

## 240th Knowledge Seekers Workshop - September 6, 2018

( , )

(:06). Someone asked me to disclosed how much the KF has received in the past 7 days as donations. We went through it and we received an amazing 5 Euro. An organization that costs thousands to run and millions of people benefit from it and we have only received 5 Euro. So we are doing very well ??? .. we can run the operation. On the other hand an organization like this takes a lot of pressure from governments and individuals and we sit here for 15 years, more or less 25 years research and development, except for 1 or 2 private funding (:08). from what I call assets of the KF. What I would like to do today with teams in the background, is to bring new understanding to us as a whole in what we have achieved and where we are now, because sometimes we have to assess what we have achieved and how we have achieved it. ... (:10). ... we need a case of a 35 year old woman, any one want to come in ... Alzar comes in. We need someone to be the mother of the 35 year, in 50's or 60's, even if your a man you can do it. It's just a case to see and study the social structure of it. .. no volunteers .. (:12). Marie volunteers. Let's say the mother has tolerated the daughter at the age of 35, thirty years of epileptic attacks, and let's say the daughter had her first attack at 5 years old, and the mother and father have done everything for 30 years. We need someone to be our doctor. Can we ask John Deven to be the doctor. You're a doctor in a mental institute and you have over 30 years there and have monitored this daughter for over 20 years as a senior consultant in one of the leading hospitals for psychiatric treatment and according to your order you have instructed her to take a combination of medications on a daily basis. (:14). of around 20 tablets per day to control the seizures. How do you feel Alzar to take 20 tablets to control your brain? Not so good. The mother how do you feel forcing your daughter to take 20 tablet a day? It's very hard to make her take them. Doctor what gives you the right to give 20 mentally controlling medicine to your patient as a professor? That's all the understanding I have that's in my toolkit, it's all I can do to help her. Now I need to explain to you, if you multiply 20 times 365, how many tablets per year, 7,300. For 20 years how many have you taken? 146,000. Now we need the General Practitioner. Giovanni would you like. (:16). ... So you are the one writing a prescription for her every week, how do you feel? Very bad, the problem with the medicine is it doesn't know the interaction between all the tablets... John has told you have to prescribe, you have no choice. (Rick says not only that you made \$10 per tablet, that's 4.6 million dollars.) I forgot to tell you. Let's say one of these tablets are specially designed and cost 40 Euro per day. Let's use Klaus he's a good businessman, you be the pharmacist, how do you feel you have a regular income from this girl. It make you a very rich chemist, huh? Let's say you sold to the family 140 tablets ... you must have made enough to buy a house from it, thinking that you make 70% mark up on the medicine or is it 30%. You are a rich guy. (:18). I need a very strange character. Peggy would like to be a strange woman walking on the street. Now what happens, I forgot to tell you, with this 20 tablets to control 20 or 30 epileptic attacks per day. With the medication they have managed to bring it down to 4 or 5 epileptic attacks per day. Even though she is taking the medications she is still having 4 or 5 massive seizures per day. Let's say you are stranger walking on the street and let's say Alzar and her mother are crossing the street and she has a seizure in the middle of the road. What would you do as a stranger? ... if you knew a man who could help her get better, would you introduce the man or hold back? I would absolutely introduce. (:20).

(:24). Would that be against your pride or a break through in the knowledge? I think as a doctor there is a commitment to serve and the fact that she is better is part of the goal, and the fact that she doesn't need my services anymore is okay with me. 38

(:28).

(:32). This is one of Court cases that I am accused of in Belgium. To the king of Belgium I am a fraud for 1,500 Euro for the systems which have given life back to a girl, 35 years thousands of tablet. The reason I brought you this, I told you we'd open this up, the case of defense in Belgium. This is what has happened. No medicine, I developed the plasma technology ?? she has recovered. This is one of the major cases where I have been accused of fraud and deception. Accepting 1,500 to build systems and spending nearly 400 hours with the girl and the mother. And the Belgium government has saved another 30 years of 200,000 per year of medicine. According to the Belgium police, it is a fraud. What I would like to know, if the webmasters can open a channel, how many of you think this is a fraud? We can broadcast the vote. How many of you think this is a fraud, there was no application of medicine, now that you know the Gans technology is a natural process, there is no application of medicine. It sits as a case in the court of Belgium, (:34). I have defraud this family 1,500 Euro which they paid for me to build the systems, multiple systems, nearly 20 different systems had been built as she developed (progressed). Forget about the time I spent and everything else. So is this a fraud case or is this a breakthrough in the world of science. It would save the Belgium government millions of dollars if every person with epilepsy changed. Question #1, is it fraud if someone pays you for systems that they confirmed they received and the scientists in the nation confirms a major breakthrough. You can enter yes or no. The other question is, how many of you think the police have the right to rewrite and submit deception information and falsify evidence in the court. Question #2, In the western world in Europe are the police allowed to falsify documents and get away with it? ... Because don't forget the documentation of the medication of the daughter can be proven very easily. It is registered 30 years of medication. .. (:36). ... And strange enough is that Mr. Red Circle has been there to give evidence that it is perfectly done and is thankful for what has been done. ... Now you can understand how we open the case in the courts of Belgium. If the new T doesn't allow no work of a medicine but is a work of nature, now you can see , you develop the things form natural process. ... we don't blame the family, the police officer has tampered with the evidence, falsified it. (:38).

(:52). Cut this part and send it to every judge and embassy around the world. The woman in the street who happened by when the girl went into seizure was Caroline. She is a criminal, now you understand how justice works in the state of Belgium. Of falsifying documents, never telling the court what was the effect of 1,500 Euro, saving a nation 10 million plus. This is what many scientists like me have stood and many have lost their lives. Going back to our teachings. What we see in our teachings is the progressive development of the same T, there is a progressive understanding of this T, that in the space we need to create a space that man can be safe and can live within the environment that peace in space has to be the peace of mind. (:54). We have to understand that the science of space has to be able to change the atmospheric condition but not the entity itself. This will have a lot of deeper effect on the lie of many of us on earth and in the space. What does this mean if you have not understood. If you go back on one of the most interesting videos we saw from Tom Sellers (hurricane shield), we

saw the environment of destruction outside the dome area, but we saw the containment of life as it is, as it was inside the dome. When we build space systems in space to mimic we need to be sure that, that space can save us, can protect us, give us the continuity of the present life as we are used to. If we understand this and take the knowledge to the next step, (:56). is it correct to be able to establish an environment in the space where we can cultivate land like we did on earth, where we can create flower beds, we call it paradise. The word paradise comes from the Persian word ?? the Iranians made this word to describe the beauty of existence where in the gardens of the house they create a serene oasis in the garden that they could go to and sit and have a drink, tea and play backgammon and the rest of it and they called it ?? mahesh. In the future the word in English became more like paradise. The Persians explained what paradise is. If we go into space we can create such a paradise. Can we take the seeds and trees with us. Do we carry a bank of seeds with us, or do we carry a bank of the MG fields of the seeds that we can create that seed anywhere. Do we go to recording of the M fields, or do we go into understanding that not only we don't take food, medicine with us in the space, we can create the condition in the space where we can call it paradise of earth. This is the next step in the space T development and understanding that we create our own living condition and now having the knowledge we can carry ?? the life in the space. (:58). It is important for us to understand how to establish this. What you see as the damaged area in the background, is (like) the space on Mars or Moon or whatever or any space in the U. It doesn't matter what happens, you can create the condition inside as you have seen to create that paradise. 25

(1:06). If you have the ability to create the brain of a person which is a physical dimension to it. You should have understood by now that the soul which created the physicality is itself part of the bigger dimension of the creation of this universe, and can be replicated. Man in understanding the totality of the creation of the PI from the structure of the neutron soon will come to understand he can replicate anything because now you have a plain canvass, which you call, neutron plasma. Many of you will come to understand this in the future. Some of you will achieve it more and then you'll claim to be the Creator and to be my teacher. And you taught me this, I had better tell you before you get to that point ?? that I ?? have said before. I am the Creator, in the soul and in that essence is the gift which we give. Because if you understand the totality, we are all the creator of the destiny of our own, but one thing we never realized is that be it the STM or be it the creator of the STM, one has to understand the limitation of the knowledge and the strength of the universe gives man one limitation, his ability and dimension of physicality brings demise to the present knowledge of the man in the dimension of existence. (1:08). Man's physical condition which he has chosen to show the existence of his soul in the condition of the existence of this planet in the solar system and within the galaxy and the rest of it, needs to be modified and understood that extends of the life of the man to the life of the U and not to the rotation of this planet around itself. You have to understand how to apply the interaction of the fields. And then by the interaction of the fields, what we call neutron plasma dictates the creation of entity as you like. And those of you who can reach the level of understanding you can even create what I call, plasmatic M fields of the STM, even ?? yourself. This has huge implications and applications, this will come and bring man to a new dimension of understanding. the dimension of understanding, for example, is the freedom of many of our people who we call schizophrenic, who I call beautiful people. When I tell you there are 2 souls in one body and if you can allow and understand what I explained in the past few minutes you can allow to create the condition for the soul to be freed to manifest

itself in the dimension of its own physicality, and then you say to the father this is John and this is Jack and not that the guy is mentally ill. (1:10). In the coming time many scientists will prove this and do this. The word Schizophrenic will be written out of the book of man, if man understands the teaching of today. It's not replication, it's the freedom of a soul in giving it a dimension for it to decide how to manifest itself. It's very easy, you have to create that dome which made this Garden of Eden in the Caribbean. Then the soul will manifest itself in physicality and one doesn't need to kill the father or the mother, and one doesn't need to commit suicide in hiding an entity. The knowledge of the science of today is beyond comprehension, but soon man will do what he says, and will achieve what has been taught. Don't forget there is no Belgium police to make you a criminal. They will praise you as you have freed the soul. It has to be understood that we all carry the same dimension. It all has to be understood that we have the knowledge but we have to understand the knowledge. Many of us, (1:12). of human beings in the coming time will go through these teachings one by one, then you'll understand how everything has been done in progressive element, as you mature in understanding. Gaining momentum for the KF and teaching is coming up. Many of you will claim you have been there, when I started ?? as I said before, and many of you will give your life to be part of the change, you'll devote your life to change the course of humanity. We see these changes on the horizon, it's not for us to satisfy the physical need of the man, from now on it is important for us that the man satisfies his own needs. If you understand and you ?? work through the process of understanding the teaching each one of you should be able to sustain life without looking at the KF. Life has to be part of existence in the U. How you mix Gans's and ?? of existences, all depends on your level of understanding. For 2 or 3 years now you all have been looking for the generator and it has been sitting in front of you. As they say the body of the man carries the energy of 18 Hiroshima bombs, if you can convert 100th of it you have (1:14). enough energy to survive many lives. The process of not being able to eat, to see, of sharing the knowledge through the school of the thought of the STM will be one of the biggest preoccupations for the man for years to come. Many of us will come to understand one thing, the destiny of our soul is in our hands and the physicality will follow. Many of you who understood this go back to the way you made the Gans boxes and dynamic cores and start looking at how your soul has been created and try to create a balanced soul that your physicality follows and then you'll find out that there is no need to feed the man or to worry for the shelter of man because you will make the shelter as you think and it will be there to confirm your existence. One person who said "no" in our voting was Mr. Delanois. That will not keep you out of prison, sir. (1:16). Any questions. Q: John of AZ. If we were to create a SS and we were in a position to help some people by taking them aboard the SS and taking them to a different environment would we interfere with their right to ?? because being on a SS puts them in a new vibration? If you want to go parachuting and you know you have a parachute on your back and you want to jump out of the plane and nobody pushes you out, is it wrong or right? Or you want to have the experience of what it means to fly like a bird. Q: But in some cases they might not know the ramifications of what they are getting into with the elevation of the soul and they might have the choice to say they don't want to have their thoughts changed and become more peaceful, I like it the way it was? I think that is the position of being in the womb of the mother, not knowing if I want to be born or not, but you have already been set up to be born, what do you want me to do with it, do you want me to put you back in or do you want to stay in there until you make up your mind. (1:18). It's the story of the Jewish woman pregnant for 80 years. ... story.... it took 80 years for them to decide who would go first. So you make the

decision of how to go out and taste that field. And this is the story of our life, we don't know what is considered life but ?? would we come by turning the corner on the street we meet the most beautiful soul we would love to live our life with, or would we end up hitting into a car or a wall, or finding the most beautiful dog on the planet and carrying it the rest of your life. Life has consequences on what decisions we make and where we go. You made the decision to turn the corner, unless you were handcuffed and taken with force, then that's a different thing. The freedom of choice is confirmation of existence and we decide how to exist in different ways and forms and shapes. What happens when a hundred of us get on a plane (1:20). and leave our destiny in the hands of a man who just moves a few things and takes off, what happens if he decides to take a hike to the Caribbean it will take you ... with it. Elevation and decision is by the soul and not by who and what takes you across there. With soul we have the freedom to choose the position, with physicality we are entangled within it and we have no choice, that why they can imprison physicality, but they can't imprison our soul. When you are a prisoner you still go to sleep and you dream and you leave physicality behind. If I force you to not sleep at 10 o'clock but make you sleep at 1 AM, keep you awake for 3 hours and then you have different dimensions of the travel in the dimensions of the STM, have I committed a crime or is it their responsibility that the soul has to find a new dimension at that point at 1 AM. Very soon many of you who understand the T and the interaction of your soul with your physicality, and gradually as you balance the fields of the inner soul or the matter state of the physicality of the life with the STM, you'll find out that you will be able to travel through the walls, ceilings, and planets. (1:22). Because through understanding of emotion you can create a dimension that you can pass through, very much like walking in the water, it doesn't matter what it is. Like the way we walk through gases, if you understand the totality of the science, everyday we walk into matter state and we don't consider it. On this planet you are walking through gas, earth, O, N, the magnetic fields we call gravity, and what we call atmosphere. We have forgotten the reality of our existence. How come our soul has decided to be able to walk and go through this strength. If we manage to understand the totality we can walk through walls, the walls we made, we gave it a strength and called it a brick. But if you look everyday we walk through a mass of what we call air. How come we can walk through the air but we can't walk through the wall or a chair, planet or U. It's the strength that we have decided to manifest ourselves to be able to transport ourselves at this strength and it has become so normal for us that we don't even consider it anymore. If we understand that we are now in charge and in control of our own strength through the soul to manifest the physicality of the man and we can control it as we elevate our own soul, then would walls means anything anymore, or would you like to go on the hundredth floor and change your soul and take a free fall for 99 floors and appear on the first floor as if you had taken a jump with a parachute. (1:24). The new science which I taught you has opened many doors, it's for man to elevate his own soul that physicality has no dimension. These are not imagination, many of you have gone through it, but you don't see it, or you have seen it and you said, oh something strange happened. If you think of it, as I said, in the gaseous condition, because we have strengthened our souls in the physicality dimension of existence to the level of a gas. What about if we do it in the level of water, or level of matter state of this planet, would you be able to walk from room to room, or do walls matter anymore. Somebody asked me if I see through the eyes the bodies. I said, no I see the soul. This is what we have to understand, in man elevating his own soul, in all dimensions, the mater states become irrelevant unless we decide we want to match into it. It's the same as if we decide that we want to swim in the water, then we can decide what depth we want to go in this

water and still be there, because do I need to take oxygen or do I tap into the energies which are within the water. These are not anymore something in the story books. Most of you have this knowledge to achieve it. (1:26). But you have to understand how you control the energy dimensions of your own soul. How you create a condition in this environment that walking through the door is exactly as you see, what we call the heaven or paradise or "bahesh". We have to understand that the extension of the knowledge has now reached the extension of the STM. It 's the STM which will take into space, ?? rather than the physicality. Then the soul already knows if I am going somewhere and I have to decide how I am going to manifest myself there. It's very much you live in the North Pole and you decide to go to the Caribbean island on a holiday. Do you take the bear you killed last year and you put the skin on you, or do you have to take some arrows that you can hunt with, or would you go with a bikini or swimming trunks and you take a couple of leaves just in case if there is nobody there you can become Adam and Eve. And then would you go back with those to the North Pole or would you take your skin back with you. I said this many times, how come the animals and the birds change their color, or dress themselves in different colors, but man chooses the clothes to hide himself in different colors. Does it need a way of thinking that we use the same line of understanding and the thought of ourselves in respect to the animals (1:28). as we do to ourselves. The school of thought which you have been taught in the past weeks and months is taking man in that direction in the dimension of the space of the U. Nobody can blame anybody else that you took me and left me there because your soul is aware of the destiny you are going to, it's you who has decided to go with that physicality. Please start testing on the level of the plasma of the neutron, then you'll have a plain canvass to be and make whatever you like. Elevating your soul will become part of the whole structure, then you'll see if you like to capture and imprison your soul in the physicality of the man. You made the swimming pools, now make plasma pools and then in that dimension as you change the PI strength of the pool, you'll see what you manifest yourself as. Any other questions. Q: Last week you were talking about CH3 and Hemoglobin Gans setup that can position a free flow system for help with self healing by impacting the mind/body/soul in one go. (1:30). I would appreciate if Mr. Keshe can share his view on the best way to apply this free flowing system for ttoal healing as previously dynamic reactors in SF with different Gans's was recommended? We don't recommend, we teach, it is you who chooses the way. There are developments in science and everybody takes from it according to what they understand from it. If you start creating hemoglobin you have to understand that you touch the soul of the physicality of the man. But the soul of physicality came from the collective soul of the entity itself. If you take the knowledge a step further it's very easy to understand that the hemoglobin that you create, it is you who gives the soul to it. That is why that hemoglobin will fit to any bloodline A, B or whatever, because it is a matter physicality and not a soul physicality, so when you receive it you give it the soul according to the soul of yourself. When you get a blood transfusion from someone it carries there soul with it. The process of what you carry with, what I call plasmatic hemoglobin, it is you who gives the soul to it, so it fits anyone. It has no dimensions or characteristics, it's you who gives it the life and soul, and in that process you become the controller. (1:32). It's part of understanding the totality of the knowledge, not just pieces of it. When I teach you about free flow it means you have to understand that it is you who gives the soul to this matter existence, that's why it fits any of you. I can inject that hemoglobin in a dog and it will become the soul of the dog ?? to fit him. I can eat and drink it and in the transfer of the energy I receive what I need. You can inject yourself with it with type O and it will have that characteristic of type O because it fits

your soul. It fits everyone. This is why the new medicines of the KF which will be promoted by KF in a very short time has this characteristic and they are so effective. Because we give the energy of the element, it's you who gives the soul to it according to your need. There is a beautiful saying in Farsi of Bahualala, but man reads it in the matter state. It says, ... It means whatever happens we do. But it is the destiny which is the soul itself that will take the shape of the man. ... it means whatever does he'll do, not in the name of the Creator, it's in the name of the STM. I give the blood and it gives the soul to it and it takes it. (1:34). The direction of that soul. It is part of our work and the teaching of the soul. So if you create that hemoglobin it's a blank canvass. It's your soul that gives it the dimension and the strength and even you don't need to carry that, because if you think a step further, even the soul is the create of the body. Then you understand, I made man in the image of Myself. I made the soul of my physicality in the image of myself in the dimension of the existence of my soul. Any other question. (1:36). Q: .. What one needs to consider for the lift concerning where the ground stands? What do you mean? If you have a system and it stands on the ground or on the table what do you need to pay attention to regarding the isolation or influence from the ground system so it can manifest its full potential. You asked this question in a different way last time if I remember correctly .. it's the same process as before, you don't look at what you have outside, you look what you have inside. This is the way that many of those who work in the space T have to consider. Why are you so preoccupied with outside, it is you who controls the inside and then you decide how this system interacts and positions itself in respect to totality. If you create a craft and you make it fully attached through down to the ground and you say okay I want it to fly, what do you think might happen. If you are knowledgeable the screw means nothing because (1:38). you are still detached, you decide that, that part of the planet becomes part of you. If you are trying to move the physicality then you get a ship wreck. You get the box torn or the system torn apart, you have to decide what are you creating inside because you're a ?? independent entity, if you are sitting outside and you are trying to control the inside, then you are in trouble. The space T in the spaceship dimension is not a remote aircraft carrier, that you sit outside, a drone, with some other things you shift up and down and a button you push and it goes. If you give a soul to it, through the dimension of the soul you can request from it, this will be nice for me to see. 57

(1:42).

(1:44). Q: Stephania

(1:46).

(1:52).

... All the lights, the speed as you go down they're all the same. (2:04). It's the guy who has decided to put a red cover on one and an orange on the other ... while in essence the light that shines inside is the same. It's us who has put different shades on this light and we call it the STM, and one light sees the other, it doesn't matter what you put on it. 31

(2:08). So with a Stem Cell, in so many ways, you're taking another person's fingerprint. But in a different shape, whether you take a kidney or a liver, a stem cell is the same, it has the fingerprint of what created it, or what came out of it. Any other question. Q: In the Mozhan you used to say to us that when we can change the color of our eyes then we are in control of our soul. Then you said before to be able to change the intensity of the fields, that's why I thought it was to change the color of the eye in that way is also to

be able to control the intensity of the fields ... to be a plasmatic or to be a material ... was that the reason you told us that? (2:10). In so many ways, yes, because you allow the release of different strength of fields and inevitably it leads to different colors and length of the physicality, or what you call the plasma fields of the eye of the man. When you look in the evening at the horizon you have a sun, and as it goes through different strengths you see an orange sky or red or whatever, it's the strength of the fields. So it is the same when you learn how to .. and the position of the eye and the STM .. this is what is never happen, if you allow the passage of light 49

(2:14). Q: Fernando has a question about the soul and addictions. .. problem with microphone ... (2:16). Q: Can we obtain the SF using 3 fingers, is there any link with this SF and the soul? I don't know what you are talking about. I did that and I found effectively I can feel fields using fingers, it depends on the distance from the ground. Is it possible to link the field from the hand to the soul? (2:19). Any fields coming from the body is connected to the STM. What you said about seeing a change at a certain point, we see that in the running of space reactors, change of dimension according to the position of the strength of the field. If you can show it by video you'll see it is another configuration of position in respect to distance. I presume if you use slow motion you might see totally a different dimension in the interaction. You have a field, if you change it to Cu would it be in a different position, if it is bone it's another position, or does everything change at a certain distance. (2:20). We have known this for some time in our research. One of the parts of space T in various stages in Iran, we face something in this position that we could do some tests on some tables, and move to another table that was at a different height in the lab, we couldn't understand it at that moment, but in the change of position we start to see it more and more, at that point what you are talking about, we decided to get rid of all the tables in the lab and the tests were done on the floor, all the flight reactors were sitting on the floor, because in how and where we positioned reactors we noticed what you were trying to explain, and this is part of the teachings, systems changes direction, but you have to understand it literally explains the status of the mind and the STM at the point of the transition where it changes. You change see this physically in the space reactors what you are explaining. Any other question. We have an experiment of CH<sub>4</sub> inside a CO<sub>2</sub> box with PI fields. (2:22). This call goes to the Chinese community of KF, as we told you we are trying to establish the factories, please keep in touch with the KF structure through Shinzan Lab. In the next 2 weeks we start the recruitment of KF K Seekers to work in the factories. This is a clear understanding, KF has entered the manufacturing phase, we are looking next 6 -10 weeks to recruit a number of KF K Seekers who are seeking work to work within the factories. Please get in touch with Shinzan in China. The factory has been found an advanced site, by the time its ready. ... the first position in China is near Beijing. ... (2:24). This is a large scale operation, we're talking 10 - 20,000 square meter space. ... we are looking at 500 to 1,000 people on a 3 shift basis. .. there will be training and teaching within the factory structure. ..

(2:26). .. Q: Fernando. ... He wants to know about the soul and the states of motherhood, (2:28). (2:32). .. he's mixed up and problems with connection. He knows the souls are eternal but what is the relation with the soul and religion and the state of motherhood, that's a bit mixed up in his mind, ... (2:34). He wants to know, we have a solution for addiction, he has a problem with addictions and has been treating himself, but he would like to know what is the recipe for curing all addictions be it sugar, anxiety, or different drugs? ... he would like to know what is the recipe to assist all addicted people to cure them? That was presented by Mr. Keshe in 196 K Seekers

Workshop. (2:36). ... (repeats) ... (2:38). How do they control the emotional part of the addiction. ... Can the person go back to his relation with his mother to be able to find a solution to the emotional part between his mother and the addictive person. .. How can we tell these addictive people to go back to their relation with their mother, this was mentioned in the 170 KS Workshop, but what recipe should we use to treat these people. (2:40). ... He has treated many people with illness be it alcohol, wifi games, other addictions. He wants to know the recipe to really get down and treat himself. And get rid of them. (2:42). ... he has good results treating others addictions but not his own, what protocols should he use. First of all ask, is he a medical doctor? No. Is Mr. Keshe a medical doctor. Many times we have said he doesn't answer medical questions. We don't talk about curing, healing, etc.. We don't use those words at KF. We can answer about processes. This is not fair to Mr. Keshe because he'll go out of his way to answer it. (2:44). We went out on a limb to answer Andrews question. Thank you Rick. 15

(2:48).

(2:50). ... Ella presents KF Plasma Times. This is the 3rd edition Sept 2018. (2:52).

(3:00). Article on "better sleep patterns" using Gans patches stopped sleep interruptions in the night, (sleep straight through). .. Looking for Host of the private teachings in English. That's it for this edition. ... (3:02). Every second Monday of the month we have a public testimonials meeting... (3:04). Anybody can come forward and share their experiences with the T. .. As many of you know KF is interfaced with governments, we have been successful in many cases where governments are interacting with KF scientists. ... Farming, Health and Space.. Malta is requesting help in producing large amounts of Gans (30 to 40 liters) (3:06). ...

(3:08). .. Ask your government what you are short of, what do you need, and test the T. ... KF has broken through with the governments.

(3:16). ... Next Tuesday I am meeting with the Prime Minister of a nation (3:18). that KF has a solution for, it's one of the leading nations in the world. On the 12th or 13th we'll have an answer, because they tested us for 3 years. Now we are in position to move. We are in one of the leading top 5 nations in the world of how KF has change the position of ?? By offering a solution and 3 years of testing we are on the table. We have reached the presidential ... We ask the support from the U Council for this, it is fundamental. It's one of the biggest moves in KF very young life, That governments have asked for it and it has been delivered, 3 years testing submitted. The Minister and Cabinet will make a decision and it will become a blueprint for the rest of the nations in Europe. We know we'll get it because we have already received the pre-orders for it. Because nobody could show the solution. We have been asked not to discuss the solution because it's fundamental in Northern Europe. But on the 11 and 12th makes a decision on the KF future in decontamination. (3:20). I will try to be present in the meeting with the government a representative of my team will be there on the 12th. If we get the approval, then it has to be decided if government can afford such a huge change. Then we go to the next step. Don't go and offer a solution, ask where are you loosing money and let me see if my foundation has a solution. Q: Who to contact if we learn of a need? We have our webmasters in the background. It has to go to the head of the KF, Ella. .... (3:22). For problems in the nation it should go to the U Council. ... Again for Malta support...

(3:24). Q; Jalal asks about contacting the Embassies about finding out the countries problems. (3:26). Contact web addresses for UC and Malta Gans support. ..

(3:28). ...

(3:30). The CH<sub>4</sub> Experiment presented. .. Before you start, why do you want to produce CH<sub>4</sub>, what is the purpose of it. Because I think CH<sub>4</sub> can be produced. But what are we going to use it for. Maybe I can use it to create water, I think it is one of the methods.. We are Chinese with a small team. (3:32). ...

(3:36).

(3:40). Expand this picture, CO<sub>2</sub> on top and CH<sub>4</sub> underneath ?? ...

(3:42).

.. you have not produced CH<sub>4</sub>, you produced CuO<sub>2</sub> and ZnO.

(3:44). Because the shape of the container you have chosen enforces CuO<sub>2</sub> and ZnO..

(3:48).

(3:50). ... Thank you. For the Chinese community. I will make a conference in Beijing, limited to Chinese Community KF, in the next 2 weeks. (3:52). ... this is to bring the

KF Chinese community together. For the Chinese community only 2,000 seats. (3:52).

It will set out for the future of the KF which is very bright, we have achieved a lot.

(3:54).
