

252nd Knowledge Seekers Workshop - Thurs November 29, 2018 (Swine Flu resolved in China, ,)

(:16). (:18). Today we announce a major breakthrough in the world of science, this is why we call it a ?? farming, and it is dedicated to the Chinese community. 20

In Sierra Leone I taught them how to make the Gans's, that proved to be effective immediately against Ebola, Once they showed it the World Health Organization said the Africans were not that clever to do this, you can't show it, and if you show it we'll withdraw your certificates to teach in the university. And strange enough, 2 months later the paper gets published in one of the most famous (:24). universities by the same WHO and officer who ??? it is. We have had enough of what we call the atrocities of the governments and scientists. This time we show it ourselves, we took charge and control and asked the KF scientists around Russia or China to find us a live specimen. Nothing that could be possibly, but something that was 100% confirmed to be suffering from this pig virus disease. As you understand and know that the KF is right across this planet. K Seekers started looking and as you know everything to do with this virus is under full control of governments. But you have to understand farmer cannot loose their animals, they nursed they, they're their children ...
.. I made a promise to the Chinese nation and government, I am here to change the national food security of China and we set out to do it. We have shown it in grain production and now we have shown it, the pig virus is over. (:26). We have made a pig presentation that it can be understood. 03

(:34).

(:36).

(:40). Play video of KF about cure to virus. ... (:43). .. (:44). Rick reads paper of African Swine Fever in China...

(:48).

(:50).

(1:14).

(1:20).

(1:26). Play video of pig recovering from Swine Flu. Any questions. (1:28). Ruthi speaks. The Chinese people are asking who to contact, etc.. Contact Lin in Beijing and we'll coordinate. We have 500 liters of Gans available for support. (1:30). .. We are holding 200 liters in reserve. This is a specific Gans mixture, it can't just be done just because you do it. As you understood it's a digestion problem and it has to be structured in such a way that it looks after everything. Because if the animal bleeds internally it can lead to his death. All of you have access to Lin and others... (1:32). .. We are giving some supplies for prevention. We are giving to big farmers with 10 - 20,000 head of pigs. These are the backbone suppliers of the nation. There's a problem between the north and the south, in the north the fever has come and the price has plummeted. We have to speak with officials in what has been done and how we can support them. ... It has to be done in a specific way that it can be eradicated. Every virus has its own strength and its potential has to be understood. (1:34). Q: To my understanding the

Swine Fever has many types and can you use the same method for each type, do ??? .. is the KF in charge of the work or is it the Chinese government? They are aware of what we are doing, fully informed, and there are processes which are taking place. We are working through pig farmer associations. If you get in touch with KF (1:36). .. We are working within the government structure .. Q: According to what you said before that nitrogen Gans can resolve a lot of viruses, ?? is N Gans for Swine Flu? No it's detrimental, you can't use it. You break up the structure of the protein. In this case you can't use it. If you are talking about the neutron Gans, that's a different thing and even that has to be understood ?? and we can handle any strength of the virus. The mixture that I have developed can meet the full strength. It will be more effect, rapid on the weaker one, and on the stronger one it just takes a couple of hours more. It's so instantaneous, it changes immediately, the farmers will see. This what we call, the killing pattern, has to be reconsidered by the central government. But they have no choice. It's very difficult to tell something which was not there. (1:38). We have asked the KF to go to full production as much as they can. And we have chosen a path of prevention. .. We are working at the highest advisory level in the government. 23

(1:40).

(1:42).

(1:48).

(2:00).

(2:10). Q: The first pig the way he shook his head, I have the same experience when I touch a pig with my intention. The water in the bucket is not just water, it's fields, and this developed in a way that the pig feels it. The pig has to want to survive and this pig has ofught months to survive. 57

(2:16).

(2:18).

(2:20). Happy pig freed from Swine Flu in China.
