times, you are on a UOF called Earth and you don't see yourself inside a ship while it's traveling. How do you expect to be able to travel inside this thing while you yourself have never understood how the thing you are already traveling in is traveling. It is not my teaching, it's your lack of understanding of the totality. I have taught you everything. Try to understand the essence and choose the point of ?? comfort and do not choose the point where you want to be seen because it's fashionable. There are no catwalks of fashion in the spans of the U. You can go with the naked STM, you decide the manifestation of time and the position of its place. This is where the teachings are leading to, for you to see the totality. Thank you for today and hopefully we'll learn more next time.
