

205th Knowledge Seekers Workshop Jan 4 2018

(LUNGS, Summary of the 24 Commandments are on Webpage, If any war is started Power Plasma generator will be released worldwide, the soul of the man is the sun and so it's the creator of the physicality how can I produce things on my own when I always relied on the intermediary of the sun to feed me, In deep space there is no cycling of time by rotation of planet so we don't need to regenerate cells so fast as on Earth, The Indian guru who came and developed the ability not to eat for 21 days and Keshe explained how he did it, ,, Our present science taught us that we need to breath oxygen to survive and this is a big fallacy no where does oxygen cells ever cross the lung wall into the blood, This means that we have learned in our blood to create a replication in the same way as the orange in the water. We bring the energy of the air into our lungs and the matching energy in our blood cells, in the liquid of the blood, converts and receives the energy it needs from the air we breath, Next time what you need for a cancer put in that water you don't need to make Gans' of it (fields will transfer ?), Every cell in the blood is destination coordinated to a specific cell in the body and it only feeds that one, By feeding the Amino Acid which is partially the soul I can survive, , New research centers will start to creates systems for food and materials needed in space, The lung is functions exactly like the stomach and is enough to feed the body so we can get rid of the stomach and digestive system, What these commandments are, is do not create any filter between the soul of the man and the soul of physicality of the man, How and where the liquid in the lungs come from up to 6 liters, The oceans are created the same way as the liquid in the lung, Earth is a nursery for the creation of souls to become stars in the universe, It's a brick wall and man has to be the giver and to always be the btotom brick that the others can be put up higher that in totality it reaches the highest to see the top, the beauty of the further distance, The reason we say don't do this or give commandments is so that when the soul leaves the body that it is of the higher strength that it doesn't become a burden on the other souls for them to elevate it, To clean your soul from wrong doings in the past you have to recognize it and don't repeat it, We have created one of the worst things on this planet, by killing if somebody kills, In the coming months we see the establishment and end of Catholic Church, The whole purpose of the teaching is to give pleasure for more to see and enjoy and for more to be able to give more, When the Church of England sold their properties they found many bodies of children during excavation so the Church passed a law so that only they could demolish it to hide their own crimes between the priests and nuns the same will happen with the Catholic Churches, John Paul created more crime then Hitler, he didn't touch the children the fresh soul, but he knew and he allowed it to happen, the same with the present Pope, , When look at your aura and you see all sorts of colors, these colors are not coming out of your body but from the interaction of fields from the objects around you, the chair wants this field and the bed that one and the frig wants something else, ,)

(:10). There is a new webpage for the new year. Stanley shows. "We are here to serve, not to be served." ... (:20). **The 24 Commandments on the webpage from the 204th Workshop, with the excerpts** from Mr. Keshe teaching. ...

(:26). (:28). **The Power Plasma Generator is being development by 3 different groups. We are on alert for the starting of any wars which would cause us to release them and you would become energy self-sufficient** and with it comes a lot of other things, understanding, 46 ..Ghana is our space station in Africa and huge amount of money getting invested there to reach this. ...

(:28). This is important as we convert governments to one government that collectively we see and understand the change. The PPG (Plasma Power Generators) have been given to 3 different groups to develop in different ways and understand the process. **We are on a standby in the case of any incident that can trigger a war due to fuel, energy or political, if this happens the 3 groups will release the PPG automatically,** which means you become energy self-sufficient and with it comes a lot of other things, acceptance and understand through the work of the soul. Now that we understand that **the STM is the sun and so it's the creator of the physicality of the body of the man. This is the part in which many people have problem with. How can I produce things on my own when I always relied on the intermediary of the sun to feed me, when in fact the sun is the center of the energy for the strength of the life on earth and the Solar System, but the STM has the power of totality,** the whole understanding. One of the biggest things was understanding the Commandments, **I released the balance of the Commandments that were given to Moses that he didn't release. Those who are religious will fight this** and discuss why and how as it suits them. It puts straight away the religious leaders in one question mark, thy shall not lie. (:30). And the second one, there is only One Creator, when these 2 if and **when they are accepted by the religious groups, of different paths, of political and economical, then we understand that there is no need for the financial monetary system that we have created or places of worship because the temple of man becomes the STM, then we don't need to go somewhere to ask, lie, or beg or whatever we have done for the past centuries and thousands of years, to get energy, that actually comes from our own soul, and then we give the credit to somebody else.** When man releases the power of his own soul then he will have evolved, the point of evolution comes when we understand that **we believed in the sun to give us the light, energy, food, but we never stood still to understand that the sun is the STM.** We need a constant reminder, what does this light do, where does it convert to, become. Most of us have relied on 1 or 2 things, going to the shop, cultivating, or somehow getting the physical need energies. Rick put up this picture and explain what you see. **When I saw it the first time it's amazing how much it brings home. (:32). Comment on what you think this picture is. The rush of food before a disaster, scarcity of food do to break down of structure,** I remember this from Yugoslavia. (:34). **This picture was taken in Germany with all non-German products taken off the shelf to show the Germans how dependent** they have become dependent on other nations for their food. What I want to show is that this is the state of One Nation, if we call ourselves nations this is the situation. ... **This is how we have become One Nation, relying on each other as a nation** ... this was to explain why they are fighting in Germany with the racism and the rest ... we all need each other. ... this is what we are striving for as KF, when all these shelves are filled in there will be no mention of what nation it comes from. Another brother or sister or position on this planet, that they care for us that we can have the luxury to live. **When these shelves are filled everywhere then we have achieved the target of being equal. (:37).** this will be what we would like to create from our soul that we can take the pleasure. **When we learn that we can convert the energy from our soul to the energy of our life, then we'll see the reality. We can produce everything through the conversion of the energy of our soul. Then we can develop a condition that in the space all these shelves don't exist, are empty. We have become habitual to produce what the man needs, now that we open the space of the U in an open way, and manner to the other races, would they bring their foods and put them on these shelves. I have said that the travelers of the space on Earth can openly purchase what they enjoy, or have they developed to a position that they**

understand the position of the essence of the soul and they don't need to bring anything. (:39). ...

Would we learn how through instruction of strength we need to taste the food from another planet, another position in the U. In 2018 we start looking at the realities that are to come. One of the things that concerns all of us from the second we open our eyes to the second we close them, and the thoughts of the next day when we open our eyes what we have to do .. is one thing. (:40). It is liquid or water and food. Would we have access to water to drink and would there be a food that I can eat to guarantee my survival until the next night. **In the space there is no night and day, so it becomes what do I need for the next time, months or years that it can feed me. Would the cycle of the regeneration of the cell of the man in the space, if he decides to carry his present physicality change?** At the moment we change the cell of our skin every 28 days or so, same with the blood cells, and other cells in the body change, because there is so much need for energy to give and take. In the depth of space when we don't have such a huge interaction of the fields, the way we have established on this planet, **would the cells of the skin change every 200 years, or every 10 days because of the initial energies that come into it. It is part of the evolution. Our body has tuned itself to every 28 days because it fits into the cycle of the moon and the sun and everything else that we have created, because each day of the moon's cycle with the earth creates different absorption rates of the fields from the sun and from the moon and earth.** This is one thing we never understood and we have to, because **the environmental conditions dictates how we receive and we have cycled ourselves into it,** we do it so naturally that we don't even think about it. We receive different energy on a full moon (:42). then when the moon disappears for a couple of days. We need that because it gives us a spectrum of the energies which we need to conserve to do (we need to absorb). **In deep space when there is no such revolution and evolution of time in respect to rotation of the earth, moon and sun, then it becomes constant. Therefore there is no need for regeneration of the cells so fast and so much. The life of the man will run into thousands of years like every other being in the U.** The secret of the Ofountain of Youth or life is the combination of understanding the totality of life. **Would we take into space to live a longer life or would we stay on this planet and use the food on these shelves to limit our lives. This is what mankind has to open his eyes to in 2018.** As we develop and bring resources then we have to understand how do we use them or do we use one source which is the STM to feed it. If you remember some 3 or 4 years ago we had a visit by an Indian Guru, in one of the presentations we see his picture. (:44). **This Guru gained prominence with his cult and his elevation was based on how many days he didn't eat, which was 21 days.** Every time he could do this his mastership and elevation in respect to his followers increased because nobody can live for 21 days without eating, drinking we could do but without eating only a few days. This gave him position and elevation that he could do things. In his meeting with me **I explained in detail what he does and it's not very clever and yet he gains elevation, because he has learned a physical trick in the dimension of the man. In fact any one of us can do this, survive without food on earth and beyond.** Many of you though my teaching has started drinking Gans water and substituting the energy of the food with, pulling in of the G field strength of the food into the water and drinking it. We are still relying on being a "copy cat" job, we copy the field strength of the orange into the water and drink it, and the fallacy is that now we don't kill an animal because now we know the energy. (:46). We just copied and stopped eating. Last year during my travels in China I have seen many people who stopped eating and just drink the water. They have made

the Gans water from the materials, so it is going to the shelf and buying the same product but now instead of being in a package it's in a water. This is beautiful but we can go 1 step, 2 steps, even 3 steps further in our understanding of this evolution. If any of you stop eating for 50 to 100 days you would definitely take over his cult, because you are more clever than him and you become the new gurus. And if somebody can't eat for 1 or 2 years definitely he is god, if we go according to the present understanding in his cult system. **But we understand the science there is no cult system, we understand the technology so there is no need to make anymore churches and gods because now we have become the creator and we create the energy we need.** We create the condition for the energy that we need to absorb. I said to the guru, you should have explained to your flock what you are doing, you are deceiving them. He said, you have found my secret, I said there is no secret. (:48). this is what is done all the time for those who understand. **The process is very simple, all of us do the same thing as the guru but we have never realized (known it). It's amazing how much knowledge we have but have ignored it** or we never understood it and it became an ignorance on our part. Very early in the teaching I explained many times **that in the present science of the body of the man they explained to us that we need to breath O2 to survive. I have said that this is such a huge fallacy. No where in our lungs do any of us every allow a single cell of O2 to go across our lung into our blood. This means that we have learned in our blood to create a replication in the same way as the orange and the water. We bring the energy of the air into our lungs and the matching energy in our blood cells, in the liquid of the blood, converts and receives the energy it needs from the air we breath.** This is one point that the world of medicine and biology have never understood. Now we have the knowledge and understand more. (:50). **In your systems you have created a condition where you put an orange above the water in the condition of a plasma, and the energy of the orange is transferred into the liquid (water),** and now it carries the energy which you can drink from and take what you like, in a way it's a third hand process conversion. **The same thing happens in our lung, the energy from the air coming into our lung with the liquid that is present in the lung, it becomes that water because it's all in a MG field strength environment** (of our ? body). Then as the blood passes, the same as, the lung in holding and converting energy. What you do is to take a cup and drink it or put it on a patch and next to your skin and it evolves to become, as you have understood the conversion of energy and it always gives to the weaker. **You have a floating dynamic body, which is the blood and you have a stationary pain pad, which is a food pad, you call the lung. So never does O2 cross the lung wall. Now we understand the science of the food, the conversion of the fields into the water** and then drinking the water (:52). or making a patch from the water and putting it on our skin to get rid of our pain, which never of you ever done before. When you made that orange and drank it and tasted the orange, **next time what you need for a cancer put in that water, you don't need to make Gans' of it.** This is how you have become copy cats, extend the knowledge, then you'll understand. **This is the process that in that condition we only transfer energy from our lung, and from the air we breath, and because of the weaker strength in the liquid blood the energy is transferred across, no O2 has ever left the lung and enter into the blood** to oxygenate it as it has been said. **The brightness in the color of the blood as we see it, is just because it receives more energy it becomes of a higher order,** so it becomes bright, but there is a limit in what it can carry and that limit is what it carries for a given cell. **Every blood cell is destination coordinated, it finds its way like a mtoorway, it goes only to Rome and not to Brussels or Beijing. The lung ?? is GPS connected to a specific cell in a specific position in the body. Every cell of the**

blood is specific to one cell where it feeds and no others. In time man will understand and when we do, when the blood cell gets to its destination, (:54). it does the same thing, it transfers its energy for it. It's just like one caging system for one office, 1 cell ?? for 1 cell of the blood with the transportation. **In that process because it carries the energy, it also carries the information that it needs for the interaction between itself and the cell, and it has a few micro-seconds to pass and transfer energy in the blood system, it already predestines what I am short of to receive from the lung. So in a way the cell of the tip of the toe tells to its corresponding blood cell in the blood that when you go to the storage this is what I need from the pad of the lung and for you to bring it for me.. In this process I can feed the AA with that cell, The AA is partially the soul of myself and by feeding it I can survive Now we understand the biology of the man in a totally different way and in a correct way for the first time. What we breath and how we breath, we dictate different energies. The air we breath in ?? in position where we are in, as an altitude from the center of the earth, even a few hundred meters difference, which is a meager distance from the center of the core, dictates a different physical condition, different absorption because of the condition of the environment of the fields of the planet, the sun, what the body and what the cell at the toe has decided to be, to be working in balance. For the first time we understand that when the STM creates the physicality of the man, (:56). which becomes a cell on the tip of the toe, it's actually with that dictates what it needs to release, so our soul becomes that orange, by conversion to a liquid, of the presence, which doesn't need to be a liquid, it can be a different dimension strength field, converts the energy which the cell in the tip of the toe needs. So we understand a new dimension, which means how to feed that soul in the tip of the toe with the soul from the energy of the STM that the physicality can confirm its existence.** Back to the guru, I explained his trick, we all now understand that the strength of the field we absorb dictates what is given to the body of the man. **Even water has energy field strength, if you can find a way that the energy transfer in the lung can be of the liquid of the water which the body needs, you can create the same O2 and H which is in the air you breath to the strength of the liquid of the water which the body of the man needs to survive in deep space if you decide to carry the physicality of the man.** It's for you to test. (:58). Then it brings another dimension, as we know that everything is exactly the same, has an AA base which is a C, H,N,O in combination of different field strength, then we decide through our emotion in interaction with the field of the soul and what comes in as an energy of the planet, through our emotion that I taste banana because that is what I need and what my body is craving for and the energy of it. **Your E in interaction with the fields of your soul and the environment which you bring in to convert, can give you anything you need or as we do in our subconscious, we re-create the matter state of E in the physical dimension through the interaction of the field of the soul and the environment which has to itself a dynamic gravitational system or a dynamic combination of gravitational and inertia, where we decide to replicate the field strength of the inertia, we give ourselves physical manifestation in that dimension.** It's so easy. If through our E we decide to give ourselves no manifestation, as it is only G and M but of a lower or a very higher inertia we decide not to manifest. So **the physical manifestation of the man is understanding between the interaction and the E of the physicality in interaction with the environment which decides on how, where and the way we manifest ourselves (1:00). in the space. We have to understand in the physical body how we are going to convert energy to the need of the physicality.** Very soon in one of the research centers we will create everything

that the body needs through our systems. The team will start working as of next week. We'll be able to produce any energy that we need. The new space research centers for food and materials are established and becomes operational next Monday, is set to do this that you can physically see it. These are competent plasma physicists and they can do the conversions and have all the support from me to develop it and they have already achieved some of it, but now it's integration of the total system. One of the points go back to Mr. guru, you **understood the conversion of the AA to what you changed with the essence of E and you called it orange, now change your breathing, understand that your lung is the G point of your body. You decide by different rhythm, (1:02). what you breath in, move slightly the position of your breathing and physicality and then control the heartbeat, which is now, as we said, the STM is a star, and then the new system which has received all the energy, which is a ??mixture of , now the heart of the man as the Earth. You decide if the field strength of the heart which absorbs the energy through the pad system from the lung, the environment of the existence, if it's going to create AA, banana strength** in interaction, or as we have seen in the body of the Solar System the interaction of the MG field of the sun which is the STM and the MG field of the Earth which is the heart, dictates what materials are created in interaction between the fields of the 2 elements, O, H ,N so now understand how easily it is, **if you can control the speed, rate, the absorption of the energy from the environment you don't need to be dependent on anything,** then you walk through the shelves of these supermarkets with everything to you (1:04). being irrelevant, empty, **because I don't need to have a banana which is made out of the slave work of the man for peanuts to feed his family for me to become the abuser.** I don't need to rely on the African to die in starvation, meager food, just to have the matter state put in a tin or aluminum ofil or whatever, for me to have the pleasure of having it on the shelf. In deep space there are no supermarkets, where are you going to shop, except going to the supermarket of the STM and you become yourself the supermarket with the shelves ... This is where we are evolving to, in 2018 we enter a new dimension. **Now we bring all the teachings together and you start understanding more and more. Through the dynamic systems you understood the soul, now through the orange and cups in which you drank the water, now you understand that the cup is the body of the man and the orange is the E of the Man who would like to feel that orange and the source of it is the STM which created the orange to start with. (1:06). You have to use the dimension of the physicality in the interaction of the E of the STM with the field of the STM to feed the body.** It's so easy! Those of you who went through the evolution especially those in China, who only drink the water from the Gans' you made, have gained trust and started to test it. **Start testing and decide the rate of the absorption of the energy from the environment by breathing, even this is an intermediary step until we teach you more, then you absorb the fields in the blood and bring it to the central G field of the heart, then through the E you decide to interact the field of the soul and the heart which is the physical part of the body, and create the friction, which gives you the taste, feeling, pleasure of the banana.** Then do you need to cut a tree, kill an animal, or to destroy anything else, except what the environment has freely given to you, which it has available, which you call air to become food, then in this process you'll find something very interesting , **because of the field you absorb in this way will create a new (1:08). atmospheric condition around you because now you create without any waste, the body of the man will evolve. The waste system we have today becomes irrelevant because now the body doesn't need to discharge any waste because it releases (what it doesn't need) back as fields to its environment, there**

goes our digestive system. Back in the medical teaching with Eliya, we clearly made this when we discussed intestines, stomach and the rest of it. Webmasters please release the sections of these which my part covered (not Eliya) where it was done as physicality, because it's important. Now I explain again that part again about where **you breath and it becomes like a Pad in your lung, that it feeds the blood vessels. It's happens the same way with the food in your stomach. No single atom of banana ever crosses the intestine in your lymph**, but it does it the same way as in your lung, but understand that even the banana was created out of the AA of the interaction of the field of the Earth and the Sun. Now that you understand do you need the digestive system? (1:10). **Now that your lung can feed your body not only with the emotional part field strength which is the combination of the AA, but the physical strength material which the body needs then you become independent of the position in the space anywhere in the U. Once the world of science and many of you have done, you drank the water with the orange in it and when it went into the stomach it gave the E feeling of the orange but there was no orange cell in it, except an energy pack which is at the strength of what we call orange.** Then it transfers to the lymph which is the physical liquid, not the emotional and soul liquid, that it transfers it to the point in the body where it's needed. So there is **no difference between the lung and the stomach, one has the pad for the gaseous dimension and the other the pad for the matter condition**, but now that learned about the field interaction in the lung, it's enough to create and absorb all the energies, do we need the stomach. Or gradually as we don't our body converts itself to a disposal system as a kidney or a storage. **Would our liver shrink to nothingness, or very small, just in case there would be a need for the storage of energy. Would we loose our kidneys, large and small intestine, the answer is yes.** (1:12). As I said to some children as a joke, there are no public toilets in the space and we don't see **what we see now with the astronauts putting all their wastes in a bag and throw it in the deep space that it hits somebody else and not me, if by accident it comes back and hits their spaceship or the Spacelab they'll be in a big problem, they'll be the cause of their own demise with their own excrement.** That's how simple it is. **As we don't have churches we don't have toilets either in the space, because they are both the same, they are all a waste of time for the waste that doesn't need to exist.** This is the clarity of understanding the totality, **I am the Creator, I am the point of existence of my own. This is why I have released the rest of the Commandments as I gave them to Moses, now you are all Moses'. you have to understand and evolve yourself. None of you will become the priests, or Moses, because now you understand the totality.** What these instructions or commandments are, is do not create any filter between the STM and the soul of physicality of the man. **Read the Commandments and understand the teachings of this morning and you have found partially the path to the UC. Understand the totality and the reason we are here and why we are born, (1:14). I can live on this planet for thousands of years, but I have chosen the physicality of the body of the man, with all its pitfalls and all its joys, to transfer the knowledge that this time there is no mistake.** Once you sell one item, you become a salesman. There is no salesman here. This way we give you the knowledge that you decide that, **I don't need to pay for someone to kill for me to enjoy, as the creator of the energy, me, what I call the Adam, in the interaction of my physicality, with the soul of my physicality, which is the Eve, I decide the creation, confirmation of my own existence in different spans of the U and in different conditions and positions.** What you have to learn from today's teaching, which is **the next step for us to understand the entering of the energies of the U within our body is under our control we decide where and**

how we like to be presented to manifest ourselves, or to feel to be. Start practicing. **Change the rhythm of your breathing, a slight position of your arm to the left, or your leg to the right that it changes the position of the absorption of the motion of the fields in your lung,** (1:16). decides the motion of your arm, is the energy of a banana, the motion of the leg is the energy of the olive. **Create a slight movement and get the feeling of the emotion of what you might receive. If I sit and slow my heart down and I put one of my fingers up and move my lung slightly forward, I get the feel and taste of an orange. It goes back to one thing, the energy I absorb from the environment as the lung and heart are the G point, I have to feed into the STM that it understands the condition of physicality that the soul of the physicality can exist.** it's not that the soul uses the environment to absorb of the matter state, it receives the energy of the universal G field force, the physicality is conditioned to the inertia which is a matter state and in every position in the U there is always a matter field strength according to the condition and the position of the fields in that area of it, even when you look into deep space and you see nothing there is still matter state according to the strength of its position, otherwise you would not shine that you can see it in interaction with the field of the U, translucency of the depth when we look into the U through the eye of the man is because there is a matter state strength in that position that it manifests itself but allows the light, (1:18). according to its strength of the field of the eye to be absorbed and to be observed. Do we need these supermarkets or does **the E of the satisfaction in the strength of the STM with the MG field of the matter state, what we call the Inertia, gives the lucid feel to the pleasure of the taste, of the look, of the belief we have.** The reality is simple, we have to start learning a new way to feed ourselves, then this brings a new dimension, and that is that **when we achieve this would we look at the oranges when we don't have the digestive system and just enjoy the beauty of the fields that they want to give us, without us ever eating them,** even though the orange will fall of the tree and decompose and become something else. Or **would the physical dimension of the energy to become an orange, as the orange tree sees that there is no need for anyone to take it will change itself to the field without the fruit that we can absorb from the tree, don't forget the vertical people are much more advanced than the man.** Then we understand that we'll change the condition of the whole planet. These are not theories. (1:20). In time man will see. **In time the space travelers who are here as visitors, this is what they do, they don't eat from this planet, they don't take and kill an animal to receive.** If the animals at the strength give their fields that they need, they'll receive what the animal gives that now it has become the earth and the STM, the sun and the interaction fields is what their body needs without ever touching a single animal. **Then we understand that the monetary system that has been created to control man through his food and his need becomes irrelevant.** Nobody can control what you breath nor charge you. In 2018 we'll see a lot of changes because many of you will start. this year we'll open to the public and be one of **the main forces in teaching the man how to become a peaceful man,** through understanding and teaching how we can survive and that we can create a condition that we'll not feel cold, or hot, but we'll decide what temperature we want according to the fields which we create within the boundary of the man, from the energy that we release from what we need that it gives us the temperature we need. The very big question is, (1:22). now that we have become wise in understanding this process, I wonder **how many of you can tell your partner, when you say I love you with the mouth, the words with a sound, and your E confirms through the souls interaction of yours with theirs.** They shall not lie, it's not the word of it, now we have the interaction of the STM. **When I tell you I love you it's**

very easy because my soul carries the dimension of the strength for that and you carry the same and the beauty of it is the love has the same strength across the U. **It's the only common denominator in the UC**, which means I am giving, you take what you like, I am a lover. Then you fall in love with the soul of yourself, that means I can't lie to myself and you become a clear transparent soul, which is the ultimate goal of all these teachings for man to join the UC. Now you may understand **the 24th Commandment. (1:24). The equality of the soul of all created things across the U** and it goes back to another Commandment that there shall be no leadership or kingship as all the souls see each other as equal in giving. **The competition is who can give more that more can elevate through the condition of giving.** In English we say all men are equal, but in the **universal language we say all souls are equal, and there is no hierarchy**, and the minute we achieve this we don't judge, steal, lie. In so many ways you can't tell another soul **I love you when our soul is not at the strength that it shows itself. This is why most of the stars in the U shine the same color because they are of the same strength**, it doesn't matter about their size unless their matter state Inertia interacts in the field of the ?? language. You made the Cups, oranges, etc, and as Alek can tell you as a member of the EC, and one of the leading scientists of the KF, you could taste the banana, orange, and drunkenness from the same cup, according to the E of the time of the need. (1:26). This is why he is one of the members of the EC, **he understands the strength of the soul in the dimension of the physicality, he was one of the first ones to open the door, you were all blind to it.** You copied it but you never understood. It's time in 2018 to move into the new dimension. **Once you learn to be done with even drinking liquid, now we understand that you create the liquid within your own body yourself, then you understand that you are the creator of the physicality as you decide.** In one of my medical papers I explained something very interesting, I never understood, maybe now you can understand. **The doctors and the medical people of today cannot explain, and they just pass by it, and nobody has the knowledge nor has anybody asked about it, is that they empty the lungs of 6 liters or 4 liters of liquid, ask them from where does this liquid come.** (they say) oh the body has produced it. But the patient has taken no liquid or hardly any, not enough to produce 6 liters in the lung. (1:28). This is a natural phenomena, it's because they don't understand it. Now from the teaching of today you can **understand when the E is not befitting, the interaction of the soul of physicality with the STM, it doesn't take from the pad of the lung into the river of the life of the soul, which is the blood, what it needs, you create a dam or a reservoir of energy fields that are equal to the fields of the lymph of the body which it has no need for, then the interaction of the H and O field strength enters the lung and starts creating its physical dimension in the Gans level, which is the liquid.** So in fact as I have explained to the doctors, that **if you change the E of the man, or the physical conditions of the posture of the lung, or if you allow different rates of breathing, all the liquid will disappear from the lung.** The liquid in the lung is created by the interaction of the air we breath, it doesn't come from the inner physical body and get stored in the lung. **Now you understand how we die of pneumonia or the lungs being flooded with liquid, (1:30).** because it's our E, it's the fields that we have absorbed and have not converted it to the usage we needed, but through the construction and restriction which we have created emotionally, we convert the oceans of the planet, which are created the same way, in our own lung. How do you think the water came to appear, **the physical MG fields of the center of the earth, in interaction with the Inertia of the body of the earth has dictated the absorption and creation of the liquid that we call water.** Now we understand the MG field of the heart which carries the E of the man in

respect to the central G field force itself and the earth has created the same ocean in the lung. There is nothing which comes from the physicality of the inner structure of the body. You decide in breathing what type of water, liquid you produce in your lung, then the pad absorbs that energy that it transfers through the blood into the STM and the dimension of physicality. **There is no difference between the creation of what we call the oceans and the liquid in the lung,** but we have become expert in it and do it faster and that's why when we go in the lungs we'll see liquid, that gel like thing we call liquid of the lung. (1:32). **This is important for you to understand, then as we see how energy is transferred from the body into the lymph, then you'll understand how the energy is transferred from the orange into the physicality of the existence of the man, this is what we are, how we are created and how we can create and manifest ourselves in the dimension of physicality anywhere in the U.** Now you understand why **when our soul is released when the physicality has nothing to contribute or to hold on to it. And now the STM becomes free and can take its position in any dimension in the U, and because of its accumulation he can become a star, a beginning, the creator of life.** If your soul in its interaction with inertial MG field of this planet lead to creation of your physicality and the dimension strength of this planet, so it can do it anywhere in the U now that it is free. Now you understand why in one of my teachings **I said that Earth is the nursery of the stars of the stars of the universe. We need a nursery to create a soul that it becomes the seed for the creation of the absorption of correct elements in the U.** This is why you see billions and trillions and beyond the imagination of the man, stars (1:34). in the U. Where do you think it comes from. **The STM is sacrosanct and the sooner the man understands** the sooner man will enter the dimension of the universal condition. You remember that **the Sun in interaction with the field of itself, creates the essence of the creation of MG field of the Earth and that has lead to the creation of life on this planet and life of the STM in a finer strength, and now when this planet's strength gathers together and becomes a STM and establishes its physicality, so the same can be done anywhere in the U.** This is why **when the time of the physical dimension finishes the STM takes a new position, because now it's free, it has matured for itself to become part of the totality.** The beauty with this is that we do not understand and now we have to understand. (1:36). **We have to evolve to the next level, we have no choice, now we understand the purpose of our creation. A single speck of dust on its own doesn't make a planet, there has to be a collection of these that it leads to creation of a seed for a planet, so is the STM.** This is what we have to understand and this is part of the further development in understanding of the totality. **the sooner we go through these processes the sooner we'll decide if we would like to live the life of the man of the universe, because it is us who creates ourselves according to the condition of the energy of the environment in which we feel happy to manifest ourselves.** This is what is for us to confirm our own existence. (1:38). **This is what has been denied to us, and what we have to evolve into, to comprehend, what changes the teaching from now on, because it's not teaching anymore but understanding the operation of ones self. We'll still carry on with making the cores and medical and food systems, but those of you who have gone through the evolution of comprehension of the totality will suffer a lot because it's a dimension, a transition, and you see the physical side and now you have to live with the dimension of ??(non)physicality, in the dimension which you want to manifest yourself in.** It will be a process of conversion, of us understanding the totality of ourselves, all the teachings we have done up to now with the different parts of the educational and experimental come together. This is the graduation time. **Many world**

leaders will rise against the KF (1:40). because they see their position in danger, because now they have **no position to control. Food, water, financial forces have been used as a point of control, fallacies in the name of religions, different type of sects but all same have been used to enslave the STM. Now the only person who decides that his soul is going to be enslaved to others is me myself. Thy shall not rape, means you can't rape, steal from your own soul, it's not for the others.** You can't deny your own existence to confirm another to be better than you. **You confirm your existence as the soul of a lover to give, that the others through your own process elevate themselves to elevate the others. It's a brick wall and man has to be the giver and to always be the bottom brick that the others can be put up higher that in totality it reaches the highest to see the top, the beauty of the further distance. The understanding of the totality is the essence of all these teachings, and not creating another dimension of mysteries (1:42). and magic. Listen to these teachings of today, this is the process for you to start to become independent of the Earth planet,** and any position in the universe, because what do you do in another position when there is no need for the lung, **but still the transfer of the energy of the environment is needed for the survival of the man, or for the confirmation of the existence of the STM.** The teachings from now on are very much targeted to the understanding of the man and how to survive in the space. As we walk, and teach we understand more, and the more we understand the more we teach.

Any questions. Q: **When the man dies** can the soul take any position in the U or is there a judge who decides the new position, **or is there a Hell or Heaven** or does the Creator decide? (1:44). I think you better read the 24 Commandments, you'll get your answer. There is no one to judge and no heaven or hell, because if you haven't done wrong there should be no fear of hell. On the other hand **the position of the soul is created by the MG field strength which is created by the soul during the time of his existence.** Go back to where Rick showed the magnets on the table, each soul in freedom from his physicality will find its position, in balance and where it can be in the U, it's not predetermined. This is why we say, thou shall not commit any crimes **that in doing wrong you use a lot of energy, or fields of your strength to cover it, to do it and the rest. Then you have less to give and are positioned as a soul in the fields that are less, which means you become a burden to the other soul to give to you to elevate you to reach their level.** The reason we say don't do this or that, or give commandments, so that when the soul leaves the body that it is of the higher strength that it doesn't become a burden on the other souls for them to elevate it. (1:46). As it, itself becomes the feeder to elevate the others. You don't (want to) become a burden, you (want to) become a source. **The hell is to be a burden,** if that is your ?? intent or orientation, when you understand my teaching it will come to the point that man will do nothing but giving, because **he'll have pride in the light, the more it can shine the deeper you can go, and you can reach more (souls). It's not to light up more, but to give more, in a deeper and higher strength.** This is the fear they put into you, by creation of heaven and hell, because heaven is the ?? when you need you become a burden to receive the things you did wrong, and you took from the others in the physical dimension, MG fields of the soul of the physicality, that you have to compensate. **Would you like to carry someone on your back like a backpack and to feed them, or would like them to walk next to you that he walks the same as you and they feed you and you them.** There is a lot to learn, go through the release of the new commandments put them in the context of understanding all the 24 and you'll find the path. Listen to the first 33 Medical Teachings that were done, there is a lot there in the understanding of the transformation of energy with the emotions

(1:48). of the physicality of the different organs of the body. Understand it and bring it forward to the present understanding and you'll see how we can live independent of any physical dimension. My enemies are many, but the fear of my existence, puts the fear of life into them, because of what they might steal that they can't complete their cycle. My biggest enemy is me and not anyone else, because I don't want to understand the true process of existence, so I rape, steal, I do everything else to my own soul and nobody else's, then I tell other people to judge me where I have to be the judge of my own conduct that if I don't do wrong I don't need to be in front of a judge to be judged. If you don't do any crime, cross a red light, hit a man or rob a bank, then you don't need to appear in front of a judge do you? When you don't rob a bank because it means stealing from the others, cross a red light because it means you put other peoples life in danger, (1:50). and you watch your own conduct then there is no need for a court and a judge, because you have judged your own conduct. Q: Is there a way to clean your soul from wrong doings in the past? If you know that you have done wrong and you know it and have judged yourself that it is wrong, you have already achieved balance, as long as you don't repeat it. This is the key. If you say you want to clean up the wrongs of the past, it means you stood still and know what you have done wrong. There are 2 ways, to know what you did wrong, and secondly what were the consequences to the other souls and your own soul. We always look when we did something wrong at peoples reaction, but we don't look that what I did wrong has created a condition that my own soul has taken a new position which wasn't to be. We call it a punishment, but in fact, it's a new position in which my soul is not in conflict. When you are adulterous and sleep with another behind the back of your partner, and you know it's wrong, you find every excuse to justify it, then the energy of the soul that you were supposed to give to your wife is not there, (1:52). so she moves to a different position, then there is the soul of the person you made the adultery with, they move to a different position, and now your soul has taken a new position because it's not what it's supposed to be, to be shared equal with the 2 souls that you shared it with, and then you find that this position is painful, it's not what I wanted it to be and then you blame everything else instead of looking at how you started looking to change. If at that point you realize that it is yourself that has been the cause of this and you have judged it and found that you are the cause of it, then you carry it out the same way, but you might not be able to achieve the satisfaction of the both, but at least near to it, by giving more of what it needs to create a new position, then you have already judged yourself and achieved that peace, that position that you wanted to be in. When you judge yourself you don't need anybody else to judge you, unless you don't see the correction that needs to be done. We have created one of the worst things on this planet, by killing if somebody kills, this is the worst thing and it's against all of the teachings of Christ. Eye for an eye, totoh for a totoh, what a rubbish. Those who created these are the ones who are going to abuse the man. If I take an eye from you (1:54). I have to give you an eye. I give you enough to see, not for you to take an eye from me. It was put this way by those who wanted to abuse and take control of the man. If I take from you, it's not for you to take from me, but it's my job to give to you to replaced what I have taken. I become your eye, I give you the eye of my soul, then the eye of physicality is not needed. It's the elevation of the soul and not the taking of another eye. This is how the whole teaching has been misrepresented to suit those who could put man in fear. Then they could abuse the man as we have seen. They tell you to come and confess and then they know your weakness then they rape you and do everything else to the children. Who do these souls confess to, the other abusers or to their own soul. In

the coming months **we see the establishment and end of Catholic Church through the ?? That is my promise and it shall be done.** No body needs to confess to anybody except to his own soul. With it will come the end of fights between all religions. (1:56). **We have to understand the totality of what we are here for, not to be judged, and not to do what we have done again and again, and we have always found a point to justify the same state and then when we suffer we blame everybody else accept ourselves who did it, and we found an excuse to do it.** Like with adulterous behavior, you justify and then you go from one man to another. You did this so I'll do that, you stole from the condition and now you have a lower soul. **To achieve it you need to get energy and you always suffer more because it's not the level that the soul wanted, it's the physicality that has pushed the soul into that position.** The pain or punishment as you call it is that the soul which give unconditionally has found the filter of stealing from it and then it does the soul itself to find its position and puts the physicality in a position to find the mistakes, **if the mistakes are not corrected, it gives it another one, so you repeat until you learn. And when you learn and you don't put it right, then the soul loses the totality, then you fall into what I call a frefall of not being able to receive and give,** then you say the relationship has run into problems, because when one is not there the soul will not commit itself to anything because it knows that the condition is not what was agreed. (1:58). **When you enter a relationship you become like 2 suns, a twin system, one takes from the other one and the giving has to be equal,** What happens when one takes more and gives less, or when you give more and take less, or what about when it's in balance. We have to become the judge of our own conduct of physicality, and then the soul always shines. **Have no fear of judgment except yourself judging your own conduct** and don't be afraid because there are no courts and judgments in the space. I have seen none in millions of years. Man has conditioned himself to abuse and those who are clever have used it to abuse them. I explained this to a man of the robes, they have created this condition of confession, so now the one you confessed to knows your weaknesses and can abuse it to his own advantage. This is **what the Catholic Church has done, and because the mother has confessed to adultery he abuses the children of the mother, because if she talks he talks, so he has captured the wife and the children.** (2:00). **We see this especially in the Catholic Church, the confession of adultery to the abuse of children. We have been witness to it for centuries and man doesn't want to understand, 99% of the children abused by the Church in the condition of the home is when the mother or father has confessed to the weaknesses of the soul** and then has opened the door for abuse to the children. And the fear of sin, and silence of the parents against the abuse of the man on the child. If we open the door of the abuse man will be shocked. Any other question. **Q: What is the meaning of higher or lower strength in the UC,** is the soul with the higher strength closer to the center and the lower further away? **No we are all equally positioned, the higher strength means being able to give more and in giving more receives more.** I explained this to **the EC members.** (2:02). **They're not being gifted, but are open to have access to higher strength of their own soul and when you have a brighter light the deeper you can shine, and you can be observed deeper in the depth of space.** If you have a candle you can light a room with a flood light a whole stadium. That's all it is, do you want to be a candle or a flood light, man should be the floodlight and with the 24 Commandments we make the path for man to become the floodlight. That's **the whole purpose of the teaching to give pleasure for more to see, enjoy, and more to be able to give, more to come together for them to share more.** I am a lover of oftoball ...

where the present way of the religions has made sure that man remains the candle (2:04). so that they can abuse, and they can blow it out and play with it as they want.

Q: Does the soul need to bring the energy of physicality into itself before moving off into space? It's not the energy of physicality but the energy of the STM which leads to the creation of physicality, look at the higher level and not the lower then you get enlightened. How beautifully all the teachings come together, **you can understand and use your own physicality to absorb energy without taking and killing and then you decide how much of this energy from your environment you give to your soul that it can give more. You take from the physical dimension field strength and you convert it to the energy of the U. The body, heart, breathing and physical dimension of the man is conversion of the lower strength matter state into higher strength which is the STM,** where in the spaceship structure the 3 base reactors are G they pull everything in to feed the top (reactor). (2:06). It's not that the top is weaker, it's weaker in taking because it's such a giver in giving. The understanding has to be complete, when you are a taker, you're G and you bring everything in, but when you are a giver then it means you don't need to take much, you give so much that the others can exist through your giving. **When we look at the structure of the H in the AA, it's such a giver because it doesn't have such a gravitational magnetic field strength in the center of it, it has only 1 electron and 1 proton, and 1 neutron, if it's Deuterium, but the others because of the number of the plasmas in their center, they're heavy and they need to get fed so in feeding they absorb more, then in that process, they have to release and in coordination with each other, the one which is not ?? but is weaker in strength of the G, they feed into it, but as a giver it gives. If you look the H is a lover.** Now we have to understand all the parts of the teaching and if we understand it, comprehend and translate it the correct way, then we have achieved what we are here for. it will take time.

Many of you in the coming time will start the process of, feeding your soul, physicality feeding and then to see how your physicality can feed your soul and physical body through the breathing and the others, that you don't need to kill, be worried where my heating bill will come from, (2:08). because **now you can warm yourself through the interaction of the emotion,** I like to have the feeling of the snow at Christmas because there is joy and it means something, it doesn't matter that in South Africa the sun is shining and hot. **It's us who have to create the conditions of understanding of the soul for our physicality, and there was no other way then to go through the teachings up to now as we have done, the Gans' the field strength,** when I speak about the pad of your lung transferring energy to your blood, if I would have taught you this 4 years ago you'd have said that this guy is crazy and we don't understand it. But now that you have seen it and produced Gans and had enough time to experiment, now it's easy. **Yes, why didn't we see it before. there is no need for energy to be transferred by O2 to go across the lung wall. Now you see how many fallacies we accepted because of the lack of knowledge.** In a way it is good because now we know what has been wrong and what is correct, then no one needs to fast 21 days to become your new guru. ... the what is the next trick up his sleeve. (2:10). **Q: What is the difference between a man like Mandela and Hitler, do their souls have the same position? No, I explained this in respect to 2 or 3 parts of the teaching which you have to put together. The man who makes the gun, his soul pays as much as the man who fires the bullet and kills.** The same for the one who creates the conditions for the elevation of the STM will receive the same. As I said before, in the process

whose soul was elevated more, Diana or John Paul II? I don't think that the light of the candle of John Paul's soul even flickers. And maybe the light of the candle of the soul of Diana is much brighter. **John Paul was placed, brought in, and knew about all these adulteries and child abuses from day 1 and he kept silent and many children and people suffered.** He was brought in to create the revolution in the Eastern Block and that was the only reason we saw the Polish Pope, and what came with it was the (2:12). opening of the new doors and more abuse. We are aware of another revolution by the same people and I promise you that will not happen. **Which one was worse Mandela, or which one gained more Hitler? That is for you to answer, not me. You understand enough to be able to answer it.** Read the Commandments as was released and revealed to Moses. **Those which he carved and those that were carved on his soul by interaction of the fields between the soul of the Creator and the STM.** We need to understand, (2:14). to comprehend the totality, don't read them on their own one at a time, put them together and look at it as the conduct of the STM, then you can judge it through the physicality if you want to. **We will see many disasters and joyful things, and the maturity of the man, this year. In the coming cycle we'll start a new approach, a new way to look at life, and once 1 receives the others will elevate to receive.** I hear from many KF supporters that they have started to experience many different things with their soul, their brain and their body, and some of it is joyful and some they can't explain, and some of it is experimental for man to start learning the next step, and some of it will be very harsh because we have to correct a lot of things of the past. We will see, understand, comprehend the totality when we connect all the commandments together, not one at a time. What I said to Moses was easy, I transferred the E of the soul and that is all you need to do, but he transferred it into the physical tablets, which was not the condition. (2;16). **He was supposed to with the light that he received to enlighten the soul of his followers, but instead he chose the abuse of the physicality. No tablet was ever carved (by God), he did it to abuse. The enlightenement of the soul of Moses is exactly the way you are getting enlightened, small pieces by connected, but in his condition it was given to him all in one go.** If you would have seen him at the time when he received it, he was a glowing sun, but then he chose the path of deception and physicality. **He couldn't say this is what I was told, he had to make something people could see so he carved what he wanted to carve and not the totality. If you go down the process to Mohammad, he did most of it correctly, even though he made other mistakes on top of it. What in part that Moses did not bring, Mohammad tried to bring through the enlightenement, both of them saw the same thing.** Q: After Moses I understand why Jesus came but why did Mohammad come? Because the others did not receive the message. Q: Was Mohammad's message more complete than Jesus' or was it the same? More or less the same, and a little bit more, he released more. **One of the things Mohammad (2:18). released that you see now in these commandments, God is one, one creator.** This is very different than the 10 Commandments. Q: **Is there a reason that one is born into a certain religion? No, it is just the way that the soul that is created out of the dimension of the physicality of the position of the parents. There is no reason why someone is born Buddhist or whatever, you are created one and what we are created out of should be equal.** When you look, it's a very interesting point, most of the KF scientists will come to it .. we have such a system in the space but it's not in the way we see it, but I call it a system. We have the night vision glasses to see in the dark, **there is a vision to see the STM, and then you see different strength souls, the flickering souls and the floodlight souls.** How much energy that flickering candle needs to take from the floodlight to show itself in its existence, a lot.

We see the souls that way. (2:20). When the man is created all the souls are the same, it's us through our conduct that decides. It's very hard, what happens to the child that is just born and dies. How pure is that soul? It had 9 months of pleasure to give and take through the soul of the mother and the others. The time of the departure is irrelevant, it's the strength of the soul that counts. Why do we pray and bless somebody's soul, we give to them more and then they have more to give. **Why do we tell our beloved I love you, because in the reflection of the receiving it tells you I love you too, and what she doesn't need I receive to confirm my existence. Religion is a manmade thing to abuse the man.** It doesn't matter if you are born in Iran, New York or Mars or planet Zeus, **all the souls have the same attributes. This is what is in the commandment, all souls are equal.** ... it is us who have been put in that position, then you understand that there is no religion. **Religion is one, believe in the same oneness and believe in the Creator which is the STM.** (2:22). This is very hard for those who abuse. The biggest opposition that will come to the KF is from the religious groups, but on the other if you look at all my teachings I have always respected the prophets, when their conduct was correct, but never the false temple which were made by the fathers by abuse of sons. **If you are Iranian then you are aware of the present uprising in Theran, we know the outcome without the interference of US or Israel in Iran.** Because it all has come to an end at the same time. What will be the outcome after this for the Iranians, or this postmortem ?? fall, what they believed because it was created to abuse. The same as the Catholic Church and Jerusalem, and the same in other places. **Everything is coming together perfectly** it's just what we have to do. So it doesn't matter if you were born as a Jew in Jerusalem, Moslem or Christian in Vatican. I have said something very amazing to someone and I saw tears, and it will come. (2:24). I said recently that **the city of Vatican should be returned to Rome and it will be done soon. The same story as we saw in Church of England in the 1980s** ...they found out that not many people go to the churches anymore because they found out that we are the tricky guys and when they first started selling their Churches ... and found bodies of children from the nuns who got pregnant. They were private companies so they had to call the police to investigate. **Some churches they found 50 bodies of children. They found out it was from the adulterous behavior of the priests and nuns and the others. Then the Church made a law that they couldn't demolish a Church that they buy from them, the Church has to prove their own workers who already know about the adulterous business.** (2:26).

... then the whole thing collapses. The same will go through the other religions because they'll see their own conduct. I am not attacking any religion. Where did the vow of silence come from, it's not in any holy book. It only applies to women in the Catholic Church because (2:28). of the nuns who got pregnant. How could they be a sister and get pregnant. So she takes a vow of silence until the child is born and then she comes back out. This is where it came from. ... the abuse and the hiding of the lie of the abuse has brought the "vow of silence" and now it's open. **An unbalanced condition creates problems, when a man is created to create and then he is told he can't do it (sex), but still the body has for millions of years procreated. It's like deciding to become a vegetarian when my body is used to meat then I can damage myself. It's the same with the body of a man who is produced to reproduce. It's written that, I made thy to make children that they may love me. How can a man who is created to love, to appreciate the presence of the soul which created it, now is told it can't create. You can't stop the process, it's still the same love affair, love for another, so it creates a false condition of homosexuality and child abuse and a vow of silence. All created out of lies which Moses was commanded not to do.** We can tear the Catholic Church

apart in such an easy way that they will do it to themselves. I promise you one thing, I will return the stones of Vatican back to the Coliseum. (2:30). Because it's better to abuse the physicality than the STM which is the source of physicality, then you can stop it. It's the same with all the religions, which is the point of weakness of the man, for he has created it himself. He had no choice because he couldn't understand it. **When you are on an island and the hurricane comes and you know what it does and how long it takes to cross, then you sacrifice a virgin. Now we have satellites and know when it will come to be ready and so we don't need to sacrifice because we know it's a natural process. Which one was correct, the sacrificing the virgin or now understanding the actual weather forecast. A lack of knowledge created the abuse.** Now we understand more why should we sacrifice a virgin. I take man into space to be equal to others in the U that he can't be abused. **The abuse doesn't come from the others abusing you, it's you who abuse your souls because you go and believe in everything else, the guy didn't say I am the god or the priest, he showed you a new revelation, a new way, and because you abuse yourself you made him a god. It is us who creates these images, and not the images that create us.** (2:32). Now you tell me is it Mandela, Diana, John Paul or Hitler? From where I stand, to me, John Paul created more crime than Hitler, he didn't touch the children the fresh soul, but he knew and he allowed it to happen, the same with the present Pope. The same with the other religions. When I talked about President of US announcing Jerusalem as a new center for US, who was **the loudest opposition, the Moslems who want to be there and the Catholic Church who is claiming it illegal**, why it's your home you are claiming it. How come they claim it as theirs and you yours but they can't claim it as theirs, because you are claiming it, or are they all the same. And have they all cheated humanity, those who were available to be cheated. It's not the message of the Messengers, it's the abuse of the followers, which is the pain, but don't forget the followers have done exactly what the Messengers have done. Cut of the same piece of cloth, the soul accepts to the same elevation of the level (2:34). of the prophet ?? themselves. Those of you who offlow the KF in time to come you'll carry the soul of the universe, so there will be no abuse. Because you enlighten to the level of the strength of your own soul and nobody else's. People will understand very soon when we speak. The question is what is going to be the reaction of humanity. We saw in Austria some years ago that 90% of the people used to go to Church. When the child abuse by the priests opened up, at the moment they are talking about less than 10% going to church, they lost their faith in faith. Soon we'll see the same when the truth and reality come out across all the faiths of how they have abused. And how **collectively in the background they collaborated to keep the status quo but they lost. The reason is because I have changed the time and it is the wishes of my soul, the freedom of the total soul of the man that it can join the UC. Within me there is more than all the priests and churches, mosques and synagogues put together and every other one. Because I am the giver and they are takers, and in giving I will change. It's the mistake I made with Moses and the ones before him and I am putting it right.** (2:36). **And nobody else can do, it was my mistake. I trusted the STM, a weak man.** (2:37). Alzar tells her life story. (2:58). (3:03). What is important to all of us is not where and what the condition of the environment we are born in, but what we learn and what we expect and what we offlow. I was born very much like you and not far from where you were born, **in a house where I saw the conflict of religions. My Jewish family couldn't eat at the same table as my Islamic family. I was taught the principle of Bahai faith and in the end I came not to rebel but to see that it was another path of abuse. It's us who decides to what extent we want to go. I sat and I watched my Moslem uncles by accident turning up at the**

house where my Jewish cousins were, and they washed their dishes or hands 10 times because they touched a Jew. I witnessed this at age 6. I asked my mom what are they doing. (3:05). She said, because we are Jewish background they wash their plates 7 times that it is clean and not touched by a Jew. ... I never understood that if my mom is a Jew and they invite us to eat, then why go through all this vigorous washing to be clean, then don't invite us, or don't do all these stupid things. **My father used to say, it's for them to mature. It doesn't mean that because she is my cousin I can't love her or be here because of out childhood, but I love your mom and she comes from Jewish background, and for love of both I take them both.** I became aware of the conflict in religion at a very young age. Then I saw more abuse, I watched many times mullahs who came and took their frock off and became normal people, because they didn't want to be mullahs, or teach because they couldn't see the light. ... I realized that man of faith is the STM and not the man himself. ... My father said, they don't even know why they exist in that frock. Then we saw the change during the revolution. (3:07). Many people just put the frock on as a path to earn to do what they wanted to do. I have respect for all of the religions, because at the end of the day I brought the religions what they came to be later on. But it is for us to understand , **I married a Catholic and I watched the same abuse, then it became more and more with Caroline the fallacy of the abuse has different names. I call one faith as sexual abuse, one as physical, and another as psychological, and all of the religions have found a way to abuse the man, of the STM in dimension of physicality.** The sooner we open our eyes that behind all of them that they are all one, and that was the first message given to Moses. There is only one Creator. **Very soon we'll see them all come together, the peace on this planet has started because it is our wish. We have to realize that the strength of wanting to be peaceful is much stronger then those who want to be the intermediary between the STM and the physical life of the man that wants to be peaceful.** These (temples) will be turned over, in the coming time. What are we going to do with all these temples, properties. (3:09). churches, mosques and synagogues. **Don't forget they didn't pay taxes because they're nonprofits and they bought as much land as they could, and the have been given through the fear of getting a better position in heaven, by those who are weak in character.** What are we going to do with all these properties that will become available? Are we going to make a nation by nation decision or do it as One Nation. **What are we going to do with all these properties that have been collected by abuse in the name of religion?** It runs into a percentage of the total assets in the world that are held by those who used the name of the faiths and the abuses over centuries. **What we see is the collective abuse of our grandparents and great-grandparents, etc. One thing the EC and UC have to thing about is what are we going to do with all this wealth that has been collected over centuries pennies by pennies from our ancestors, how is it going to be shared. And the gold that was taken in Philippines and South America and bought as shares in the New York and London.** There has to consensus and to find a total solution for the financial ?? of our ancestors in the dimension of the abuse of the soul of them and of our soul. (3:11). .. how are we going to solve it .. what about the properties that were given to these abusers ... then we'll see only one alternative and that is One Nation. We have all invested in New York and we all have to be benefited by it. There are a number of positions coming up and dilemma that arising very fast. Palestinians and Jews are of the same blood, Christians and Jews of same blood. How to correct all of these. **A lot of people will oppose (3:13). the end of the faith as we see it because they are afraid of the abuses of the past which will be opened up.** The only thing left is to forgive. we have no choice because it's not one abusing the other,

we all have abused each other at the same time together in one way or another. We referred to the other one not to show us. To become One Nation we need to close our eyes to a lot of wrong doing of ourselves and our forefathers, and a lot of abuse that has been done in the name of the Creator by the those who could see us as weak. I attended Fabio's funeral we were absolutely shocked, the priest limited the time of this beautiful soul to only 1 hour, was the soul of this boy so worthless or was the priest for hire, or has it become a business in how we can rob in the name of God. In the end it is us. We'll change into One Nation this year it will take shape and the coming time and it will force us to change these things. The only alternative (3:15). left is a compromise somewhere that, we were stupid enough to let them abuse us and our forefathers, but in a way the ones who abused us is part of us. .. these priests and mullahs are not born to be, they are the product of the environment that we have created. Becoming One Nation is not just teaching the soul the understanding of how to exist, it's to understand how much we need to compromise, to close the doors of the past with the knowledge and not to leave things behind the door, but knowing what ?? ?? and start to live in a new house. I have been to Vatican and I have felt the pain. The funny thing is all these religious people are aware of what they are abusing, the only thing is they don't want to admit the level of abuse. As a priest once said to me, I am not a child molester I don't abuse children. I said to him, but you abuse the STM, it is the same rape. (3:17). the position with us and the change of new technology will bring up the new One Nation, One Planet. We have to do a lot of work and have the strength to see that the time has come for change through the conduct of the STM and not the physicality. **I watch many revolutions, many things are happening at this moment around the world and I see how it has changed compared to the past, and I see how much man's maturity is leading to it. We are becoming mature and more aware of , but now the physical awareness has to lead to awareness of the STM and then opening of the UC to man.** Will man mature in a night or in another thousand years. Would those who mature have to wait for totality or (if) we become part of the totality becomes (will the totality) mature faster. All of it. It depends on us and the human race. **Today I taught you how to feed yourself. I know many of you will start doing it and see. Start with one taste, vision, understanding and then when you achieve that one go to the next one. Start understanding the operation of your soul and the physicality in respect to the soul, and operate through the soul of physicality, which is the heart and the lung, to give to the soul of the humanity, or your own body, that by giving it creates a new position.** (3:19). **From now on when you eat, don't think of it as an orange or a potato, think of the soul elevation of what I can give to the soul of myself, using the soul of physicality to convert it to the soul elevation of your own soul. This was the purpose for teaching you about Star Formation (SF) and the MaGrav systems.** This is the reason I teach this way because the common man can understand. Some of you got touched by having a free energy system, I even gave you the free energy system but you don't see it. You looked for a medical application, I gave you one. **Every man that lives and has heard of the KF can live without any pain for the rest of your life or any diseases, but understand the essence of the teaching, work through your soul and not through the physicality to touch the soul of the physicality.** At least start by working through the soul of the physicality to change the physical condition. **As a man we suffer, it's a part of physicality because the interaction of the fields are so much, when you walk through your own home your body continually has to interact with every field, the chair, the table, every cell on the carpet, on the spoon and everything else, it is a continuous battle when living in an Inertial conversion environment. Whereas in deep space it's not so much a battle, there your cells don't**

need elevation, that's why you last and live longer. This is the problem with living in an enforced environment, (3:21). in space we still have all the same fields but it is open to what we want to take, it's not encaged. When you are encaged you have to give and take, **when look at your aura and you see all sorts of colors, these colors are not coming out of your body because the chair wants this one and the bed that one and the frig wants something else and it depends on where the frig and the freezer are (located) then your aura is different because they pull on you.** And the one who wants to abuse it (Feng Shiu), says oh, 'put something there or their is something wrong with the liver'. But did he take the same picture where the frig and freezer were behind you when you were giving and taking. We have to start opening our eyes in a bigger dimension in the totality and then we'll start seeing and we'll become in charge of our own physical dimension, then we can travel the span of the U. **I promise you that I didn't come here with a spaceship, I came through the STM. Nobody landed anywhere, but we traveled the space of the U through the expansion and need of the STM.** Try to understand the teachings from now on in depth and not just by the words. **The teaching from now on will become very intensive but it is what is needed to go through the evolution of the change to be able to travel the spans of the U.** We'll still make the Gans', spaceships and everything else, but if you are a real entity (wanting to be an entity) of the UC, I have given you all the knowledge, it is your choice. (3:23). Would you like to go by donkey or jumbo jet, or now a spaceship, or travel through the STM. You choose according to your intelligence, but at least this time you can't be abused. Let's call it a day. Try to understand more about the totality, the soul, the physicality and the operation of the systems and the knowledge of the creation, and all of the teaching from the past time. **2018 is the time for the maturity of the man** and we have started it and it's for you to expand your horizon and not for us to push you, because **if I push you and say this is what it is, then we'll create another term. If it is done by you, you decide when and how of what you want to take from it.** Thank you for today and hopefully we'll meet on the 206th teaching next week. But be ready for a change and to see a lot of changes on the international scene because we have wished for it and because of it, it will be achieved. (3:25).
