

242nd Knowledge Seekers Workshop - September 20, 2018

(,)

(:06).

(:16). ... (connection) ..

.. Because we look at the manifestation of man at the point of birth, (:22). but in the dimension of the U we look at the man at the completion of the main brain which the STM established. It's mature, it recognizes its environment and can respond to it, grow according to it, and it reflects and indicates what he likes with it. Is it time for us to go back to the point of birth and find the communication language we were born with and we forgot. Because that language becomes a lower level in understanding the language of the U, galaxies and the rest of it. Because it is all the same principle if you remember the way I used to draw the spiral that used to go from the center out, the same goes with the language of the U, there is no difference. If you look at the whole structure it's still the same. He draws a spiral. If this is the totality of the languages of the U, man's language is somewhere here (opening of the spiral). The galaxy soul language is deeper inside, the U is still deeper, the Unicoise in different strengths still further, at the center is the soul of the Creator. Everything from it is created according to the strength. But if you look it all is contained on the same line, on the same strength because there is a common denominator of the same strength. As much as it communicates out it receives back in the strength of the soul of the ?? Creator, (:24). non-tangibility but in the dimension of the field strength of the U. We come to understand that man does not need the new language to become passengers of the universe, when we put man in the Pl of the U and we create in our SS the dimension of the Pl, according to the neutron energy level of the Pl our souls speak the same strength, it has the same strength and thoughts. Will it be surprising if you meet the man or a creature from another planet who works on this dimension and you know his language because he speaks the same as you. He communicates with the strength of the galaxy, and then maybe you have to learn something from the strength of the U, you don't understand this language. Then you have to go to the inner of yourself to find a strength that is higher than he is made of, that he can communicate with, and what you can convert from his to yours that you can understand him. The other point comes, that when we come to these dimensions would we see the people of these other dimensions, would we observe them, not seeing with the eye of the man but seeing through the STM. If we go back to this understanding and start measuring the strength of the emotion of the man, we'll see that many scientists have gone to that point, are testing and developing to test to see the reaction to measure the wave in what they call the frequency or whatever, because the wave of the soul in interaction with the material status of the brain needs penetration, and that penetration on ?? all other frequency, or hertz, or whatever you put to it. (:26). But at the end of it, it's Tesla, what we measure is the strength of the field. Then when it interacts with the matter state we find how it penetrates through it, then we have given it the name of hertz or frequency. What if you understand in the totality of the knowledge of physics and if this is the MG field strength. When it hits a block, it doesn't matter if it's the brain or Cu wire or whatever, it has to penetrate. If it can't go through it, it has to find a way to go, and at certain strength it can get through. It can get through certain things and you call it a frequency or wavelength. Now we can measure this. Scientists are developing a way to measure this, an emotion or feeling, the response. Rick I sent you a picture. If we look at this picture we'll learn a lot and latter on I'll explain to you what this picture is.

The knowledge of the scientific world is advancing very rapidly, but we are going to the other end, we have to go opposite, to the strength of the STM. If we take the brain and this being the STM (draws a tiny dot in a circle). Our scientists are measuring in different depths these wavelengths, frequencies. Then they say these are the emotions, this is the interaction, this is the response to recognition of life and position. (:28). What is interesting if you look at this picture, you see what we call the electrodes on the brain. Every single thing you see on that (helmet) is one sensor which measures the length, strength, and frequency or whatever you want to call it. Of the brain of the person underneath it. You see the computer on the table in the background and the screen in the lower picture. There is a video recording of this. This head unit which is full of electronics measures every frequency and wave produced in the brain at a certain point designed by the Israeli scientists. The scientists of Cambridge University wrote the programs for the programs of the computer in the background. The 2 groups of scientists plus another group got together to assess if this brain of this person works, has it got emotion, does it respond to reality and facts, does it got recognition. Does he recognize his name. And all the answers are yes. We have advanced in the knowledge so far, that if you see there is a cable, heavily supported, every position of this brain, it's about 150 electrodes on this helmet. It's unique, it's the first time ever, it brought the Israelis and Belgium and Cambridge University scientists worked a long to do this because they could not have a position that they could test, and this was their test. (:30). This is one of the most important tests that they could confirm that the person is alive, recognizes his name and has a function and alive. If you look at the shape of the hand and the face, (you can tell) this person was in coma and now has been brought to life. The most competent scientists in the world confirmed life, existence. She sits and talks. She was a coma patient that was recognized as dead and for the (life support) machine to be switched off. It took less than 14 days of the KF technology to bring her back to life. And it is confirmed by the scientists. It is so advanced that it patterns out the color of the brain, all the data by pictures and color. At the same time they used a MRI and CT scan, are available and it shows that the brain is reactive. And they had never seen this before. Do we need to reach the level of the STM to bring the rest into operation. We have seen the advancement of completion of this ?? Naomi. It is so radical that nobody has ever seen it before. According to the scientists at the Belgium center where the tests were done, with the agreements of 3 nations. Actually the governments had to be involved for these tests because it was too advanced. The reason the Israelis did this was to confirm that the KF T was so complete, that Sharon the (former) Prime Minister of Israel could be brought out of coma. And they concluded, yes. If you go into the history of Sharon he was moved to the home after this test. But it was blocked by the Israeli Prime Minister because an Iranian nuclear physicist's technology could not be used on a Jewish leader. (:32). He was below. Letting a Prime Minister die was more important than the name of a man and the nation of the man. This is why we make One Nation out of man. What is important is that this woman is in court against KF and they haven't told that she has come back to life. The whole case is pinned on this girl. She was certified dead on arrival with just the heart beating. I gave her life back to her at no cost. A month, 14 days, she was eating and everything. We have the communication from the mother that it says, the Israeli government, scientists and the Cambridge scientists are coming to see, Mr. Keshe has to be there. And then the police has changed it that there was something done wrong. This is a major breakthrough in the world of science. The only person who has returned a dead person back to life is Christ. And I have done it twice. I am double Christ. Naomi and her. In the eye of Belgium I am a criminal and in the rest of the world, the most intelligent scientist who knows how to

bring life back. We will show these as evidence in court. The scientists of the world have confirmed, we have a full dossier. Now we presented you the third case. Mr. Dellenois destroyed evidence not to show one of the biggest gains in the science of man, that the world scientists have to confirm it. The funny thing is Red Circle has taken a video of the process of when she comes back to life. And the beauty of it is, everything is recorded. (:34). Scientists from Cambridge and Israel will give evidence in the court. The biggest achievement for man to be able to give life to a dead body. But at the end of it, where did the scientists build the systems. We have measured and developed T that we can measure the wavelength of the brain, but this wavelength comes from somewhere. It comes from the center of the brain, from the STM. Do we need to make more complicated systems to go inside and outside, to go within the structure of the brain to find the frequency, wavelength, the Tesla strength of the STM. That we can put man in the space. How far are you as K Seekers prepared to take this a step further. How far are you prepared to create the condition that you see the operation of the STM within the confinement of one of your reactors? Two groups are working on it, the Chinese and the Americans. One group has fallen out, they are going in a different direction of the research. One group has gone to the movement of the fields of this U in the dimension of the soul. We have 4 groups heading towards the space development, physical, non-tangible, and the soul. (:36). We need to because some of you according to your understanding will take flight according to what you feel comfortable with. How close are you to your soul that you can trust the soul of your pilot, or you prefer to be in a tangible dimension and travel within a SS. Or some of you decide that I am intelligent enough that I want to travel within my own soul across the U and manifest myself as I feel. We have to understand the science and knowledge of creation. We have to confine ourselves within the dimension of the U and not in the dimension of the skull of the man. If you look at it as you go further out you come to a different dimension of tangibility. What is interesting, we have to take this further, we go into the dimension of life, of feeling, of physicality. How does our physical existence in the matter of the bones and the flesh come to exist. If this is your soul, (:38). and it radiates out, and according to the strength of his position becomes the brain of the man, then at a certain point all of these strengths, all of them, become to be the same. And it makes the boundary of the shape of the brain. Very interesting. But there is an interesting factor, this brain is contained within the skull, which continuously showers on the brain Ca. Very strange that the world of science has never sat down and thought about is this little chap. How come everything at the highest level of Ca gives the shape of the brain. And how this Ca is converted and its position in the structure of the soul into the bone structure of the man, that then the totality of what you call the flesh of the brain, becomes the flesh of the man. Because every spot on this flesh (in brain) has a correspondence on this flesh (body). This carries the STM at the strength of conversion, and this (body) carries the strength of the planet to the point of the conversion. (:40). How much more can I teach? How ignorant the man is. If the collective strength of this (body) at a given strength creates (in the brain) the emotion of laughter, joy, the whole physicality reacts to it. How much more, what else do we need to understand? Then when you enter another dimension in another position in the U with a different strength, now the shape of the same (in the brain) and the strength of conversion will give you a different shape, but the soul is still the same. ?? what you call the pain of the man in respect to the condition of the fields, to matter condition of the existence, will manifest man in that dimension in that shape. (:42). But do we need to understand more or do we need to make systems to find the mystery of existence. Or is it that there has been no mystery, it's just that we never understood. Because it's the same replication across the

U. Those who come to see man they appear in the shape of the man because the conditions of this planet according to the manifestation, creates this condition, maybe with a slight deviation, as we see one is black, white, yellow, short, tall, blue eyes, which is the reflection of the energies of the STM in the dimension of physicality, with them trying to adapt we might see them with a little of a green eye, with a break in the middle, or they might be a bit greenish, or yellow. How come we don't mind if we see a black man or a Chinese or an American, and then suddenly when we see another color from another dimension and position in the U that they are aliens. Are we aliens to each other on this planet. Then it goes back to what is the language of the soul of the U, and are we now that we understand, the operation of the STM, the reflection of the soul of the Creator. And that ?? here. (:44). If it took the reflection of the soul to manifest ?? itself ... if it took from the strength of the STM with the interaction of the physicality of the brain to create the soul of the finger that in reaction we could see the finger in its dimension of motion, what would be this if I put this here, and then this is the space gap in the U, and this point of manifestation is the STM which leads to the creation of the man, and this is the soul of the Creator. It has the wavelength according to interaction has become the wavelength of the manifestation of the physicality of the man, so shall be to the strength of the soul of the Creator to the creation of the STM. I made man in the image of myself in the dimension of the STM. Then the soul decides how to manifest itself according to its environment to confirm its existence. But the question is, in the distance between the STM and the point of inception of the soul of the finger, there is a media and there is life, there's an existence, that's why in interaction with all of this is reduced to this to become the soul of the finger, on the brain. So shall be the existence of life in the dimension of the physicality of the U, it doesn't matter how many universes and how many universes and galaxies you put across. (:46). Man shall not be repeated in another position, maybe in a slightly different, another dimension. The STM even being the same, the physicality of the man is unique according to the environment which he is created. Then it comes, do we need a SS to travel to the dimension to the soul of the Creator. If the man finds the riddle, of from his soul of physicality, his brain to his soul, that will soon to unravel the path to the soul of the Creator. Many races for millions of years are still chasing it, because they don't understand the past 2 minutes of teaching. We need to understand more, about our own creation. We need to be able to comprehend life in a dimension of the soul and not life in the dimension of physicality. (:48). I see many eyes, but I see none. I see many lies, but I speak of none. Can the physicality of the man lie to the STM. .. ?? Today's teaching is very short, but understanding of it will take man billions of years. None of you will be able to jump from one to the other, as you have to discover, unravel the secret of your own creation. It's important for many of us to understand our inner self, our inner being which is our inner soul. It's the essence of our creation. I took you to the physical condition, back to the energy, back to the interaction of the fields that leads to the creation of the soul of the SS, and if those who are advanced enough understand that this leads to the creation of the soul of the Creator. That it is you who have created it. And because you have your thoughts in it, it will carry part of your soul in it. Our Chinese guys are battling with it. They see it but they can't reach it. Our American friends are pushing it, but they don't see the reality of the existence. (:50). Everything has to have a matter dimension, but everything has to have a soul dimension, then you succeed. Then you'll be able to create what you set out to create. The history of man is very short compared to the life of the U, but we have to understand the totality and not partiality. We have to come back to the essence of true creation, not the creation of physicality. As I keep on saying in all my teachings, in the real world of the teaching of the KF, theology is part of

physiology, without understanding the creation of the soul you have no physics. They tell me that as a nuclear physicist I have become atheist, but (from my point of view) as a nuclear physicist I have come to understand the true essence of creation, without prejudice. Being able to see and understand the truth, and to accept that you can see more of the truth, that you can unravel more secrets of creation is the job of a nuclear physicist. A scientist without prejudice, color, race, knowledge, universe, it is all the same. (:52). Any questions? Alzar Q: If you are the Creator, there are 7 billion plus of us, for example you created me and I go crazy, how would you as the Creator feel? Nothing, you are just another cell in the brain of the man. Just because one cell dies doesn't mean the rest of the brain has to die. Or if one dysfunction it doesn't mean the rest of the brain has to. Q: If I do something crazy doesn't the Creator feel? If I presume many of you suddenly do crazy things He might feel a pinch somewhere. It's like a brain hemorrhage where suddenly billions of brain cells suddenly destroy themselves. If one dies it happens all the time, there are replacements. It is known, there is a saying in the U, that the time has been that even the Creator has cried for the condition of what we call existence. There have been massive incidents that even the soul of the Creator has felt. (:54). Very rare when the galaxies and universes clash in a massive, what we call, an unbelievable scale, and as they are the same as every cell of the brain, and massive destruction, the soul of the Creator feels. Many times tears in the dimension of the soul of the Creator. It does happen but it's on a very massive scale. Q: When I try to follow my breath and feel, it doesn't go to my chest, it goes all the way down to my lower abdomen ... how important is this emotion connection to the soul and everything has to do with the abdomen. When I feel the movement of energy I feel the heartbeat and the chest and there is some movement in the lower abdomen, but I don't see any movement in the brain, but I think of the brain as a leader, how important is that? H1 carries its own connection. It's very much like when you fall in love, you have a bit of problem in the heart, and suddenly like a butterfly in the stomach, what has the love to do with the stomach, heart and brain? Everything goes crazy, nothing works. Q: Last time you spoke about alkalinity and acidity, (:56). Acid was M, like H likes to give. So the soul is a giver, M. Ah, the soul is a taker also. Okay then you come to the heart and 2 lungs which is the base of it, if you call it a SF. Heart and lungs are the condition of physicality. (I am trying to understand the heart, because the soul can go ... I work on the soul as Infinity Loop to the heart, then to each lung ... how can I understand it mathematically? You are in the medical teaching and there is part of the first 31 teachings we have described this in detail. The connection between the heart and lungs has a connection to the soul and creation of what we call, other parts of the structure of physicality. I explained this in detail if you go through the medical teaching I think you'll find it in there. It took one full lesson if I remember correctly. (:58). Q: When the soul radiates and not acting from physicality, ?? is the soul good, I mean something extraordinary? What do you mean? You see you can extend the strength of the STM beyond the physicality of the man and it can embrace with it. It's very easy to do. But man has a fear what's going to happen to his physicality somewhere in the background in his brain. We call it, fear of demise. If you change the condition you can create a condition within the STM, what I call, love of the trust of existence. 52

(1:02).

(1:12).

(1:20).

(1:22).

(1:26).

(1:32). Questions from live participants. Q: How does one know if one is one of the good people? What happened at birth that 2 souls created at the time of creation, could one be the one created with the interaction of PMF and of the sun and earth, and the other one was a volunteer soul to update one more time in the physical dimension? I don't know. It all depends on how we look at it. When we are on earth we are all conditioned to the MG field of the earth, it doesn't matter which dimension we come in (?came from). This is where the soul has accepted the strength field of. (1:34). And it doesn't go to manifest maybe one half of me is from planet Zeus and the other half is from this planet. If you are from planet Zeus you manifest yourself in a different dimension and strength of MG field of the earth. 30 ... (1:36). Shows 129 Tesla videos. (1:38). shows video ... (1:40). (1:42).

(1:50).

(1:52). ...

(1:54).

(1:56). ..Q: You have manifested many times that electrons never separate from their protons, is this true? We can never separate electrons, it doesn't matter where you take it, it still has a M field connection. It's like you and your mother, can I separate you from your mother if I take you to planet Mars. Do you forget about her, do you have no connection. Once a M field is established it is always there. Even your mother has connection with your children let alone you if you go to planet Zeus, because you are the intermediary. (1:58). Q: So what we have on our electric cable is just the manifestation of a M field going around a cable? More or less, but you have to understand more, why can we one on one end and get it on the other end. What causes this and what is the motivation? Is it giving or taking more that it creates that flow. We are always looking at the flow. As I have always said, if you call it gravitational, eddy current, or what Dr. Miles called it, scalar wave, it is all return .. to be able to go against. It's very simple, I explained this to school children in class one day. Maybe you intelligent people will understand much better. If you all, a couple hundred of you, are going down the road one way, shoulder to shoulder and you are all marching in one line, and now comes John marching from Mexico, and decides to come back against you lot. ... (break in connection) do you think that crossing you 100 people, then you have answered yourself, in respect to G and M field. G fields to the source always takes more energy because you have to break through the rank of what is coming towards you. It's like you are swimming against the wave. If you swim with the wave you'll go faster. You need more energy to swim against it. But the human race has only used the wave that flows down and never looked at what comes back. (2:00). There is more energy in it, but you have to know where to break it. We look at the pressure or what we call the potential difference and the drop, we don't look at the potential difference on the pickup, and this is where the science of man has hit the wall. We ignore it because we have never been taught to look at it, because the people at the time, the scientists never understood themselves. Now we have to, because otherwise, if it takes you 1 minute to go to the moon, then how long would it take you to come back ... if it takes 1 hours, or 100 minutes to go to the moon, how long would it take you to come back. If you swim against the M flow, 400, but if you learn to flow within the reversal current, G pull of the earth, how long? 10 seconds? Man has never learned the truth about the space T and you are still working in the matter dimension. The minute they realize, this is what I

explain just a few minutes ago in the warning to the American government. We don't need to do anything, you already send the systems on, we just feed through your own line. Because you are calling us in, and we'll respond respectfully. When you open your lines of power and energy (2:02). you are calling me. It takes you 1 hour to get me, I get you in 10 seconds. You is going to be disabled? You because you don't have it ... then you travel the rest of 1 hour. People don't understand, but soon they'll understand. If I get involved in the matter of peace to stop discrimination, there will be no weapon left. I explained this to some military people very recently. Give me 10 minutes and there will be no battleship in the world that can fire. And it sits within the M field structure of the planet, you don't need to do anything. How long does it take for earth to change its polarity of M field? How come it takes the sun 11.5 years to 59

(2:08). ... Q: What role does the soul play in conditions like cancer, as the previous teachings talk about 02

Q: When you talk about understanding your soul, (2:18). we all ?? missing. If we want to understand our soul we really have to question everything we do ..? No you don't need to question! Dr. Alzar this is the problem, you don't need to question. (everything we believe in we think is good ?? ... since I have been with you.) It takes too much energy, why do you want to eat the food by putting it around your head before it gets to your mouth. (Mr. Keshe when you stop believing in anything and everything, you just start living freely) No if you are that ... then when, what is, when you stop believing in everything, so you don't believe you exist either. (No, ..) You have to understand the strength of the soul of the Creator, that's the secret of creation. And in what strength in respect to that you want to manifest yourself. There is nothing else. This is the ultimate goal of every soul in the U. How much ?? is there ?? between Him and me. What's the use in not believing in everything. Do you want to deny your own existence? Throw away ??? (Nothing, I am not saying I don't believe in anything, for example when I feel, when I see ?? the ?? off me, it's just like the experience of it is exhilarating. It feels good.). Yeah, but if you go to that step, go a step further, look at the soul of the Creator and your own soul, that is the next step for the development of those souls who mature. Now you are looking at the dimension of your own physicality and your soul. The true being looks at the space between his (2:20). soul and the soul of the Creator and they ?? the light, then whatever happens in physicality is irrelevant because the ultimate goal is the elevation of the STM, and when you get elevated a little bit from your physicality and you ?? die ?? some little energy comes up, but the true essence of elevation comes when you understand to the next step. Are you busy with this side bigger, or are you busy with the essence of the soul of the Creator. It's the same way as I said, if you have a cancer and you go and get a chemotherapy, or do you go to the brain and sort out the problem there. Now the next step is understanding the elevation of the STM is much easier through the soul of the Creator then the man himself. Man doesn't want to understand this, he has a fear, how can I. The truth is, I am. You can throw everything away but you still are working in the dimension of the physicality of the man. The next step for the man to understand is the space between the soul of the Creator and himself. It's like you are that soul with the finger at the end of the brain ??? in the middle are all the brain tissues. Now that you know you are, were made of, the ultimate goal has to be the position of the STM and the soul of the Creator, then you can become whatever. What do we say in Arabic, it tells in the Koran, Mohammad refers to it directly, Christ refers to it. (2:22). We are afraid of our own physical being and attach everything to it to let it live. Now that we know that the living and the life of the man and the physicality depend on the STM, and you know your soul's connections ?? with the

physicality. I always say I am ashamed to be in the body of a man, it's nothing but shame because you have to battle it everyday. Whereas when you work with your soul and the soul of the Creator, what's the matter, what's the problem. The U is your oyster. Here you are satisfied only with the oyster of this galaxy and only suffering. Any other question. Q: In ancient literature there is a description of an energy called Qi or Prana, the Life Energy or other terms flowing through the human body and other living beings, how can we understand this energy from the plasma perspective? ... I lost it, can you repeat. ... (2:24). ... There is a funny thing with the creation of life on this planet and a lot of times man never understood in essence, the true essence of it. It's like when you have like a Tesla and you put a pole or a beam in the ground and you have a current flowing through it and it creates its own M field. In the life of a man that pole is the spinal cord of the man. If you look at the structure of the spinal cord you'll understand how the energy flows, even with the animals and trees, plants, fish. If you look at the bottom of the structure of the man when he stands up, it's thin. As you know, as you wind up more and more M fields of wires together you get more powers. (2:26). You get more and more neural systems coming in. If you look at the spinal cord of the man it's a central column field. We see one half of it as that physicality of the man, which is us on the front side. But these field forces carry beyond you. It's equal. You have put the dimension of physicality of the brain and created the face, arms and legs. What happens to the other half behind you? Why do we decide to have a flat back and different shape in the front? Why do we have buttocks? Have you ever stood still (and wondered), where does the energy gather and goes in? And it starts from the planet. When you speak about Qi or energy in the U you have to look at the spinal cord and the dimension which the man never understood. How come half of it can be directed and make physicality, what about the other half of it? When you make a coil does the field only reflect on one side of the coil or does it circle around it. Your spinal cord is a dynamic situation. That's why you are successful with plasma systems when you put patches on the dynamic reactors. If you look at it, and then you'll understand the process of the Qi and energy elements. I used this a lot in the process of the applications of life. (He draws) This is the brain and spinal cord. (2:28). How do the fields go? If you direction it, it gives you the breasts, legs, whatever. When you make a coil, can the fields only detect this way? What happens to the other side of it? If man understands this part of it, you can bring a huge gain into the life. And what you call Qi, goes through here (spinal column). This is exactly what happens here (?back side) but we are not aware of it, because we never looked at it. You make a (Pain) Pen, a pin and a coil, you make a transformer (draws a coil around a central pin). This is what it is, if you look at the spinal cord it's not like this, it's the fields which they go across each other, electric current goes through them. Here's conductivity, how come it only appears on this side, and the back side is flat. Just because here (front side) you branch off it, you don't branch off it here (back side). Have a look next time when you think. In the dynamic systems we call up on these (?), because it's a balance. This flows and this is the opposite, this gains or this gives. This is what the course of Qi is. Because you look at the physicality all the time, and you see the aura, you make a measure of this (?) then you'll understand the true meaning of the energy of life. It's the most simplest things but human beings because they only look at the face, breasts, belly and legs and they think that's life. Why are you .. why do you have that spinal cord? (2:30). Where is the other half of the story? Do you remember the first thing they taught you in the M field, left hand and right hand? When you measure Tesla around the coil do you measure only on one side, what happened to the other side, or is it the ignorance of the knowledge of the man. We don't see anything, so nothing exists. Man has a lot to learn. Any other

question. Rick says, what you just said reminds me of an experiment we did with a small group many years ago, we made the room completely dark and everybody used their back as a kind of sensor instead with eyes or hands, it was to use your back to sense the other people around you, their position and so on. It was quite interesting. Normally we don't think about the back ... (2:32). If you want to understand it ask your lover to hold and cuddle you from the back, and see what fields you absorb about yourself. Do the same in reverse, hold your lover from the back in the essence of understanding the fields, and then see what you'll feel. Then you'll understand what man has been missing. You have to accept the status of love which means giving. How much I give, what is received. I do this a lot, not out of curiosity, but knowing that it can be done. You think what they think you think. And you can think what they think. They can lie to you with their lips but when you hold them in the back you can see right through them. 47

(2:38).

(2:40).

(2:44).

(2:46). Goodbye for today.
