

## 257th Knowledge Seekers Workshop - Jan 3, 2019

( , )

(:11).

(:14).

(:16). video of conference in Iran.

(:22).

(:26).

(:30). (:32). (:34). .. Ella presents the KF Times 7th Edition January 2019. "You are a galaxy" , "6 Portals, the gateway to the Universal Community"; "Spaceship Program Teachings" ; "1st International Conference of SS nations" ; "Interview in Kenya with Dr. Gatua" ; "New Teaching Format in 2019"; Launching new cosmetic line, "K Plasma Care"; Plasma Teaching in Brazil Health Conference"; "Oil Gas, Protein and the Earth"; "Production of the 4 basic Gans's"; Magnesium Gans, production and uses"; "Viruses; Energy Packages of the Universe"; (:40). Testimonials on CO2 Gans Water, scratches.

(:42).

(:44). .. we saw a paper on creation of Mg Gans. Why do we need Mg Gans. We saw before in the creation of the STM, it bring a new dimension in understanding the structure of the body 32

(:46).

(:52).

(1:00).

(1:08). A graph of spectroscopy of CO2 with the appearance of many other elements.

(1:12).

(1:22).

.. Would the portals become the demise of the man. Would they bring viruses by mistake, what we were not expecting, not educated for. To what extent are we ready to accept such a new change. (1:24). Is his too fast for the human race or should we go through a crash course and do it anyway, because we have come too far to go back. There is no way back for any of us now that we have opened this Pandora's box, or has the invitation for space become our doomsday philosophy. Have we gone so far forward without being fully educated? Or we go through it anyway and we see what education we gather. A simple spectroscopy explanation understand gives you most of the materials for man to exist in the U on one graph. When you put this on another IR or other spectroscopy the writing on the reports coming out is absolutely horrendous. We never knew that we are possessor of such a knowledge and so much of it. We call it the body of the man. (1:26).

... (1:28). .. or do we shut the doors to space for mankind, the way they did centuries ago, because the mankind is not ready. Or the very few people who are and get ready will become the passengers of the U. Now we can see the dilemma and its extent. Now you understand why we have delayed everything so much, both in teaching and in understanding. (1:30).

(1:34). .. are we willing to change, to accept the new ..

.. the colors and number of colors and shapes changes (1:36). now that our knowledge of U has increased. Are we still colored prejudiced, language etc. Because when you look at this graph something really scary comes out and that is, up to now all of these peaks were just peaks, but now we have understood something new, creating any of these peaks in the right direction and strength, in the new Portal, means a new life, and not necessarily shaped like the man. Are our leaders ready to accept such a diversity, because this guy is more intelligent than our king or presidents. And through his dynamic Plasma can control the brain of the president. And coincidentally the (1:38). the strength of his emotion sits with laughter, we have a happy president. These Portals are not going to be easy to understand now that we look at this graph. 21

(1:44).

(1:50). .. Q: If we build these Portals then do we need Spaceships (SS) or do we travel through the Portals? This is exactly what I just said. (1:52).

(1:54).

(2:00).

(2:10).

(2:14).

.. Any questions. Q: When I can control everything by fields ... it will come to you, mankind will very soon understand this sentence. (2:16).

(2:20).

(2:22).

... (2:24).

... Q: What about a conscience, a guilty conscience, not that but when you know to do what is right or wrong. Do all beings have that? Let's do a different thing, what do you call a conscience? Q: Making a distinction between conscience and consciousness which is a different term. (2:30).

(2:36).

... Q: John asks, so these Portals have doors so an entity just can't show up? I am going to stop you there and answer you in a very direct way. When you eat the banana and it goes into the stomach, does it open the door for the banana to jump into the lymph, or does it find to match its strength to transfer its energy across to manifest itself with the energy of the banana ?? Why do you expect a door? Q: Okay I understand. (2:38). Let me add to it because what you raised John is very important 08

(2:40).

(2:42).

(2:46). If you go to the field system and repeat the same thing, but understanding that you need totality of the dimensions, in both ways (horizontal and vertical), then the U is your oyster. Q: When you go through the Portal is that like a new dimension or higher dimension of the earth plane and can you just walk through the Portal and have your soul elevated, is it that simple? Simpler than that. You are still looking for physicality of walking. Q: Just by being in the vicinity of the Portal? If you create the right link inside it, and if you have the banana inside it will pull you in and you'll ?? feel it. Q: And on the other side of the Portal is it still earth, a new earth, a different earth? Yes in dimensions, it will be, because you created that dimension according to MG field of this

planet, minus or plus. The game of space technology becomes fantastic from now on. (2:48). Any other question. ... I think in due course a number of KF members will start defining their understanding of these Portals and their operations. One thing we should not become, to see them as gurus and whatever. (2:50). They are just tested in their own strength and that is all it is. 04

(2:54). Snap is one of the most beautiful souls you come across ...  
(2:56).

... It brings up a very ethical question and man will answer it in a very short time. I know the answer because we've been through it, we've seen it. When ?? gives birth to a child and you're in the depth of the space and the mother has to nourish the child through breast feeding, would the mother feed the soul of the child to grow, and would you change the dimension of the soul to the physicality of the milk that the child can drink from. Which way do you think the man will feed the child in the depth of space when there are no cows or physical matter to feed, then you'll understand how you behave in respect to the guest and how you'll be treated as a guest when you arrive. (3:00). Then you'll understand, do we need to kill to feed. This is an ethical question that every man in the space is going to face. When you go out with your wife or girlfriend and you decide to have a creation of your own to confirm you're powerful, you exist, and you're god and you can create. How do you feed that child? This will be up to man in a very short time. Space comes with other dilemmas if you decide to travel with what I call the American way, wear a suit, a backpack and food, and as long as it's a tablet and you can put it in a microwave, ?? How do we feed our own offspring's in the depth of space. Then it comes to would the father feed the same as the mother, do we need the breast of the mother to feed the child, both can serve through their soul. Then does the sexuality exist? Or is there a truth in what is written in Torah that, I made Eve from a rib of somebody, (3:02). or was it passed on through a traveler of the U, that one can create one, and Eve to be a partner was a creation of the STM to confirm and to be able to transfer energy that he can confirm his own existence. A lot of riddles are getting answered with these points and understanding more of the true knowledge of the U. Q: A question about the rib from Adam, I think it's a ratio like an electron to a proton, if I take my rib out and weigh it, it may be 1 to 1800, ??? , but maybe we have to weigh the rib and see if it's the same ratio, because I see Adam and the electron ????. I said, next time I see him I'll ask him. .... What we need at any level, even at the creation of the 6 members of the EC and the new, what we call space groups, we need the totality to confirm the existence of the singularity, and within that singularity we still need (3:04). integrity and collective awareness of the full dimensions of the fields of the U that we can create that lower, or weaker, or more humble position, that by existence of that, that we can feed it and can confirm our existence. The reason for the planetary system is for confirmation of the existence of the sun, otherwise ?? it can't exist. If the fields and the size of the fields of the solar system is at the point where it can create the smallest entity and the farthest point, that from the more stronger one in the middle, and the smallest in the far end and the weakest can create the dimension of the motion of the fields to confirm its existence in that dimension. Nothing else. ?? same with the size of the body of the man, same ??? It's the size and what that environment allows that size to be. As you understand now, a lot of things in 2019 comes back to us and how we want to be in respect ... we'll still build the factories and do the research (3:06). We'll do everything else, but more or less all the development of the mankind in the past millions of years, where it is now and from now on, as we are born and destined

to die, mankind was created and destined to unify with the Universal Community for the new ?? And that time is now. How we decide to interact with it, it totally us, we can go with shout and screaming or with a happy joyful time. But is the shout and scream out of the joy or out of the fear. Any question. Q: We read about freedom from the monetary system, we now have 2019, when will it happen? You decide. Can you have an apple without paying for it? Have you found somebody on the street that will accept a kiss for an apple? Or can you buy a shirt to be on your back in the cold of winter and you can say think you and walk out of the shop? (3:08). Or the other way is, would you work all day and bake a bread and put it outside and do that everyday, and the flour will come from the roof and the heating from the wall, and you can feed the whole humanity. What do you expect from the monetary system if you yourself expect something to given to you for what you have done. This is what we have created, but would we need to go into that dimension of physicality that we need a monetary system. A lot of you don't need if you understand the work of the KF, the teachings, but then if you can take the fields of the U to feed yourself and a at a certain distance create the fields that no cold or heat comes and you stay warm, and make it a little tinted that nobody can see if you are a man or a woman, that is the only part you care about, then if you want a water you can create, or a food it all comes in because you draw the energy, then you are happy with that life. if you can use your soul understanding of positioning to get from London to New York in 5 seconds why do you pay a monetary system into an airport, taxis to get to the airport, pay the pilot and the fuel to ?? What is good for the goose is good for the gander, (good for the male is good for the female). If we want to get rid of the monetary system are you prepared to work for free? (3:10).
