

206th Knowledge Seekers Workshop Jan 11 2018

PHOTOSYNTHESIS, If you say to someone in the universe you lived a thousand years they laugh what a 1000 rotations, In the universe we don't rotate but are part of the Creator and life is everlasting, When you die you become non-dimensional, Most Solar Systems have life that man can't imagine, This planet has a huge mixture of elements and this gives the soul of the man new dimensions, The tilting of the axis gives huge spectrum of MG fields so that the soul of the man can manifest in many different parts of the universe and this is unique in the universe it's one of the reason earth is a nursery for souls to help others in universe and also become stars, This creation on Earth was a beautiful accident and why they want to help man, We need a physical body to be able to transport and transfer all these different strengths from this planet into the STM, suicide means the body has not done its work to mature the soul, Men who went into space come back to earth for an upgrade of new added experiences and dimensions to the soul, With the new technology the expected lifespan will be a minimum of a 1,000 years, In an accident the soul can remain connected to the physicality and it can repair it, Viruses which are energy packages attached to the Amino Acid are part of the evolution to receive fields of the universe because in the space it's the strength which is absorbed by our soul that determines our physicality, The fallacy of photosynthesis, The MG field pressures from the earth and sun effect the current to drive the electric motor and this is proof of field effect, Like the lung no Carbon or oxygen ever cross the leaf it is done by the Amino Acid in the leaf effected by the MG field pressures of the earth and sun, matter is created by the fields not chemically, The tree line on mountains reflect this MG field pressures, Those who want to travel in a spaceship will have to learn to create matter out of the fields like the plants do on this planet, The photosynthesis is really the process of the plasma of the Amino Acid Nitrogen being the balancer and why we use it as fertilizer to make the plants grow it drives this process forward, In this process the matter state of O and C are created from the fields of the plasma and like the lung no matter state crosses the leaf, The same process goes for the fish in the sea and the lion in the jungle the energy transfer will come through the Amino Acid field pressure, Inside the leaf is Gans of the Amino Acid which experiences emotion because it's the same AA as we and therefore we can communicate with them, The plants don't need water from the roots, It's possible to stop the deserts migrating, The deserts are created by the tilt of the planet UK used to be a desert, What was the North Pole gradually becomes the equator, The M and G fields have a flow like in photosynthesis but on a larger scale, The MG field shielding that took place in the hurricane created higher strength fields in that area so the winds couldn't effect it, (NEW understanding): In the Gans production: One side of your plate is creating the condition for what we call photosynthesis of the C, while the other side is creating photosynthesis for the O, one side of the plate is day operation and the other side night operation, If we change the conditions we have to consider what effects it will have will it create a new pest or cause problems for the neighbors, etc, Plants also have viruses, Using copper axe doesn't kill tree but iron does, The heart plays both the balancer of the Nitrogen and the higher strength of the Oxygen in the Star Formation, We carry all the knowledge of the past from our ancestor in our RNA or in the soul of the physicality, The creation of the earth and the way it turned out with such a mixture of elements was a beautiful accident and the others are amazed that the man doesn't see it or understand his own creation, , ,)

(:10). .. I hope we enlighten you to think more on your own strength of thoughts. We have inspired many people to do the right thing and that has been **the purpose of the Messengers of the past, to inspire man to live a correct life and to live independent of any imagination because in reality he is in charge of his own destiny and he decides it.** If you listened already to the most of the teachings you should have already seen it that life has no limitation. Five hundred or one thousand years (life span), number are the rotation of the earth around the sun, **but in the U we don't rotate around anything except the Creator, the central cosmos, where everything rotates around it. It's the center of attraction, the center of life for the whole of the Unicose.** The sooner man learns that he is part of the Creator, the sooner as we tell, he is everlasting and so shall be the man. This is part of the process of maturing and it's very hard for us to think. When they said that Noah lived such a long time in his day 50 years was a long time with diseases and everything else. If you lived into your 50s they said you lived a long, long time. Some say he lived 500 years, still what is 500 but a number of days, it is a meager time in the time of the U. **We have learned that the soul leaves our physicality and becomes independent of the rotation around the sun. The year on earth is absolutely meaningless in the universe,** if you say a thousand years is old they laugh, a thousand what, how many times you rotated. (:13). **If you are a Sufi and rotate so many times you add to your lines it's a Sufi life, you can keep on rotating. Man's life in essence is the life of the Creator,** without it .. our life is part of the Creator's life as He is everlasting so shall we be, but we have to learn that if the Creator has manifested Himself in different shapes and forms of the time, as universes, galaxies, as stars, planets, man, as the animals on this planet. **We have the same capability to be part of it and in a way to understand it. It's very important for all of us to understand that we decide our own lifespan, it doesn't matter where and when, once the ??seating of the soul takes shape in the womb of the mother, as man on this planet, it has captured the essence of the creation.** Now it has its own dimension and it absorbs (:15). gives and takes. When our soul leaves the body in the dimension of the universal cosmos, as we feed ourselves as it was shown with the magnets it decides where it's going to be, it can come across, and **most of the souls of the men who lived in the space after parting from this physical body, or what I call the leech of physicality, then they decide what strength fields they take and they give, and if you come into a very high strength fields which is in the strength of the STM you get elevated because you can receive more, because they want to raise you to a new level.** We see the rise of the manifestation of soul in a different level. These are the things we have to open our eyes to. When we talk about a thousand year, it's just numbers on our count, because we limited our lives to the number of rotations of our physicality around the sun, and the sun is a small speck of dust in the whole of the creation, and imagine that we are a speck of dust in comparison to the sun, **but in essence we carry the essence of the essence of the creator.** When we speak of thousand or ten thousand years in the depth of space as we adjust ourselves to different **dimensions we become part of the totality of the bigger structure and life of the man in space is everlasting.** Once and until the time of the dimension of the strength of the STM becomes part of the soul of the bigger structure, but even that still lives within itself. This is the secret of the creation (:17). and this is what most of the men, the creations in the U die for, **they want to be able to release their physicality to become part of a non-dimensional entity that they can choose when to manifest themselves. Not very many creations of God have managed to reach this, nor have many races in the U have managed to understand this,** but who understood have matured very rapidly and this was a gift that was given to man, to mature rapidly, because in the

structure in the building of the STM there is such a capability, such a potential within the STM and it is unique in the way it has unknowingly become part of the nursery of the creation of the Unicose in creating new dimensions of existence, the flexibility. As you all know and it is very easy to understand, most of the Solar Systems support life in the dimensions that man can't even imagine, but on the other hands to them they can't imagine life like in the human race in the U. We are as amazing to the others as they are to us. We amuse them as we get amused by seeing different things, different dimensions of life. The beauty of this planet is with the cosmopolitan presence of the huge mixture of elements, this gives the STM new dimensions. If you look at the rotation of most of the planetary systems (:19). the vertical axis, they don't have such a combination of the mixtures of materials as we have, this creation of the rotation (tilting) of the axis of the earth in the few degrees creates the seasons and with it creates a combination of new dimensions of the strength of the MG field has given the STM the strength of fields which covers a huge spectrum across the U, and don't forget that whatever we discovered, Plutonium, Uranium, Cobalt, etc these are the first few elements but they are the fundamental cornerstone of the creation of the STM, and in the universe if you have such a spectrum of energy of the MG field, it means you can manifest yourself in many different dimensions. It's a cake with many ingredients and each one stands on its own, a bouquet of flowers that carries 100 or 200 different elements with it, and put all the isotopes with it, and put all the dimensions of strengths of the M fields, this gives the STM in the dimension of the U to be able to manifest itself in a huge spectrum of lives. If you understand this now you understand the beauty of the creation for man where and how we can manifest ourselves, in having and being able to carry such a huge spectrum of the fields in the STM, it's MG field strength, it gives man the ability to survive as multi-taskers of everything in different dimensions, and this is why the STM is precious. (:21). Because in the dimension of the U if you come into a position where there is only Uranium mixture, you can manifest yourself because you carry the strength. And you use the other elements then the strength of the M field to add to it and manifest yourself in that dimension. If you come across a planet that is only Carbon and manifestation of life in C strength, man can manifest himself in it. This is why there is so much emphasis on guiding the man. It's an accident of the creation but in that process it has brought a beautiful creation which we call the STM. You call it a Swiss Knife, because it can do everything, man is a Swiss knife of the soul of the universe. Man's soul and there has been so much contact with the man in the past in trying to educate the man, it's not for the physicality but for creating the perfect STM, then the STM in the universe become the messengers of peace, because he knows peace. Up to now he has created so many problems, so educating man to understand the beauty of his soul has been our responsibility, to appreciate his strength and to see the beauty of his creation. Not many creators have been made the same as the human race. The spectrum of the strength which is built in the STM is unique, in so many ways the man can become, those men who were men of peace and have joined the UC (:23). are the peaceful ambassadors of the U. In that process they are the teachers, in the way they created the structure from the beginning which is peaceful. It's like with languages if you speak French and I put you in with the English ??? because you know multi-languages you can survive, you can go to China and speak Chinese, so it is with the STM, it's the facets of the beauty, this is what man has to understand, the life of the man is everlasting as is the creation of his soul which is needed, but we need a physical body to be able to transport and transfer all these different strengths from this planet into the STM.

This is where it comes, **from the sperm and egg, then the creation of the physicality, that we adopt and perfect the strength of the soul. Then in time when a man decides to leave or by accident leaves the physicality, the soul is already carrying the full understanding of the strength of the dimension of the creation.** So is your body, your soul a thousand years old or are we nourishing the soul which will become the creator, communicator in a life in the different dimensions of the U. This is what man has to understand the beauty of his creation **and not the torture he has been put in by those who abused the physicality. The more we abuse the physicality the more we deprive different strengths to be developed in the STM that in the U he can exist in all dimensions.** (:25). We take feathers of the wing of the bird one by one, and this can't be. This is the purpose of all these teachings. Many people who call themselves theologians and religious people are baffled in how to handle the knowledge which is getting released so rapidly in one go. **And the biggest shock to them is that so many people are understanding, there is no need for intermediaries, no need to call the priests, translators and transcribers. the words spoken are being understood and will be understood by more men.** This is where we are, why we said the life of a man is a thousand years in the life of the U and not a thousand years in the life of this planet. And that life is everlasting. Don't forget in some of **the writings of the past these numbers have been hidden,** if you look in the manuscripts of the old times, the essence of time was explained to man very easily, but then they covered it, and they said that every year is equal to a thousand years, every day is equal to 1 year. Try to manifest something different this is the essence of the creation of our soul. **Once the STM is created and takes what we call flight in the realm of the soul of the universe, then there is no time limit.** (:27). As it has been said, **if I tell you the beauty of the life in the dimension of the soul, every man on this planet will commit suicide from physicality, but at the same we forget, suicide which means the body has not done its work to mature the STM to be capable to live within dimensions of the U.** This is why in most of the paths of the belief structures suicide has been forbidden, which **means the soul has not gathered enough strength to be able to fit in all dimensions, it hasn't yet reached the point of maturity.** It's like when you have a child, it can only take suckled milk from the breast of the mother, then you introduce it to bread then meat, and as it grows older and travels across parts of this planet it gets to learn, acquires the tastes of the beauty of the English foods, Chinese etc. and he adds this in the way that we learn languages, the vocabulary of the science of physicality, all these gives strength to the STM, the more combination we add to it the more we have added to the dimension of the soul's strength, into the survival and being able to manifest ourselves in different dimensions in the U. **The STM is sacrosanct and it has to take its own time, when it reaches maturity it will know when it's time to leave.** But as we understand more we get educated more, we interact more (:29). in the dimension of the STM meets more dimensions in need of physicality that it adds more to its different strength. So it's now to started adding to the time of his physicality, this is why at this moment in time we live , **we used to live 30 to 40 years, as the time of viruses and infections and the killing and the wars reduced, man started living more secure, we found rice, wheat and converted the grass to food and we stopped being nomads, every step in this process has added more to the strength of the STM.** We need time to mature in the dimension of adding to our soul, **when you don't do wrong and last longer on this planet, you give more vocabularies, you add more languages to the strength of your soul that you can manifest yourself in different dimensions in different parts of the U.** In the future as it has been done by many men of today who have returned to Earth from deep space, they have learned this,

you go back to the point of physicality to charge up, to add more, just like when you press a button, they say, update or upgrade, when you return back to the origin of life from where you came from, because you had the essence of the origin within you upgrade, you add more, and this is what the essence is. **Many people of this planet will return back to this planet to upgrade, (:31). because the people who stay here as natives are developing and upgrading and creating more and more**, not in a materialistic dimension but in a way of absorbing more and more different fields. It's like going to Italy and asking for a pizza, or India and a curry, and Mexico for Mexican food, but if you go to England you can ask for a pizza with a curry and a Mexican taste and they make it for you. Nobody in the world is so flexible then in UK. So it is with the STM, you come back to see what has been added and because you want to take more mixtures into your soul. (:33). If you understand this process then **the dimension of physicality becomes the absorption of understanding more and more and realizing what is needed** and then when you travel into the deep space of the U and the Unicose, then you speak all the languages, so you already carry all the tastes. **Mono-material and mono-structure lies in the U of many and then they can only manifest themselves in that dimension**, but the STM due to his construction, actually through **the construction of this planet in the way we have connected our physicality to Cu, Zn, Al and everything else, this has given our soul a mixture of the combination of the strength in its optimal of life in the U**. How long do you think you need. **In the new science it is said that by 2018 those who are born in this year, a large majority, up to 15 to 20% are expected to live 200 years**, those born in the 1990s were expected to pass 100 to 120 years, with the present knowledge. But now **with adding the new knowledge of the technology of the plasma the life of the man for children who are born today will be a thousand years minimum, because we have learned to overcome those diseases** that overcome our life in the physical dimension. From now on when you are a thousand years you are just a youth, you have just acquired all the tools of life, then you have to exist in the full dimension of the U. Recently we received a letter of thanks for the plasma technology for what we call the regression of the breast cancer of the wife, he sent it himself. We have seen new dimensions with our medical application. We have seen the return of a Coma patient to walking and eating. These are not medical (healings) but understanding the science and the true essence of creation. (:35). We have seen it with our dearest Naomi and in her cycle now that the accident is over, she'll live maybe 500 to 1000 years, because now even the physical accident can be remedied. In the new KF clinics we'll emphasis on many of these strengths, **not the returning back of the dead but knowing that the soul still has a connection with the physicality that it can be regenerated, it can be brought back to bring the physicality into dimension**. I have done this twice and it's very easy. It is so easy and if we teach the physicians **how to allow the soul to still be connected to physicality that it can now use the soul to repair itself**. In the coming time there should be no one in a Coma for more then a few hours. As we teach more and learn more, **that even the death can be negotiated in the dimension of physicality and STM. Does the soul still want to leave the physicality or does the physicality still want to be attached to the soul, it's a marriage that has to be in perfect harmony and it has to be accepted by both, separation from physicality**. I have taught you a lot in the past few weeks, you can decide. You can decide to change the physical dimension into the dimension of the soul, (:37). and then bring the soul within the physical dimension when you need. This is an art and an understanding of the true method, structure of the life in the U. ... we have seen this, been there, **we transfer our souls in the physical dimension and when there is a need, we interact, we live, and then we bring the soul back into**

physicality for it to be there and then like a chameleon we turn inside out and let the soul to take over the physicality and we take a new dimension in the U. Every man on this planet with the essence of his creation should be able to do this. It's a choice, the creators given right and nobody else. This is why **we see how much man has let himself down when he allowed himself to be abused and with that abuse he has not allowed the STM to educate the physicality of the man**, this is where the balance of the equality has gone and then it has been abused. If you look at the history of the man, at the Persian Empire, Greeks, Romans and Egypt, look at the Chinese cycle of the understanding of their life, **man has progressed in these cycles where he has been just, correct and peaceful with himself**. We have seen the dividends of the true (:39). men of peace, and now we see the true meaning of how they have added to the man through the time when they were peaceful. **Their is a myth that when the Pharaoh built all these buildings that is was done by slavery, but that was the time when there was more equality then in any other time during the time of Pharaohs. The leader, soldiers and onto soldiers were all looked after the same, so they worked the same, there was a harmony, no one was nobody above , it was done by the pleasure of doing**. We see the same process now in KF, many people in the background work on the same ethos, they are there to see the change because it comes with the man's peace of mind. In the coming time when you say you are from planet earth they don't ask how old you are, they ask you what do you carry, I need this part of it, have you managed to add so much to your soul that you can give from it that we can survive. It's like what we call on this planet, the blood type. Are you O, or AB, if you are A you can only give to A and nobody else. **What about to be the blood that fits everybody and that is the STM, in the space, and wherever you lay your head that is your home**. You are there because of the knowledge you have gained and the strength to be part of souls and life in that dimension. (:41). The STM has many beauties and assets but the man hasn't yet found them out, now it's time for him to appreciate himself, and **to understand the true essence of creation and the reason, be it just by accident for him to be precious in the UC. This is why we spend so much effort to try and bring man to understand that he shouldn't do wrong, because in the space these wrongs can be dangerous for some**. The true essence of life is not the physicality of the man, it's the STM that can do so much in the depth of the U, in different dimensions and parts of this Unicose, needs the STM. No one has ever told man which universe they landed in, in man's words lions with lions, birds with birds. **The soul which we have created can fit in the dimension of the soul of another cosmos, another U, which now we become the feeding line to that dimension**. In many ways I have hidden this work and I have spoken many times about it, we said, now that we understand the work of the plasma **we can make a magnet for anything, Carbon as we see in the CO2 box, (:43). for plastic, metal, wood, because we create the dimension of the essence of that element, so it is with the STM, where we create a magnet that it can be attracted into any part of the U where he can serve**, not only this U but in the Unicose. So does man live a thousand years, meager number of rotations, of a meager planet, in a meager star which is in a meager part of a solar system, in a galaxy that is totally lost in the whole structure of the Unicose and the rest. **Or is this the nursery of the soul that with it helps every dimension in the whole Unicose**. The answer is the second, we are not born here to be physical, but there **is so much pleasure in physicality because it allows you to elevate your soul to all dimensions**. It's like if you just drink milk, you don't know nor understand the taste of juice, it doesn't matter what it is. As you add more the more strength you get, the more we can interact, enhance our body. there has been a path which man hasn't understood but in time you'll

understand, you call it viruses. I have explained that viruses are fields strengths that add themselves to the AA and that's why man hasn't found any solution for viruses, except in the dimension of the new technology with the plasma, where you actually interact with a virus, (:45). which is an energy package, which the plasma is this interaction of the virus with the AA is part of the new connections, trying to find solutions for the interactions of the physicality with the STM. What you call viruses we call energy packages part of them are **created by the soul itself, because it needs it for the body to be able to understand the new evolution in the depth of the U.** You think you just live on this planet and that's it, but you have to understand a simple work, **your soul is interacting and working with the rest of the UC, so slowly and gradually it's trying to educate its physicality that there is a need for the dimension of the field strength which has nothing to do with the AA.** Maybe for the first you understand why some viruses kill some people but not others, because the soul has already planned in the process of physicality to receive these kind of energies. Man has to understand more about his own physical life and **the energies which come from the U and those that come from the STM, trying to train his physicality to be able to withstand more that is to come, which is the interaction of the field of the U.** It's the evolution of the soul in the dimension of the physicality, we have to learn this **because in the space it's the strength which is absorbed by our soul that determines our physicality (:47).** Now you understand when I say that **we open the true science of the U to man in 2018, you have to learn more, you have to understand more, when you do you don't forget it's scribed in the dimension of the soul, but when you learn it, it's a physical entity and you loose it with the physicality.** **Comprehend and you survive. Remember and you'll always forget, memory is in the dimension of physicality of the life of man. Comprehension and with it bringing position is part of the STM.** This is what we have to achieve, understand and if you are so busy to learn about the life of the U, then no man has time to fight wars in this physical dimension, what an absolute waste of time. Why do we see wars and aggression, because those who don't have, want and are unsure of the future, once they get the habit of getting it by misconduct then it becomes their nature. Look at **the UK it can't produce enough potatoes to feed its own nation,** and if you look at the structure of your own family, if you're a father or mother, (:49). you always look when the next food will be on the table so the children don't go hungry. If you're a doctor or scientist you go to work and put effort and time and get what we call money so that you can buy and feed your family. When you don't work and there is no structure to support you what do you do, begging, thieving, robbing, killing so you have something to eat for your children, then you become part of organizations that the killing and destruction is part of it because it guarantees you can put food on the table so your children and yourself can survive. So has been the structure of the UK. I have annoyed many British politicians etc, over the years I lived in England with my talk this way, I always said that **this Island can't produce enough potatoes and that's why you became colonialists and invaders to guarantee that you can feed like your father and family.** (In England) there are no guarantees for it, to put food on the table to feed the children and then you loose your position. We have seen this with every ?? structures in the British system for centuries. Why did they invade different countries, and now they call it Commonwealth, because they need to feed and this guarantees then the life. Once we make One Nation and UK is part of it, you don't need to let them come and rob, we'll provide them with what they need. (:51). The ethos of the ?? teaming and the work has to change, then the same work we receive from the intelligence of the food of understanding, the man in England will come up with the systems that we can work

better, in conjunction with the better that we add to it, then it becomes one family. There is no better time for peace than now, because the more the UK ?? increases, the more need there is to ?? carry that the king stays in position that he can have a kingdom and with it comes more war, because there is not enough intelligence in the Monarchy structure to go out and say we don't have the food but we can create the technology that it can help you to live a better life if you feed us. Then we won't see what we saw with the German supermarket (photo) last week. ... if there is a famine they know the rest of the world is there to support us, food will come and everything will be available. This has been part of the structure to build military and arms to guarantee food, and we'll get women to guarantee more in the sexual behavior to guarantee our race. **If you look at the history what has man done (:53). he has never killed all the women of one village, he has always killed the man, exactly what the animals do.** When the lion takes over a herd of lionesses he kills all the babies of the past lion, so has done the man, he has not evolved. How many times have we read in the world history that the world leader has killed all the men and how many when they killed all the women, I think there is none of the second. It is the habit that has been brought in by the misconduct of Moses, we all know the story of how he came in a basket because they were to slaughter all the males, so that there will be no one to oppose the king. This is how **Moses was brought up and in the history he killed many times all the males of the villages**, even the dogs and the ?? pigs were left alone. Then come done the history 2,000 years, **Hitler of Jewish descent did the same thing.** In Netherlands he ordered a couple of villages where all the male species were to be killed. The wrong doing of the prophet has become the wrong doing of the subjects. We see the same process in other parts (of the world) and in religions and sects, and everything else, because man has not understood. It is the STM that is precious (:55). and not the physicality of the man. **If you live in Africa and you have been robbed by the British for centuries**, you should have never forced we'll give you what you need you don't need to kill. The Africans had nothing to fight with, because they had the guarantee of survival. It's the same with the French, their government is tainted with blood. If you are a true Frenchman look where your money comes from. the British made the Commonwealth and left the freedom to them but at the same time they controlled to take money back in from that nation, what they call the slave. **The French budget stills receives slavery money from every French colony. This is one of the reasons French colonies are not growing and they are all suffering in absolute poverty is because up to 80% of their income is sent to France** for the French to live a good life, and Africans to be killed as their slaves or any other place they have been. One of the major work of the EC is abolishing this from the French structure. Why should a nation after 200 years still pay billions of dollars to the French government for being enslaved, and then they call it their freedom. Look at the French income and that of the colonies and see how much money flows to the French central bank. (:57). And then they say the black this and that. Because they don't understand without them the French don't have the bread to eat. The streets of Europe are paved so beautifully by the burden of robbing the rest of the planet and this will change. We'll make sure of that because we'll elevate the souls of the ones who call themselves European to understand this misconduct. There are 2 choices, you judge yourself and nobody else. Every part of the teaching is coming together and it needs to, in time to prepare man to be at peace with himself and his neighbor and then his planet. This is the purpose of these teachings. When you know you can absorb anything you need from your soul to feed your physicality, it there a need to rob another nation or to enslave another person. In fact by enslaving another person you have enslaved your physicality to your soul. Man needs to learn and teach a

lot. **In the coming time we'll see huge conflicts within the structure of the European continent**, I have recently warned this and you'll see it. Because the other nations will not yield to be subordinate, and the other nations will not allow the Europeans to make arms to kill each other on the planet with their guns. the man of peace will not allow this. (:59). **The Europeans need to learn that there is no more time for gun manufacturing, then they'll become equal.** they don't see themselves because of the color the skin and the murders that were done ?? for them to be superior to the others. When they learn that they are equal to the others and have to be part of the same society without being any higher then the others, then we start the first steps towards world peace then many of them will become the messengers of peace. This is the time for it and the ?? evolution of it has come. **The start of the game comes very soon with the abolishment of the kingship in the kingdom of Belgium.** You'll understand very soon. There was a reason we were banished into Belgium, why all this had to be done, it's part of the life that I have accepted, and through it we'll show the mistakes of the past, and with one kingship going the rest will follow in the winter of the end of kingship. Because through my life the others will understand how wrong it is, and how much abuse there has been, and then the rest of humanity will very rapidly go into it. We'll see the end of the kingship through the understanding that nobody is a king to no one, and then those who call themselves king and abuse others will have to stand for their own terms. If I went for revenge on all the killing and abuse we had from the Belgium's, then I would make the mistakes of Moses. And that shall never be done, (1:01). not in my time under my watch. We'll mature them by them understanding how much they have done wrong to themselves and the others, and then through it we'll reach the maturity of the peace. the time has come for the religions to collectively fight each other, or to find a path of peace. ... when it's a financial damage that they can't take then they'll find a solution among the religions. ... as part of the predictions there will be no place on earth that man will make a single arrow to hunt not even an animal let alone another man. That will only come when the man is guaranteed that his hunger won't be there, shelter and the wealth that he can have and the pleasure of time to do what he likes to serve others. We are approaching this time. (1:03). **They have left me too long, too free, to write too much and publish and teach too much. Once the Fox News brings out the KF and these teachings become so available across the planet and promoted by those, you'll find that 99% of the human race will become peaceful in no time**, because they have been waiting for these teachings for centuries. Then who will they blame, those who control the Media, then we'll see the end of financial empires. The process is set ?? we can't so anything with it. As we have seen the new factories and research centers of the KF, up to now the wealth of nations has been by gold, now ?? bitcoins, but the KF stands on the strength of the knowledge. It's the only One Nation that guarantees its resources backed by science technology on the basis of peace. In a very short time your children will say, my father and grandfather was one of the first groups to join the KF work. They'll be proud ... this is where we are going. **I don't need to teach you about the Gans technology, but I'll still (1:05). teach you because you have to know how to elevate and add more to your soul. When we go back to physicality and the teaching of other things is to teach you how to add more to the arsenals of the soul, so our soul can survive in more dimensions in different parts of the U.** I am going camping and I am taking gear for every weather, it might snow, sunshine or raining, I carry everything I need. This is the purpose of these teachings that you carry enough that you can manifest yourself across every position in the U. This is the beauty of it and then we can contribute and be part of the totality and not be isolated because you don't carry that bandwidth of the strength, if everybody else

has a party in the physical dimension but I can't be there because I am just in the dimension of soul, I don't carry ?? to be at the party. I am not there, not because I am not invited, but because I am not dressed appropriately. This is the craving of the man in the space, why didn't I do more, to have more so I can participate in every party in every city and town where I have a friend, and that friend is part of the structure of my soul. the purpose of these teachings is to try and add to the structure of the soul in the dimension of physicality. Many of us have taken in plants and we understand the process of vegetation, of the process of photosynthesis. (1:07). where and how it happens. The same as what we explained last week in the passing of the energy through the lung, through the blood and then the connections to the soul. There is a mystery or misunderstanding in the world of the plants, maybe today's teaching will start a new cycle of understanding. If we look at the history of the education of the man in the physical dimension of the plants, **we have been told that the plants give oxygen during the day and absorb carbon at night. We explained it like how we breath air and the O goes through the wall of the lung into the blood. A fallacy, the most beautiful fallacy we all have excepted because of the lack of understanding. the same fallacy exists in what we call photosynthesis.** How do we explain photosynthesis in the world of science today. Rick will show it and then add to it that we understand it in a more correct way with the new knowledge of the science of the plasma, of the creation of the fields of the U. (1:09). Shows Wiki page on Photosynthesis, is a process used by plants and other organisms to convert light energy into chemical energy that can later be released to fuel the organisms activities for maintaining the O supplies in the earth's atmosphere ... and for most life on earth ...

(1:12). Video on Photosynthesis. (1:17). Mr. Keshe, let's look at the facts of the transfer of energy in the body. The physical process has been understood and explained this way. (1:18). but the real structure has not been understood. Now we understand how and why because we have systems and technologies that we can use. **If you run dynamic reactors, a fairly large dynamic core, let's say 200 to 500 grams, and you put it on a motor and fill it with Gans plasmas** as we showed a couple of years ago, and connect this to a power supply. He draws. (1:20). .. gas reactors connected to a power supply, current and voltage. For those who have done this have learned a lot about plasmas and what they call Photosynthesis. He draws a graph, take a 24 hour cycle and plot voltage and current, something very strange happens. If you go back to Einhooven where we showed reactors that produced more power during the night then the daytime. This should have been clear to a lot of you what it is and how Photosynthesis works. (1:22). Photosynthesis comes through primarily and only through the operation of MG fields of the planet and it has nothing to do with anything else. The rest of it is the process of conversion. **Why does photosynthesis happen in the dark, at night and not in the daytime? If you look at this voltage current chart you see something very strange, the voltage stands the same, but at night time the current dips to the lowest point at 12 PM and then picks back up at 12 AM. This is very strange for a motor that carries the same weight, it should be a straight line like the voltage, because we haven't changed anything. We see a drop in amperage between sunset to sunrise.** (1:24). This is exactly what we showed at Einhooven, in the papers and the (reactors), that the power production increased 2 or 3 times during the night then in the daytime, why? If you look at graph A and B, as a scientist it tells you something very strange is happening, because by the law of physics, the power used is Ampere times volt equal power in units of watts. The power should be constant because we haven't increased weight to put pressure on it or we have reduced any other

factors to increase the power. the only thing that changes is the day and night, which is the pressure of the sun (MG fields) and the pressure of Earth (MG fields), how come the power reduces at night time after the sunsets, we see the dip. I have asked one of the research centers to do this for themselves because this is important for space development on how you can lift from a planet. And what is the reason that they can't get their flight systems sorted out? Because they have to understand this concept.

(1:26). **Why do the motors use less energy in the night? this means that there is less pressure on the motor so it uses less current, which means the Sun's MG fields is withdrawn, and the Earth MG fields in the absence of the Sun it can push further up, and in pushing further up it takes weight off the motor, and off the plasma inside. The mystery is not the system, but this, the gas inside, because it's in a PI condition, and in MG field strength, therefore the Earth's MG field strength touches it, so it has less weight to put pressure on the motor.** When you run a system the way I do, it is very significant because the body stays the same, during the daytime you go to 100 mA and at night it comes down to 85 - 87 mA, it's nearly a 20% difference. For the first time scientifically we show, **we created a PI, (in the blue section) (1:28). which now has the intermediary of the Sun and the Earth's MG field**, and it's only a few, maybe 20 cm above the ground level. And then you change this **to a leaf of a plant which is dynamic**, then take it a step further (you should be a wizard in doing this by now) , **the stronger strength O, the weaker C, and the intermediary N, it's the MG field of the planet which dictates which one is taken by the intermediary and then which one is available to be released according to the MG field pressures.** This then changes everything we have seen in those video (photosynthesis), because in the videos we just saw released by the American Educational website, **they hide something which they don't understand**, but which we understand (1:30). It said, **a proton is released and then an electron comes, but what are these protons and electrons, what are they effected by and why do they get released. And why does the process go during the night time, because now when it's a PI on its own, it is effected by the MG field strength.** Where do they come from when they get produced and how come an electron is released at a certain time of the pressure, the proton and neutron comes from somewhere else. **You see the teaching is correct but what is not understood in the packages of misunderstanding of the man it is just added in**, but if you now put in the further understanding of the knowledge that the G field strength of the Earth, 85 -87, less MG field pressure, what does it do, **it pushes the lighter weight which is the C into the boundary of the N, and during the day it's the reverse, the pressure of the (C) makes the O available. Then something very interesting in the whole process, there is a word in these teachings that are added, it's called, Amino Acid, the H now you see, the game is played by the AA.** So in fact, all the, what I call, rubbish we heard, to a simple man like you who now understands the creation of AA, and understanding that **the whole atmosphere (1:32). around this system is AA based**, now you see the interaction, he draws a circle around O, C, N, H, this is your CO2 Gans isn't it. **This is your CO2 box but you call it a leaf.** All that explanation, this and that and the mysteries, but to you who understand this it is solved. **Through the G field of the Earth you change the G field strength in the center which is N. Adding more the G field to the C with the N as a balance it makes it available, that in the process of the reversal when there is more pressure of the time, which is the daylight to be O.** If we understand this process exactly then for the first time we understand for example **why we have 3 vegetation lines in the mountain ranges. It's the MG field strengths at a given point** in the understanding of the new science that allows different strength fields to be created

(on the mountain). At this point (above the tree line) there is no vegetation because we don't have the AA connections for vegetation to exist, we see the tree line. This now makes sense and fits best to what they call photosynthesis, what we call plasma technology. The reality is that now we understand more and the (1:34). fallacy of all these pictures that have been made become nonsense, because what they didn't understand they just put words in. There is nothing wrong with that video, but now we understand more of the reality. **This becomes important for us in deep space in creation of the AA of the place of existence, what factors come from the planet where we want to manifest ourselves, which part of the structure of the bandwidth of the elements we carry within our soul, that it needs to come into operation that it gives us physicality. Without the AA there is no physicality on this planet as life.** Then in different parts of deep space our scientists who still want to travel in the matter state, in what we call Spaceships, in understanding this and creating the 2 division sections in part of the fields allows them to create anything that is needed by the body of the man. It's the job of those who started working this Monday in the KF research Centers for interaction of the fields of the matter of the body of the man. ... I thank all of you who set this up. **This teaching is important and targeted for you, please understand it. (1:36). When I teach one I teach everyone so that the totality understands. If you have a doubt and don't understand you can go back and make one of those original reactors** that you put on those fan motors, fill with different Gans' and note the difference in mille-amperes, and how it drops between night and daytime, and that you haven't changed any other conditions, except the fields of the Sun which goes through the walls of the house through everything, and the fields of the Earth which comes up through ground level up. This changes the whole structure .. broken up. ... He draws on white board. There is a very important part to this and it goes back to the original teachings that we did, (1:38). We said **the AA, he draws a Star Formation (SF), the base reactors, C, N, O, and always put H on top, start with C then go to N and then to O. If you look at the balance of the field forces you notice something very strange,** it goes back to the other picture I just drew. It goes back to G and M fields on the structure of the leaves and plants and what has become the fallacy of photosynthesis. C is 12, N is 14, and O is 16. **The strongest 16 or O tries to feed the C to bring it to its own strength, the N feeds the C to bring the both into balance, at the same time you have O of 16 trying to feed N to bring it up to its own energy value, in this you have created a dynamic flow.** He draws a counterclockwise arrow around it, this is how it become the base G. But at the same time you also have the opposite base G (draws arrow clockwise). (1:40). You have 12, 14, 16, **two trying to feed and the balance what comes up, is very little. which in the isotopes of the total C, O, N which we have a connection line, feeds the G needs of H, that in turn, as the receiver of the equal strength of itself, it becomes the feeder and balancer to the others (draws half circles coming down from the H to the base reactors), and because it has slightly more, the H becomes the energy source, as we see with CH₃ in sugar. Anything on this planet that has an energy base in connected to the presence of the H.** The effect of the MG fields of the Sun and the planet dictates and changes everything as they retract or they push in. This is the photosynthesis, of how we understand it, of how it works. If you take the pressure out, (1:42). and this is one of the reasons everyone of us goes to the shop and buys **fertilizer, N, because as long as we can keep this guy (N) these other guys (C & O) will do the work according to the structure of the pressures of the MG field of the planet. For the first time we understand the operation and the need of N in the plants. It's the balancer of it, when there is not enough of it (N) the other 2 can't operate properly, then the G**

field of the planet can't interact correctly for them to go, this is why even the CO2 you add to the water of the plants changes them to grow more, because you create the condition of the G field of the planet which is providing more field forces for the C balance to be in operation that the N itself becomes irrelevant and then the plant absorbs everything which balances all the AA pressures. Now instead of relying on the growth only by N which is the present time work of the fertilizer, now every element of the C, N, H is there to feed so the plant grows faster. Now you have 3 mothers feeding the same child (1:44). not just 1, depending on the time and the place. If you can create it at the same time as the plants, **you create the (plasmatic) environment of the plant**, you are always in balance, more or less. In the future at the Research Centers the people who deal with vegetation and life, **they'll measure and see a more balanced power through the motors, meaning not much difference in amperage between the day and the night**. This is the new and correct way to understand the process, then it changes the **same thing for the fish in the sea, and the lion in the jungles, because we learn to work through the essence of the creation which is the AA itself**, and in that process of understanding we need to bring all the factors. The lady in the video said, 'the prootn comes and goes and then there is an electron', what is the game of the prootn, or of the O, electron or prootn or whatever. **These are all plasmas and because they haven't understood this process, then these plasmas creates MG pressure and gives it a new position, and it's that position that creates a new direction where the O is absorbed taken 2, or the C is rejected because of, and visa versa**. Then we can understand why it has been a mystery. For years they have been **telling us not to sleep under the trees at night, (1:46)**. because the C intake is very high, because the MG field creates that structure that you create in your CO2 Box, which with **the presence of the N creates the same MG fields plus the G field of the Earth that calls in for the energy of the C to be enforcing the condition on the N inside, which at that level there is no need, no strength for the O to be as the field transfer available. It goes back again that no C ever crosses the boundary of the leaf. The pressure on the N through the MG field, which is in the leaf creates a condition of transfer of energy of C as a matter state through the Pl, through the leaf, and then the visa versa during the daytime**. No Carbon ever crosses the boundary of the leaf of the plant. The same as the lung of the man, the way we breath and we explained the conversion of the energy through the lung the same process happens here with the leaf. Don't forget that you are looking by habit as the leaf, (1:48). the same as what you have done with the mistake of physicality. He draws the leaf in 3D, **the internal environment in the leaf is in MG field Gans state and not in the matter state, even though you have the skin of the plants, the skin of the leaf is (like) the skin of the body of the man holding the Pl of the Gans of the body of the element which is the content inside the leaf**. This is why if you understand even deeper, **the (leaf) is made of AA (COHN) then you'll understand why plants have emotion and if we can join in the MG field of them we can communicate with them**. Because they are made of the same AA, from the same environment that you and me and everything else is created from. Now the life and the creation in the dimension of the "vertical people" has different meaning if you understand this fully. **Then if at planet Zeus you decide you want to be a vertical people, not to have to move but have everything come to you then you use the environmental MG pressure, or you become a horizontal people and you move about to collect more of different things** and not one. You become the traveler on the jet plane (1:50). in different directions from China to US to down in South America, or you decide that I am a local guy and I am not moving from the village but I'll take everything that comes in the village, and become what we call the vertical people. Now

understanding the science of the true process, **photosynthesis goes through the window, doesn't it. Because this environment that you have created you have all the elements, the N, C, H that you don't even need to absorb water from the ground, because in that process of what you call photosynthesis, what we call plasma interaction you create the MG field of the water.** It's the same as what the lung does, **you produce your own moisture.** this is important for governments like the Chinese who are worrying about the deserts moving towards Beijing. If they understand this they can create a condition where vegetation can grow without any need for anything (water), and by rooting to stop the movement of the deserts at the boundaries of Beijing, but this needs a lot of understanding. You create this condition, you don't plant plants which are suiting the MG fields of the environment like as we see the tree line in the mountains, but a vegetation that fits into this environment and they'll grow themselves. **You have to work in harmony with the environment. (1:52). If you try to force it then you have to fight with the environment but if you create a condition that uses the true MG field** of any destination be it the desert, sea, or planet Zeus, you can live, create a condition that is what you need for the time you need it. **The creation of the deserts on this planet is done because of the angle of the planet. the planet starts from the north and rotates down and it goes through that phase of deserts and in coming down to the equator,** and the plants at the equator ?? and it turns over. Go back to **the history of let's say the UK, some time ago it used to be part of a desert and in another time it was at the bottom on the sea, due to the angle of the rotation of the planet in which everything rotates, it takes billions of years but it comes out.** Geologists can tell you about the evidence of this and exactly what it has been. **It takes billions of years but what is created in the North Pole gradually becomes part of the equator ??** . And we can't stop this process, but as it goes through it, it shows why we can't create, or we don't see it such vegetation in the desert area. Leave it to me and I'll make the deserts to be the oysters, green as the jungles of the Amazon, because I understand why, but then this brings another problem for us (1:54). **If we do such a thing then we'll create a dynamic flow on the surface of the planet for revolution and the rotation of the M field of the matters we call air, we need the hot and cold and the temperature difference to create this dynamic atmosphere that it guarantees life,** and this planet has gotten used to it, and has adjusted itself in the evolution as this is happening slowly it matches up itself. As I said before without the dust from the deserts of Central Africa there would be no life, or very limited life in the Atlantic Ocean, because **the red dust from the desert becomes the beginning of life when it lands in the oceans, millions of tons of it.** If we stop this then what happens to the food that the fish need and that man relies on so much. We have become an integrated system we can't change it, one is depending on the other. But in places we can create small deviations, but **not what the Israelis did in the Sinai desert, they tarmac it (asphalt) and put a new soil on it and then orange trees, then when they couldn't control it the whole thing goes collapse.** you can read about the Jaffa Oranges that the Israelis created in the Sinai desert after the 6 day war, ... but when you can't sustain it anymore then it goes back (to desert). But you can create conditions to sustain life in quarters of the Beijing. The deserts that are moving towards Beijing. (1:56). If you understand this **you can do the same anywhere in the U, but you have to understand which way the fields are moving.** We look into the deep space and we see what we call the darkness, but in time when man becomes educated and creates new tools, we'll see the same thing, **the M fields flowing in one direction and then later on they flow in another direction, the same process as we have with day and night, photosynthesis as you call it field flow, the same thing happens in the U but on a**

larger scale. In the dimensions of **the pictures coming from NASA** from their telescopes, we see the magnetic fields, dimensions and environments where the systems and **galaxies are totally rotating in different directions in opposition to what is going on in the rest of that area, why? One is the direction of flow and the other is the interaction of other universes at that point.** There is a lot to learn, but we have to understand the basics of the interaction of the fields. If you look at the reactor we showed in-between that the amperage changes according to the time, this gives you a lot of knowledge in how you can create a leaf ?? and motion from any space. Those in the space research, I asked you a couple of weeks ago to run such a test to understand, because **if you can create a MG field using the earth's MG field that it matches then you don't need to ?? burn anything (fuel), (1:58). the field of the earth like a wind blows you into the air but because you have a field strength within the reactors that you have created, then you dictate the strength of that wind, do you want to float, or block and go as fast as you like.** In the new science of space technology you don't need to burn the fuel, because **by adjusting the field strength you lift, and you dictate how and where to, and how to blow in the winds of the environment.** We see this clearly in what Tom Sellers did in the Caribbean, **how come the rest of the area is flattened by hurricane but not Tom's mother's house, because the MG field created by the Gans' which he has sprayed on the plants and more or less the whole environment with, and not just a plant. They have created a condition that they do not follow or interact with the field of the environment, the wind has no strength to blow through it because they are above it. It's what we call MG field shielding, which comes when you have a strength higher then the environment, it's like a bullet proof (shield) even though some wind might go through.** Now the whole science with the experiments that we have done makes sense. There is no mystery as Tom was showing us in the Tuesday teachings of the EC and UC what he did to his mother's house and why it's like an oasis. (2:00). Now **understanding this and even the photosynthesis is field strength interaction** and we understand this more. **This is part of the total structure bringing the physical teaching of the matter state, then in the fields, and then in the soul. The plant has a soul because it interacts, it has a dynamic soul with a center line.** Why can we cut part of a tree, its limbs, leaves, and branches and it still lives and it gives more, it's a giver, because now it has directionalized its field, this is the beauty with the vertical people, because they have directionalized the stem and trunk of the tree. The trunk of the tree is from I release my energy or whatever I accept collectively through my soul. This is why the trees have different shape and structure, they decide from their soul, from inside what environment I cover. I can go because of the field strength I receive, all the way up and become a very tall tree, or I have a composition that allows me not more the 10 cm field effect, I become a herb or shrub. **I create a condition according to the central point, that at certain points I need energy points for myself (2:02). that at certain points I can balance with the environment,** call them the ?? The pictures are from Tom where the hurricanes went through the Caribbean's and flattened everything but nothing happened to them. Rick shows the video. You see flattened trees just a few hundred meters away. The Gans came in and changed the environment and created this condition, it's not that everything just happened here. Tom watered the plants with CO2 Gans'. .. this is **an oasis in the center of a disaster. ... this brings home everything we just have been teaching about, because we create a condition** that ... this is huge live research for world scientists. Now does photosynthesis exist the way we learned it or do we have to learn a new science in addition to the existing one, because if we say everything has been wrong up to now then we become hypocrites of

the past. (2:05). We can add this knowledge to what we know now to complete it. That is the difference in the desert and what has been created by the hurricane. **Every plant, leaf has created a physical condition, even the structure of the building is protected, part of it, and this is a few days after and the whole island has been cleaned out. KF technology is the only solution for mankind to overcome these problems,** the other half is understanding the totality and what we call the problems we have created for ourselves. We have to understand the true knowledge that G field strength is not just as we said with the hypocrisy that it passes their life, but that it passes the whole environment of a life. Rick add this video at the end, **because many world governments watch these teachings then they can see the real effect of the problem.** This is a big teachings for the governments in Africa and Asia. the conditions have to be understood, now what I explained about photosynthesis makes sense **that in creating new environmental conditions with the presence of the Gans' we influence the environment, we decide where we don't interfere the G field of the earth to interact with the plants in the Gans state of the leaf or of a branch or whatever, in respect to the suns MG field pressures.** Would anybody like to see this across all the islands of Caribbean. If the governments, like the American government decide to spray the islands with the CO2 Gans, they'll have more effect then what they did with Agent Orange in Vietnam, the beauty of the light of the Gans is much better then the poison. (2:08). This is why we need to become One Nation, then let the hurricanes blow across the Caribbean's, nobody cares, the buildings will still be there because the fields created by the plants, CO2 are protected .. This is what the world governments have to see, the need for becoming One Nation. Not killing scientists at the dinner table, or poisoning me, or the guy who made the stems, and all by one misguided bunch of people who do not even deserve to be a part of humanity. **The scientist who bring the changes have to be understood and supported and not to be killed and have their knowledge be put away.** It is all done under one name and nation, and this will be stopped in the coming time. When we said the scientists are being killed by Belgium's everybody laughed, .. **The scientists are the messenger of the knowledge of physicality as were the prophets of what became the misguided STM.** (2:10). Every single one of us is suffering because it. We discovered something new ... every little bit adds to ... show this video to your governments. Why don't we spray the islands, we don't need much, we don't need to bring reactors and ??? you create an environment and see what happens next year and the year after. **This process will stay with the island for years to come.** We do pest control, this will create the conditions of hurricane control but leaving the rest of what is needed for the changes the hurricanes bring for the condition of life, but isolate places where it touches humanity. (2:12). This is the fallacy of photosynthesis, it doesn't exist, but because nobody understands you can create any rubbish and people believe, it has become a religion, misguiding people and letting them believe that they are correct. But in a way **we didn't know any more. We didn't know until 2 - 3 weeks ago how much Moses lied to us and he destroyed what he didn't want to be known by us. Now we now the, what I call enlightenment, the same is with this.** What you call photosynthesis is in fact plasma synthesis, the plasma which interacts, now we understand the operation of the Gans and the internal operation of the leave. **If you look at the color of a leaf the color is slightly different on each side because on the side where you have the central line it creates different fields which matches the C and on the other side it matches the O. It absorbs and releases according to the field strength.** It's very much like you all understand, you put a plate of Cu and Zn and then you brought a plate of Fe in, or one of galvanized or something else, you withdraw it and you still get CO2, if you add to it a new Nano coating and you get a different

material. Especially for those of you in the factories (2:14). ... and **those in Gans production systems, as we use 3 plates you have to watch because if the field strength on one side of the plate, or the third plate is different on the other side, on one side you produce CO₂ and the other part ZnO₂, or you might produce CuO₂. KF manufacturing system control this is something you have to watch**, the electric current between the plates has to be, even though we use the same plate, otherwise you'll have huge amounts of mixtures of other things inside. This is part of the understanding, **so one side of your plate is creating the condition for, what we call photosynthesis of the C, while the other side is creating photosynthesis for the O, one side of the plate is day operation and the other side night operation**. In a control system when you are setting up, **make sure you understand the separation of the 2 sides of the plate, and if it can't be controlled it has to be 2 plates only**. This is the beauty of how we use public teachings to our scientists who work in different parts of the sections, as you saw the space, food, materials, factories and research development. KF has become a global structure and will influence the life of every man and living thing on this planet because we respect and understand how to respect each other's physicality. (2:16). Any questions. **I would like to thank Tom Sellers for the beautiful job he's done and ask him to become head of the KF Rescue worldwide** because what he has done in the Caribbean is needed, we should have the resources. And we don't need to every year worry how we are going to feed them, instead we can change the environment of the Caribbean and these islands that no hurricane can touch. Q: Klaus, I worked many years with the fields of minerals, and we see the possibility to help the olive trees with this ??Aquarium effect, if Mr. Keshe contact me, with the Gans and crystal structure of fluids and all the trees will be healthy. (2:18). **Yes, there is a big problem in South Italy where millions of olive trees are effected. When we offered the solution to the Italian government authorities they were not interested because the money made out of seeing the olive trees destroyed, for their private accounts are much more important than the saving of the trees**. There is a huge amount of money given by EU to sort this problem out, but the problem sits. We have worked with people at the highest level and they have been told not to do anything because there is a lot of money. It's like the bridges in Italy that go nowhere but the EU has already paid for the work. I think the work of the EUY has to change to one of performance index payment. ... (2:20). They created a 10 km gap in the South to stop the disease but it can be stopped with a few thousand dollars. I have done tests on it and it works ... you can do it with any diseased tree anywhere in the world and the beauty of it is that you don't kill the animal, you create a condition where it's not suitable for the pest, they move to somewhere else if they can find some place to move into. **It is creating a condition that the life doesn't exist, but at the same time it is a double edged knife that we have to be very careful with, it cuts on both sides. We create a new environment, do we invite new pests with the new condition, which could be more harmful or better for the plant. The life on this planet is a very complicated composite. Every single cell in the body is created under different conditions of MG field ?? and we have trillions of cells in our body, so there are trillions of different conditions we have to understand**. (2:22). We can't say everything we do is 100% correct and we have to understand that **our actions have consequences and is it good for the tree or are we just trying to enforce (our way) while being blind** to the others, or have we created a condition where another life is invited to take nest in the tree. The more correct we are ... in the teachings and in the testaments, if we judge our own conduct correctly we don't need anybody else to judge us. **We have solutions but they should not become a problem for another creation, or create a condition for another new creation**, then we

conduct ourselves correct. In the work of the KF we have to have a view of 360 degrees considering everything, and not to become narrow minded and glorifying ourselves and become like the other hypocrites. **What do we create by changing, okay the tree can survive much better, but do we create problems for the neighbors in the next fields, or for the plant to become the center for a virus for the plant rather** then just being a worm. **We have not understood that plants also get viruses and we have to understand how we keep the growth of the plant, is in the AA growth of the plant, the H moves up in elevating itself in the PI field strength (2:24). that creates a condition for the plant to grow vertically. Every tip on the leaf of a mint has strength M field connection that it adds to itself, this is why herbs are different, they absorb more because of the total variation,** every single tip on the little nudge on the edge of the mint leave creates its own specific condition to absorb ?? more from the earth. **A collection of it makes the leaf of a mint.** And then the collection of it in what we call a sweet tree creates the smell of mint, **when we use the CO2 to feed the mint would the odor become stronger, or would the strength of the mint now be good for a certain disease, because now it's not a mint anymore,** it's elevated to a different strength and it can match something else. We have to be open, understand and be correct. It goes back to the 12 and now 24 Commandments, be correct and not be self centered and judge what I do is correct. **Look at the balance of the fields and to whose benefit is it and is the benefit correct for everyone in the totality.** (2:26). Do we make a decision to spray all the islands with different combinations of Gans' so that they can withstand a hurricane but would that create a new condition for the citizens of the islands, would they become calmer, would they need to gather more because now they become part of the structure of the environment, they are fed and calm. One KF follower said, do you know why the whites attack the different continents etc. it's because we don't have enough food to guarantee so we always worry about the next food and don't have enough to guarantee the survival so we invade other places. People are calm, they can always go up a tree and get some fruit they don't need to worry. ... we have to see that the consequences of the new technology that it effects everyone correctly and makes everyone happy correctly. ... (2:28). EU distribution of the wealth has to be performance index and not prepayment to rob. ... we see the same thing with American agriculture ... Rick talks about the Italian factory making the bombs falling in Yemen to convert it to KF technology, keep people employed ... (2:30). There are a lot of politics involved in the bomb and gun factories in Italia and the KF is highly involved to seeing the end of this. We don't disclose anymore what we are doing, as you know we travel the length and breadth of this planet to make sure of it. ... the bomb making in the Saudi subcontinent has to do with the religious financing, financed through Vatican we have seen the bank transfers and are fully aware of it. Something very interesting, go back 3 weeks ago when we exposed North Korea and who was behind it. (2:32). and just look at the news in the past 2 weeks, suddenly out of nowhere N Korea has opened peace talks with South Korea, out of nowhere. This is a camouflage, it's a plan for a bigger plan, but we still see it and we are very effective in the political scene through the correct conduct. .. it's from exposure of whose involved that we did before Christmas. **They thought is was hidden and now it isn't. Now there is a new game in town to try and cover up while still carrying on the same.** We are heavily involved in opening structures to create peace but with it we have to show who is behind it and it's possible. **As long as the Jewish and Catholic worlds keep Islamic nations at each others throat, the more they can blame the others to collect more.** I will give you the statistics sometime in the future how much each person is counted by the Catholic Church, ?? each ?? as a financial entity, it will amaze

you ... **these bombs are financed by the Catholics, and this war in Middle East is planned and the stupid people because they receive money in their bank account, are following it. This is not a war between Shias and Sunnis but it is used by Vatican (2:34). and Jerusalem to create war** between them to sell more and then to create a new dimension of control. We are working very hard to elevate their souls because if you punish them then they start something else, but by elevating them and controlling their understanding you can stop it. And this is what we are doing. It's the job of the UC and especially the EC to elevate the soul of these people. We are fully aware of the arms production in all the European nations. The problem is when one side makes (a technological advance) the others feel they have to catch up to them, so it's a double waste of energy for other nations trying to counterbalance what they made to destroy. 90% of the arms production in electrical etc are deterrents and trying to have a better system. If you can have a better system and save why do you need to waste money on war, the time has come to be peaceful and the technology we bring and the nations that can bring this, we are talking to and working with, and they can, we'll see in the coming time the change will come. People are getting fed up of creating to kill ... The intelligence of the man has to be used for the advancement and benefit of man, this is the whole purpose of the KF. I enjoyed to received the message that the new research center has started (2:36). and they are already working. **Q: John says, you must be up on what Viktor Schauberger's work, that when a tree is cut with a Cu axe it re-grows, but if you use a steel axe it will never grow again**, this is why he made a factory to produce tools made out of Cu. Keshe: There is an old saying in Iran (2:38). if you want to end the life of a tree hammer it with a Cu nail. It depends on what and how fast is the cutting, I looked into this some time ago. the CuO₂ becomes part of the Gans of the tree and it changes its composition, but on the other side the Cu is part of the structure of the tree trunk which doesn't mix with it. The reason it kills it when you use a iron axe is because it's exactly what you did in the CO₂ Box when you added a galvanized plate to it, you started creating blood. The blood doesn't come from the Zn alone, the composition of the Zn and other materials covering the Fe gives it the condition of CO₂, when Fe is exposed on its own it leads to the creation of the blood. As long as it is CH₃ it stays orange-ish color, but when the metal is exposed it becomes the red color of blood, ? on the spot. **When you cut the tree with the steel you change the composition of the environment to one of hemoglobin, which is not part of the photosynthesis of the tree.** I have done a lot of research on this in the past. Now we understand that trees are made of AA, when you cut it with steel you create the condition of the blood flow (2:40). as a hemoglobin, which doesn't fit into the structure of the plant and that is why it dies. You put blood on it. **Where Cu is part of the structure of the plant, even though there is some Fe within the structure of some plants anyway, but you increase the field amount of it.** When you cut understand the whole process, when you cut you create a heat, if you remember it's like the Chinese wok and how without knowing it you created N technology. When you trim a tree with a steel cutter on the edge and you see it dies, how it changes the color on the end of the cut, **when you cut a stem you create a heat condition in which now you have N particles of the steel with the AA and create a hemoglobin condition that doesn't fit into the life of a plant** which is different. I carry the knowledge of the U, it's just to understand how to ?? the correct way, it doesn't matter where in the U you are. **Q: How to open our soul or adjust it so we can accept and interact with the fields of the U and teach our physicality to accept this process? Our soul already has access to it, we have denied it through our emotion, through our physicality.** (2:42). As simple as that. We are always waiting for physical confirmation but our soul is already connected

to the UC. It's how we can get our physicality, because we are so physical to understand, accept and live within its domain. **Don't think that just because you put the soul around some cells that you isolated it to itself, the STM or the brain through its absorption and in a way through attraction and repulsion absorbs energy from the U, whereas the physicality, the body needs the dimension of the Inertia matter state of the planet.** Our soul doesn't need to be fed **but it needs the tuning from the physical part of the soul that it can interact with** it. It's a leech which carries around, which found the compromise for it to exist, but at the same time it needs to tune itself. Q: (C 12, N 14, O 16) **Is the heart 14 and the two lungs 12 and 16, as they are different in size so the flow is towards the smaller lung? Heart is 16, ... in a way if you look at it one way, yes it's the N but in reality (2:44). it creates the totality of the fields and the balance side comes up from the 2 sides. The left lung connects to one part of the brain which creates and effects the absorption part of the brain, this is why we are very emotional as part of the work of it. In the left side of the brain we become a giver it's M, you give your right hand (handshake) which is connected to the left side of brain, the same thing goes for the inside construction of the Heart and the lung. The heart plays 2 games, 1 as N but at the same time because of the strength of it, it works at the higher level of the O.** It has to be able to be a balancer and at the same time play the conditions of the balancing of N and O to feed the surplus to the STM. If you look at it one way yes it is, but the other way it's the O because it carries the total much higher strength levels, which ?? feed that dynamism. Q: **Is part of that dependent on whether we are breathing in or out? Of course, why do we feel good when we walk among vegetation and in parks, we receive a higher order which is an O aura. (2:46). This is why we have different behavior if we live in different environments, means height and weight from the central core of the planet,** that's why people who live in the mountains have such a behavior and people who live in the valleys have a different behavior because we are part of it, we just ?? talk about photosynthesis, plants and leaves, go back a couple teachings, **we are effected by the fields of the planet,** I explained that in the recent teachings. Why do we feel tired at night and want to sleep, the statistics given by the police is that more **crime happens in the early hours of the morning** because it's exactly as we showed in the graphs that is the time of the change from one to another, now you have to change accordingly, so we are effected by this, why do we feel tired at a certain time, we talked about the sleeping months in S Italy, this is all part of it, it isn't just photosynthesis of the plants, we are part of it, **we are a bigger Gans container than a leaf.** Q: What is the relationship between the soul of the physicality and the non-physical soul? **The soul of physicality is connected to one matter element Inertia collection, (2:48). whereas our soul is a total collection of all the elements.** One is the Central Bank and the other a branch and they all send their money back to the Central Bank to be kept if you look at it that way. **The biggest surprise for man will come when we go into space that we realize that we have more then we thought, and we'll thank the Earth for giving us so much** that we can survive throughout the U. Q: **In our time in physicality we spend time learning skills that might be useless in the life of the soul work, how to know what skill and knowledge to develop and how to use our time and what to develop? First of all skill is a knowledge gaining condition for the elevation of the STM and a farmers skill is for his physical matter state and an engineer the same, it doesn't change anything in their soul, it elevates for them to understand more of what they are, but it is literally irrelevant because it adds to one part and not the other, but remember something very essential, (2:50). we carry all the knowledge of the past from our ancestor in our RNA or in**

the soul of the physicality. So we have the knowledge because we carry the experience but that is for our physical part, the emotion, as we said there are no carpenters in the space. **What we gain from it, the joy, the happiness, that we serve, we elevate that we create something that our own physicality or the others can live off, in balance, then we'll see the difference. This is part of our misguided understanding that we have to be a PhD or a doctor to have a higher soul.** I promise you a farmer living in the jungle and who sees no one but has chosen to live simply will probably have a much higher soul, then the man who is a professor and PhD because he had to cheat a lot, but the farmer negotiates with the trees and plants and understands them and lives in harmony. It goes back to the question of Hitler or Mandela. **Q: Why are the others in the UC amazed at us and why are we a beautiful accident, what was the accident?** The creation of the Earth was the accident. (2:52). the way it has turned out. And why we are the puzzle is that how come these people have everything and they don't see it, how much they are ignorant to their own creation. **Q: Why is the Earth an accident? It was just created coincidental to get the direction of rotation.** There is an interesting question I raised for some scientists but they can't answer it. We look at the long term and you look at the moment, if our annual time ??? in Iran we celebrate ?? at a certain time. **Was this rotation of the earth around the sun or 365 days and so many seconds, 10 million years ago or did it have more seconds to it?** We don't have enough history to have collected this data, but there is a way you can do it and it will show that our annual time is reducing by so much every so many million years, **because the closer we come, getting pulled in by the sun, the shorter in the circumference to rotate, then the other effect is that because of the interaction of the fields of this planet, would the 24 hours be 24 or can you tune it to 24, or in 1 or 2 million years it will be 23 hours and 59 minutes. (2:54). then it throws everything out that we set things up for.** The accident means that the conditions have created it, it wasn't preplanned and so it is what it is and we have to accept and live with it. **As the dinosaurs don't exist because we are closer to the sun. The dinosaurs and big trees go back to billions of years because of the same thing I explained by the photosynthesis, the tree line is an indication of the height of the animals that can exist and as the pressures from the MG fields becomes greater it doesn't allow for taller trees and animals. It is as simple as that. Our position, height, intelligence, and whatever is dependent of the interaction of the fields of this planet and the sun.** The sooner we understand this the sooner we find new technology and dimensions in life. KF is developing very fast in different aspects. Please understand the teachings of today as I said they are becoming very intense and direct because in 2 weeks it is exactly 4 years that we started the open teachings, non-stop. The governments have started taking notice, the problem is we could never get the publicity but the negative publicity has been very good for us. We are still in the nursery of the knowledge of the U and to get into the first class there is a lot more we need to learn, especially listen to the teachings 2 weeks before Christmas and now, we have taken a new course and we are entering into space technology in a very rapid way ... some of it they don't see and I don't teach it because it has to be understood by them. try to comprehend the essence of the knowledge and not copy cat and we'll progress very rapidly. (2:58). Video about the Caribbean plasma shielding during a hurricane.

END
