

212th Knowledge Seekers Workshop Feb 22 2018

(Internet connection problem, , ,)

(:04). People are using KF name to attract people and teaching their own things, we will shut you down. If you have your own ideas we are open, but not playing resonance games or machines you pick up somewhere and just start selling it. (:06).

(:10). (:20). photos of Mr. Keshe. ... there is a lot of interest since we started teaching about the soul and people have started testing their own strength and potential and what has been taught is within them, (:25). and they can reach it. Some are endeavoring to go further in understanding their own physicality and soul and the way they are structured. Some of you will start seeing the interaction of the fields of your body with the others, and start controlling the dimension of your own physicality. You can control a lot of things with these teachings. There is a demand for redefining a lot of things in the world of physics (:26). ... so that the knowledge that has brought us to this point can be put the correct way. A problem a lot of people have with PI is that you can't control it nor understand the operation of it. .. the fallacies are so deep rooted that it is hard to change. We explained like a school of fish, that when a number of cells come together they produce a STM, and for the first time we understand when a flock of birds or school of fish, they come to the same point, it's not their physicality anymore, it's a combination of their souls that creates a new dimension which ??then becomes the center for the rest of the flock or school to respond to, they don't need to talk to anything, it's instantaneous, the field is felt by one fish, let's say that there is a whale around, then it transmits directly to the center and everybody else feels it. This is how it works, if you understood this and understand how your soul works (:28). then you can see the emotion of one or any point, like in the physical interaction in the rest of the group, something we have missed and have to look into, is the next step to it. Look how human beings are, intelligence, diversion has been created. In fish we call it a school, or flock of birds, in the human race we call it a city, village or town, it's the same process. When we bring so many souls together in confined spaces as in a city, we do the same as what a school of fish do. This is why we see evolution and development in response to in different ways. Now we can understand more why each city or town has a specific characteristic, because now they are the same as a flock of birds, one emotion and behavior reflects in the soul, just because we live in different rooms or houses or maybe 10 streets away it doesn't make any difference we have created that mother soul. The mother soul of the city then reflects on the behavior of totality. Now we understand more in the psychology of the man. This is important for us because when we go into deep space we become a soul part of a bigger block from different dimensions of the U, different races of the created of the Creator. Then what happens to our total soul, we become part of it (:30).

(:40).

extension of (:48). our existence ?? is the limitation of the universe. It's us who has to decide where we want to be in connection with our emotion. Then we don't need to say hello or shake hands, or be in any position if we want to, to feel another soul, and then through that soul find the response of physicality. It will become harder and harder for man to lie. The more we teach the more you understand, because then you feel the STM or the soul of the creature and this is how the PI technology in understanding of separation from the matter works and we have to understand it. This will change a lot for us if the world decides to go in that direction, of the soul, if you point at the thing

with your physical finger, you don't need to touch it, you can feel its emotion. By looking at someone you can see in their eyes ??body, nothing, but we see the soul. The soul says, I am sending this, but ?? Chinese whisperer there and there are a lot of lies in what I said. How to feed our soul. The secret of existence in the U is how do we manage to feed our soul (:50). that our soul can feed our physicality that guarantees the continuation of existence. the main point in the structure how to feed goes back to the Commandments which were given to Moses. Thy shall not lie. What does this mean in the Pl dimension, that you can't give while you are taking. There is a difference between stealing and lying. In stealing you take and go, but in lying you pretend to give but you are actually taking. The souls sees. The interaction of the soul is like what we do in the car driving everyday, we have a white light in the front that shows the direction of motion coming to us, we use the red light in the back known as a red ?? shift, that the car is moving away, we can't see if the soul is receiving or taking, only in the white or red zone. because when he says he takes but he actually gives, he's actually taking from us, we feel it. Why am I getting weak in that direction, where are all the fields I am giving, they're ending up ?? the one who is supposed to give ... those who start understanding the work of the Pl in universal communication, they'll understand that there is nothing to hide. (:52). ?? they can keep on lying, and those of you who become more and more expert in it you see it. ..

(:56). ... when you create a religion you have to lie, because that is the essence of it.

(:58).

(1:00). Then you can share from dimension to dimension, you can change position, you can change from physicality to the dimension of soul. To come to the dimension of physicality of the man is very hard, it's extremely an unpleasant experience. But when you are given a job to do, you come ot an agreement between the soul and the physicality soul to manifest yourself in the dimension of man, you take it because you know you are safe, somewhere down the line you know there is a pattern for your work, that you are there to serve, to elevate the soul, to bring the change to the others in the dimension of physicality. Many of you who manage to reach that point, as I said, the earth is the nursery of the diversity of the fields of the existence, then in time you become the prophets in different dimensions and positions in the U. Then if you get it right and get the message, you are like the fish on the end that gets the message to give to the center that a change is needed here, there is something happening, then you respond accordingly that it keeps everyone safe, then you work within the realm of the UC, then when you are guided to teach then you teach the correct way. You don't teach the lying or stealing way, because it's not ingrained or part of the soul which you accepted to teach, even though you manifest yourself in that dimension of physicality. Those of you who want to transfer from one position to another (1:02).

(1:10)

(1:14). Vegetarian ..

(1:17). Any Questions. dropped out.. (1:22). people start talking about killing vegetables that each grain is a soul. ... Nicholas talks about becoming apart of the plants .. we have become numb to the pain of the plant souls ... (1:33). ... what's the use of trying to cover it up when the truth sits in a totally different position, if we start looking at the truth ourselves then we can inspire others to start looking at the path of truth, and not to ofol ourselves that we try to make it better then the reality that is there. (1:35). Mr. Keshe in response to taking vegetables to the market and looking after them,

and why do we feel this way or the other, it's not to promote vegetarianism or to be a meat eater, it's just being honest with ourselves, it's not to attack or to say that you are worst murderers than others, no. It's about understanding the reality, then it's for us to judge our condition and position, and maybe those who are vegetarians become faster PL consumers. Maybe there is another point that it is harsh to understand, but the fact is very simple. (1:36). When you bite your child or friend as for fun or to try and hurt, it's a different kind of biting. ... but they are still all bites, we have justified them in different ways, but the still all hurt the same. In the same way in this, it's not to find out who's killing more, we have to find a way to survive, it's not finding a justification, it's finding a way how to survive. ... if I walk into a place where everybody is biting and shouting then I become deaf to it, I create a threshold that I don't hear anymore. it's like you are talking to your lover in a noisy airport, you blackout all the noise to hear your lover, (1:38). because we have created a threshold for what we are concerned with, the lover on the other end .. the rest we are deaf to. So it is with the way that we eat, it's not that we don't hear the soul of the cow or the grain, we have made a threshold and we don't want to hear it because we know we need it to survive, but it doesn't justify the job. It's because we don't hear. If you cross the light and hit somebody, you say I didn't see the red light. It doesn't matter you made the accident. It's not justifying, but understanding the totality and what we do. Maybe this explanation causes us to move faster away from consuming, killing another, or lying ?? you got to give it to me so I can survive. Why do we offer ourselves as a lover because we want to give. We don't care if you love back or not because we want to love. We want to confirm our existence, like with valentines now we can give. It's understanding reality and not trying to take a position, because once we do that we are blind to the facts and the truth. Justifying it and understanding it are different, There is no justification (1:40). for termination of a life, it doesn't matter how we do it. But as a human and other animals on this planet, we have found a justification, I have to eat to survive. Now we have the copycats with the Gans water, they say, now I don't kill anymore. Another fallacy on top of the other one, a justification of the same. Just because we have made a threshold in our brain, ears, soul that we don't want to hear the shouting and hallowing of who we bite, doesn't mean we haven't bitten. Being open to the understanding of it, is being open to what is next. Maybe that's why I said vegetarians will sooner take up the PL, maybe that elevation of the soul needs more and it receives more faster. I know the answer. I prefer to stay silent. We are not here to blame or separate, but to understand the reality, the totality. If you are so concerned that, I am not killing an animal, and then if you accept that the vertical people are the same as the horizontal people, then where is your justification. Somewhere there is misleading of ones soul or playing with the color of truth. (1:42). That's why I said in this time there are no prophets. 08

.. because you have to consume energy to protect that lie. (1:46). When you consume energy you give from your life, you age, you have to always cover up. When you understand this the life and soul changes. We have deafened ourselves to the truth and then we try to justify it, because the reality is there, we can't .. if we can't discuss these things like this, now that we understand part of the truth out of the total reality until the other part opens up to us ... do you know when it's going to open up to you, when you open your ears, when you take that barrier of deafness away and you hear the voice of the soul of the grain, the voice and emotion of the dead cow, then you'll become alert. We are not preachers but a scientific organization and we have to understand scientifically what we are doing. Just because we close our eyes to it doesn't mean it doesn't exist. And just because everybody else does it, doesn't mean you have to do it. Just because everybody is a murderer you don't become a murderer. Then we don't need

to justify it. If I don't do it I die, I am a beautiful guy I put the seed there so it grows. So does the bird, it eats the seed, goes somewhere and shits it out and it becomes a new plant. (1:48). This is what we have to understand, no justification and being honest in understanding in the whole process. Because if you understand this and you're in the space then you become the judge of your own behavior and not doing things out of fear. The whole part of these teachings is to take what has been put in the STM out of fear and punishment, out of the equation, then you'll think logically and take a logical procedure anywhere in the U, you won't look at something and say, oh it's beautiful can I eat it, but if you think if I eat it will I die, this is out of the fear, or if I eat it will it eat me this is also out of the fear. Whereas if you think, I don't eat I just enjoy the beauty. Someone wrote to me i met the most beautiful woman in the world. I said to myself, she makes a beautiful presentation of humanity, KF face because it shows the beauty of the creation that we all can enjoy the Creator, but the essence is, is the beauty skin deep, we don't know the person, we passed them on the street, then do we hear the shouting inside. You want to understand the work of the U, do not judge and don't allow anybody to judge (1:50). (1:54).

(2:00). It sits in our RNA, DNA, we still look at it as delicious to have, can we taste it, then something rings a bell, I am not that anymore, I have evolved, but it's still there, whatever experiences from the first man is in our RNA. Do you think you are going to get rid of it, rather being able to control it, on top of it, is much harder then actually getting involved in it. Then if you eat something that is a virus, you're done for. Most of the teaching is for you to be able to survive the environment of the U. If you want to go somewhere where the women and men are so beautiful but are afraid to go there in case you do something wrong, or you can go there just to enjoy the beauty of it, it's the same position, and being aware of it that weakness doesn't come because that could be your demise. That will be the time your soul of physicality can't operate outside the parameters of the soul, because now it's in position, not you as a soul of physicality. You are allowed to fall in love as many times as you like in the depths of the U with the beauty of the U (2:02). but you can't destroy it. Just because we opened the park and it has taken so long to beautifully arrange it, you can't go in like a bull in a china shop, we try to stop the bull before we open the door of the china shop. We are trying to civilize man to the way of the universe. In the U civilization is not like here where you just learn how to use a fork or drive, Africans without the fork and knife are more civilized in so many ways. Civilized means that this is my limit and I don't need it enforced on me, this is the difference between KF and men of religion, which is life by fear, if you do this you get punished. Fear should be out of harming and not being punished. This is the language of the U. .. it takes time we are going through a transition, we were not aware of, now we are aware of and you can't justify. (2:04).
