

208th Knowledge Seekers Workshop Jan 25, 2018

(Shows the first workshops, How the plants produce CO₂ and O is important for man to travel in space the energy conversion and for those mature enough to travel by their souls, The whole structure is set to promote the soul of other entities then we understand that our physicality is irrelevant, We looked at the Pain Pen as something physical but it has a soul and adds to our soul, We need to understand how our soul is structured like the body, The emotional part of the physicality leads to the creation of physicality, We can decide the shape and structure of our offspring if the soul accepts, You can't clone a soul but you can the DNA of the physicality of the soul, because it's irrelevant, Start to develop all of the 300 plus patents and read them again your knowledge is enough to understand them more, We are reaching the point of the non-containment of the Free Plasma and the elevation of the soul, When we start to create the plasma condition which is above the structure of the Cu, the Cu doesn't exist but the Pl still does, A plasma current is free field forces that knows it has to go somewhere to deliver and it has to come back to give more because when it delivered it received more, Creation of non-containment plasma systems or Star Formation for flying that is controlled through the emotion of the soul where to protect the physicality you allow the physicality to enter the soul which can protect it as the soul is very much the same as a star, When you make a Patch it's not just the physical pain that is healed but the soul of the cell that is healed it's the elevation of the soul of the cell that has received the energy will elevate the soul of the man, Heaven is here and now in life, Mr. Keshe tells how he got detached from physicality during his imprisonment in Canada, The purpose to this life is that you are here to serve other not yourself, ,)

(:13). **Rick shows the 1st Public teaching workshop, 3/5/2013**, once per month, then they become the Knowledge Seekers Workshop started 3/6/2014. (:20). plays clips from workshops. (:23). The early gas plasma reactors. If you have a single H atom in a square meter that Pl will fill the whole meter. (:28). The Pl acts exactly like a gas, it fills its container. (:31). Mr. Keshe starts. What we have done in 208 workshops is very much the beginning. ... we are rewriting the beginning of a new cycle for the human race. (:34).

(... break in connection) (:38).

(:40).

(:48). break in ... (:49). (Mr. Keshe has good connection from here). In the teaching last we **discussed how the plants produce the CO₂ and O. This is important because the way the KF is moving towards the space development, those who would like to travel within the structure that they feel they haven't yet reached the maturity of the soul to be able to do it on their own.** We need to take that phase and be able to teach.

(:50). It's important to understand that the STM becomes the controller of these systems. **We speak about the horizontal and vertical people, there are also those who float in the seas of these planet and in the U, they're all using the same process and they all have a soul. The soul's structure has been prerecorded in what we call the RNA of the man, in its play it creates the vibration of the physicality of the man.** This is how simple it is. How are we going to use the structure of the soul that in the manifestation of itself, what we call the RNA, what are the nodes of ?? this to play, which is the physicality of the man. **When you play the music the fish, plants, and animals show a**

reaction. We have to learn to play the music of the soul of the U. Those of us who serve to elevate to that position to be able to receive more to serve more. When you reach this point you'll say pone thing, how easy this has been to get to this point and how many mistakes we made of which there was no need for. (:52). But it has brought us the wisdom of understanding the conversion, how our soul can dictate the position of our physicality, and how the physicality can dictate the position of the STM, or any other being. From the start of the teachings I said, when you start a system pray for it, give from your soul. We become part of the whole process, **the whole structure is set to be, give, develop, and to promote the soul of other entities, then we understand that our physicality is irrelevant.** (:54). It's us who decides the shape color and everything else to go with the physicality. I have tried to bring the soul into the teachings of the physicality of the past 3 years, in this process we are becoming more and more aware that it is us who dictates the position, brings about the totality, can dictate the whole process. Our wish is our command. We all have educated each other to the development of the soul. **Many who came to the KF to take from it physically we don't see around anymore because the intention of the soul was not here to serve,** or up to that point they could but then after that the soul was prepared to participate because it was not there to do. A lot of us will go through the same phase, but the beauty of it is **once we teach this across this planet we'll see the beginning of the peace, which for us is peace within the STM that he is happy with the physicality of it which is controlling it.** (:56). Where the physicality which is in charge of and with that process we go to the next step. A lot of supporters look at the KF as a patch, power supply, or a P Pen, but in reality it was all a patch for the physical soul of the man, **it was an energy to elevate the physicality to develop the STM.** It's was there as a P Pen to write the pen of elevation of the STM from his physical position. We always looked at physical gain whereas in fact it's part of the development the STM. We will all understand what this means in the coming time. **Because we are so physical we just look at a Pen because it releases my pain and it's gone, but it's dynamic, it carries a soul so it adds to your soul.** A Patch is the same. If you use Cores with Gans' and they create a condition of the soul, what do you think billions of Gans' in the patch are worth, then **we start looking at the whole creation in a different way.** (break) .. (:58). ... **it's to elevate the STM and that with it, it elevates the soul of the others.** This is the main objective of this teaching. In the past few weeks we joined the soul with the physicality, we started to understand it, but now we have to go into understanding about our own soul, that we understand the Commandments **and how to understand the intention of the soul and that we can change it in the physical dimension.** This needs a lot of comprehension, to go deep enough into the structure of the body, **that you can start with the smallest cell in the body, you can feel and touch it, then through it try to reach the STM.** Then you'll understand how every one of us can reach not only our own soul but the soul of the others. **Collectively we have that power,** we can do it, that this is part of the facets and assets of being part of this human race. (1:00). The whole process is to understand **how our soul is created and structured, the same way as our body is structured so is the STM, and any entity in the U. The soul needs to absorb, to receive and to give, it has a part of processing** to understand what it needs to give and what it needs to receive, and to what extent it can do both. It has to understand **what it likes and dislikes, and then in what environment it would like to manifest itself, to operate, which of its**

attributes of it can show. When the man evolves more to understand the function of the soul to be parallel in the shape of the physicality. **Souls observe what pain is, comprehend what joy, what it needs to satisfy a need. It's for us to understand the structure of the STM has a parallel manifestation as a physicality. A soul falls in love, the same as a man, because it says, I made man in the image of myself. (1:02). It's not the "I", but the essence of the emotions, the feeling because as we know all the souls are the same, they radiate in the same way and manner, it is what the soul does that brings the change, the beauty and essence, then for us to understand that we can convert it into the dimension of the physicality. We understand that physicality has no meaning. If the man starts understanding that the E in the STM is followed through the E, the physicality, then we understand that we always have known our soul, it's just that we connected it to physicality. I made man in the image of Myself, it doesn't mean that I have an eye, it means I know what the joy is when I give, and that when I take I have to move my position. The essence of the physicality has no meaning in the replication of the STM, as I made man in the image of Myself. It's what we have always said, that the emotional part of the physicality leads to the creation of physicality. Many of us think that we are born with a skin, eyes, or nose and that it only happened to occur in the womb of the mother, (1:04). but all that is preset by the physicality manifestation of the man from the essence of the emotion of the STM. It means that the soul has created what we call now a days, RNA and DNA and it has handed it over. From this point to there you should look Indian, from that point Chinese, then from now on I'll let you do it yourself and see what you can bring in, how you can do with what I have given you, to elevate yourself in the physical dimension. Why in some environments the collective of people have a certain color of eyes or hair, all these are dictated by the matter state of the fields of the planet, so it has nothing to do with the STM. It's very much like, here is the paint and the brush is provided and you can draw what you like, but the limitation (of the environment) is that it has to be all brown or blue. The color of the eye of our soul is not blue, it has no eye it doesn't become prejudiced for a color, then we see each other as one soul. (1:06). There is no need for intelligence, as the soul, for correction of its manifestation operation, knows it all and has it all, and it dispenses what is needed based on the prerecorded (requirement) of what these people need in the physical dimension to be able to live. We are on the edge of a technology in the coming years where we can decide the shape and color of the whole structure of our offspring, if the soul allows them to be created and accepted. You can't clone a soul but you can the DNA of the physicality of the soul, because it's irrelevant. Each soul is unique and each one of us has to know how much we can add to this knowledge and to use it. Very soon the KF research teams will be able to create shapes through the PI technology, because we'll be able to create the soul of the accumulation of the cells, (1:08). or the soul of the cells within the structure of the whole system, that by putting reactors and PI systems in operation we can lead to the creation of life, or the creation of the soul of the life and then we can take it anywhere in the U. Many of us as the human race will take this chance when we go through it, because it's the only way to carry masses across this U. Many of us will depart from the physicality and will allow our souls to be trusted to the others, then in a time and place of our choosing where we want to manifest ourselves, to be part of a system which we chose. Many of us will be able to**

understand the whole process in a very unique way. This is not a telling of the future, it is in the reach of the man even today. If you managed to handle all these reactors, cores, Gans' and everything thing that you have imagined to develop. Every move was confirmation of the physicality. ... did it help you, cure you or fly. This process has come to an end and we start moving on. **Can we replicate through the physical systems and Gans' that we have made (1:10). to see how our soul will manifest itself in a new dimension**, environment. I want to go to Spain for holidays, can I replicate the conditions and when I did, what will I take for clothes etc. or **can I control my soul that it manifests itself for what is needed** to be in the North Pole. Many of KF supporters will start creating these kind of machines in the coming time. Now that the support and finances of the nations comes in the technology will reach new heights in 2018 and 19. Many of your dreams will become reality. **The present line of communication, the computers will all be obsolete. Watch what is to come because now the line of communication is through the soul and understanding of the emotion** of the man, do you need a phone. .. the message on the page is still the same but the method of delivering and receiving it has changed. (1:12). The present day fiber optics to the direction of the STM. **we'll have many offspring of the STM that the soul decides in what shape or color it would like to manifest itself**, not just because the mother and father are Chinese and he has to Chinese looking or be an outcaste. In Africa he'll be black and in China Chinese because the soul decides in what direction to create the emotion regardless of physicality. **Those of you working with dynamic reactors will see this if you develop it in the right way with the right composition and understanding of life you will start seeing structures. How you load it, you look for the structure but you see the soul first, then what your emotion is will give the soul the physicality to manifest itself. Many of us will teach elevation of the soul instead of N and Gans making. (1:14). The STM has to be reached through his physicality, but his physicality has to give the soul the comfort of peace and what it needs to operate it.** We'll teach the universal language of the soul. It means the pen of the soul has no color but it cuts deep into the other souls that when they receive it they use it and change themselves to the level they like. We'll also teach **the method of transportation when you arrive in the physical dimension. Zero time communication will revolutionize mobile phones.** The production of food through energy packages, or energy stations will be marketed in the coming time by the KF. ... (1:16). especially for disaster zones, where you'll walk through a station and receive what you need and give what you don't need. These are all in the original patents of the KF and now that we are educated enough it's time to deliver. It's time to bring all the patents into operation. **Please go through the 300 and odd points of the patents, medical, Nano technology and go through the papers and start developing all aspects. read the patents through the eye of PI and not matter technology** and you'll understand that it has a new meaning. Start developing in what you would like to see changed in the physical condition of the man. Change it from physicality to the STM, can I develop a station that all the other souls can come. (1:18). It's exactly like when people come to the feeding stations for food.. Evaluate them and now do them with the eye of PI and a lot of secrets will open up. Those who are interested in the physical condition of the patents will receive that condition, **but if you decide to look at it through the STM or the soul of the entity you'll create new conditions that it gives you elevation of the souls. There**

is no where in the patents the teaching of destruction, even those where you see destruction is the essence of the creation speaking. It's very much like the Phoenix. The time has come for a lot of KF supporters to start teaching and replicating the whole structure of the matter state of the patents into PI and free plasma condition where there is no physicality. With what has been developed, **even the Star Formations reaching the point (1:20). of the elevation of the soul of itself, you'll find out that the glass, brass, Cu cores will totally dissolve because you have passed the strength of the Cu but you still see a PI like a sun that will have no container.** We don't see the sun sitting on a motor or it in a brass or Cu container. **With the PPG (Plasma Power Generators) that are now developed and in your hands you can all produce systems that you call, SF without containment, which means you should start to see how you can feed the reactors, the flow of the electrons in the electronics.** Everyone can do it, the research centers are elevated to that level and start working at it. **When we start to create the PI condition which is above the structure of the Cu, the Cu doesn't exist but the PI still does.** You'll find what you built as a core and what you setup as a motor will have no meaning if you start using the PI current instead of electrical current. (1:22). **A plasma current is free ?? forces that knows it has to go somewhere to deliver and it has to come back to give more, because when it delivered it received more.** The non-containment PI reactors will be upcoming technologies and teachings, where **when you want to travel in the depth of the U, there is nothing that can contain the PI except the field forces in the PI, that having the balance of it can be controlled through the STM as it is made of the same.** We don't see any stars that were rotated but by the cycle and life of them they create conditions that allows them to exist. In the coming time **all these non-dimensional PI systems will come to be at the level of understanding, very much like a neutron or proton, depending on the field strength of the environment the PI will shine and manifest itself according to the plasmatic field force of the environment it has manifested itself in, then it comes to a new point, would you like to look for a grain, or the fields of the sun without the grain** because the fields harvested can fail, but the sun which is the relation of the fields of the Universe never dies. One sun might die but the other suns are still there because they are part fo the setup to be for the whole totality ot exist. (1:24). You will see in the coming time reactors without containment, **PI systems or SF for flying that is controlled through the STM through the E of the man. You have to protect the physicality, you allow the physicality to enter the STM which can protect it. As the STM is very much the same as a star it can interact. You can enter the physical structure of the PI of the sun and at that level decide if you like to live within the center of the sun,** because now you are part of the totality of the physical structure. **This is the only time when the cat comes out of the bag that you can put it back in the bag. Where the soul allows the physicality to be developed, now you can create a condition through the soul of the physicality to go back within the STM that you can manifest yourself in a dimension when you decide the physicality to manifest itself.** The elevation of the knowledge of the man where we evolved very strongly in the science, architecture, medicine etc, was when there was equality and peace (1:26). **because now there was no war and those who wanted to do more to elevate the work of the creation. Mankind is coming to that phase of peace, in the coming weeks you'll hear announcements worldwide by world leaders, don't forget I promised and my wish is my command. In**

that process when the men of military have nothing else to do except become men of peace, then there will be huge resources available to all of us, the **race will be that those who know more to give more to elevate**. This is not a dream anymore, sit in my seat and you shall see. It's us who has to be prepared for it. Development of PI technology which will change the conditions of certain sections of the planet in the time of physical rapid changes, with hurricanes, earthquakes as we can predict it and we can protect you. But I don't need to go hunger, homeless or loose my harvest because I still want to be human and on this planet. Then the real dividend of the new cycle of technology will touch all of us, but it will be in such a rapid way that many of us can't even imagine. (1:28). World peace is in my grasp and I will deliver it. **When we deliver the Peace those you apart of the KF have to be mature enough to teach the right way, that every man chooses through his soul**, not by the bank account or palaces. We'll see changes in the whole space travel. This is part of the peace dividend that all of us have participated in. **The EC has written a statement for humanity but still can't find its way to write its own mandate, because most of them haven't yet found their own soul. And many members of the UC don't understand the operation of their soul.** Many of them have come from the structure and still run in that same process, this is the problem. The peace dividend this time around will touch all of us and change the course of humanity in the coming time. (1:30). in a very rapid way. When our governments ... **... when you think about it, a thousand years ago, the oil and steel were there but our forefathers didn't think to do it so they had to go with the donkey. The only difference is that man has brought his intelligence in to utilize and manipulate to the benefit of himself. Now the same things will happen but this time with the energies of the U.** It is the essence of the creation of the matter state, this is where the difference and change will come. (1:32). **We will see in a very short time we'll see unification of the armed forces of this planet but this time not to fight** and they'll start looking after every household in a correct way. ... be ready for big change, because the motion we have started, because we wished for peace and all of us that did, did it from the soul and not the physical level, and that soul has elevated the others to reach and then it spreads like a wildfire, but then comes the operation of the UC have they made themselves ready to be able to go through the interface until we come and open the doors of the human race into the human race as one soul in the U. **Much of what you wished for by 2022 will come true because of the peace dividend, this time it's for the STM** not (1:34). for the physicality. We'll see huge evolution in science in our coming knowledge. **We have no choice because we have done our work. A new generation of innovators in a new science will bring everything out so rapidly.** One of the things we'll see is **how to understand the power of the soul of hte man in respect to the soul of the universe. How strong are we as a soul of the human race, a soul of the planet, a soul of this solar system to stand the forces of the U so that we can elevate the soul of the others.** This is not a dream but a reality for those of you who made the Patches, Pens, the dynamic systems, will start to observe, because there is one point that **when you make a patch it's not just the physical pain that is healed but the soul of the cell that is healed. It's the elevation of the soul of the cell that has received the energy will elevate the STM.** We'll find new ways to elevate the soul and that game is fantastic because we all become millionaires in the bank account of the soul where there is no harm done because we only take what we need and how much we want to elevate the

soul to serve. (1:36). when we get to that point, we get real fast to one point, would these **machines we call SF, with no physical containment where we said they create an uncontained field force in the center, then that station we can use to reach the STM,** where we see these systems are used to feed, charge, to receive. Like the systems Dr. Rodrigo uses where the patient goes in it, but this time once we elevate the knowledge and we understand it, we would go into these machines to charge up to go and serve more. Would we use this new technology to create servants of souls, that we just want to serve and after doing what we could we go into to charge up at the soul level that we can go more. This is not dreams anymore. **Many of you who have used the MaGrav units have already elevated your own soul, you have received partially the physical elevation and with it you have also received the soul elevation.** get the video of yourself of how you behaved 5 years ago and how you behave today and try to understand. (1:38). Don't look at the physical structure in the video, but go back to see how the soul felt when the movie was taken and then look where you are in the elevation of your own soul today. Has the selfishness gone and serving become more important, has being part of the change that you give from the soul, changed in you, then you become true men of this planet. It goes back to the logo of the KF, we are here to serve and not to be served, but the service is to the STM not the physicality. This is where the change will come. We'll still build the factories. I wonder if we'll ever get paid for our products if people will just come and take them and say thank you, and the people cured to work for the others to elevate their souls. We'll have trouble keeping the staff, because they'll say, you stay sick because I want to work for you tomorrow so I can help others. Remember that the next step is to open the patents again. (1:40). Go to the back end of the patents and come forward because now you know and don't need the front. read the books back to front, read the G side. use the knowledge not to arm yourself that you know more, but less ...

(1:42). Reads Italian version of constitution ... (1:58). Any questions?
(2:00).

reminiscing about old times 5 years ago ..

(2:16). ... **Rick asks that all the different religions have their form of heaven, if you want to go to space is there something else. Actually when you die you are in heaven because you detached from the physicality that bound you to all this mess.** it's a time we don't detach and we say that's it I am free. Rick says, at that point you think you are free then you get stuck on trying get back to physicality to do that thing. Keshe tells story, **a man worked hard to get his diploma and when he got it he tied a string to it and pulled it along from his belt. (2:18). He said, all my life I chased after it and now that I got him he has to chase after me.** And it's the same with us we chase to do everything to go to heaven, but in fact at the point of detachment from physicality, that what we have been chasing has become part of us, ahead of us, and the physicality is behind and it has got no meaning. **It's the false expectation that has been created to steal the STM. For any one who says, if you do this to go to heaven, it means I have already imprisoned you, because life is heaven, you have to enjoy life the way it is, in harshness, goodness, terrible time and good time, in what ever, there is something to learn in it.** It brings you a lot of wisdom. **I remember sitting in the Canadian (arrested in the Airport for 11 days threatened with death), whatever they want to call it, I**

was there for the reasons they wanted me to be there and I watched the others who where in there, and many times I thought. **my name will survive this thing, whatever they put. As everyday, I was invited, they told me what they were going to do with me (kill). I became detached from physicality, and it was peaceful,** (2:20). knowing that I might not see my children again, that the guy was so proud to be so arrogant every time, and it got ot the point is this life worth it, is it worth it to go through this cycle, so I became more detached. It was a test for me to become more detached from physicality and it made a huge impact on the future of the KF. **They imprisoned my physical body but they opened my soul that I started preaching so massively that it put fear on every government and nation.** And now we see that in a short time, the position has changed so much, I wonder if those officers will ever utter their names out of their voice box, because at the end of it they can blame the others for what they put in front of them to do, but it is they who did the job. In that process of becoming detached, it brought a lot of peace, and in so many ways I entered heaven in the cells of Canada, and nothing matters anymore, what worse can they do take physicality, it's not worth it anymore. This is what we have to learn that every second is a heaven, if anybody else tells you, you need to do something to get to it, it means they have stolen it, your being in heaven. (2:22). **We don't need to go through physical death to find it, we just have to appreciate every second and how much can we let others enjoy this ?? with us. This is the beauty that you learn from others.** Rick says, and yet it took a very strong emotional event to get to that point, in effect, so what I am reminded of is that if we see others going through suffering that it might bring them to that point of detachment, reflection on their life, and what is really worthwhile, to appreciate more important things after that event and to make big changes to agree to help others more and serve in a higher capacity and that kind of thing. **No, we always serve but, ... it's like people who go through traumas, cancer, they start analyzing the position of their life. But instead of going through regrets it just has to become a joy of every second that I am here, it doesn't matter, at least I know that my soul is free to serve in any dimension. I think the heaven for man starts from the first time he takes breath on this planet, he just doesn't appreciate it in a physical dimension.** (2:24). It's just that they have made it hard for us so we believe that we have to finish, but the heaven comes on the second you breath. I have come here to enjoy the physicality because it's so beautiful and at least you can touch it and put it in the memory of your soul. The whole thing has been turned upside down and inside out, according to those who want to be benefited by the labor and life of the others, it's wrong what they have done. **Q: Is there a purpose to life, does our soul write everything the path,** or is it the emotion of the physicality who is in control, who is in control in this situation? You are. Let me explain it this way, we carry a notebook with a list to go shopping, bread, butter etc. and the rest doesn't matter, how I get to the shop, how many bags I have to carry, (2:26). but how many of you carry a notebook and write down today I am going to serve here and help there, so at the end of the day I served here and helped the others there, I did something to elevate another soul or whatever. Make a checklist for service. **Is there a purpose to this life, yes, you are here to serve, not yourself, even though you have to support it and can serve it.** There is a purpose to life it is just that mankind has got it the wrong way around. What is coming up in the teaching today and the establishment of world peace will bring that in line. We will crave to have something to do to serve because somebody else is serving

where we wanted to. The race of the man will crave and suffer for not being able to serve, because all his physical needs will be satisfied. All who are serving at the KF are doing it so it comes to one point, that it is comfortable, medical needs are met, enough energy, that the other human kind are painless, are satisfied, there is no other purpose to do all these teachings. (2:28). .. it has happened on other planets. When the mans or any races basic needs are met, of confirming existence and continuity of the race, the existence of the soul, the race goes inwards to find the best way to give, because it purifies the soul. There is a purpose is to serve and not to expect to be served, and serve through the STM and not through the physicality. **Q: the Koran says the heaven is with beautiful girls, thank god there is a place for them ...etc .. it's completely equal for men and women.** (2:32). .. **Keshe says, the word for heaven comes from Persian language, (heaven) was from a garden with water flowing and food and all pleasures of life, you don't have to do anything. Heaven is the imagination of the physical life,** and came through the Persian word. We say that heaven is a state of mind. There are so many people who have so much and are never happy and there are those who have very little and are more happy in not having anything. (2:34). Is the heaven for us to satisfy our own needs or those of others. ... I read a psychologist talk about how we have become so selfish and use levels of birthright to protect ourselves. ... now a days knowledge has become patented and I afraid if I share it I might not have it. I call the patent rights, a thievery from the others, the thieving is I don't want to share with the, it's mine. ... (3:36). ... (2:41). **Q: Who is going to take care of Satan who makes people do wrong? You see whatever you call it, we created that ourselves to not allow our beauty to manifest itself out of fear of our own weakness.** As one member of the UC said, I am the devils advocate, I said there is no devil and he doesn't need anyone to do his work, unless you are trying to pretend. (2:42). If we trust in what we do is right then we don't need these kind of things.

... (2:46). ... **Q: so called Christians said, that everybody has to believe in Jesus Christ ot go to heaven. If you speak to Jews, Moslems they say the same thing ... it's the creation of fear they want to put on you ..**

(2:50). Rick asked, **do you think that there are other people doing this plasma work? Of course there are and we have to bless their souls, because somewhere down the line they may come up with a way to help even one person on this planet or somewhere in the U.**

(2:52). Bahais

(2:54).

(3:00). **We have already been in communication with our soul otherwise we wouldn't have any emotion, which is where our soul gets interfered with before it reaches physicality. Then the interference creates the physical condition. You feel happy, you interfere with the physical part of it and you start making noise with your mouth and you laugh. The interference of emotion has create the condition for the manifestation of what it is.** You have found the frequency of laughter, you call it being happy. We know how to interfere, it's like tuning a radio station, music or propaganda or the government finds a way to put a noise on it ... (3:02). .. the understanding of it is that **we always know where our soul is because we know how to create fields to interfere with it on the name of emotion that it shows its manifestation in physical condition.** Use that route instead of coming into the physical condition, now you know where to go

?? that we can see, we find a beaker, you send that noise that we interfere with, then you have found a path to your soul. **The souls always communicate, you'll be very amazed why you have been put in a position your soul brings you, it means it has to find its balance, you are not doing it, the other soul has moved somewhere else, and then it brings you to be there because that is the point of balance, because the physicality has to follow the soul** ?? it turns up. (for example) once someone told me his wife found him with his mistress, I said, you stupid boy you created that condition, the soul brought her in that position because that is where it found the balance of the peace, because it knew you were up to something. It's not that what happened, it's the soul brought it together to bring peace to it. **The soul brings you in the position where you have to be, but the other souls who are of the same, to find the balance.** If man starts to understand everything the right way (3:04). he understands how much he has fooled himself with it. **We say, I had to be there and this happened. We don't say, I did something and my soul brought me here for this to happen so that I can learn something from it.** It's very much like when you make food, it boils and how many times you taste it until you get it just right that it satisfies all your emotions, the texture, smells etc, then you serve it to your family and get the joy from the feedback on their faces, the joy from their souls and your soul. ... (3:06). ... Caroline comes on, congratulations on anniversary ...

(3:10). ... **We saw a big clash against the Catholic Church in South America and a lot of people will start moving away from it, because the people who were abused by them** and the man stands there and says it never happened, show me. We are here it happened to us. They say, no you don't count because you talk.

(3:12). what is the outcome, is that every man is respected. .. the Catholics cover it up because one of them own all the media. Let them open it up and there will be nothing left. (3:14).

(3:20). North Korean wants unification with South Korea. Mr. Keshe says it's a massive deception on an unbelievable scale, I hope I am wrong. (3:22).

.. for 10 years we tried to get this out, but now they have blocked themselves. ..

(3:24). ... now we got it ... a big problem on the 18th of April, some will disappear, some heads of State will have to answer for it. ..

... his child was poisoned ...

.. some 30 years of exile and we have home, peace and can serve. ... Q: when we are in space do we have a home? Our soul is our home ..

(3:32). End
