

243rd Knowledge Seekers Workshop - September 27, 2018

(PROCESSING OF HERPES, VIRUSES in SPACE: In space even our soul can be vulnerable to the fields of the universe which can attach themselves to it once they are at that strength of it, The atmosphere of the earth absorbs most of the radiation coming from the universe, Man in the space will not die much from bacteria's and infections but will die of viruses or energy packages which have the strength of the DNA of the body, He will have more problems from viruses in the space then anything else, To handle viruses we have to measure the strength capacity of the virus and build a system that drains it, We have to look into the elements of the universe and not of this planet to understand the strength of them, ,).

(:17). ... As part of our teaching in being able to understand and work in the parameters of the U, we come to understand that one of the main works of the universal energies is how they interact with us, our bodies and its structure, would we get (:18). like what we call infections of the throat or heart and organs of the body, or the cancer of certain elements, would we get these in the space, or when we travel in the space through the strength of our soul. **Our soul will come across fields which are at the level of its strength and it will attract it to itself and interact with it**, and somehow it would effect its working. This is all possible, it's not something imaginary. **We have seen that when a given strength radiation is interacting with the body it changes the behavior of some cells. Don't forget the body, the physicality is created out of the E of the soul itself in one way or another. We'll come to understand that even our soul can be vulnerable to the fields which can attach themselves to it, once they are at that strength of it. In the human body we speak about DNA and RNA, what we call physical structure and soul structure, and memory structure. As we develop our knowledge and we enter into the dimension of the U we'll come to understand that one of the biggest threats to the life of man in any dimension, be it in the physical or soul dimension is interaction with the fields of the U and those which will match or be parallel or be able to interact with our physical dimension. (:20).** We have never thought about these things **because to us these fields are far away, they don't exist because we have been in the cocoon of what we call the atmospheric condition of this planet. It helps us, it absorbs most of the radiation, it transfers some of it back into space.** But once we are in the space and we come across these kinds of fields which are much stronger, for example as when we enter towards the center of the galaxy as we go into the central line of the U. Us as humans will reach more and more closer to the center of the Solar System. Different fields of the strength of measurements as we have, as we spoke about Tesla and 129 and the others last week, these are all ?? learn more and more about us, and let's see how these fields effect us. How do we see them and how can we overcome them. **Man in the space will not die much from what we call bacteria's and infections, but man will die of viruses, energy packages which have the strength of the DNA of the body and in that process will interact with the man. The energy packages which have the strength of the STM, and in that process interact with the DNA of the STM. In a way they become a leech onto the leech.** They come to leech on the whole structure. They don't have physical characteristics or a physical entity, but they have **MG field strength in part of their composition which matches (:22). one of the pieces of the AA of the man or the elements which are connected to it, being the Fe in the blood or the Cu in the muscle, be it the AA itself ... they have a field strength of the C so they lock in, and once they do because they don't have a physical dimension they carry a**

massive amount of energy because they are made in that way, they don't have the wastage arm of physicality. In that process, what we see, **we call them viruses. Viruses in the plasma technology is the packages of energy** which mankind needs to understand and realize. In so many ways **we have not managed to handle the simple viruses of this planet. Those energy packages that have no physical dimension to, what we call AA, but they carry the energies of AA. A lot of you understand this because it's not a theory to you. You put the orange (on top of the Cup) and you transferred the energy and taste of the orange into the Cup. There was no need for the physicality of the orange, but when you drank the water you tasted it, so it means it was an energy transfer.** It means **confirmation through plasma structure.** Maybe it came through the orange's AA's Hydrogen in it is equal to the H in the water of the Cup according to the mixture of the Gans's you have introduced. These are important and man has to start looking into it. Maybe we have a first glance to play with, we are and we know and we have not found a way how to handle these. (:24). When we get touched by viruses on this planet we go into mayhem and panic because we don't know what to do. You have HIV, and Ebola. ... (connection drop) ... So the viruses like HIV when it hits mankind we panic with it. We see different flu's coming from birds, pigs and combination of animals and we have no solution for it. The nations surrounding it waits (to see) who gets hit. (:26). If you have an infectious disease by bacteria's or whatever we immediately have tablets or injections, we do something. **But with viruses we stand back, if you go to a doctor he says there is nothing I can do,** we have to see what happens. **Now we understand that viruses are packages of energy which leech themselves into the structure of the physicality of the matter state of the body, or what we call the Gans state of the body.** In the process we learn and see more and more. **Man in the space will loose and have more problems with these kind of energy packages then anything else, because as we travel with the high speeds across the U we'll be touched by more and more. Our own spacecraft in interaction with the different field strength of the U,** like the way the earth in interaction with the sun creates different lights will create different energy packages that some of it might and could be at the strength of the AA, or the AA strength of the STM plasma direction. So what can we do, how can we handle viruses? Or should we call them the energy packages. How do we come to understand these more. How do we evaluate and measure them that we can say, okay this is the strength of this and this is what I need to do. When it comes to the viruses we call it an energy package, it's a dynamic energy package. (:28). As you remember there is a very easy way to handle these energy packages. We have been told, we know, we have done this before. **For the present world of science the viruses are a menace. There is no solution. To the scientists of the KF viruses are as anything else. Any virus or entity whatever we call it which has a ... dynamic plasma has a problem. ... What happens, any virus has a dimension of a dynamic plasma. It's an energy pack and it has a structure in it. The plasmas usual structure, we call it CO2 or whatever, is the same as the plasma of a virus. It has a strength capacity. We have to find out what that is. There is no difference. If we can measure its strength, if we develop technologies that can measure the strength of it, then all we need to do is develop a system that works in the opposite (direction) to it. G to M to drain it, to reduce its strength or one of the factors of the strength in it, which let's say matched into the AA's H strength. Now it hasn't got. We see instantaneously that we can reverse any virus. The beauty of the PI T that we have developed (:30). is made directly for viruses. One of the reasons we brought up the whole T of the PI through the Gans was as a tool for the space T for the deep space travel. It allows man to learn in time all what we call, different**

strength of it, to apply to what. If the world of medicine and especially K Seekers who are in this field start working on this pattern, understanding this, there should be no problem for any of us to handle any kind of virus infection. It doesn't matter what it is. **We have to find the way it travels, where it nests, what is its strength in G and M, and in the body when you have viruses which attaches itself to one of its AA's then you can use any of the Gans' which are present in the position of ?? , some of the viruses have a different strength.** We have to look into **the elements of the U, not elements of the planet to understand the strength of them. Man has only seen a fraction ... of the MG fields, now we don't have any elements on the Periodic Table, multiply it by millions. It just needs the condition for it to manifest itself in the matter state of itself .. (:32).** .. ?? it's course has a link to the AA of it, if you have a soul of the AA of "Mr. COHN" which was created on the earth ... on this planet, and you enter into another dimension and you want to manifest yourself, **but in that planet the structure doesn't allow you to manifest yourself, but it has a connection to one of the AA of the STM, and you want to manifest yourself as a being on that planet. That strength could be a virus to you. It could be a virus to the STM. Or once you manifest yourself in that dimension in that physicality, you become, or you make an access through your soul (:34). to your body to deliver viruses to it, which means it changes its characteristics, its energy.** If we look and change the name of a virus to "energy packages" of MG fields with structure but no physicality. Let's say in an easy way to understand we call this body that we see of an alien, so in a similar way the virus has not managed to manifest itself in physicality but has a dimension of the soul, which has an energy and dimension. **Then we can handle it and understand it and we can create another system which matches it so that it can drain its system that it passes the level to which it has attached itself to.** In the present world of science of man the biggest dilemma is viruses, it's so bad that they just ignore it, we have no solution for it. If you walk into a doctors office with a virus infection he'll tell you, sorry darling you have a virus, I don't have medicine for it. If it was an infection or bacteria I can give you something. **This is a virus, you'll have to wait until it goes out of your body. If you wait for the virus to go out of your body, or for it to go through its cycle, it means it has an energy level. You have to wait until that energy level is spent on the rest of the cells of the body, by the division of itself by adding to the others. It doesn't mean that it has disappeared, but that now it has spread its energy so it doesn't have that effect. It doesn't mean that it won't be there, but at the same time if it stays dormant and another energy near it comes, then it comes back up again. (:36).** It shows itself again because now you absorb more energy of itself. It multiplies in energy pack difference division, but it still exists, because it has that link to, let's say AA, or to the salt (in middle layer), or to something which stays in that level. We have seen this with Ebola. When Ebola hit Africa some 2 - 3 years ago, very soon we'll have scientists from Sierra Leon on our panels and you can speak to them and they can tell you directly. When we gave them the key on how to overcome Ebola they immediately set up a system to produce what they were told. They put it in the lab and it was dead instantly. They tried it on humans because it was hitting Sierra Leon very badly, and it worked, people with Ebola recovered within minutes. Because what we did was to introduce to there body another sphere we called the Gans and we drained its energy. What did the scientists do, they were proud they found a solution for Ebola. They were scientists of the U and went to the presidential palace with their system. And what happened? There were health people present from America, from a given university, you can read it on the Internet, they said you can't show this, it's impossible you can't show it, Africans are not that intelligent to find a cure or a process

or whatever for such a disease. This is beyond your understanding. The scientists understood the T (:38). and took it to America and 3 months later published a paper. Exactly what the scientists in Sierra Leon, under the instructions of the KF developed and overcame. They told the scientists not to say anything and if they did they would loose their position in the university. You would be finished. They went back and didn't say anything, but in the university they started producing it and helped the nation. Because it was so easy they could make it again. Because they understood the concept and process. This goes the same. I saw a talk or presentation in the Universal Council meeting on Tuesday where they started talking about malaria, typhoid and any kind of viruses. Now we have a knowledge. I explained to them, you can't detail what materials and what you used because we are not doctors, but we can open the knowledge that there is a process that it can be done. The part of the teaching of today is that, we are opening a number of topics on this level. Are virus positions like HIV now can be handled with the new knowledge. It has been tested and some results are very positive. Now we come to one of the biggest menaces to the human race. Now we understand how viruses operate, the way they operate, where they nest and the way they work. One of the biggest menaces to the human race has been Herpes. It's a virus and we never had a solution for it. (:40). It's an energy pack and it can survive in the middle layers of the skin. Sometimes it goes into the third layer but usually the inner layers, sometimes but most of the time it operates through a tunnel of the outer layer of the skin and the inner layer of skin because it can travel through. It's a virus, it needs M field protection. This is how it works. He draws a bottom and top layer of skin. As we know the skin is made of Gans layers top and bottom, and it travels in the M field of the middle layer. If you speak to many scientists who work on Herpes they give you this knowledge. Today I have decided to open a new chapter in the science of Herpes, a new knowledge and understanding and it will be published on the KF Journal on the scientific side and will become the basis for the future and most of the KF scientists to develop it. In the paper I will release the details because it's a scientific paper and you can give ratios, and what you did and used. I have asked them to publish it in the next month or November. But it will change, you have to understand how Herpes are. Statistically in America alone, (:42). ...it's very shocking, it says worldwide we have 2 types of Herpes, we'll discuss it later on, 3.7 billion people in the world are carriers, under the age of 50, which is 67% of world population have HSV, Herpes virus of 1, which usually appears around the mouth, lips, we know, then there is an estimated 470 million people, 11% of world population between 15 and 49 suffer from HSV 2, which is usually genetic and appears in the body. Strangely enough a large number of Americans more then 50 million have genital Herpes. One of the most advanced and cleanest nations in the world suffers massive ?? from this. And 85% are not aware of it, statistically. (:44). 42 million Americans are not even aware they have genital Herpes. What we see is this is a menace. The reason we see in the research papers, that are coming more and more, is that because of the structure of the Herpes, 85% according to some research papers of the ones who have Herpes leads to Alzheimer's after the age of 65. ... We can see that it is one of the most prevalent viruses amongst us. and it's .. The world of medicine has given up on it .. with what we are going to release today, and the scientific world will come to understand, we will see how much the new knowledge of the KF can change many lives. Herpes now can be reversible and can be handled. Herpes with what I am going to explain as a scientific paper is an explanation of how the processes can be set. In the teaching I will not dictate any numbers, figures, or materials, but I will explain the principle behind the way ... Herpes ... you understand now how it ?? itself to the body. Now for the first time the process of Herpes will be understood fully and then

we'll explain how it appears. (:46). The world of science has never understood it. Parts have been done and parts could be understood, but in totality we have never understood how Herpes gets into our system. It effects more then 2 out of 3 of us across this planet, has it. Does it lead to Alzheimer's and death, and other diseases and conditions? Statistically we see in every nation we have this problem, it's part of our structure. It is something which we never knew. We never knew that viruses are energy packs, but they have a DNA strength connection that they can enter the body. Let me explain a new knowledge in the world of science of the man then this will open up many researches in the future. As you know KF is leading, and started interacting with the world of medicine in different ways and in a very fast way. We see that many scientists across the world are listening and taking note, the way we brought other things in, they start researches on it. We have to see 2 things, now we know a virus, it doesn't matter what it is or what we call it, it is an energy pack. It needs to attach itself to an AA. (:48). In that process, once it finds an energy pack, with energy structure, because it has a DNA it can control itself, it can mutate to absorb more. It is a living thing, it's like us looking for food to survive, it looks for energy that it can take. It attaches itself to Mr. COHN, let's say it links itself to O because it's a G field of it, or to the weakest one of the H. We see that it needs and finds that connection. But how does it enter the body? It needs a weak point, a point of entry. One of the points of entry that we can show, is the lip of the man. We usually see Herpes around the mouth in these positions, he draws lips with dots. Why? At this point this is not what you see, what you imagine. The reality is that there is a space gap, the shape is like this, draws an outer lip line. Here (the outer side) is the skin of the man, the external part. Here (inside) is the internal part, the sausage, the breathing part, (:50). where we eat. These are 2 different structures, so what happens here, this is the weak point in the structure. It's like a woven chain, it's like as you see in your N layers it's an open space (between particles), it's like sewing leather to a cotton, there are 2 different materials. You can't put them together, you can't fuse them, they are 2 different structures. What happens is this energy here has its own characteristics. As we said in the medical teachings 3 - 4 years ago, every skin has 3 layers as I just explained before. When you look at the structure this (inner lip) is 3 layers of it, 1, 2, 3, and when you look at the other (outer lip) it also has the same 3 layers of it. Somehow the 2 bottom layers link up. But the middle layers of the same salt content because they carry the blood in the level of balance of it, which you'll understand later on. They have a space gap. It means they allow and link up, and now the virus comes into this space gap. Now it has a place to live. Why do we usually see it on the corners (of the lips), because this is where the space gap is continuously fixed to one point, moves to close and open. At the points of flexibility we see it coming up, because that is the point (:52). where it can enter. When it does it has found a nest. It can enter into the middle layers and it stays there. Now we see existence and the reason we see this energy pack which is equal to the energy pack of the AA of the 2 levels of the inner and outer, which becomes the nesting ground for the virus. Because don't forget it's 6 layers now and not 3. You have 3 layers of the skin and 3 of the inner tube. In that position there is a gap. It sits in there. Because the field strength matches the fields strength of the virus. In that position sitting in the middle section protects the salt content of the layer, usually on the skin side, because on the lip side or inside is fluid, you carry a lot of fluid. It is continuously changing, so what happens is the change of the salt due to the energy creates blisters, and the slat burning, and you see it as blisters on the skin. Then the infection slips in because of the energy level and you have all these, what we call the virus of Herpes. If we have understood this we can go to the next step. That is why we see Herpes of a given strength which appears only at the mouth.

(:54). If the Herpes moves inside then it's a different story. Now the story on the inside is different because of the acidity and all the different enzymes and everything else in the mouth. It has to mutate that it can become stronger that it can survive this position. If you have a cut in the internal part it goes in the gap of the 3 layers of the skin, and now it becomes stronger. It becomes what we call (Herpes) #2. At the strength it now becomes it has to handle the liquid inside the body which is a composite, where the skin was slightly different. But there is a big problem with the whole thing, if you look at it the skin is part of the brain. Now that the virus has entered the middle skin it immediately travels to the brain through the middle skin (layer). But at the same time, as the other side which is the lip skin is connected to the internal, but it works in a different dimension, links up. What happened is the virus through the middle layer of the skin moves into the brain, because it is made of the same, it's the same transformation. When it moves into the brain, the strength of the virus, if this is the brain and this is part of the memory of the man, has the strength that it sits in that space, (:56). and this is the reason we call it Alzheimer's due to Herpes. In a way you put a jammer on it, the way you package and you jam a frequency, this Herpes has a capability at the strength because it came through the middle section, through the membrane of the body, it has a strength that fits into the strength of the memory part and produces what we call Alzheimer's. It has a strength, as we grow older the brain function changes and at a given strength it matches total blockage. You know like when you send a message and they block you, this is what it does. Now we understand the whole process of Alzheimer's through Herpes. It has taken me nearly 25 years of research into this. It has been one of the biggest dilemmas in the world of science. If you go back to the research papers I brought with me to Belgium when I came, Herpes was part of it. I could not understand why this things could not be solved. Now we can understand more how this research will end up. It will bring a lot of shocking news to a lot of you. What we saw here when the Herpes goes into the mouth, where it becomes stronger because it's a stronger dynamic system and it has gained energy. the way the Herpes from the outside moved to the middle skin (layer) to the brain, now the game changes. (:58). The game changer is very interesting because through the same process of the skin. He draws the mouth, this is the intestine, and you have understood by now you have 3 layers of it, and that Herpes moves down the middle layer of the esophagus, stomach, to the intestine to the large intestine to another point which again has 2 phases, the phase of the dynamic dimension of the internal organ, and the same story as before, the skin, this is the anus. This is how Herpes moves from the mouth directly into the process, into the genitals. And it's stronger. But 2 ways it happens, you have the reproduction of the woman, or of the man. Look at it, again it's the same place they turn up. It's an interface, at the point of the foreskin of the penis you have the same position, you change to the tube to go inside. The interface again comes into operation, we see Herpes on the genitals. It can do the same but we might not see it in the mouth. (1:00). The interesting part of the story is, the body carries bone structure. He draws the structure. This is your spinal cord, hip and the head and the rest of it. Does this remind you of anything you have done in the space T? Do you remember the Cup and the orange, transferring the energy of the orange into the water of the cup. Now look what is the Cup, it's the hip of the man. Up to now the doctors tried to sort out the problem of the Herpes (#) 2 as they call it. In interaction with the creams and everything else, it moves, it can't be done. Because with the new research which has been published recently, we understand, and this supports what we explained years ago, that now the hip becomes the Cup, the Herpes virus now sits in the hip, this is why doctors couldn't solve it. They keep on touching and doing things, but it comes back. Because when this

Cup, its energy reaches a point it releases the energy into the same layers, (1:02). then you have a flaring up of the disease. Now we understand the full process of the Herpes, be it #1 or #2, it's the same, it's just in a different strength. Now we understand from Alzheimer's all the way to genital Herpes, how we can do it. This is why we have 2 different types, but in fact 1 is stronger and 1 is weaker. The stronger travels through the intestines because there are too much acids and everything else which is has to go through. But there is again 1 point which the world of science has not understood, doctors have not looked that Herpes also appears inside the body. It appears in different locations internally. At the entry, at the point of the change, the same as the lips and the skin, the esophagus and the stomach, they are of different materials. Now we should look for signs of Herpes in the opening of the stomach. Also at the stomach and small intestine, and the small with the large intestine. If we look in general Herpes is the totality of the disease across the body. This changes the game. Herpes with the new understanding of the plasma T should be able to be managed (1:04). and reversed. You have to understand that I use the word "should", because the last time we explained about the cancer some nations took action against the KF, that they can cure, reverse ... no. We use a very direct positioning but in the scientific paper we'll publish we'll be very precise, because it's a scientific paper. Now the condition of Herpes if understood, handling the totality of the body can be handled. If those of you who work in research, doctors, scientists and the rest want to understand, then we'll publish the paper. A scientific paper has to be published as it is without peer review. This is how we give strength to KF journals, what we call the scientific paper of it, the journal of it, by revealing the most advanced knowledge that doctors can work with. I'll make this journal one of the most prestigious journal that the world of science has come to look at. When there is no peer review and everybody has a say in what they want to do and how they want to handle it. For the first time we understand the whole process of Herpes from head to toe. Why do we see Herpes on some points of the arms or legs? Go back and look at the structure of where it is. They could have been a puncher (boxer) in their life time. (1:06). There could have been a damage to the skin at that point, where again like the partition of the 2 lips, the weakness of the middle layer appears and it manifests itself. It just needs to get underneath with a few dots and an energy transfer. Herpes in every level with the new knowledge of the PI T is reversible, because what did you do, do you remember the patches put on both sides. Do you remember a very simple way when spoke about the condition of when you had a cancer or a piece of metal in your body and you wanted to remove it. When you have a piece of metal there, you create a ratio of 4:1 (in patches on both side), or 20:1, creation of the fields (Infinity Loop between). Now very simple, take an extract from the Herpes itself when it flares up and create a Gans of it and place it in the same ratio. It should not take more then a few days or weeks to be able to drain the system. But don't forget the hip, or the body with the intestine, or the boss on the top (brain). Remember what I did and our friend explained to us how we managed to deplete the salt from the foot of Naomi. (1:08). We took the urine of Naomi, made a Gans of it, we patched it, what was supposed to be weeks, it was gone within days. The same applies here. When you have a (forest) fire you don't fight it with the water, it's too big, you burn more fires around it so that it has no more to burn when it comes to it. You handle the virus directly this way. You can even handle the genitals directly the same. Then you remove the energy from it so that it is not there to flare up. But what is not understood is that the Herpes sits within the whole structure of the body, not where it flares up and we see it. I'll try to publish the papers in the full details with the cooperation of the KF team in the background. Two thirds of the human race suffers from one thing that is not to be and it is there. The point asked is where

does the Herpes come from? It comes from the brain of the man itself. It is the release of the energy from the inner STM touching the invisible memory part of the body. This is why it goes back to where it came from, (1:10). and that's why it effects the memory parts. I'll explain for you to understand fully. Many of you in your sleep you dream. Some of the dreams are nice and some are not so nice. But if the dream is at the strength that it endangers or jeopardize your life or imprison the physicality, this is what we don't want to remember. So you create a field force in the balance of the memory that you don't want to remember, but because it hasn't manifested, because you are having it while you're awake (asleep), it's part of your soul operation. The energy transfer appears on what (the place) you can't speak, which is the lip. This is why when you have a very horrible dream you get a blister on the side of your mouth. This is the beginning of the process. Now we understand the whole process of the creation of Herpes coming from the inner structure and that's why it goes back to where it came from, because it has no memory, it wants you to remember that horrible thing or whatever. We call it, a heat temperature of dream, you know you get a blister on it. Now we understand the whole process of where and how Herpes came to be, it doesn't matter where you are in the U, or this planet you'll get it, (1:12). because your soul is the creator of it, but it has not found the physicality at the time when you are awake that your eye observes it, you see it with the eye of the STM. You have a dream, you're captured, they put you somewhere and you want to escape, it's too frightening, but then you wake up. But the energy is not there to memorize the energy part of the feeling. And where does it hit you, the place where you could not speak. Walla, the mouth is the point of speaking. It's where the energy will transfer. Do you remember what we said, if you have a problem with your son, as a man you get a cancer of the prostate, ..?? by the scientists, it's the same process. But this time Herpes is a condition created by the STM without the interaction of the physicality, but knowing where it has to go, because you (don't) want to remember that, so it doesn't happen to you. Then it goes back to where it came from. Now we even understand why Herpes damages or interacts with the memory side, because you want to forget that horrible point. If you read the paper I published called, ILS a death wish which comes true. This is another process, very much and directly from the STM, ILS is a wish through the soul that the physicality can't handle. Termination of contract you call it. Now we understand the full process and that even Herpes doesn't come from outside, but it is the creation of our own soul. And now as we understand the process of the creation and the work of the plasma, and as our body is a container of Gans's and we've seen how doctors have handled different (1:14). conditions with transfer of energy. We need Herpes itself to handle Herpes itself. If you have a lump of Ca in your body you need a Ca in a different strength to be able to move it. Dr. Rodrigo and other doctor scientists have shown us. You can do the same with herpes. Now with the understanding of this knowledge no virus should be a danger to man, even in the space. I developed this T for man to be safe in space and you have to understand the work of the viruses or what I call energy packages without physicality that it can save your life in the space. The U is packed with Herpes 3, 4, 5, 6, .. million. Once you know how to walk, you can run, jump, dance and whatever you like. Now I have taught you how to walk. Two thirds of the worlds population suffered from it and we never knew how it comes, now we know it is the creation of ourselves, the way we create it through our souls, the structure of the muscles of a heart, lung, intestines. Now we understand that herpes is a condition of the STM, in a condition that releases such a huge pack of energy from the STM in a condition of interaction with the other souls that can not find physical position, but between the 2, the gap, the salt is so precise that it finds its way there. And if you carry the same emotion and you kiss another person on

the same space gap between (1:16). the skin and the lip, or what we call the inner tube, you'll transfer it into the middle layer and they get it, because you have a copy DNA. Herpes in any shape or form, be it the herpes of U or herpes of planet Zeus, now you can handle it. Many scientists and world health authorities have been looking to find a solution for this, now the solution is there. This is a gift to humanity, if those who understand can apply it then herpes will become a story of the past. It's the memory of the STM on the physicality. The way it chooses the color of your hair, the soul chooses the color of your eye, the soul in interaction ?? time of life of the man does the same. We've seen this transportation across the body of the man, the way it comes in and leeches onto, how herpes itself as a virus travels through the body and at intersections of the change has to mutate to be able to move across because now the faces of top, middle and bottom layers that are linked together, so as it's going it travels through the middle skin from the mouth to the (anus), .. (1:18). ... (break).. . what we see now is the process of understanding how every virus in the world of the creation can be handled, be it AIDS, HIV, or Ebola or anything. These are what we call memory packages of energies that they can mutate and they live, they get fat and collect more energies and once they reach a level they travel to another position. Now every kind of any disease which is what we call virus or energy pack connected (1:20). is reversible. It's a process this is why in the KF we don't call it treatment, cure or whatever, because it's a process and now we understand the process. We understand the process of its creation, transfer, and how we can balance it out of the body, because once you deplete it of its energy it's gone. It's not something that can be done in a day or 2, the body is dynamic, it (the virus) mutates and you have to have persistence and understand it and you have to be able to develop new ways of developments of viruses. Because it can mutate you have to be able to mutate with it. The only way you mutate with it if it occurs, you pick up the liquid or inner skin of it and make a Gans of it. You use itself against itself to transfer its energy out of the body. It's the first time the human race has an answer for all the viruses that have been threatening man, be it influenza, to her flu's, AIDS, HIV and the rest. But nothing has endangered the life of the man as much as herpes. Now we know and can add to the science of the man that through the KF and you as K Seekers, doctors and whatever, I am sure that many of you have been touched by it and that many have told that they have this condition. (1:22). Now you can help yourself. I will try to publish the paper but I will ask the team in the background to make a transcript of this teaching as part of a scientific paper to be submitted ... If we can take one man out of the pain of his lifetime we have served our purpose to be here. This is part of the process which now we have to be ready for space. If we can't handle such a small virus with such a weakness that has caused havoc in the human race from the time the first man had a horrible dream through the soul which had no dimension in physicality, then we understand the seed of it. In Tuesday's teaching I mentioned 2 or 3 times that I am ashamed to be in the body of a man and I received some complaints, why do you say this? Because the body of the man suffers too much. We come to live, to enjoy life, we don't come to suffer. And it is shameful to see suffering due to an act of the people, let alone through a virus in the body. It's a shame to suffer, what for? Living and existing has to be a pleasure at every point of it, (1:24). even at the point of transition from one dimension to another. We should celebrate life and not to suffer with life. Viruses will become and has been a part of our lives now we know how to handle it and to allow our body to go through the emotion of reversing. We understand the process from A to Z for the first time in the creation of man. Every one of you, the millions of KF supporters around the world, you can do and listen. I know and many of you know that KF reaches millions of people around the world and many people act on it and use it. I know we

reach many places because I have been places where you could never imagine (that people have heard of KF) and people walk on the street and they ask me, are you Mr. Keshe. So it must be done, we know people listen and they'll find a solution from us. That on the street in Beijing, China to the streets in Italy and France and everywhere else we are recognized. I am recognized by my face, KF followers should be recognized their soul. (1:26). Teach it. If you live in a neighborhood of a hundred people you should understand that 67 of them suffer from it. If you live in America you should know that over 800,000 people are infected by this disease, that is 2,000/day, 100/hour and nearly 2 people/second and that's only in 1 country, because they are good at keeping statistics of people who are infected by it. Now we have a solution. Test it and add it to my papers as a testimonial. But understand what you are doing. Next time you have that boil on your face and they tell you, you have a herpes, take pieces of it, take all the liquid that comes from it and make a Gans of it, and add it to CO₂ and add it to ZnO, the way you make your boxes. Because it has the interaction of the physicality of connection as the electric to the brain, and it comes from the emotional part of the brain. There are no muscles in the brain, now you understand the ?? effect of ?? If you as KF supporters start doing this for your own suffer or for the others, (1:28). then you'll understand how to do it and how it can be done. Teach it freely. Once I release the paper, hopefully I'll try to work with the head of the KF, Ella and the new team of papers who are there. ... This is a gift to humanity. I could make millions out of it, but as again, in the KF the knowledge is free. You have to understand it and then teach it, very much like you teach other aspects of the KF technology. There are people who want to publish the paper on malaria and other diseases. I support you but do it as a scientific paper. We have done a lot of research on it and we'll add to it as a collective paper and it has to be done in a way that malaria can be eradicated. I have done it. Alek can tell you. Yes, good morning Mr. Keshe. Hi darling. Alek would you like to tell us what happened with you with your malaria a year ago. Yeah, I came to Ghana and I had malaria and you gave me the Gans of Mg and ZnO, (1:30). which I did and the malaria went away. Have you had an more malaria attacks since last year? No. Were you spending all the time in hospital with it? Yeah, I used to, but after that treatment I haven't had malaria again. You haven't had malaria since I made you what you call, "The Water of Life"? Exactly. Alek was in hospital 2 or 3 weeks before you came and saw us in Ghana, and you walked back a healthy man and haven't had anything since? Yeah .. This is how easy it is. He was getting Malaria attacks more or less once a month? Every 3 weeks to be precise. If I took the malaria medications which didn't work. ... It's so simple because it's a virus. ... He calls it a treatment, but we call it a process. We understand how it comes and where it goes. When you get infected by malaria from the animal (mosquito) from the fly or whatever, what does it do? It bites you, it inserts its energy pack in the middle layer exactly like herpes. (1:32). That's all it does. Now it finds a new dimension, a channel to fly and go through the brain and everywhere else. Any disease which gets into the middle layer finds its way to the brain and it finds continuity because in the brain of the man it finds a replication point like a heartbeat. It reaches a saturation point and then you get an attack, because it absorbs energy similar to it, because don't forget the bite of the mosquito carries a DNA and AA which is made of the body of the man, near enough. So it is easy to travel. All you need to do is to reverse the energy pack. But it has to be done in a way that we understand the whole process. When you drink a Gans water, it's not just a water that goes through your body, because this is the understanding of the present man and that is we think that when we drink water, in our intestine that the water goes through (absorbed), that is all it's going to be. And it's a water. But when you drink a Gans water, a plasma of it and

not the Gans itself, what do you do. It's not anymore water, it's an energy fields (draws spirals along the body). It covers your skin and every part of your body because it goes, it creates its own aura, its own new field dimension. (1:34). It's amazing how far it goes. In a recent test in agriculture in China we have seen an amazing result, a 100 meter field, applying Gans on one end we can detect a peak of the fields like this (a curve that extends almost 100 meters), 50 and 75 meters away we still feel the field effect. This proved to us that the Gans materials have a spherical shape. Because we have had a 4 weeks trial to see how it goes and it's this shape. It's not if you water it, or if you don't water it, the field next door, you get this. When it comes to the new space T we have to solve all the problems of man, and what we call the RNA, without the DNA, energy packs. Actually they have a DNA of themselves but it's an energy pack that it keeps their shape, but it has a memory of itself as a field. One of the strengths of it. If you remember .. you'll understand this very easily as K Seekers. (1:36). When you have a CO2 it is all the same plasma, you don't see 2 different plasmas or materials. Whereas in the matter state if you have an O and C you see 2 and can separate them. But in a plasma you can't separate it, it is one Pl but it carries 2 strengths of O and C, where C is of the lower strength and is farther out. But it is all on the same structure. Where in a chemical binding it's this, draws 2 rings interlocking. If you understood this then solving the problem of viruses in the U should become a child's play. We have to understand the totality of the process. Any questions. (1:38). Q: How does colloidal silver and chlorine dioxide works on viruses? It doesn't work on every virus. Silver has the affinity of the common denominator field effect. I have explained this in other teachings in the past when we spoke about other parts of the development of the science. What they call silver or whatever, it's very much a monatomic, so even it's in a matter state it's a Nano material, and N materials have their own fields. This is how the silver works. If you look at like a Pl it's like this, but when you look at your N material like we just did, this. It still has a field, he draws rings around a center. When you convert it to a Gans, then it's not a matter state anymore, it's a field state only. (1:40). But when it's in a N state, and what you call silver is a N material. So it has a sphere of effect. And it doesn't work on all viruses because it is limited to a given strength. Q: And the same is with the chlorine dioxide? Chlorine is a different thing, it's a cleaning agent that has an affinity to a different direction, to the bonding, we have it in our body, that works in a totally different way. One works on chemistry and one on N technology. Q: First, is about elevating the soul, if we connect our soul to the soul of our higher self or God, are we able to infuse any of our Gans material to a higher level vibration? They have a consciousness so the question is can they be elevated to (1:42). more then just being a regular Gans? In so many ways (pause and change in voice). This is another part of teaching, but maybe as I said, if you bring the subject on the table and I'll teach you. I was writing this to one of the K Seekers yesterday and maybe it's time to teach, that's why it came to be written yesterday. You speak about higher level, order. Let's go back and get a new understanding of life, because this is what you need, this is where the problem of the man is. I was writing this to the head of the KF Ella sometime this morning, she can read it. We have got used to feeding ourselves with the physicality, food, water, air. And with it we feed partially, we provide energy at a given strength to the soul of the physicality, we feed our soul. (1:44). This is what we do. This is something man never understood. What we do in reality, what man has done to himself, is that, we eat food through our mouth and it goes into our intestine, part of the energy of it not only energizes the cell of the DNA or RNA, but part of it energizes the soul of the cell. And the soul of man, if you look at it, because it is balanced to it and now moves at a slightly higher energy takes from it for its bottom order of the fields. (He

draws a spiral with an X at the outer edge of spiral), if you look at it from here. So we eat food partially to feed our own soul. By conversion. But we forgot something. The soul itself lead to the creation of the physicality of the man. By collective energies of the souls of the egg and sperm in the womb of the mother we created this soul, which by the interaction of its fields with the interaction of the environment lead to the creation of the physicality of the man. Now that you are in the space, how are you going to feed this soul? For it to exist it needs to absorb the way now it uses the soul of the physicality to feed itself, now in the space it needs to be fed. (1:46). Now you understand, you were talking about a higher soul. If this is your soul, to be fed you need to tap into the higher energy. Man has to learn how to feed his soul in the space. If you go back to the teachings where I say man shall not kill anything, because we have to go back and learn how to feed our souls, that through the soul we feed the body of the man. Thy shall not kill. There is no need for killing or destroying anything. In the space there are no cows and sheep to kill and eat. You call it, higher then yourself, that you can change the soul to change the physicality. This is the whole purpose of my teaching. This is why we came on this planet, to teach this to man. It's time to learn. It's amazing, I thought about it, and I wrote it this morning, and you bring this subject up now. Which means now the STM is mature to understand the truth. In reality, we need to understand this, and if we do and if we understand, then we can go further in the whole totality of the understanding of the work of the STM. (1:48). Ella am I allowed to read the communication? Of course. I enjoy conversing with Ella to teach, it is very nice. ... It says, but we have the STM which itself the creator of this leech of physicality, so what becomes, our soul, is a virus of the planet itself. We need to teach our soul to feed off physicality, and not of physicality off of our soul. (?? wording). This is what I have been trying to teach and gradually getting there. Go back to my teaching, this is my message and no one gets it. That is why I teach about the soul. A change of habit is difficult. It is the soul that creates the physicality and its responsibility to find a new way to feed it. We have to understand it and go back to our soul. Now you are enlightened. Now you understand where my teachings are heading to. The man in the space lives through his soul and not his physicality. And no crime. (1:50). And it is always there as a master. Now the purpose of the teaching comes to one point. You were all waiting for the Zn to change the man, the whole purpose of the teaching is to teach the man to go back to his soul to feed his physicality. You call it the higher order, higher level, there is no higher level. The higher level is the field of the U, the higher strength to feed the man, the STM that through it, it can feed the physicality of the man so that it doesn't need to kill. It is very much to the point. John Q: By the same token we can elevate the Gans as well? Of course. As you understand this, the more you absorb, the higher level of understanding, the higher level of the STM. And somewhere down the line you change. The point of physicality, that then you decide how to change that point of physicality. Q: With our spaceship is it possible that we have (already) created the fields of the SS but that we can't see it, or will ? (1:52). In so many ways the answer for you is ... I always said, that people will take this knowledge according to their intelligence. If you just change the words in a few sentence, it's us who has to see the dimension of physicality. So is the SS of the STM, the physicality of the man, or can we extend it that we see beyond the physicality of the man. Q: so possibly we already created our SS? You always have, but we decided that this SS which was created ... (break) ... It's your soul that created your physicality, now if you understood this, as I said, the STM accepted the condition of, according to the SS of this planet to manifest itself. What about if we move and change the position and conditions of this planet. In the world of science we call it evolution, but this time around we have to allow our soul

to evolve that our physicality follows it. (1:54). The evolution of the time according to the physicality of the man is very cumbersome, very difficult. Q: If we are successful in removing the herpes from our body does it mean that we can remember more of our dreams? We remember the dream. We choose to ignore it because it is another dream. You wake up and say, I had a horrible dream. If you look when your herpes started... unless you got it from somebody who transmitted it to you ... How can a man in the middle of a jungle have a herpes but he was never in touch with nobody (modern man). But he had a fright of a tiger eating him and that is all he could see, a tiger, lion or whatever. (1:56). Q: So right now I can't remember any of my dreams, when I wake up I don't know what I have dreamt last night. So take a video camera in your dream and give it to your soul. It will record it for you. It's the position that we choose because our soul has a memory bank of itself. I made man in the image of myself. If the brain has a memory to remember things it has to come from his creator otherwise he doesn't need to have it. So when you go to your soul there is a bank of memories. this is what I explained before and I repeat it again, if you last with me long enough, I'll let you hear if you have been present with the voice of the Christ. Because your soul, who made you, was present, spoke with the Christ or saw him, will tell you how he looked. Surely not blue eyes and blond hair, we didn't have those in the Middle East, unless he had a European father. Then that is a very big crime for ?? As my mother told me once, I said, how did Jesus look. She said, look at yourself and you'll see it in yourself. He comes from your bloodline. (1:58). But I said, he has blue eyes, and she said, they can fancy whatever they like. The truth doesn't change. This is the part of the process of understanding and being truthful with oneself. Q: You were talking about general processing of viruses and you mentioned that we need to know the specific field strength of the virus or element which it is connected to. Would it be possible to use a full spectrum of the field strength with for example the basic Gans's and just wait until we get the match with the field strength of the virus to drain it of its energy? Can you repeat yourself. (2:00). Q: Yes if you have a virus and you don't know the certain field strength of it, and maybe you also don't have the time to make a Gans of it, if you use a dynamic system with the basic Gans's ... and wait to match the viruses. Is this possible? Most probably. It can be done. But you have to have to make sure you can extract it. We don't have the equipment to do at this moment in time. But on the other hand you can do what you do with the "orange" if you understand. Then you have to find the ratio of transfer. Once you made the Cup with the taste of the orange on it, then ... it can be done, you can transfer into a dynamic system, into any Gans, like the orange, but you have other things that are around. You can take it and do it. But what about the next virus that hasn't yet appeared itself and is somewhere else inside you, you don't (2:02). How are you going to do that one. We have to develop a T where we can understand the measurement of the fields of the lower strength composite AA body of the man. Is there something else you want to explain about that Mr. Keshe? Not really I think I explained it. Q: We were talking about interacting with viruses, HIV and most of them. There is a scientist ?? who worked with plasmatic lamp devices some time ago. ... (2:04). he found out the interaction of these fields with viruses and created a list of 30,000 creatures, bacteria's and just found out the frequency that effected them and he used a microscope that he invented and he could see them .. the microscope disappeared and we don't have any trace of it. How long ago did he live? Something like 1900. ... Can we repeat his experiments? Is that plasmatic lamp available? There are some in America and England and a museum. (2:06). This is something we can find out. If you can go into it and bring it out, then this is another edition to the science we have, as I have said, we always build on the science of the others. This gives a leaping start. Now

we have the Gans so we can diversify very fast. (Exactly, that one he was using was a dynamic one, he was using a light or invisible light, or direct emanation, we are using the alchemical side of it, he was working directly with the energetically fields). Yes this is what I was explaining last week. When you make dynamic Gans's in a dynamic system you create that light, invisible light, the interaction of the 2 M dynamic field cores, is not just something to rotate, if you look at it. When you have the dynamic cores and the body, these fields interact, and somewhere they create that light. It's very much like the earth and the sun, but we don't see it. If we create a system where you can see these lights we'd see these interactions, bandwidth. What is applicable to the sun and earth is applicable to the medical system released by the KF today which Dr. Klaus has done. (2:08). (Royal Rife died in 1971 and he carried out this research in the 30's. So we should be able to find his machines) I think we have more advanced ones with the Gans systems we have. (Of course, but he was working with the universal microscope it was made with 6,000 pieces and he could see, we are not able to see live viruses now, because we have to kill them when we use an atomic kind of microscope. that's why he was advanced he could see the flow). He could see the flow of the energy. (He could see viruses emitting lights, he said, they were pulsating and there was a red light) Let me add to the knowledge. These viruses we see in the space. The videoing by the NASA space station has shown us these viruses. They have no physicality, but they have a boundary and they create a light. They are very much like a jelly fish, the ones we shine a light around them. We need to develop a system that we can measure exactly and it can be replicated. And for the first time we have these dynamic PI systems which is a matching of what we are, for the human race, for what we have on this planet. (2:10). But at the same time we have to create a condition of the U that we can measure them and see them. It's very interesting, if you can search for it and bring it out. We add it to the scientific paper which will go in the Journal. ... this is a beautiful knowledge to have. but again we go back to one point, we have to make that "universal microscope". (Someone has got it). Maybe Rife's have kept it, we won't ask them. The process is that we have to be able to develop a common knowledge to be able to deliver this. ... Rick found something on Wiki .. (2:12). ... so the microscope is documented somewhere ... Our Dr. Paris has been working with the Rife technology for many years. .. (2:14). Dr. Paris comes on. ... I have been working with the Rife technology since 2007 ...

(2:18).

... that's the story of Rife. Okay, can we with your knowledge add the dynamic plasma balls which we have and go through the same process? With the same machine, most probably I don't think so. No not with the same machine. I am talking about the process of the understanding of the dynamic system. (2:20). Now we have, and we can change the strength according to what mixture we put in and reach that point. (Because it works in a different way.) We are talking about in the PI T the transferring of the energy. But the energy at some point when it interacts with the physicality it creates a frequency. (most probably sure, it makes sense, yes. In my opinion it's about understanding different sciences and applying whatever is possible for better healing .. plasma T is changing the field, but Rife's T is not changing the field, he is targeting a specific point,). ?? about the frequency as you said, we are talking about the totality. But he went for individual cell frequency. I understand that. You understand the process by which we work, how can we introduce this into the work that it can become beneficial more rapidly? (Do you mean just the plasma T?) The PI T in conjunction with Rife's T. We can't be the only and sacrosanct. If there is a background and ground work we have to

accept. The moment we say the rest are wrong (2:22). this is the end of the KF. If we see such a point we have to accept it as a beautiful job done. As I said, scientists are the messengers of God in a different form. And if this man has done so much work then we can build on it and give the credit to him, and maybe understand more because of it. And amalgamate the 2 knowledge's together that it helps humanity. That is all we are here for. ...

.. Yeah but you have to find cell by cell, but as we said the herpes lies across the middle layer of the skin. Now with what we suggested with the new plasma dynamic systems or patches, it doesn't matter what it mutates to, when it appears if you take it as the final mutation, and you can make a Gans of it, then you can zap it with itself. (I would love to try that and get some support by the medical system (2:24). of the KF so we can try it. I have enough willing patients to try it.) I'll sort it out that you get it from me. Thank you. This is what openness of the T can bring for humanity. Every man brings part of the knowledge in the music ... it's a symphony, many people have to play that it sounds good and becomes perfect. I'll follow this through and we'll come back with it. But now that we understand how to use the Gans T, and now we understand the travel of the Herpes virus through the body we can change a lot of things. Q: According to the rife machine it's a precise device. We are using spinning Gans's, this will create a typical kind of scalar wave. ??How are the scalar waves (formed)? Q: The spinning of the crystals. What crystals? The Gans's, they are diamonds, thousands of millions of diamonds are spinning around. No they are not, they are not crystals. It's a plasma. Q: It's a Pl, of course, but it has a shape of a diamond. No, it has the shape of a sphere. I have looked at many of them under a microscope. (2:26). Q: Why would a scalar wave propagate from the ?? engine? They interact with each other continuously. Q: So we are using thousands of different frequencies at the same time? Millions and billions. Q: Okay, so we went the opposite way, Rife just looked for one and we are using billions. We have a spectrum of them, yes. Q: So it's perfect we just have to unite the 2 things and we have a precise. This is what I said when you put the patches in the front and the back. That's what you do. Because a thousands do not stay in a constant strength all the time. It loses in G and gains in M fields, it moves, it's a spectrum. When you do Raman spectroscopy and especially Infrared spectroscopy on the Gans's you get (it reads) 10 to 20 sometimes 30 different elements, are recorded. The scientists at Ghent University asked me, how is it possible, we have a C as a C, O is an O, how come we get 22 different items here? I said, it's a plasma and when you have a drop of Pl you have millions of suns and each one is radiating a different strength, or the interaction of them creates different strengths. So your machine detects this and that is what it shows. We have known this for years, it's in the book I have written, in the 2nd book. Q: So it's a configuration of different kinds? It's not a configuration, it's the totality of all the stars in the U. They interact and we see different lights and ?? It's very simple. This brings a lot of things to us, the opening of the horizon of knowledge. (2:28). Thank you very much for bringing such a beautiful knowledge to us and thank you Dr. Paris for such a beautiful enlightenment. We'll talk later on as we usually do and see where we can go to (with this). If there aren't any other questions, then there was a point risen by one of our scientists that one of her patients asked her a question. The question comes from a woman farmer in South America, and she has posted this question to us, she has a problem in her land in Brazil and the problem is, that the way the human body has become resistant to antibiotics, the weeds have mutated and become immune to herbicides used on farmland. The chemicals have no effect on them. In the same way Dr. Paris was saying about the herpes mutating, we see the mutation of another life form

that we call the vertical people, that chemicals do not effect them anymore. She has asked the question, how can we as KF find a solution as in some of the lands they can't cultivate anymore. With the diversity of the weeds or herbs, (2:30). that their farmland has become useless. How can we come up with a T in the KF that allows the farmers to grow a specific grain, wheat, corn or whatever, but doesn't allow the weeds to live in that space. In her communication she says that up to 10 of these creatures have become totally immune to any herbicide. Can the KF come up with a solution. can we find a way that the farmers can claim their lands back and they can make a living. Then has any of the KF child's ever handled this, any of our agriculturists ever used the T to create a condition that allows one life to live but creates an environment that it is too hot for another to live and it moves somewhere else. In the life of the KF process we can not kill. This is one thing which we promised. The only thing is we can ask them, we change your home, would you like to move somewhere else. We give you a home but you have to move. Or we would like you to move that it makes us happy that we can make food on the land that we can have a life. Do we talk to the soul of the plants, (2:32). or do we create a condition that allows one type of life to exist and the others don't. Our agricultural tests in respect to live animals or what we call parasites where you could use pesticides shows it could be different. Is Dr. Klaus online? Would you like to tell us about your test when you tried to move one animal all the animals moved. Which test do you mean? You tried to get rid of bark beetles but the whole animal world immigrated. Yes, we made a test with bark beetles which are a problem in a lot of regions. They are little animals that drill little holes into the bark of the trees and they live inside and they are very clever, in 1 or 2 weeks and maybe less and they become more and more and they suck all the energy from the trees. So there is no chance for the tree to survive. (2:34). This is why we did several tests to apply the T. We placed several specific Gans's around the tree and additionally we put them on a dynamic windmill that turn them around by the wind. We observed that the bark beetles disappeared but also other animals disappeared. ... the ants and other little animals disappeared from the little area around the tree. We were only working with fields and didn't spray any Gans water or Gans. ... as a whole these fields were very concentrated. (2:36). and the bark beetles disappeared. So you came to move one and the whole neighborhood moved. Yes this was a side effect we didn't like. ... So can we make a specific system that says, only you are not welcome and the rest can stay. Yes, I think we can we have to concentrate only on the beetles. ... A solution may be in this case to strengthen the tree. (2:38). Because what we know is that when the bark beetles come in large numbers it means there is some imbalance. We have to look at how we can balance the tree again. Okay, there is a solution, like what we just spoke on the herpes. There is a solution, I have done this and it can be done. What you need to do is, where the trees have fallen, some of the roots are still in the ground, you need to reach through at the point of the soul of the tree. I have explained already in the teachings where it is. You need to make a Gans of it, and enhance this Gans and feed the plants with it. The way we used the herpes (taking a sample of it) to create a Gans of it. By transformation of fields you can make a Gans of the soul of the tree, or the center of the tree which leads to its soul because when you cut (the tree) at the point it doesn't grow but is still there, what we know. (2:40). And create an interaction of the fields. You just strengthen the tree that it changes the condition of the existence of its physicality and the animals will move out. Did your system move the animals out or did it elevate the soul of the plant that it creates a condition that it doesn't want any neighbors. It doesn't (necessarily) mean that we moved the animals, (just) because we changed the environment. Maybe in that process, as what we saw with the Kiri tree (? last week) that

it grew so much. We have changed the environment of the soul of the plant. Do you understand. We just need the roots of one or two trees, most probably you have them from what was already cut down. If you can get to it, we understand roughly where the position of the soul of any plant is, we have explained before. Make a Gans with it and feed the plant and other plants with it. You can strengthen it with CH3 and other things that are needed for plants. And see if the tree changes. If you (only) move the animals then the holes or wounds in the tree bark are still there, but if you strengthen the soul of the plant, as you have done with other propositions, then you will see the wounds on the trees will heal, the holes will recover. That's how you'll know if you acted through the tree or through the animal. This sound good, we are going to make it immediately, they need it. (2:42). You just need to put this across. Maybe the soul of even the damaged trees will repair themselves and you get the woodlands back. With what you are doing you are moving the beetles out but the damage is (still) there, but if you can elevate the inner strength of the tree, understanding itself, then the farmers will claim their woods back. Q: Alek asks, what if we make the Gans's of the natural predators and spray it on the trees? You create a condition of giving them a strength. If you put it at one end of the woodland to the other and create a gradient, you might move only the beetles, it's possible. You just create a condition that it doesn't suit them. The whole work and knowledge of the KF is not to harm. And in that process of not harming you create a condition for them to live. You give a condition to what you want to live, to strengthen it. .. (broken transmission ..) by itself. ... (2:44). .. you hollow out the center to the point of interface between the ground and the air, it's roughly about where the soul of the plant, of the tree lives. You can replicate it and strengthen the soul of the forest. ... in that process when we elevate the STM it elevates the physicality of the man, diseases can't live. It should be the same for the plants. Now we still haven't solved the problem for our farmer woman. And we can't go and put a dynamic core around every herb, there are millions of them. I think the solution sits in what we said in this part of the teaching. If you want to think about it. We've been going on for nearly 3 hours, I am exhausted. Teaching at this order it takes a lot of strength and teaching knowledge which is not understood and opening it up into the world of science and it turns out to be 100% correct, it takes a lot of concentration. Think about this and we have an agricultural and other teams, (2:46). that they can come back to us. I know the solution but we need to allow other knowledge's to come in from the rest of the K Seekers that in time we learn that we can share in the same way as we have done before. ... I hope we close one the most horrible chapters of the life of the man with this herpes. We'll publish the paper .. we'll how we give credible to a lot of things. ... (2:48). ... (2:50). (2:52).

(2:53).
