

## 211th Knowledge Seekers Workshop Feb 15 2018

(Questions this workshop, a lot about setting up factories, , )

(:11). This is the 2nd week for asking questions. Today is the beginning of the Chinese New Year. .. (:17). We have set up a management team across this planet, like a franchise. All our factories are becoming standardized. Pre-fabricated factories made in China. (:20). talks about setting up factories worldwide ..

... we have only developed 5 or 6 Gans, there are over 200 to develop. When we come to make the feeding stations for disaster areas, we can't just give the body CO2 and some ZnO2. We have to developing the feeding technology for disaster areas and for space where you can get from Ph, K, and everything the body needs. (:30). When you go into a feeding station you have to receive everything otherwise you'll have deficiencies in the body. We are in the process of developing them. They have to be developed by all of us, this is the only way we can make mankind independent of finances. 17

... talks about KF factories, Brazil, Mexico ...

(:52). Q: About how KF is going to setup management? We don't have a problem in that area. All the best managers don't come from the US.

.. our bottom line is not profitability it is peace, if you try to explain that to managers they walk away. We teach the managers in the KF way. Q: About where all the funds are coming from. We don't disclose ... we don't have people who have given 100 million to the KF, people who have very little contribute all they have to the KF. (:54). One thing for sure it doesn't come from the British government, no blood money or wealth stolen from the murder machine. the main thing is that you carry the ethos of the KF. We have to learn a new way. (:56). This is the only way to guarantee to look after those who need looking after not just financially but in other ways. 19

(1:04). The minimum age is 18 years below that not allowed, but if we have a genius in the world of PI at the age of 5,10 or 200 they should all be respected for knowledge, this is a big difference. A child should have time to be a child, and man should have time to mature his soul ... Q; What about teaching children about the Gans at a young age. We started teaching child and made it fun. ... (1:06). .. the KF is paying for 50 PhDs in the universities. the whole process of teaching has to change. (1:08).

(1:10). A lot of people complain that the KF is not responding. We respond to what needs to be responded to. .. (1:12). (1:20). Q: How to teach in Germany under their special system. .. there has been some problems in Germany ... 10 to 15 factories needed in Germany in next 10 years. (1:26). ... as you are hearing from the discussion, KF is multinational we have people from all over the world. ... we cover all the nations openly ... sharing freely is the key to our success. .. people are fighting to teach more this is the beauty ... this is very unusually. ... Are there any plans for Sweden, not at the moment .. a factory costs about 20 million dollars .. the base manufacturing is in Italy

..

.. if anybody becomes a competition we'll reach out to collaborate ... (1:40). Everything we develop is for space development the other things are byproducts. We hope to take man to space in 2018.

(1:42). Q: There are 2 souls, one in the vacuum space behind the heart, could he speak about this? Not really, we have clearly defined the position of the soul, we leave those who like to interpret for themselves one way, it's good. Thank you Mr. Keshe. (1:44). In the past few days we tried to explain the position of the soul, we touched on, how the incoming egg and the sperm lead to the dynamic division of the cells, and then they

create so many cells when they come together, and together they create a central point of the central control that all of them can communicate and be with, which we call, creates, becomes the STM, then this soul communicates with all the organs in the same way and dimension. It's the micro(cosmic) in the Macro, I explained that this is the same as what we see in the school of fish, or in a flock of birds, this should give you a very good visualization of it. In the ocean when we see millions of fish come together and they all rotate in the same direction or they move in the same kind of circle, and we always think how do they know when they all turn in one direction .... how does it work. (1:46). it's done in the same way as what is done in the sperm and egg, they make this combination of field forces. These animals create what we call a central soul in the dimension, and they don't need to communicate, because that is the central energy they create, it transfers the energy right across through them, so they all put the bits of themselves in and the totality see what it needs to be done. For example, where the danger comes from, how they have to ?? , and this is very much the same with the operation of the brain in respect to the emotion and the STM. There is no better way to explain it. Then you see everything responds together, all the birds move together, or the animals suddenly take the same direction together. You press one place the rest move. In the liquid of the planet, what we call the waters, we have the condition of the Gans state and then the animals this way create their own central, what we call soul dimension, which they all connect to and they all receive from. There is nobody shouting, go this way, then that, it's not an army. If the men of science understand this then they can localize it, it becomes very handy, in the space dimension, when we travel with a huge number of spaceships or souls in the depth of the space, where this thing becomes zero communication, where we put from the strength of the soul, (1:48). which is the emotion of the trust in everything responds back to. The process of where the soul is, a soul can be created anywhere where the collective strength of understanding of the feeling of the emotion come together. It happens in the division of the cells in the womb of the mother, flock of birds, school of a few million fish, it doesn't matter whether a few hundred of millions. This is the beauty of understanding the totality of the work. If we understand and develop this knowledge then it becomes very easy to control flight systems, the whole structure within microseconds of the decision to go left or right or the whole flock decides to suddenly turn backwards. Collective numbers or what I call souls, irrespective of being the heart of the man, the brain, school of fish, a bunch of spaceships who understand the process of interaction, creates a zero time response through the dimension of the STM. Those of you in the space technology and are looking for zero time communication you should have learned a lot from these past few sentences. (1:50). Don't create a fiberglass 06 .

(2:05). Do you need someone else to love? Rick can we confirm love ourselves. ... how many of us on these planet are aware of Valentines Day? very few. (2:10). We have created this Day for us to confirm to ourselves that we are loved. That is all it is. We want to confirm that we are loved,... it doesn't matter what games we play with it. It only applies to the Western world. It comes to what does it give, make us to be that we need someone to love, that through that love they confirm our existence. There are different ways to look at it, in the end it's giving by emotion and not by physicality, we buy flowers, whatever the commercial world has told us to fit into the image of being loved. A woman told me I buy myself something because I love myself, I don't have to pay for the rest of my life for loving someone. (2:12). As we say love is giving and we would like to have a confirmation that someone accepts what we are giving, that our effort is not wasted it's a confirmation for us of the work we have done. Today's

questions are very different then last week. Q: Zero time communication in space is instant, why does it take 6 minutes for the sun's rays to reach here? That is a matter state conversion. (2:14). not the actual totality of it. I explained in the book, in a very simple way, the ray of light, what reduces in the strength, from the sun to the earth, 8 minutes. But in fact the higher strength rays, the second they reach the surface they have passed through the galaxies and universes, according to the strength they have. The brightness of the light we see on the surface of the sun, it's interacting with the earth's atmosphere, we see it. We would not know that the sun existed, we see the star, the interaction of its light, which is at the strength of our position of observation, in the liquid of the eye we recognize the star, otherwise we would not see it, but the interaction of the fields of the central MG field with the matter state of the sun itself creates the surface light. This is the light that takes 8 minutes because it comes to the matter state to get to us. No scientists have ever measured the rest of the lights, energies which comes from the sun. It's instantaneous (2:16). The strength of the soul of the sun passes through this planet the minute it is created in the center of the sun. It's the same, the soul of physicality or the soul of the existence or what we call the STM. It's what the scientists call neutrinos they try to create a condition upon the water or kilometers under the ground that when it slows down enough by the mountain stones and when it hits here we can detect it as a photon. But if you look at the stupidity of the world of science, some of these neutrinos slow down in the liquid of the eye, we don't need to go all the way to the bottom of the earth ... Because we don't have a filter that reduces all the fields that come from the sun so that it becomes observable to us. At the matter strength we can measure it at 8 minutes. We don't have the tools to measure the fields of higher strength ... it's not even the color, size shape.. What I see as a sun the man from planet Zeus doesn't see as a sun, he sees at the point of his ?? absorption, observation strength (2:18). The space scientists have achieved the speed of sub light space travel. They showed me the flight system. They said we have a problem we can't go over the speed of light, can you solve it for us. When I saw their flight system, they have traveled?? in the first second the flight takes place. The craft has been built in a special shape that, the problem you have and don't see, you are using matter state, if you develop the technology we use at the KF which we create the structure of the matter through the strength of the PI then you can pass the speed of light. The barrier is the physicality of the entity. It's like trying to get a bullet through the bullet proof glass. These world scientists have reached the speed of sub light they can travel beyond then they appear (2:20). and create mayhem in places, but it's fun. I have seen their structures and whatever. Now they have understood that the knowledge has to be re-studied. Einstein created the problem that the speed of light is the ultimate speed, yes it is, but only in the matter state. We can produce any aircraft and fly up to the speed of light more or less. It depends what material we use because different strength materials have different speeds of light. Whereas with the PI you become a chameleon and fit into everything, then you can go with multiple strengths of speeds of light in the matter state on this planet, because the speed of light on planet Zeus is totally different it could be millions of times faster then the speed of light here. So when we say it takes 8 minutes for the sun's light to reach earth, we are talking about in the plasma physics ?? they say light has 2 characteristics and we don't understand, sometimes it behaves as a photon and sometimes as a particle. But what they don't understand is what strength is the light traveling at. Now we can answer these questions because we understand that the speed of light is only to us on the matter level the maximum speed, or the freedom of the speed plasma can fly or travel in matter state, then we call it the speed of light. (2:22). ?? above or below. Q: Can you explain about floating souls ...? The soul of liquid life takes into consideration the field strength of the

liquid and then the field strength of the containment of the liquid. The liquid is always contained, the same as a gas, but when you submerge or are an animal of that dimension you have 3 forces of fields interacting in the matter state (2:24). or in the field plasma state of the matter. This means that this is the soul of you as a creature, as a man walking in the air, our containment in the plasmatic pressure of the atmosphere, more or less freedom of the space. In the liquid state now you have the MG plasmatic field of the liquid, then the liquid itself is contained within the structure of another MG field, it's like if you put a fish in a bucket of water and then if you see it, the fish has a soul which is in there then you have the condition of the liquid, then the condition of the ?? container, it has to adjust to accept the 2 plus the container is conditioned in the condition of the MG field of the planet. the fish always have control of the central gravity in respect to the liquid, environmental MG field strength that then we adjust our soul to fit that, the fish partially accept the condition of the physicality as part of the limitation to his existence in accepting transformation of the information the soul to its physicality. It like what I said with dinosaurs and coming down, if you look we still carry some of the animals from the dinosaur time in the seas. (2:26). they are still there but none exist in the air condition because in the condition of the liquid there is a containment that has hardly changed at all, very little, this is why we see huge animals in the ocean. ?? which we can't sustain in the water, they go back in the history, look at crocodiles and the rest. Because it's a condition confinement, then confinement of the liquid, it's a double layer ?? system where we only accept the physicality, this is why most of us can't live in 2 dimensions, be at sea and the air, because we need to understand the containment of the 2nd layer which is the MG field of the earth itself and the liquid. If we adapt we'll survive and in time we will survive because now we are learning a new way. Part of the teaching and books I explained double layering of the ?? fields, you can allow part of your soul to be internal to another, now you can live in 2 dimensions of the fields of the universe. It allows you to live in both the gaseous and liquid states, then if you understand how to live with the dimension of the fields of the soul it allows you to live in the physical dimension in the strength of the STM also. (2:28).

(2:33). Q: Hoops on the surface of the sun? That is from the interaction of the fields on the surface of the sun. the sun's surface it has 2 or 3 dimensional field flows, 1 is coming from MG field of itself, 1 from the strength of the fields that have reduced enough that they have become matter state at the strength of the fields of the MG field of the sun, now they interact back with the fields (2:34). that are coming through and this interaction of the matter state conversion with the strength of the field that are coming, which again acts as a friction (like I said, with the voice which is friction between the STM and soul of physicality) to the creation of the light of the surface. But some of these because of its dynamism and rotation create these features, the blackness of the surface of the sun, read the papers it's in the books I have explained this very clearly how we get black spots on the surface of the sun. they come from when the charges go , and trying to reverse the cycle, as it goes through its 360 degrees like its heartbeat, every 23 years it does a full cycle, ?? half cycle of it, change of M fields, The matter PI state is going to get balanced then the field matter strength of the PI center comes out and they create the charges and then when it gets to the saturation point at about 11.5 years, it creates a reverse rotation. This is why we created half sphere reactors to stop this rotation, the cycle of the reversal of the polarity. With circular reactors we always had this problem and we had to devise a new system. It took

millions of years to understand this in some races, to be able to do it because there were so many loses. Because we always looked at all the universes and galaxies, everything was circular, but cutting it in half, taking out the ability of saturation of ... like a heartbeat of the PI lead to the creation of the present half circles spaceships. (3:36). If you look in the universe you still see some spherical flight (SS) this shows primitive knowledge of primitive people who have just managed to fly, then you see the SS which is half circle flat, which ?? stops the rotation of the fields. The black spots on the sun is the same when the fields come in balance you don't create any lights, and this shows the time of balance of the fields which creates no interaction, therefore no lights, then you see spots on the sun. Q: when the STM creates a SS why is it not half spherical? because ?? it's the original. ... (2:38). the new half sphere is from the development of the understanding of the PI, not to allow it to flip over. If you look at it we create the condition of half sphere through operation of full spheres, the 4 reactors are full sphere shape. .. now you can position reactors in a certain place that you can bend the fields inward and can make it half circle, and in that position the field forces can't flip back you take the heartbeat out of the system. Q; could you use a N coated sheet to cut it in half would that absorb it? You can't cut it in half, but you can suppress it to the shape you want, if you look at the 3 base reactors are suppression of the fields for them to go further down. If you move them all the way equal from the top, from the center, you can position them next to each other, you get back the spherical shape. The half sphere has a lot of advantages, first of all it allows you to travel much faster because the M flow friction is much lower (2:40). It allows the containment in the physical dimension of the PI, it stops the reversal of the heartbeat of the PI because you siphon it, you literally turn it back to itself. It has the advantage to allow a spectrum of the souls to be traveling in it. ?? you usually have mono M fields, when you have half sphere, it's like the 5 degree angle we have on the sun it gives us many different variations, these 3 base reactors coming up between forces, shape, allows the transportation of multi-races. And those men growing to become part of the UC can get a chance to enter these environments they see different creatures of different dimensions, because that change of shape in position, allows multi-dimensional beings. When the man becomes wise and chooses the path of peace and when the UC opens up the knowledge to man to rapidly grow into it, when you enter these SS you'll see the marvels of God, the creatures within them are beyond imagination. Their beauty, the way they exist and the whole UC is as one (2:42). because they work through the soul, there are no languages. Q: How to help someone out of depression? It's very much attention deficiency, "I need attention". 56

(2:50). Stella Argentina, long talk about her problems ...

(Klaus fell for her victim hood, Keshe stopped it)

(2:57). Can I stop there, such a discussion please do it outside. Keshe replies, because resonance doesn't exist within the STM. What is important for us to understand, we try to solve our problems in way that we see a solution for it and in a way that is something not much help. it needs a lot of understanding of ourselves and our position. Many of us move into these emotional conditions and the others, through the cycle of life we live, and the energies and the souls we have received in interaction. Those of us who look for an answer outside, we need to look for it inside (2:58). how this position has developed and with understanding it we can move out of it. Sometimes it seems impossible because we don't see the way, but sometimes when we elevate our own soul we can do it and it is part of these teachings and we are trying to understand more and to teach more, is how we can elevate our own soul through our physicality that in return our soul

moves the dimension which is a point of pain for us, don't forget that the physical part of our entity lead to the creation of our soul, that the creation of our soul lead to creation of the physical dimension as we are. We have to understand (how) to use this process, not by somebody coming and telling, I'll teach you resonance or something else, which puts us back in the same position as before. Finding the level of the understanding, I put it the right or maybe wrong way, finding the contribution towards our physical dimension towards our soul and then understanding that in return our soul looks at the physicality, it is the only way of survival in the U. There is no other way, because there is no pharmaceutical or a man with a resonance machine to teach you what to do. You have to learn to love your soul and that in loving and nourishing it, you learn that you nourish your physicality through the dimension of the soul. Anything else sits on the dimension of abuse., because now you give it to somebody else to abuse, and then when it's not there you find another way to abuse yourself. We are teaching, approaching , learning (3:00). how to survive in the space, even though we are explaining it in the matter state. In the normal condition people develop the space technology and then whatever comes out of it becomes the byproduct, in this cycle we are doing so much to change man, that the byproducts are released before the man has full understanding of how to use the spaceship, even though the ?? knowledge is there. In the space there are no systems, unless understanding the process of ones soul and in the dimension of the physicality of itself. Yesterday there was something about love thy neighbor as it was in the Commandments. The closest neighbor to you is your soul, ?? reason for you next door neighbor, whatever ... The closet neighbor to your soul is the soul of your physicality and you have to love it and give from it to elevate, it is the only way. We have always said this, what we call love it means giving . . . we have misinterpreted all the writings that came to us because it suited us. When you love your neighbor, which is your soul, you give to it, what do you do when you are in love (3:02). with somebody. A lover in the language of the soul is a giver, you give from it. Why don't you learn to give from your physical soul, you can add to it because we consume things throughout physicality to increase the level of your soul and then through it the soul will increase the level of the soul of physicality in the physical dimension, and then the filter of depression is still there but now it doesn't fit in, it moves out. It's nothing but a skin anymore. Learn how to survive, to be the last man standing and there are no resonance machines anywhere in the U, I haven't seen one. I teach you to survive in the space, not to sell systems to man to suit somebody. Even though the whole thing is to start gathering people to understand more and more when they use the systems. To elevate the STM from the pain makes the man wise to see more. Try to understand, you are the last woman standing in Argentina, in the space, what are you going to do, you have the dimension of physicality to take from or the dimension of the soul to take from the universal to elevate the physicality its pain, that's all you need. (3:04). Q: I quit smoking 3 weeks ago, that what you are talking about makes me shake with fear and anxiety, the need to go to something ... Can I say something, I am not a doctor but I analyze the words spoken which is the easiest way, you have repeated 3 - 4 times the fear, what is the fear, why do we use this word. You can put it another way, this is my strength or limit. There is a fear when you can loose, there should be no fear when you can gain and you know your limitation. This fear is created in different ways in us to control us, and we have become master of ourselves to control ourselves for our own pain. Why do you call it a fear, this is the level I am. .. Isn't it the fear of success, of recognition. (3:06). yes. so why have the fear you have already recognized it with your own dimension of physicality, what are you afraid of? Q: I don't know it's like subconscious like a program, I don't know where it comes from. Can I ask you. We go

back to the origin of life, you are the first Eve and there is one Adam and he has gone away, do you go through depression until he comes back. Or is life worth existing until he comes back. And whatever I have is there for me to survive and enjoy. If you were the first woman on this planet would the word fear exist. I don't think so. Fear has been put in us over time and we are nourishing it, and it has been a way for us to control ourselves. One of the biggest fears for man is to do something wrong that it might end him up here or there. I have no fear and most of the people who follow the KF are of that school of thought. When you are afraid it is the time that they control you. Even you control your own soul that it stops you giving, otherwise ?? of yourself. I had no fear when I sat next to a king who threatened my life. What we see now in the courts is because I did not have a fear, unfortunately what was planned was not seen (3:08). there was somebody else who took pictures, they were so calculating that they thought nobody will see, we'll get him in a corner in a cafe in the middle of nowhere, we'll pressurize him and he'll squeak, but I already squeaked, I gave all my technology to humanity. I teach freely. Then incidentally somebody in the cafe took some pictures, because they never thought that they would be caught. ... they are trying to cover up, otherwise I have no fear. I can't lose what I have already given. Even a king can't shake me. out of their fear they set everything up. they didn't calculate a nosy calculating woman who took pictures and handed it over. When we released the pictures we got the cases. Man should have no fear when he is correct, nor even from his physicality. No king can move you, because the rule of the Creator is above anyone who calls himself a king. Thy shall not steal. When you steal from yourself you create fear, and then they create punishment, confession boxes (3:10). and the rest of it. When you start to create conditions of fear it means you can't give to your soul. Give to your soul and then you receive more back because then it collects. If you can't do it through the physical dimension then do it through the emotions, because then you'll receive more internally in your brain then you receive physically by your body. 26

(3:24).

End
