(2:10).

(2:14). ... (drop out). (2:16). Any questions. Q: I understand we have the soul in our physicality, the way to feed our soul (I cannot hear properly, pieces). repeats. in a way we need to go through a process to feed our physicality. And in the future we'll go through a process where our physicality (2:18). will be inside our soul? (repeats again, only parts) .. yes that's correct. (Mr. Keshe has to change systems.) (2:20). (a new microphone has been bought but hasn't arrived yet.). .. Currently we have the soul within the physicality, in order for us to feed the soul we have to feed the physicality. In the future as I understand it, we'll have to go through a process where our physicality will be within our soul, and in order for us to feed the physicality we only have to feed the soul. My question would be, do we have a say in this process, is it like something that we do, like for example following the Commandments and trying not to kill in order for us to feed, or is it going to be some kind of different condition that is going to come from outside, let's say something happens to the sun or something like this, in order for us to reach that condition where our physicality will be within our soul? And today you said something about the "alkaliness", the giving, so would it be like if we give more we receive more and in this way our soul expands so much that it entraps the

physicality, in this way we position. (2:22). Am I getting it right? Yes, in so many ways yes, but on the other hand you have to remember a very simple principle. Is the giving part, or the radiation or the field strength of your soul which has dictated the dimension of your physicality. In our physical dimension we live within a M field of our soul, where the G field part of our soul is within the structure of our brain. The sun sits in the center of the solar system, you think so ... I don't think so. The shell of the sun is not spherical, it's as misshaped as God could ever have created it. It's trying to juggle its way but it has some sorts of symmetry, and that is the physical dimension of it. But it still has its G which holds onto everything as much as it can, ?? it backs all its strength in the center. That's its soul. The soul of our solar system is the sun itself. So is the STM. It's not that we are totally outside our position (2:24). outside our soul with our physical dimension. Our physical dimension is decided by M force of our soul. 09

(2:32).

(2:36).

(2:40). Q; How does man take his life experiences and memories with his soul? It's already in the soul. Now go and tell the scientists about the RNA, they're going to be shocked. 32

.. Q: Can we change the principle RNA that is the source of the failure in this solar system? ... How do I answer you that one? (a pretty big question). (2:44). No it's very easy, but how can we .. We know originally where this sun came from. We had the problem with it at the start. In the dimension of universal understanding, one of the problems with this solar system occurs very occasionally on a boundary .. of galaxies. It's too far to absorb enough energy to carry the totality and it becomes part of the system that in its cycle of life, it will mature and receive what it needs. But it takes a long time to come up what we call the arms of this galaxy. It's not the DNA of it, in the process of the creation of this solar system. There is the same problem with the twin sister of this solar system. There are similarities in problems, but not as bad as this. In collection of the fields, some of the fields were not absorbed which were needed. It's like with you make a dough and you forgot about the salt. Or you don't have a salt and you make the bread anyway because you need it, and you end up making it without the salt. (2:46). This is something which is ... it's the position of this galaxy in respect to the universe (U) and at the same time the position of the solar system in the galaxy which has created it. But there is a bigger problem, this solar system galaxy and this solar system and this U, are on the edges of the Unicose. So it's a complicated situation due to the position in respect to what we call the Creator. 38
