

## 229th Knowledge Seekers Workshop - Thursday, June 21, 2018

(Discussion about love, The workings of the universe is so simple, Through our emotion, feeling and understanding we can change and influence things, Example how 1 fish causes the soul of the whole school to turn, The Keshe Foundation has become that fish to bring peace to humanity, It's that wish to understand more about the knowledge of the universe that it is triggering the release of the knowledge to mankind, Our wish for peace is taking shape with the summit of America and North Korea, Syria is the last war, Now that we understand that the soul of the man is within us and is us and gradually we are becoming peaceful then the Universal Community will come to us, More teachings on light, Any one light shines on everyone else that is of the same strength and can absorb it and the souls communicate through the light and it has a strength that anyone clear enough in respect to that position can read it, When we speak about the light it's the light of the existence, of the knowledge, of information. Where does the man go now that he has understood that he has the power to dictate and influence and access to the emotion of the humanity, The Keshe F is on the verge of space flight and we'll need to communicate with our souls to the soul of the spaceship, The spaceship will not accept lies anymore so we have to be honest and transparent, We don't believe the Americans ever went to the moon they have to explain the discrepancies, Challenge to KF to reach the moon and see if there are any flags, The light has a structure and carries information, If you understand how the body is made then you'll understand how the physicality of the spaceship is made, The sun doesn't have any physicality as such, The sun has a heartbeat therefore a soul and feels emotion towards its children as does the galaxy and the center line of the universe, In space we have to learn how to communicate with the soul, Detailed explanation of what love is in terms of plasma and how it is formed at the outer boundary of the brain and why it has a physical dimension, When you receive the love back you understand your own soul, Sometimes the love gets stuck in the middle and doesn't reach the soul, In the space you have to understand this because another entity can absorb you as MG fields unless you have awareness of your soul, In time the physicality of the brain won't be needed and it will be free to move in the universe, Bone structure is common in the universe, Explains the difference between love for a child and a lover and that he still falls madly in love with Caroline after 30 years, Plants and trees take from their environment but also give to it there are chemical changes around the roots it is always both ways, The electricity in your home requires give and take to create a current, When the love dies with the husband don't blame him for the blockage have you taken out what he doesn't need to create a current of love, We haven't learned to distribute our love equally among our children, If the father falls in love with the daughter she becomes a mistress to the mother he has to confirm equal love with the soul, In the space we have to understand the different forms of love when we encounter other entities, Now a days it is fashionable to say I love you, Rebound love is a disaster, Why we emphasize on love because it is how the universe works we give what we don't need and link up with others who are of the same, They give that we can receive and in turn they can take what we don't need, but is that love or is that the dimension that I want to be connected and that connection allows me to exist, Why he's backing the Chinese for world peace, Obama's shameful letter justifying killing, We need to see ourselves in the structure as our soul counts and we can change the whole through our soul, Discusses the Belgium court case and the end of the Monarch, We need people who can communicate with their emotion and soul to the soul of the spaceship, Love is M the outer boundary of the physicality, I call the love that comes purely and reaches the inner sanctum of the soul

of the man, the love of the Creator, because every other love has a strength and somewhere in the brain of the man it gets stuck, in the future I will explain what I call the eddy current, the return of the field, then man will click on it in no time to understand how much he can change the existence, UOF over Jerusalem with 3 color is H H2 H3 in high speed rotation, He makes Hydrogen Gans by putting H3 in 3 reactors and rotating them they become the 3 Gans's but will revert back when they stop rotating, , )

(:06). ...We see a lot of achievement, **a lot of things are changing, is it by our thoughts and understandings that we can influence situations and conditions.** It's very interesting to understand more and more how things are happening (:08). **Not long ago when we spoke of gravity which was the biggest mystery in the science of the man, now more of you understand how it is made and can make machines and systems that can replicate it.** It has become a knowledge in such a way that it is so simple. **The reality of it is the knowledge of the U is so simple and understanding the workings of the U is one of the simplest things the man can do, but because he has understood everything at the level of matter state he has created himself a lot of confusion because he has taken only 1 state of the transmutation and transformation of the fields the U and to him that is everything. Now we learn that through our emotion, our feeling and understanding we can change and influence things. The way we feel our emotions and we cry or love, and the way we decide who and how to love.** Sometimes we decide how our emotion creates anger and how we react to it. When we feel peaceful we find it within ourselves and lives. Now we have to learn something extra. Some time ago we talked **about the soul of the school of fish in the ocean decides if one feels something on one side the whole (school) millions of fish turn.** (:10). The same with the birds flying when one turns the whole thousands of them turn together. In the teachings at that time **we could explain, that was a common soul, but now man has to learn the next step and that is the way you felt love. The way when you love somebody you want to cuddle and kiss them, the way you feel when you want to give a hug, the way you understood your E creates physical reactions.** The way when you get angry the anguish creates different physical dimension. Now we have to understand one thing, **maybe for the first time, we have become part of the E of the human race. The way you felt love and created the E of love and it happened. Now collectively the man has created that E of the school of the fish that they all react together** and the one reflects the feeling amongst the whole millions of the school of fish in the ocean, now the human race has become that school of fish, 7 billion of them in the ocean field of this atmosphere. **And us at KF and members of the world that likes peace and unity has become that single fish in the corner and when he felt love everybody came and ofund ofod. Now we wish peace and everything has started. This is what we have to understand, how we have to realize the power of us, that we become the emotions and senses of the human race.** And now many of us are fishing and feeding, and acting (:12). and evolving towards that peace. Now maybe you understand why it's not your wish anymore, but it's your E which creates that motion in the world to create peace. **It's that wish to understand more about the knowledge of the U that it is triggering the release of the knowledge to mankind.** Now we are not only that one fish who senses the ofod and the other millions of fish goes towards, but **now we are that fish which is the emotion of the humans race. One of us wished peace and it was sincere enough to get millions of us moving in that direction. Many people worked towards it but they didn't**

**know where to go, they took banners, shouted, there were marches.** How many march for peace have we seen in the 70s, 80s, and 90s and even now people have given up. But the human race has found the correct way to wish for the peace and achieve it, now we understand that our E is part of the reaction of the humanity, and it is not coincidental. Was it coincidental that you felt like loving and you kissed or you cuddled your child to show your love to it, or did it just happen accidentally. Now you have to understand that you are that E. **Our soul, destiny, or what you call wish, our essence of creation has moved the whole thing in the direction peace because now we know we deal with the STM and through that we teach and touch the soul of humanity. The process in the past few months and years we have seen moving in that direction.** (:14). It is nice to see our wishes, you can't say I love you my child and just look for him or her to feel you, you embrace it, feel it, kiss it, hold it. **That shows the E which was set in the brain has shown itself in the physicality. Our wishes for peace are taking shape as we saw last week in the summit between the American president and North Korean leader,** and now we see the same North Korean leader yesterday and today embracing peace in China with his Excellency president Zhi. Then you see the 2 reactions totally different. When you look at the pictures of last week, it was all set up, a defeated man trying to buy face, but when you see the pictures of yesterday and today and see president Zhi and North Korean leader is sincere to the ?? , you feel it, and you say yes we achieved it. **But at the same time you don't know what might happen, maybe the child kicks and reacts because he has too much love and attention. But that is the job of us to keep that loving, that wish of peace.** When we see world leaders make these kinds of public moves everything is calculated. And this time the calculation is peace, the KF Chinese, Iranians, American, Africans, South Americans, we all wished it and that wish has collectively the wish of our leaders. **As I said, the Syria war was the last war we'll ever see on this planet. This is my wish.** (:16). **In a way if you look civilization started from Syria and the war of civilization will end up in Syria.** We shall not see any wars and **that shows the maturity of mankind.** This comes with the knowledge that for **the first time we understood that the STM is within the structure of the man and we know where to go to make the right move that creates the right motion in the rest of the number of the human race, in the school of the fish of this planet.** Now this pattern starts. This school of thoughts that now we understand that peace is part of our soul, our E. **Anyone else that might come up with anything that might indicate war to us becomes meaningless and you'll find out it just disappears.** We have seen the funniest one appearing in the past few days, now we take forces to the **6th force in the space,** and we said, in the space there is no army. **I wonder how much more we have to educate and show the power of the technology** that gradually not only through the science and T and the STM but through change of the understanding of the STM those who are still arrogant enough to claim to be everything else and it will create new conditions for all of us. They stand out like a sore thumb, like we say a black sheep in a white herd. **We see gradually the damages that were created by man over the centuries will heal up. In the coming time and centuries** (:18). **we'll talk about the bad days when man was wild and killing. We still have a lot to do and learn yet. The teachings we have done up to now is to bring a man to understand that the STM is within him and is him.** When he speaks through his soul then we call it sincerity, and that becomes the language understood by other souls and they move and they act. We have a lot to learn yet, because then **we have to go a step further. And that is, now that we have understood that we can effect the soul of mankind through our souls, and that we can change its emotion to physical reaction. The soul of mankind as totality is**

another fish in the soul of the universe. So when the mankind indicates that he is ready for peace and has found it within himself the rest of the school of the universe will come to it. It's very much like when we first found of danger and the rest followed and responded to it. Now that we elevate ourselves to the next level of understanding, and now that we understand that we have become peaceful souls, as gradually we are changing, then the soul of the U will respond. **The school of the UC will shower us with love and care that we elevate and educate ourselves very fast in the knowledge of the U. Now science and religion or theology come together because they are one. In essence you can't conduct anything wrong in the world of science because the conclusion of it, is the reaction of the man itself (:20). and what man will do to himself.** We have to see how it comes, how do we interact. A couple of weeks ago we started to speak about light, the interaction of the light, which is the faster speed of communication or interaction between 2 sources of energy. Now if we understand this and the operation of the light within the STM and its transmutation and transportation to another soul leaves a trace of light and we can follow it. We can see it when we become wise to the work of the universe. Then we can see how any one light shines on everyone else that is of the same strength and can absorb it and be in the path of its motion. In essence our wishes, when it moves from one of us to the others, if we find the facilities and the systems that we could see the motion of the light of the earth, at length and strength, then we see the motion of emotion, of feeling, what is right and what is wrong. We see which light is going from where to where, which light is going from one soul to another soul. What one soul has given and what comes back. It's very much like a ?? zero on computer coding. The strength of the light from one soul to another is a language communication between the souls and we can observe it, who is talking to whom. Who is transferring knowledge and information, are you talking to the soul of the mother or the father, because at the end of it, **everything even communication (:22). between the souls has a strength that one in receiving it gives and then if you are wise enough or you have the understanding of it you can read the communication between the souls. When we speak about the light it's the light of the existence, of the knowledge, of information. It's the light of communication and it depends on how clear you are in respect to that position.** When you see a thunder on one side of this planet on the other side you can't see it, but if it were transparent enough you would see it. We can see, observe, we can feel. And what the teachings are coming to as we go further is **that where does the man go now that he has understood that he has the power to dictate, to influence, he has the power and access to the emotion of the humanity.** What do we touch, feel. What are our wishes and how much do we lie to our wishes. **But once we become transparent, when we become detached from physicality we'll see those who talk one way and do something else,** and they think, I said and it didn't happen, I do whatever because nobody knows. But when you sit in front of a wise man who can see the ?? motion and transportation (:24). of information from one to another, or what you call the light of the soul, **you know who is lying to you.** I sat in one of these last Saturday and it really was amazing to see how people lie through the ways and means that they do things and then they think you can't see. **Physicality has no dimension. But when you sit and listen and one says this or that, you see it's very transparent, why don't they tell you what actually the soul is saying instead. When a woman tells you, I love you, and then says, I love myself,** you know what the feeling is. You know how the E is hidden behind words, but you see the truth, what do you do. You keep ?? silence. When a man sits in front of you and says I want to kill those who damage me or my nation, and then he says I want to be

peaceful. You see the lies through the teeth, through the soul. Because at the end of it, these people are forever making systems that it gives them something to live. **They don't work through their soul but through their pockets. De Vinci was one of those, he forever went from one camp in Italy to another to sell more modern thinking weapons to kill more so he could have more finances, and that is why he got nowhere in his life. He just did a lot of work. For the amount of work he released if he would have had the soul of peace in it he would have changed the human race that time, 700 years ago.** Now we see people creating tools of war and killing and they hide themselves that they need the money for it, and hiding themselves behind all sorts of excuses. But they don't see that when you sit in front of a wise man like me, (:26). **I see the soul and the intention and I see the lies and have to pretend, yes you are right.** Yes, you are right to lie to yourself and they don't understand that soon they have to pay for it through their lives. This is what is strange. In the past week we have come to the knowledge to understand what the woman lied about, she received it, and she can't handle it, she is still trying to lie to herself, in what she lied was because of something that she wanted. We see teh transparency. **We have to start understanding this because the KF team, scientists and K Seekers are on the verge of space travel.** They are ?? around it and soon we'll see systems. **The electronic systems of today are absolutely feeble, they can't catch up, they can't work within the system of the light. We have to be able through the soul, thoughts, and emotions of the man to make a communication line with the soul of hte spaceship, its control system so that it carries our wishes.** That it allows us to be in the direction of the satisfaction of our E, that it can take us across the space of the universe. Then when you stand outside you see teh light of the communication of the STM you call the captain and the soul of the ship. (:28). It's very much like them talking to each other with walkie talkies with a cable from one to another. But we call these **the light of the STM that it communicates with the light of the soul of any entity.** In the coming time, **shorter then you can ever imagine we will see what you call teh spaceships on this planet made by man for the man.** We will see men who are the only ones who can get in and out. **Then we'll decide because we can see, which man is true to himself. Then we'll understand and we'll see when the lie is rejected, when the lie is not accepted.** When teh light of the STM tells a different story then the sound from the mouth of the man. I love you, but I am unfaithful to you. I love you, but I love myself. But a man has to be true to himself, because wise men like us sees through like a glass, like a mirror. Nothing is hidden. Loving and giving is of teh emotion of man within the structure of man touches teh soul of the humanity. It goes back to **Book #2, The Structure of teh Light. Light not only has a structure but it has an information. It's strength and speed are wrinkles on it, and show what information it carries.** We need to be able to understand (:30). that whatever man has done in the past will unravel very soon and then we to stand it and see if we have respect for it. In the past few days the American president has said we'll go back again to the moon. I made a comment, have you ever been to the moon that you are going back to it. They say, yes we have been. So it leaves it to us 2 ways. Man is so ?? to the ways of physicality, he sees the ?? of the universe. I make a challenge to the KF supporters, the Americans can't do it, they don't have the means for it, can anyone find a way or develop a system that, as we know **teh Americans are selling and have GPS every inch of the moon.** They have named it, (named) streets on it, you can buy it from a company, it's a American because they have been on the moon. But when you buy property you have to look at it, it's there. I want to ask KF supporter and even NASA because I know they are listening, and the Chinese space program people are watching.

**We don't believe you!** When I brought my technology they said, show us and we'll believe you and then you have to approve it. Now we turn the table back on them, We don't believe teh Americans have ever been on the moon, **unless they can show us those American flags which they left on the surface of the moon.** It should be very easy with the present technologies, then we'll believe you. They left one (set of ) legs behind where the rocket was supposed to eject itself. (:32). We would like to see those. We are not calling you liars, now we are more advanced, we don't believe in fairytales. Or we challenge the KF supporters and speed up, to catch up and land on the moon and find these flags. **Until we don't them there is a big question mark if man has ever landed on teh moon. There are a lot of discrepancies** but we don't talk. Discrepancies can be explained by different ?? people in different places. If as we know teh heavy dust on the surface of the moon has not ?? very old and American flag and all teh legs, we should be able to see them. We turn the tables not to discredit the American who have discredited themselves if they don't show it. But make a challenge to KF ... or we land on the moon and show there is no flags. They can say we left it there but the people from Mars took it. Now the challenge comes the transparency of the soul and the physicality of the man in the light of the new knowledge. We have to be able to explain and deliver every position. There are a number of teams working towards space lift and motion (:34). and all sorts of things, and some of those who are claiming just because now they think they'll become famous for it, but you have to show it. What the challenges are, **we 2 see 4 groups on top plus the governmental groups around the world who are trying and listening to all these teachings and who have actually made the systems. How we know is because one of these space agencies have asked for fuel from the KF, 'we have a system but can we test your fuel'.** It means that major space organizations around the world are like you and me sitting and listening and learning and copying your systems. We'll reveal very soon which governments and how they are working around it. The only problem is that they have not listened to the teachings clear enough, because I gave you every detail of teh fuel. **The fuel of the spaceships of tomorrow is the creator of the physicality of the SS** and not aluminum ofils and concrete blocks and spherical balls. If your body exists through the same dimension man has to learn the totality and collective work of the body of the man, which is a copy of the working of the galaxy, universes, and Unicose. Then man can find peace and new dimensions of knowledge, then all you need to do is to replicate. I look and I see, (:36). that **not many people have listened deep enough to understand that if you offlow the work of the body, which leads to the creation of the physicality of the man, you should be able to make the physicality of the SS.** **There is no need for anything else to be done.** How far and deep we understand the knowledge will allow us to elevate into the dimension of the motion in the U. The more we understand the faster and deeper we go, the more games we play with the structure of the materials, M fields we use, plus the light which teaches us, indicates to us how to carry out our wishes and become manifestations of itself or physicality in motion or dimension. **Go back to last weeks teaching and listen to it in detail. I have given you the essence of teh creation of teh U. I have given you all directions and indication in the past 3 weeks how to take man across this U** in what you call man's milliseconds. It's you who has to mature in understanding. From teh sun to transmutation of energy, to manifestation of physicality (:38). of the earth. **The sun doesn't have any physicality as such, except the conversion of its fields to its own matter level which leads to creation of its own self. And then in conversion of its energy leads to creation an feeding of teh energies and matter state of other planets. Then is it the wish and teh love of the sun which creates the motion and**

**life on this planet**, or is it pure accident. If the work of the sun has a heartbeat, then **the sun has emotions towards its children and different parts of its existence, the way we do. We know from observations that the sun has a heartbeat. So it has a soul, it has a dimension of existence. How can it be that the STM can create its physicality of teh man and within it carries E, and not the creator of the man which is the source of it, which is the sun.** How feeble (minded) man has been. Do we need to look at everything in the dimension of physicality or only when it suits us. **If teh present science confirms the heartbeat of a planet, or a star, or a U which has a bigger heartbeat, then that entity has to have E, (:40).** because creation of repetition of the same, which leads to interaction and non-physical dimension of entities like the solar system, like the physicality body of teh man, it has a soul, and with it has E. **What happens then when teh man learns this and can tap into the E of the sun. Would we see its laughter or would we become teh passengers on teh wave of its fields to travel teh span of this solar system in no time, as it does itself.** Then the extension goes again to the next step, **every galaxy has a heartbeat, so does teh U. Sometime when man graduates to teh level of understanding the work of the U, we'll find a way to listen to the heartbeat of teh U, which means it has caring, it can love, it has E, the same as teh man does.** It has dimensional physical interaction which is the heart of it, and with it, because of it, it has a soul which is the creation of its fields and its E in interaction. **Now we come to one big question to ask and that is, is there any difference between the STM and the sun, center of the galaxy, or the central line of hte soul of this U? Then what is the line of communication? How do we find other planets that we can go to, because when we left them 500 years ago they were somewhere else, (:42).** with billions of kilometers per hour they travel between one point and another. **In space how do we go to such and such an address, house number this, apartment #2, where there are no routes or streets, no buildings or apartments, but there is a position where we can find our loved ones. Or have we become too physical and we have to have an address to go to. Or can we become wise and understand that the knowledge of the man has reached a point to understand that the STM is what we call his GPS. He knows where everything is and has all the knowledge of teh U. It's for man to start using the library of teh STM to understand the total knowledge of the U. Then what would you like, the Gans of CO2, Mg or whatever, or is teh Gans a mirage for man to start to understand the new teaching.** I most probably lost half of you by now, if you are snoring, wake up, because teh snoring of the STM doesn't create the physicality of the man to be asleep. (:44). How much more do we need to explain, to teach? **How do we create the transportation of the E from teh STM to the soul of teh mother, or friend, or another entity in the space. How would you say I love you mom, when you are in the space, and because of the conditions of life you have lost your lips, because there is no need to feed, so there is no need for a hole to be called lips. We have lips because it is the joining of the sausage tunnel inside teh man with the skin of the man. Once we don't need to feed teh man this sausage hole will shut. Then how do you tell your child I love you. How do you explain to your mother and father I love you or it's a beautiful day. Words and sounds don't exist, so man has to learn to talk and have a conversation through the STM. Man has to learn a new way to restructure his brain that instead of creating noise through the voice box it creates an emission of fields through the brain. It shows love and care, eager and anger, then to be able to convert the lights of the soul the way we convert it into E and love and we speak it, how can we create the same light, but that doesn't need teh motion of physicality (:46).** and the mother and father feels it. Where you don't need to go into the house and say it and give a cuddle, you can be in

touch all the time. There is a lot of wisdom in what has (just) been taught. There is a need for the wisdom of the U. **We have to understand the communication between the light of the STM and the light of the soul of its destination, and at the same time we have to start to learn the way we have a group of us sitting around the table and communicating and talking, joking, laughing or crying, we have to create the dimension of the communication of the STM simultaneously with different entities. It's very much like having a soul talk with the mother, or with your child without the lips moving, and they say, let's go to the park, and everybody gets up and goes but nobody has spoken but they all feel it.** These things need teaching and understanding. It's not going to come by one stroke of the pen, or by one understanding of one point. It needs the maturity of the man to understand the creation and his own creator. Understanding, justice and fairness and love and care. I asked one K Seeker recently, **what is love?** (:48). **In understanding the new science of man, Pl where do we find love, and why do we express ourselves in physicality of love, the E of loving. In the understanding of the new world of Pl, where do we find love. We explain love is giving and when you love someone you give unconditionally, as does a Pl. So the position of the love in the dimension of the physicality of the man is on the outer boundary of the brain, because that is where the giving is. This is the boundary, this is where it goes, it's the M field which goes away, and the more you can give. For the first time you understand why love to the man has a physical meaning, because its soul touches the boundary of the brain that it touches the total physicality of the man. We got so much into it that when you create another soul we use the whole body to be able to create that interaction of the physicality's that lead to creation of the soul.** For the first time man understands the position of love comes from the extremity of the physicality of his brain, because that is where it is giving, it's the M field strength which is always the outer boundary. Then it shows itself in the physicality and that's why we need to cuddle, to physically hold and kiss to show our E be it our lover, child, father, mother or anybody on the street. (:50). This is why for the first time we understand why and how the work of the physicality is connected to his E at the dimension of his M on the edge of the boundary that it gives out. Now what is the M, it has to have a G. Where does that G end ... which comes back through the M. When you say I love you and you give a physical hug to your wife, husband, child, grandfather, they hug you back and give you ... **does it touch the M part of your body which you have given, but you have to receive it, and so it has to go into the dimension of the STM,** because that is the source, that is where it is going to. Is the feeling of being loved, shows the source, the station of the STM, because it has to be absorbed within that he can give at the boundary as a love giving. **The question comes, what is the other end of loving when you receive the love back? And is that point when you feel your love you have come to understand the position of the soul of yourself, because that is where the G, he has received, and is absorbed in essence and has been held within itself. How much more can we teach?** (:52). Or does it come to the point that **the one who loves back, gives you, but somewhere in the middle it stops, somewhere in the layers of the brain it stops,** and it says, Oh ... he hates me because this position in the brain coming in is called hate, this position coming in if I feel it means love because it hit me a lot that I can love back more, and as we said, the plasma takes him and then gives more back. We have seen the physical structure of the polarity of the spheres of the planet. Now we have to understand further where the position is of the STM through understanding the E of love or giving, which comes from the outer boundaries. **If you are in the middle you can't give because you have barriers. The loving and giving comes on the outer edge sensors of the body,**

**or interaction of the physicality of the fields of the STM and the boundary of the interface** with its environment. We come to one question, are you true in loving? Or can I feel it stopping somewhere in the middle. **Because in the space you have to deal with this. In the space the energy you receive according to the strength he has and where he goes ...** **clung a flash of light would indicate if the guy says, 'you are beautiful', but you can read in your brain that he wants to eat me, I am ofod and that's why I am beautiful.** Then I move, but unfortunately you have no lips or tongue (:54). you have no mouth you lost it millions of years ago when you left this planet, and so is the guy opposite to you. He's got no mouth, **but to him you are absolutely delicious because he can create MG fields in the opposite strength of yours, that he can drain everything from you. While you are getting absorbed in the soul of another entity, .. you say, I love you, and you disappear. Or you create a condition that the loving is so much that I am not appetizing, I am not there to be eaten or touched, and if you want me you can have everything I have but ask politely, because I am here to elevate you by confirmation of my own existence. We start seeing the connections between all the teachings and what is to come and understanding of operation of the light.** How that light looks what speed it carries, what strength it has, to what extent does the light confirm the existence and the source of the STM.

Are there any questions.

Q: So love is G on the boundaries, imagine the outer core, {wrong off the bat} (:56). Love is M. Q: and the M of it goes to the core of the soul. Can we go to the beginning. I think we want to do a diagram. ... the inner and outer core of our reactor and the potential difference and incorporating this love idea ? Mr. Keshe draws the physicality of the brain, draws 1 line beyond physicality and says this is the dimension of M, because beyond this is there is no physicality, it's what I call ?? **But in essence the G (in center of brain) because when it comes in this is where it's targeting. Where these 2 fields interact, if it is here this is true love, if here the guy wants to eat me, if here the guy is lying, and the rest of it... (:58). In the time to come the physicality of the brain shall not be there. What in fact you'll be is the completion of the plasmatic fields, because in so many ways we still carry the physicality as we see it, but if you remember if the environment is the balance of the MG field of the bone of the skull, then, plump, it's not there. then the brain is free to move in the U, because its containment has disappeared. In time man will have a lot of fun and fright with these things. It's happened, you'll see it, bone is not the exclusivity of the human race. Bone as the framework as part of other entities confirmation of the existence is very common in the U amongst many creatures. Now that you move in the MG fields of the U, where its MG fields matches your bone structure you just become a pile of jelly on the floor because it's not there the bone is gone, but still you have a field of the E and the brain there. What am I going to do with this pile of meat, how am I going to move this thing. Man has a lot to learn and a lot of fun to have in opening of the space. So what are you going to do, how do you get that physicality moving in the dimension of existence in that part of the U. (1:00). Q: Alzar. How to make a diagram for the love, lovers can fall madly in love and 5 years later hate each other, but love for a child is unconditional ... It changes but we learn to forgive because there is no where to go, but with a husband he can go to his mother. **Caroline and I have been together for 30 years, I said, there is a problem with me, when I look at you I have the same feeling when I first met you, my heart just goes bump. I said it should have stopped 20 years ago, what is the craziness you have done with me. I still fall in love with my child, the dog and the bird, another woman or man****

**in whatever different dimensions of the strength. But my love for my beloved, my wife hasn't changed in 25 years, it's very strange, people say after 5 years love dies. We go through emotions, changes, different understanding, but it is us by confirmation of loving we can keep that going.** One of the biggest problems with man is that he forgets to confirm the existence, to keep that line clear that (1:02). I love you. Because when you love, and love in its true essence, it never dies because you keep that light on. You are there to show the path. It's very strange, it hits me hard because now a days because of our work and the way we promote everything around the KF, I am 2 days away and I come home and it just goes, vroom. I can't help it. I said, many times, what love potion have you given me? **But does it come with sincerity and knowing, or is it just one way? And we don't get it back,** it's just us who puts in, but the problem or the beauty with it is, ?? it would hurt another soul to respond back to you with the love you don't get from your lover. **We love our children, we care about them, we do a lot of things for them but how many children return back, and they deny everything, you've been there,** I've been there. The minute the first girl says I love you (to the son), ah .. Why don't I feel this love with mom and dad, so they don't love me because I don't feel that feeling about them. And then he or she (girlfriend) becomes god, and you can't change it. Do you know why we can't change our children's love and they become our biggest enemies sometimes because of bad love, because they don't feel the love we have given them all our life continuously, to us it is second nature, it's the water that runs down the river, we can't stop it. But this Madonna walks through the door and he goes and falls in love (1:04). and she says I love you, and he says, why don't I feel the same way with my mom and dad, so they don't love me and she becomes everything. **A wise parent explains to a child that this is a love of the dimension which leads to the creation. My love for you, has lead you to be created. And there is a big difference. You are part of that wave which is continuously there, I can't do. You are not just another satellite that has come in, you are created out of me to be. Whereas the girlfriend is a satellite that has just come in,** just like a shooting star, at the moment it is bright and then suddenly it goes poof, nothing there, then what do they do, they come back again, oh, Mama help me. I thought it was a good love, but they forget and the next one comes and they go through the same program again. The reason our love for our children doesn't change is because we have created it, and with our lover it is created for us. It's a big difference. It's a give and take. I was talking to Caroline, I said, do you know **a plant or tree exists and it's held by the ground. We see the roots and we say we water and the plant grows, but have you ever noticed that when you shake the ground around the plant and give it a bit of room and something and it tries to grow a bit bigger.** (1:06). Why? Because man has never understood the way the earth gives nourishment to the plant, the **plant gives nourishment back, it's not a one way system, it's not all sucking it up. It's (also) giving it back. We don't see that part because we look at the growth of the tree. We don't see the energy and love that the plant has taken, that is given and by giving has created a position that it receives from the earth.** And it gets coughed up, because it can't push anymore out, that's why it roots itself out to find new territories to be able to deposit. the plants don't go to toilet, but where do they get rid of the surplus energy, they're another living (being). Now man understands that you have to look into the root system of the plants and see what they chemically change around themselves, that it their toilet, what they put out. But man has never seen it. He only looks to see if the root is growing. We never **understood the principle of creation that it is two ways. We always said, we water it and it grows, but when it grows what comes out of it and what does it absorb from the environment that it has to give out, that it**

creates a space for it to come in. And what speed. Why does it grow only in the spring or summer and another one only grows in the snow. What has it changed, because it has learned a new way to give out to allow new energy to come in. It uses the energy of its environment and by giving it, it receives to come. (1:08). But that environment and what it has been clothing it decides if it is a spring or winter plant. You all look at the **electricity in your homes .. why can't you work with 1 wire. If it is a current 1 wire should be enough to light the light. Why do we have 2. Because we need to take, create condition of emptiness that when it gets filled up in the motion** we take something out of it that in that position we call it the light, and what we take out is called the refrigeration, the other for AC or whatever. In essence if you don't have the return and take more you can't receive. We take out more by giving. **In electricity we call it eddy current, and love in the terminology of the emotion of the fields of the man. then what comes in which is the return or feeling it, when the light comes on, that is the STM, that's when we can measure it, or in one point, is it 20 watt power the other is 40 watt, when it is very near the soul it's a 1000 watt power light. Then when it's 20 watt it's darker we can't see, this shows a bit of fear, and when it's 50 -60 it's a happy time. Don't be too cautious we call it calculus, and when it's there, a 1000 watts, vroom, you hit the soul. We have to understand the essence of creation. Without gravity there is no magnetic also. (1:10). Without the eddy current there is no current. Without love there is no essence of receiving to feel that love, then it becomes the essence of the creation. When we talk about loving our children and it dies with the husband, don't look at the husband, you have not taken enough to open its position in his heart to give more. I am part of the blockage. I am part of the stopping to recharge it and then I blame him because I have not taken his burden, and have not given him the freedom of the space, the pleasure of what he wants, and then I blame him because I can't give, because you haven't taken out what he doesn't need to satisfy ?? his own need. But on the other hand, have you understood that you fell in love with the physicality and the heartbeat , or did you fall in love with the soul. I feel in love with the soul of Caroline, it just happened when I tell people how I feel in love with this woman .. just crazy. It doesn't mean that I don't fall in love with my children, or another woman, or another man's writing, or another car, or somebody from planet Zeus, but in that essence of creation, the commitment of physicality, this is what it is. How come we see a father with 2 children, and I have seen this many times, watched or observed it, and it is so hurtful to see, but parents are not aware of it because we have never been educated about the distribution of love to our children. (1:12). Watch a mother who has 2 children, the first child was loved beyond because it was the first, the second one comes out of ?? to being loved, we forced the first one to be there and now he becomes a spare part ?? willing to ?? , but everything goes to protect the eldest one. What do we create, hate between the first and the second, because we haven't learned to love equal and show them, not only I love you, it's there, we love you together with the new one. I see this many times. Then what are you going to get, a depressed first child and a hyperactive second child, because he realizes that by me being active the first one doesn't get anything, I get everything. And then you'll find the second one always dominates the house because it's the only way to stop the first one. But if you teach both of them from the beginning that the love for both of you is the same, not only in talking but in showing them. (this doesn't make here should be before the positive statement) You see the first child hides behind the second, what he gets and I get the crumbs. Loving and separation of the love, blaming to be loved has to be felt by the STM and not the physicality. A lot of parents don't understand this. They**

have never been taught. It's like the king losing his throne, now there is a new one in .. because we are looking at the new one we forget the second one. (1:14). Very few parents, fathers don't understand this. Much more mothers understand this. Look at this one, the parents have a daughter, the father falls in love, they can't do anything psychologically, she is still innocent, even though she is 18, so he has to protect. the boy becomes a footballer, he'll be out. So what happens, the father finds a lover to give so much love to, and the one who used to be loved so much becomes the second child behind. Is the mother picking up the crumbs. So by giving so much we ?? stop at the barrier to the second one. **The mother becomes jealous of the daughter and then they become the biggest enemy, everything she does, she's another mistress. But if we learn (confirm) through the STM that we confirm to our wife, partner, I love you the same, this is the physicality of the love, which I care so much for and I care the same for you. Confirmation of love and the equal distribution of it has been forgotten by man and is the creation of many life long sufferings.** This is the strange thing about the man, he always looks through the physicality and not through the STM. When you fall in love with a flower you say it's beautiful and everything else about it, so too with somebody else, a car, a vision. What are we going to do in the space when we fall in love. My god it's craziness. (1:16). Man when he opens the span of U and then sees the soul and its beauty man will fall off with the whole of the U. Then how are you going to choose which one is the husband or wife and which one is the child, or do we understand the essence of the return of what we receive, shows if it is mutual and to what extent. **They can't lie. You can't cuddle your wife and kiss when she has another man in her brain** because now you see it, au oh darling, stay there, stay with who you like to be, don't talk to me this way. **Some of us will become mature in understanding the E of the soul, feel these things, we know these things. And man will become more and more expert in it. In the space we need it, otherwise we come to the point that because we create the wrong field, or we don't understand it, we become that magnet which absorbs, because we give an indication to the other soul, without us knowing, because his strength of motion (or emotion) to him is, 'I love you, you can have whatever you like from me', and he needs to convert the energy to something else, you become part of the drop of love in the entity in the ocean of his soul.** It happens many times. **We have to understand which love comes from what and how we distribute and accept that love from within the structure of the PI of the STM and not in the PI of the physicality of the brain.** (1:18). If you have that brain and you sit here (draws a circle) and this is the E of physicality. This is the structure of your physical brain, and on the right, this is the structure of the PI of your brain. You feel pain here, then here on this side. Anything in that dimension of sphere is pain. Anything in this dimension, around the outside, is physical love. **We have to distinguish between the physical strength and what stops in the structure of the physicality of the man and the PI of the E of the STM. It's the same thing, but now we have to find, this one is physical, and this one is in the dimension of the fields of the U which has not ofund tangibility.** But the problem now a days it has become very fashionable to say, 'I love you', and I love 2, and the boyfriend next to her I love you 3. These 2 are with the soul but the other one is with the mouth and if you are wise enough you see right through it, oh, she thinks I am a fool. (1:20). it's very much, 'I love you', what are we going to have for dinner tonight. He's gonna finish talking me, he thinks I am a fool. **What they call "rebound love" is the biggest disaster for man in the space. You'll understand very soon.** Q: Estella last name is love. .... (1:22). The question of love has been with me for a long time, I understand that there are different kind of loves. When you said we are always looking for the existence

of light, that reflection, our soul exists on the physicality. Love was a big question for me since I was young ... So you married one. yes ... No, I said, so you married one, love was a big question so you married one ... so in a way you were in love with Mr. Love. Yes. ... **we are always looking for confirmation of existence and we forget when you love you give to acknowledge the other person** (1:24). .. you give to that other person unconditionally, because love is not possession ... talks about her ideas ... (1:26) .... thank you. **Let me explain why we emphasize on love. we see it. In the U what we call love is what we feed out. (1:28). What we give and are prepared to give, and those who have the same need as us to give from theirs, they accept and create that link, they give that we can receive and in turn they can take what we don't need. But is that love or is that the dimension that I want to be connected and that connection allows me to exist.** As you said, we tell someone we love them because we want them to confirm that we exist. **Most of the time that we tell to somebody 'I love you.' Is that the physicality that mentions that I exist, that I can love, that's a gift from me that through loving you I confirm my existence.** Or is it that I give to you that you take what you need that you can confirm that you exist, that through your existence I exist. If you understand the work of the U, the science of U is a theology, that's **why many scientists who come to understand**, especially physicists who work in the dimension of understanding **the work of the U, we don't become atheist, we come to understand the truth and with it we understand the totality, and through this we create the line of understanding, and according to the strength of how much we understand, we create a line to the Creator, we become part of the Creator**, because then we understand how He has created it, and with it we become the mirror of the soul of the Creator. (1:30). **In fact, in time so many people don't need to become. In the space man will see many, many creatures that live in reality, what you might call the path of Christ or Buddha, in the truth of their essence not in the physicality of what they live. then you find out this is why the U is so peaceful.** Because according to the level of our understanding we become closer to the Creator. **Partially, 90% of my teaching especially in the physical dimension of the reactors cores and everything else, is to open a path gradually for the man to walk away from physicality and understand the true way to the Creator. The time of showing you a fire, a bush, and god knows a storm, is over. We show the path to the Creator through the love, which means if you give truly, you receive truly back from the Creator, and with it in your actions you reflect His emotion and His light.** Does the Creator give so many fields out for Him to receive them from so many to confirm that He exists? In so many ways, yes, **because without our confirmation or reversing back through our souls, He has no confirmation of existence.** (1:32). (Q: your connection to the Creator through the central sun maintains you with the power that you exist ... the back flow powers the SS ) **Something very strange, I live a very horrible life, but in so many ways I have to live in the dimension of the man, and so many things goes when you see what I see ... at least I look at in different ways. It is very painful living on this planet, it's very hurtful. So many times I have said that if I didn't take teh mission to change the course of humanity I wouldn't stay here for one second I would go home where there is peace.** And so many ?? dangers come to you and you see it, and then you think, what about. A few days ago I walked into the bathroom, over teh night or whatever, an ant which has wings, you know the way the ants live, **once they impregnate the female ant in the air, they drop off and they die.** You look at it, it is such a tiny little thing, and when you have the knowledge I have, you just look at it. I looked at it and I said, where has your soul gone to? **Which dimension of stars in teh U have you become, that you left your physicality**

here? (Q: It's a process.). It's not a process. It's comprehension. (1:34). (Q: Well, yeah, but some people can comprehend in 2 seconds, and some people have to go through the process to get teh click). Humanity has been doing this for millions of years and haven't understood. I cried when I received the letter from president Obama. I felt ashamed to be a human. (Q: I experience the same but at one point you understand and you put the emotions on the side and then you can see teh truth ..) **But what do we want to see?** (The truth of our lack of understanding, our blindness and being trapped in a reality we can't see outside the box). Let me explain. **Do you know why I decided to put all my efforts to the Chinese government? Especially president Xi, to back the Chinese for peace and prosperity.** (Because I think they have a long history of understanding the U in a different way.) No I received a **letter from president Obama**, it said, Dear Mehran ... Barack. In the communication, the world's most powerful man, **he tries to explain to me why he needs weapons of destruction and killing, and calls himself the man of peace. When I read this letter. It was 2 pages, (1:36). I felt this nation doesn't deserve to be in teh position that it is.** It needs a nation that understands what peace is. Line by line, literally word by word, Obama used nothing but justifying killing. **It's the most shameful letter I have ever received. I made 2 decisions, I had a choice to abandon everything, or take position with the Chinese. To make China the peaceful land through the knowledge and by path of history, I have ofund a man in president Xi of China, a man of peace very much, maybe there is a reason we are both at the same time. In the current time.** I see teh course of change. **Because a world leader who calls himself the most powerful man on this planet, is actually the most vicious man on this planet. There is no love, nothing but hatred in the position of power.** I made a very clear decision, I decided to bring man to a new level of understanding. To a new way. Fighting it is no good. It wastes too much energy, **but loving it was easier. (1:38). I have showered the Chinese nation and its people with the love of knowledge.** People don't understand teh amount of effort we have put into China. And the world will offlow. Because in essence, if we change the position, you'll see a lot of changes coming up. Nations will stop spending on armaments and first feed their nation. **We see that with president Xi, he is putting a lot of effort to in essence change the poverty in his nation. Not many world leaders do, we saw what happened in America during the hurricane (New Orleans), the truth came out. I decided to shower the nation with the love of the knowledge and that's why I said China will be in teh space in a very short time. But that knowledge will be used for peace and not for war.** It is teh trust that I have. It's very much like what I said about **the soul of the fish that it changed the whole life (1 fish in the school directs teh whole school), which now we understand the STM. I work through the soul of president Xi in a very direct way. One day I will explain. He is a tool for peace in the knowledge and the love of the Creator.** We have seen all teh previous Chinese and Russian presidents always answer, tic with tac, but the wisdom of this man, he doesn't fight back, he takes in and finds a solution without war. He takes his time and teh wisdom of the council he has with him. (1:40). He doesn't retaliate with another nuclear war the same with what we saw in the Cold War, if you have 200 then we make 400 and we'll see. He puts a lot of love into his nation. It takes a harsh time for people to understand this. Chinese are careful and always thinking what's behind it, why this happened and why is he doing this. As someone who sits outside teh Chinese structure, and I have worked with world leaders for such a long time, I (can) see teh love a the leader for his nation. We don't see (that) with the Americans. The love of the Americans sits with how powerful he can talk rubbish. It doesn't matter .. (But there is a problem with ... because we are all leaders and equal. ..) Listen Love, you try to explain this to

the other 6.999 billion we are equal. (let me finish my sentence. The problem is when people don't know something they keep believing in the way they used to do things. And it's all about control and I am stronger than you, competition. And no co-creation, and working together as teams in a cooperative and peaceful way. This is how I see we are going to move forward ... (1:42). there is abundance everywhere but they told us that there is scarcity and you have to fight or compete in order to get things, it's a very deep way of programming, if we understand from the field exchange, how you give and receive is how the U works and that what has to happen on Earth and we have to be One Nation). **You see the strangest thing is, how do we see ourselves in this structure? Am I one and do I count, or I have a soul and I am counted. If you understand the example of the fish in the school of fish, then we understand that my physicality is irrelevant, what I carry through the message of my soul to the rest is what creates that motion. We have to become that fish, and have the understanding that we all trust each other, because full trust in all being one soul, is the safest to know which way to go to avoid danger or to eat.** Man has lost that trust and part of the teaching which is becoming **the cornerstone of the teaching of the KF is to create that trust.** Yesterday I was talking to our lawyers, as you know we still have a case in Belgium which is running. I explained how the Belgium government has walked themselves into a big trap and very soon we'll see (1:44). top people in Belgium in prison because of the KF case. I won't go into detail. ... the reality is, can we change the soul of this nation or do we leave them. For it is very difficult. **For Mohammad as we have seen he took the love of God from the Jews, and they became nomads because of what they did to Christ. We saw Bahua, he gave the love of God back to the Jews, which was his biggest mistake and we see what the Jews have done.** When I look it is a test for my soul and my physical dimension, what am I going to do to this nation that is bending backwards to destroy me, but the problem is that I have a child from this nation. **My children are connected to this country called Belgium and my wife is a Belgian. It's not something else (it's not a nation that I am not connected to), so this has given me a sense of balance to understand the level of love even though he has created so much pain. There is a discussion at a very high level that Belgium should turn into a republic because of the situation with KF.** You'll understand when it comes through. (1:46). Because I can go with the power and knowledge I have to punish this nation beyond understanding of the blood, but I carry the blood so it has to bring, it has been my test to be correct in every way because in trying to stop the love of God or Creator or my knowledge, or my way for that nation, I harm my own children and the woman I love so much. **So it has given me a balance of understanding not to revenge in a physical/soul dimension, but at the same time it gives me a knowledge and an insight to be able to correct those who have gone out of their way to be wrong. The situation with the KF is a court case, it's so powerful that it will change the monarchy in Belgium.** The case is getting put together in a very powerful way and the structure shows what it will come to. It's not that we lost the case, we got it the way we wanted it. But I am a patient man. ... since 2005 I stood everything with this nation, the cheats, lies, murders, and everything else. But do I stop loving the humanity, (1:48). in which one part of it is a sore or a nail called Belgium. Or do I chop the leg off and say that is it. This was done before, we can't do that. I have many discussions with Carolina, she says all the Belgium's are not the same, but I say it is the way you have been put together. On the other hand, my love for her, our children. We were crazy about our children and we have seen how this monarchy has hurt our children. Very soon the Belgium nation will separate itself from the monarchy and the monarchy has to stand their own way. It comes because of our court case. Because the nation wants

nothing to do with them and then they have to stand for what they have done. **But do we punish them or do we elevate their souls that they walk into ... and they are walking to it.** You do not understand what is going on. So many times I pray for Derek, give from my soul to D, and they have walked in. They are the tools for the end of ?? of mankind. ... **The whole structure is we don't fight, we elevate, we give unconditionally, knowing that what is taken from our love for them. ?? we become the resentment for those who wanted to take from us.** And then they walk away through it. Let me explain financially what they have done. The creation of KF and what they have done to it when we moved out of Belgium. They thought they were very clever making us (out to be) whatever, has brought us to work with all of you.

(1:50). **if the position of the situation would have carried on and would have embraced us with everything, you would never have heard of KF the way you do today. Because of this we spread the knowledge out. But economically what has happened, one of the most powerful technologies has moved into China.** The nationals of Belgium will ask the question, how come we lost the biggest asset, it's not like before you go and capture a country called Congo and rob it, us scientists at my level, there are thousands of us, we are assets to nations. You call it patents, scientific rights. Now my knowledge and work has become an asset to one of the strongest nations and I stand by it. People will ask how come we lost it, because of a king who wanted to steal it. The resentment will come from inside to get rid of inside and then mankind will find out we don't need kings and monarchies. We don't need people who call themselves bigger than us, as you said, we are equal. You don't see the implication and application of what is about to come with this court. **The biggest thing the kings did was to put the police force behind it. The biggest mistake the police force did was to spread ?? it the way they did.** We don't explain anything until the final stage then you'll understand. **We are putting in for damages in excess of 20 billion Euros to the Belgium government and excess of 200 billion.** You'll understand how it is calculated very soon. The nation has to pay because they choose. (1:52). The damages are not to me but to the KF. So they are trying to uproot the KF but it can't be done. Soon we'll release documents which we ask you to send to every lawyer, judge, city district and court across the world, then you'll understand what it is and why we do it. You helped us you went to the court. The presence of those who went to the court brought the end of the monarchy. Those of you who did your affidavits please get them signed, all the pictures you took and signed affidavit, we need that. Send it to us as fast as possible. The case is nearly complete. **The best thing that ever happened was those who went to the court. I thank you for it. You brought the monarchy to an end.** Send it to us. It's the end of all this killing, murders and the rest of it. .. I thank you for everything you are doing in the background. Do it as fast as possible. We need it in the next few days, notarize it and register it in the courts. ... every single picture you took needs to be notarized that you were present in the court, and others, the pictures of the police officers in the court are important. Because then they say how do we know who it is. We need your pictures and everything you did. Because it's the process. We gave you the love, but they took from us, (1:54). but the thing is they brought their own demise. We still need to understand that we are part of a structure. **You have to feel what I felt, I walked down the stairs with my son and he said, Papa I can't walk, and I realized later on that John had put poison and tried to kill him. And this is a man who pretends to be a father to children and grandchildren. It's very hard for me to be impartial, this is a test for me. To keep my soul on track so I don't do anything wrong, if I do it comes back to me, it's not the fear of coming back to me, it's a guideline for me, a test for my soul to be correct in my physical dimension. Loving**

**is not just all giving, it's to know how to give and to what extent that it doesn't become hate or resentment, but at the same time control that leads to it.** I am not a pragmatist, I am very logical, I am a scientist, everything has to make sense to me, not only to my science but also to my soul. We need to be able to understand the structure of the STM to be able to understand the physicality. (1:56). **We need to understand the transfer of the E and the fields of transfer of communication between 2 souls, between the soul of a craft, SS and the man. What we are looking for even in the SS development, how can we find people who understand the work of the soul of the spaceship.** Very soon those of you who develop and become part of the space program, you become expert in understanding if you are open, this ?? with this soul of the captain I will be riding a very bumpy road, and if I go with this one and give my soul to him as trust I'll travel the speeds of the U. These are the stages of understanding and then you'll know who is a good or bad driver and who is on a donkey or driving around with a Jumbo jet, but it is all the same soul. **A lot of KF KS will change very soon, because a lot of you lost, you are ashamed to be because of what they put on being associated with this or whatever, but when you change, you'll say I was a KF supporter, I know but that was your test to understand the strength of your soul compared to humanity,** not to the KF, to your own dimension and existence. Recently we have appointed a beautiful man to Chinese KF, it has been kept away from public. (1:58). He has accepted to be in research. I know my T is in safe hands, not only because of it, but we see the soul of it. **It's not that we put everything into China, we do because it's a tool for peace. I put a lot of effort into Europe for 10 years but it was nothing but robbing and stealing.** I put into China, we still see some misconduct, but we see people are there for the changes for humanity, the work. It's not that they are any different then the others, but the guidelines for the existence is slightly different, it's positive and can build up. The head of Chinese research, I agreed we would never release his name, but it will be shown how this T will go very fast with him. ... the topic to change humanity is more important. ... the teaching is not always how the light is or the reactor moves, sometimes like today we have to understand the essence of the teaching. (2:00). **And in it and through it we find our soul which is the next step of our teaching. I always said, that when I write the 9th book the essence of the soul, that will be the completion of my teachings. The soul radiates and at a certain point when it reaches the surface like the gravity of magnetic field it becomes the surface of this planet, in the dimension of the life of the man we call it love,** and then we feel it through the physicality of the man, we hug and kiss, embrace each other to give it. And we know when we hug someone and they say, I love you, and there is a cold dead body in your hands. You know you are not getting anything. Do you drop it, or do you give a little bit more to confirm I can give. Any other question. Q: Lawrence (long winded ) .. (2:02). we are creating the CO2 in the reactors ... they are just like the plates of H, H2, and H3 .. (2:04). .. (2:06). ... Did I mention all the topics you mentioned? **I don't know it depends on what people take from it. Each one of us takes from this according to what we understood from it. Each one of us will do and react according to what we think we understood.** Any other question. (2:08). Ruti Q: you talked about the strength of E and that the love is the boundary of the E. If our E is also a Pl, ... what do you mean. You said love is the boundary of our M, right? **Love is the boundary of our physicality of the Pl of the man ... of the STM in the boundary of his physicality. We don't feel love 10 meters away from us, huh? What we love we usually hold,** we love our children we hold them. We show it and convert it into physical dimension, that **extent of love can be extended to,** another 1000 meters **to whom we target it to, it will still be received, because then we add a**

**dimension of being able to receive it.** My question is which is the higher emotional strength love or hate... It depends on what you want. (2:10). The highest emotional strength for what, sharing or loving or anger, and according to what you are in it. Q: I mean the highest strength the most close to the soul? That is the mystery for the man. Q: But love is ??? the teachings ?? **Yes, but the love we explained is the point of giving, so it is always M, so how can love be maximum in the soul as G, or is the opposite end of love in receiving also? Or is it that what we need we receive and we call that love in return.** Is that the satisfaction of the need, where there is a satisfaction of giving, the 2 and 1 becomes of 1 strength and the other on the receiving end strength. What do you want to call it. **I call the love that comes purely and reaches the inner sanctum of the STM, the love of the Creator, because every other love has a strength and somewhere in the brain of the man it gets stuck. (2:12). In the future I will explain what I call the eddy current, the return of the field, then man will click on it in no time to understand how much he can change the existence.** We are not there yet but in time it will be explained. Q: Caroline asks, you promised to expand our knowledge on nature. (2:14). Q: Last workshop the possibility of creating Gans of a neutron from our H, H2, and H3. was discussed ... There are many ways to produce gases .. if you can go back on something very easy .. (2:16). ... Can you find the video of the **UOF over Jerusalem around Christmas** a few years ago. (2:18). ??... fill in the 3 reactors with H3 and let it run. H3 is a giver. (2:20). but at the same time it can give and create a G field. If you get it right one of them will turn slightly black. Another one will turn a slightly different color. **If you understand the essence of the creation of the fields in the U, you have in the 3 reactors, H, H2, and H3. The balls just change color, because in MG field essence, it works this way. It's gets you confirmation that your first material was H3.** (can't show the UOF video). He draws teh SS over Jerusalem. Over the central band you see something strange. (2:22). He draws **3 sets of lights repeating around teh band, strange enough these lights start revolving. Do you know why? You have the answer here. The H, H2, H3 in the reactors. It's not that they are flashing lights. It is due to the rapid rotation of the Pl fields which are here, and it has a reason,** so they continuously change between the 3 colors, he draws an IL between the 3 H3, H2 and H, they haven't made a new light it's the natural interaction with the environment, and **in that process they create a G pull towards the center.** When someone tells you they have seen a UOF and you see this, now you understand teh science behind it. Because you create your H, H2, H3 this way. And the color which stands from the beginning is your H3. Now **how much electricity current do you want to use, there are different ways how we do it.** Man has ofund different things for himself. **The lights you see on the boundary gives you a lot of indication ... later on I will teach you. I make my H3 this way and I have done that for years. If it is ready you pick one up, and if you leave it for some time the change (2:24). their color back again because they absorb energy from the environment. The KF Chinese man is a genius but he doesn't understand the physics of it and sometimes he needs an explanation for it.** When you try to replicate teh work of the U understand everything about it before you can replicate it. You can't just make a man without part of the heart or liver because you never understood it. If you put a picture of what you call a UOF in front of me I will tell you if it is real or not, because I understand and I come from that nature and I understand the full process, what everything means and which one is fake. The strength of the color, which one, even tells you which part of the U they come from, because according to their knowledge they use a slightly different process. (2:26). it's like when you see a car and say, oh this one is it a Mercedes made in Germany or in America. **When we look at the structure (of UOF) in the space we**

**know where everything comes from, the registration number, year it was made, and who is driving it. This is part of understanding the totality and why I teach piece by piece. This is how we evolve around the teaching of the UC and everybody enjoys the system they made.** The process of how you create H3, you have the basis of CH3, which is ?? a sense of the creation of the blood of the man. If you separate it in the right way you create other dimensions which its new materials, ways and applications. (2:28). **We have to be able to understand the totality of the physics and the interactions of the fields, not physics as a spanner (wrench) and Newton's Law.** Any other question. Q: When Gans obtained without current (2:30). ... Gans of rust. .. Fe, Cu, Brass, Zn .. You have created blood, hemoglobin if it is in touch with the fat on the top, AA, and if you just immerse it, it's like a PI without the hemoglobin. (2:32). If you stick the nail half in air and half in liquid where you have created that CO2. ... Let me explain, there is electrolysis and there is Gans production, they are 2 different things, with Gans production we still can put current, we still do on an industrial scale. **It's electrolysis if there is an acid in it. If you keep the salinity high there is no acid condition and it stays a Gans. It's very simple.** (2:34). .. if you carry on using the same water you'll find that after awhile you can drink the water because it's absolutely sweet. Those of you who work on continuous production **at a certain point the process of having salt changes and you just have a small part at the bottom of the liquid, the top liquid has no salt in it. ... if you take a system so far you'll see crystals at the bottom and at the top there is no salinity.** ... (2:36). .. The point has come that you have to move on. **Even the production of H, H2, H3 is obsolete. If some of you move further up in the knowledge you'll understand that. We teach everything. The setup for the Chinese space system is far beyond these things. It's been in the teachings for the past 2 years, I have explained everything, but people don't hear.** I don't teach coded, but to the understanding, and those who understand can use it. In the process of the maturity of space T the whole understanding is very different, because we have to be able to understand the whole spectrum of knowledge. (2:38). **It's beautiful to work with Iranian physicists at the space level, they see everything as a package. They don't compartmentalize into this and that, they see it. .. they see the totality.** You have to understand everything. **Different cultures look for different things, Germans look for perfection, but they forget about the principle .. the Chinese take and have to put it in balance, the Americans don't understand it but they put so much into it so they can show something and then later it can be corrected, even if it's wrong we'll find a way to prove it is right because we showed something.** The Iranians have a different approach to space T. The beauty of the human race, when we mix all we see the totality of it. I stand behind Chinese for peace process. In a very short time you'll see a flight out of China. **I guaranteed them that the Chinese space flight will be done by public (2:40). not in the hands of the government. We are done with governments.** We shared it with Iran, I guaranteed and I'll keep my oath and my word to my nation. But now I have a nation that is the human race. We'll keep it open to all of you. Even when we show it you lot will not understand how it works. It the understanding of space, it's not just making a Gans and it does this. **I can produce anything you mention in the Chinese system, be it from diamond to ofod to free energy, lift, speed and the rest. Because everything is considered in this system.** We designed it, worked on it step by step. Everything is done. ... (2:42). Summer promotion ... (2:44). talks with Giovanni, Naomi will remove pipe from feeding the stomach ... (2:46). (2:48). talks about KF products for sale .. (2:58). (3:00).

(3:02). Promotions of products. (3:04). if they place an order for 1,500 they get these extra products free. .. groups of people can place the orders together .. (3:06). Post a link to Maltese program about Naomi ... [Xarabankbackstage.blogspot.com](http://Xarabankbackstage.blogspot.com) ... .  
(3:12). ... the beauty of it is that the knowledge is shared. How we can change simple things with each others emotion. (3:14). (3:16). the latest meeting photos of President Zhi is not available yet ...

END
