

## 259th Knowledge Seekers Workshop - Jan 17, 2019

( , )

(:11). In coming weeks we'll announce new collaborations with organizations and governments. Scientific organizations are looking at KF work. ... (:14). We have received some orders for the Cascading power Unit, and it is good to see we have overcome the barriers of race, because they may be thinking that because it's from Africa that it's no good. It made by the KF and certified, we don't get everything right all the time but on the other hand, these systems have been tested by the petroleum groups and there is confirmation that it gives reduction in power. .. The cascading system starts feeding itself that it is a true generator, over time it just needs the phases of AC. If you can create that condition it works more or less 100%, we have seen it achieved in a number of countries. I ask you to support the Ghana CPU, ... (:16). ... (:18). .. some of the advancements of the KF is leaking into the international press. ... we try our best to keep very low on the radar. .. We'll go back to the teachings. We have a question from Caroline. We leave it to you to decide how to make the Portals. Tomorrow in a location to setup the first structure of a Portal. Tomorrow physically on the premises, the first Portal will be set up around the middle of this year and the structure of the organization. What will this Portal give us and what is a portal. A Portal is an eye into the future, another dimension. (:20). That's why we call it a Portal. If you think, the STM has its own portal. .. Now for the first time, those of you who speak about dreaming and opening of the STM. How the physicality has created what I call a portal for its own transportation, communication, ?? value strength of the softer and higher order. What does this mean? If you look at the structure of the physicality of the man, puts a ?? of the STM, you'll see the portal, it has been there, it's a portal that we as human beings never considered it, but now that we understand and we graduate into it, we have to, we have no choice. If we look at the skull, the STM has made a portal for itself, very cleverly. (:22). The eye in the dimension of physicality and an eye in the soul. If you look at the picture of the soul and draw a line right across it, what do you see. If you take the totality of the wavelengths or what I call the bandwidth, the eye of the man, what do you see, you cross the position of the STM. very strange, but what is important is, the eye, or the STM has chosen a dimension of the soft tissue where the rest of its structure is considered to be well absorbed. When we look to the neural system and structure of the eye, and the STM, we find one of the most important Portals of life and ?? self. If you can increase and understand the strength of the STM and its operation the whole universe becomes visible to you. In the Universal Community many, many races are like this, it's all closed, but they have used the strength of the soul to go beyond the dimension of the physicality of the structure of the boundary of the emotion, or what we call the brain. When we speak about the STM and a portal, the eye of the man. (:24). Skin. But at the same time this skin ofllows a structure of the physicality. How far can we go and how far can we extend this knowledge? Do we need to have vision ?? direction to be able to see or can we direct our vision for us to be able to transfer the strength of the STM through. When you understand and humanity comes to mature enough, you'll find out that the physical eye of the man and its body, physicality, is one of the most powerful tools that a man could have been given to be able for the transportation, communication for the soul with the ?? universe. Vision as we call it, the eye of the man, is a soft tissue ?? If you look at the position of the soul and at the other dimension of the brain, the soul sits right through, looks down, ?? the eye of ?? Up or down slightly and you'll see the ?? direction of the soul. We are looking at the side view of this, when you look at the frontal view you'll see the eye looks

direction into the STM. (:26). Do you remember the first times we started speaking about the position of the soul I explained to you if you can find a stereo (head) phone and how you can locate it. So you have your stereo (head)phone and your vision, you can pinpoint the soul. If I draw this in a different dimension in a very practical way, you have the 2 hemispheres of the brain, and the 2 eyes which cross, and the 2 ears, if you draw the lines straight across in a very specific way, you should be able to see the dimension of the soul, and the position of the STM. We always had access to, and you always gained access out of, and in the future when the man grows in knowledge, you'll understand something very simple and that is, why when we have a dream we (also) have a vision. (:28). When we have a dream about our mother or loved ones or children, why do we see visually, why do we connect with the noise and the place, it's because the STM sees through the eye and in that process of ?? and reaching other souls what it gets back, it comes through the vision, therefore we have a vision of it. Up to now, man has never understood this. This ?? absorbs, has a limitation, some ?? visual of the eye and the liquid within the eye is the transformation of the level of the soul to the level of the physicality. And in conditions when you don't even have an eyeball, the structure which is built by ancestors in the position of the conversion sits within the eye. The physicality of the eyeball is more or less irrelevant ??? This is why our soul's portal is the eye. And that's why everything we see as a dream, ?/ a connection between our soul in understanding connection with other souls goes through the eye at a given strength. But we have to understand that the whole structure of the skull receives other strengths at the level of the vision of the man that we see (:30). our loved ones or we see ?? , we see through the portal through the strength of the soul, through the vision of the eye which in turn ?? soul of the environment, and the soul of the loved ones, we see converts back into and becomes what we call the vision, or memory or what we had a dream of. Even in the daytime when the man is awake and looks through his eyes, the soul is still in communication with the others, and what is coming back and gets registered within the structure of physicality. The STM never sleeps and the eyes never stop converting. But it comes to another point, when you travel in the depth of the U and this vision of, or condition of what we call vision, or this condition of hte rest and sleep disappears because now our rest and sleep time is totally dependent on the rotation of the sun and earth, in the space there is no sun, and we are in the dimensions of no time, and no space, because that space is yours, there is no other space you can be in. A lot of you don't understand when we speak about no time and space, ?? the U, because the time, place, and space is you, nothing exists before or after. (:32). When you are in the depth of the space and you don't have these parameters (earth rotation) which have literally controlled the physicality of the man, is there a time for rest or do we live through the eye of the STM. Do we go through 8 hour cycles and 16 hours of waking because the 8 hours in the depth of the U is 1 second and ?? is less than 1 second ?? does it exist. Or do we go as part of the understanding of the regeneration, or replacement, do we take and wait 16 hours to recharge, what we call during the rest time, or do we recharge as we use, or do we take from the environment of the U as we need that we don't need to recharge or that rest time. In ?? countries, and lack of our ancestors, except now that they brought their religions and they shut us closed down because it's a Sunday, or Saturday is a Jewish holiday and Friday a Moslem, if 4 more religions are brought in the whole week will be holiday time ... (:34). .. then we become true man of space, there is no space ?? gap. It goes back to the olden time when all the religions came in to rob the STM, ?? work 365 days of the year. They found that they celebrate for something and they celebrate. So we go back to our origins on this planet, there was no weeks, days, no time. But the difference with the world of the space

when you go into it, there is no lack of energy, because as we use we replenish, actually we don't use, we tap into the universal energy, as we use it, it ?? Do I need to hoard food that one day I am going to go hungry in the space. But the food is there, it's not part of my ?? it will be there as I need it. Then it comes to one fundamental question, what is man going to do with the life of no tiredness, no hunger, and no dimension. How do we spend our time in the depth of the space. When you watch some of these futuristic movies they put people in capsules to be asleep for a hundred years until they get to the destination. A hundred years in the life of man is nothing in the space. And if you read the news, now that we understand how the STM works you don't need to put anybody to sleep, but you bring balance between the STM and the soul of the physicality that they work (:36). in a synchronized way. ?? how many nuclear physicist, I am a scientist by nature, to me when I look at the STM and the soul of the physicality, it explains to me a proton and an electron, an electron moves and it takes energy as it needs to find a position in relevance to its proton, in the depth of the space the life of the man will be the same, the physicality will absorb what it needs from the soul to keep within a position and a distance from its creator then do we need to look for food in the span of the U, or do we actually become another work of nature, an electron and a proton. This is 1 atom and this is 1 atom .. the existence of the man. If you understand this, do we need to feed the man. This brings us to a lot of things. I didn't come here to build up factories, I came to detach man from physicality, which is ?? within the factory. But in the way I can get the man to see the beauty of the T and start building things and become independent. research centers to develop new ways, to understand more, but now that we understand and through it we can understand, (:38). how the STM works and how it manifests itself, and how it keeps its position in respect to its dimension then is there any reality to the physicality of the man, or is it just a mirage of fields in trying to keep position with each other, create vision, a mirage of physicality. Then is there a space and time, then is there a time to have the space to confirm the existence. Do we need the vision or is the vision a portal for communication of the STM and without the restriction to the ?? of physicality to the strength of the other souls. Would we see the souls of entities of the U through our soul, through the eye of the man, but not through the physical operation of the man, the soul of the cells of the physicality of the man, as it converts to the vision, the STM. Is there a path in the brain which can convert such ??? for us to understand, and then it comes to another dimension of the understanding that the man has to open up to, that we have already been aware of the existence of the ??? of the U, but the information has been filtered at a given level that is not, that is above or below (:40). the ?? sight vision of the man ?? in the dimension of the physicality of this planet. The is, it goes back to the medical teaching, we had Dr. Eliya in the first 30 odd teachings, in every shape or form she confirmed the existence through the medical ?? acceptance and the machinery and existence which confirms the correctness of, then we put the parallel in the dimension of the soul and understanding the work of the PI, then this brings one thing very important to all of us, that we have created systems and technologies to confirm that what we see is what it is, because we have transferred the knowledge in the physical dimension of understanding of ourselves. We send aircraft onto Mars, to Moon, and we take still pictures of that frame at the vision of man and not at the strength of the vision of the U. And then because we do it we confirm to ourselves that this is it, because as we did with medical systems we built systems to fit into the fallacy that the oxygen crosses the lung and then it gets oxygenized, and we all accepted it and now with the new T in the understanding of ?? we understand that there is no such thing, that it is just an energy transfer. If you could put the banana and transfer its energy (:42). through your mouth

and the banana appears in your lymph and it becomes part of your body, you can do the same thing, push the banana through your eye and it goes through and gets transferred to where it has to go, but you don't need the mouth you can just push it through the skin and it becomes part of the lymph. So we understand that there is a process of conversion, but man has made systems to confirm according to the time of his understanding, systems to confer that he is correct, and we have accepted it, and this is now and it's time to understand and to want to understand the work of the physicality of the U is not at the level of the vision of the man. It's at the vision of the full strength spectrum STM. We just convert it and take the part that we need. If you go to the last pages in one of the books, I say the God is the Creator and the man ?? is the converter, we convert very little of it, but the love of the Creator spans the whole spectrum. What to you is an ant, to other creatures of the U is a moving soul, it doesn't see the physicality. This is what we have to understand and in the process of the life ?? when you ?? create portals, and portals to transfer the STM, or the dimension of the physicality, these things will count very heavy, because you have to decide where is the space gap that I can exist and not necessarily in the dimension of physicality (:44). of this planet, this solar system, galaxy and this universe. If I take the same soul which gives the physicality of the man with 2 arms and 2 legs and put it in another universe strength position, it could be nothing, it could become 1 cell to cover the whole space of that U as 1 cell. Because it's the energy of the system that counts and not the length of your fingers and toes, and ?? Then we come to one fundamental point in understanding, when you make these portals. these systems of transportation of the STM for transportation of the U, do we need to control them ?? by strength of the STM on this planet, or do we give the STM the freedom to choose his place, point ?? ?? then what happens to the beautiful fallacy which the man has accepted, "I made man in the image of myself", the image of me on earth is 2 hands 2 legs and the image of me on planet Zeus is 20 arms and 40 legs, which one is correct, or is my image dependent on the environment of the manifestation, and then do I still communicate and be in control of the space dimension of the STM in that position, and I still can look through the portal and I'll still be in touch with the mother or sister which I knew on planet earth. (:46). In the upcoming conference with the space agencies around the world in a few weeks time these are the things that will be considered. The new space agency which will come as the collaboration of the work of not only the space agencies but the KF of these nations, including them as part of it because then they become responsible to teach the scientists at NASA and Russian Space Agency and the rest, the understanding of the PI at that level of what we teach, then you'll find out that they have a lot of problems until we can show, manifest. When we have set up the "CIBRIU" what is the name for the newly setup space agency, which stands for China, Iran, Brazil, Russia, India, and United States space agencies. We are not looking only to bring scientists from NASA. First comes the scientists from KF who have developed the space T in their work. We merge the space agencies of the nations with the KF. Because it's the responsibility of you to teach these guys that there is another ?? what you do. cibriu.org is registered and will start its operation in the coming weeks. It will be a collective space agency program as part of the KF. (:48). Part of this is for you to open the eye of the space scientists of the present to the understanding of the work of the STM. With the confirmation of the starting of CIBRIU we bring cyber work of the STM in what ?? many of you think that is ?? ???? think twice, where doe the U sit. The creation of understanding of the new T and transferring the knowledge of what we have taught and you have become wise to it and many of you have started to build the space systems ?? you have understood it, you are building the SS to ?? the fine lines which I teach and many of you don't understand

and some of you do, you will become the teachers of these agencies and the teachers of the new space science. In this process it's easier to teach the scientists of the new space era, we have moved from the physicality of the craft, and planet earth, and the body of the man, to the dimension of the creation which is the dimension of the STM without ??? It will be very hard for the present aerospace scientists to accept, because then they'll find out that they have no passengers to carry, which was their aim. We have one of our colleagues, people we know who is ??? (:50). ?? policy is to complete the NASA space mission to Mars for human life landing on Mars in 2030. The head of the mission has been told that he can't speak to the KF, .. he can lose his job. Because how long can these space agencies cover-up. We see in the next level that by building the space cities we'll show that they are nothing but the soul of the communication, and not only on this planet but across the U. In the setting up of the new space cities one of the new considerations, which is part of our obligation, we have to create a space that is a point of interaction the man and the STM with creatures and the soul of the creatures of the U. Because now we understand that we have to have a guest and acceptance room, somewhere we can provide ?? and provide the environment of ?? of the planet, to be seen and shown. As a nation ??? matter state some years ago, they sent some space craft out into the U which is still going, it says that we are people from earth, and it says this is this, etc. But now we have changed with the new understanding, we bring the soul of (:52). what we call, the man the universe to be a guest at home, even though they have been a guest here for a long time. I was explaining this some time ago and it's not far from reality, sometimes you get on a bus or you sit on a bench somewhere, or you come across a man and you start talking and then you realize that you know each other, from childhood you went to the same school, or you lived in the same neighborhood and you talk about this and that cafe, ?? running around in that environment, you have met but you have no memories of it. In these space cities, now you are given the memories to remember, that the man you met on the street at such a place was a traveler of the space as you didn't know, but now you can connect ??? but he looked as to be eating to the conformity of you, for you to be happy, but it is there for him to see the STM. By opening up these new space agencies, these new space cities, we are not inviting you to come and see the new magic or new Disney world, but it's the world where it makes you dizzy to understand that it has always been there. It has always been with us but it is us who have not understood. (:54). if you understand it, you have 2 legs and 2 arms ?? due to the atmospheric condition of this planet and you carry the Amino Acid (AA) of this planet, and then when you go to planet Zeus and you get the dimension of the physicality of what it could be there. In creating these portals we allow the passengers who made themselves to be in the dimension of man, to show themselves in the original dimension of their point of creation on their planet. And then we see the true soul and the creation of the time and space of the creation. If many of you think, I can, I will see aliens and I can say what it is, my friends it is a very good guess, but when we create a condition then we see, ?? we never knew, that the man we saw on the space in the dimension now this is his true face, his true physicality at the dimension of the creation. The change in the coming time is so rapid, that mankind has 2 choices, to carry on with the stigma and stick to what is in the past or accept the new and the present future of the ?? science. Many will have the ?? remembrances of earth. It used to be .. it has come it has to be. It's (always) been there, it's us who didn't know. As I explained to a child, (:56). he said, when did you discover electricity? I said, the electricity has been with us since the beginning of time, ?? It's us who now understands how it is produced and we make it and call it a Tesla ball. It's the same lightening. It has always been with us, but now we are educated to see. We are developing a knowledge of the universal structure,

not in the matter state of the man, to be able to understand the reality and the truth about creation and not about ourselves. The minute we start looking back to see about us, then we come to (we stop at) the same point that man has been up to now but further down the line ?? These teachings in the past few weeks will be heard by many men of this planet for generations to come. These teachings are the cornerstones of the new Era. We just happen to be with it as it happens. In the coming time all this will become what we call, the bread and butter of everyday travel, interaction, existence of the man. If you are not happy in the dimension of physicality you do not need to imprison yourself into it, that you confirm and conform with it. This is important for many, many things when the man comes to space. (:58). We learn the new freedom, but we have to learn with this new freedom of the physicality comes a new principle, a new dimension of totality, and an integrity of what is mine and not what is others. And it goes back to the first Commandment, Thy Shall Not Steal. In regards to the new understanding, I have seen many people mixing Gans' and other things and I sit down and I say to myself, my god, they are still busy with it, they have not seen. If you want to replicate the work of the U and understand it, do what happens in the U and not what you want it to be based on what you understood. We have started a development in the final phase of the Spaceship Program and hopefully in due course you'll see unconditional flight in the structure of the STM. But in the new space system we have offlowed what "I want", it has been very much up to now blocks by blocks for you to learn the next block before you can have the whole structure. The new space system which is now under design and development is a completion of totality. (1:00). It's the replication step by step. We'll not release when, how and who or where it is going to be shown, but when it manifests itself every soul on this planet will feel it. In the past days we have moved to the final stages of it, ?? of man. Systems are getting designed and developed, at the same time when these systems come to the full operation, it will replicate the operation of the STM, ?? not the physicality of the man, even though we need the physicality ?? The final phase or stage in the system is very simple but extremely ?? because it has to take into account everything that leads to creation of the STM. You have an egg and a sperm on their own ?? , but when they share their fields, in sharing they have, rubbing off, which creates a condition of collecting the spares which becomes a new center, and again the interaction of them becomes the creation of more cells because it comes out of the friction of interaction plus what the environment gives that at the end, (1:02). that it ends up with the STM and the physicality of the man. But up to now no one has offlowed this. In the Iranian space agency work 10 or 11 years ago I put this in, but the Iranian scientists have not understood this ??, they still work on the matter state. But if you understand this and comprehend, then you'll understand something very, very simple, that man has entered the final phase of understanding not the work of the U and how to travel the U, but to understand the work and the ?? of his own soul, and nothing else. What you call the "Unified Field Theory", if you read my work, if this is planet earth, the UFT tells you one thing, the M and G are all the same, it depends on which point and which direction you are looking at. If you stand and look with the 2 eyes you see this coming and going and it behaves as 1 field. If you look that way it looks red or white and if you look that way it looks red or white, and then the other way the same, and then you say they are 2 different things. But in reality if you look at the true structure of a car you put red lights in the back and white in the front, but it's the same car. (1:04). It's unified, it's the same thing, it depends has it passed you or is it coming towards you, so as it is the same car it's unified. The UFT has become an enigmas in the world of physics shows the lack of understanding of man. If you understand this, then change the car to the STM. Then you have to decide, are you getting or are you giving, or is it coming to you

to receive as you need it, or are you giving away what you don't need. Those who made the world of UFT shows an absolute lack of understanding of totality of the creation, even though they live by it everyday. Is it on the red shift or the white shift, in fact there is only 1 shift and it's the same light, same ?? it's just dependent upon the observer, and then if you understand this, as a man in the space, this makes a lot of problems for you lot, and that is, is the soul next to me coming to take from me, or is the soul on this side coming to give, and how purple is this, and how blue and white is the other one, then you decide your reaction, and in fact, your position in respect to both, you take a new position. (1:06). If you look at this it's exactly the same principle, the same teaching, nothing has changed, you just change the name of the earth and the sun, to the name of the man and his physicality to the position of the STM and another soul, in essence it's the same essence the same work of interaction, the fields of the U. So we come back to the beginning, what is the purpose of the STM, and now that we understand this, has the STM, now has become understood by us that it leaves, it has communicated, (that) it will forever communicate as long as the dimension of the physicality of the man exists through the portal of the eye of the man. Or does the body need the eye or has he made himself 2 holes to be able to escape through, and be able to do his work, to communicate with the outside at the strength of the vision of the man. Now for the first time we understand what it means and how the dream comes to be visualized by us. Because we actually see that our eye has always seen the soul of the mother and has transformed it in the physical dimension to the structure of the mother, (1:08). even through the life of the mother in front of you and the presence in ?? Then you come to understand how far man has ofoled himself in confirmation of the physicality, or we have changed the strength at a certain strength we see the physicality of the mother but in fact, we always observed the soul of the mother, and when the mother changes the position and leaves the physicality we still see the same soul and transfer the vision as the mother. This is the truth about the creation that man has never understood. The eyesight of the man with nothing there to block the strength at the matter state of conformity is like a house with bricks and wherever you go you don't see anything outside except where you left 2 windows. By the brick walls we block ourselves to see the outside and the outside to see us, but we choose the windows to be the portals for us to be able to see, so has it been with the man himself. Nothing changes in what's happening outside in the reality of the dimension of existence, it's just that when we decide to look through the window, but all the information from outside has always come into it through the window and all information has gone out through the windows. We made the house in the same condition and position of the skull and we gave it a portal, we call it a window (eyes), and we made it transparent. (1:10). It's us who has chosen to put a shutter that we don't see when it's dark or when it's cold, and in the eyes we created the eyelashes that this time I just want to work through the soul, I call it sleep time that I don't need the dimension of the wake time dimension of physicality, that I don't want to see the color, bedroom, roof or ceiling or the sky, so I only work through the dimension of the STM. Therefore the work of the STM never stops. Just because you close the shutters of the windows of the house doesn't mean that the sun is not shining, not that the light bulb in the house is not working. You have decided to close but in reality the field strength of that shutter moves in, the heat of the sun comes in. So it is with the STM. But in the condition of the eye when the information comes through the ?? cipher of the vision, the socket that is another intermediary ?? conveys the information of the STM to the dimension of the physicality of hte mother as you know. When it comes to the dimension of the space how do we recognize passengers of the U if we carry the dimension of the physicality of the man on the position and the

strength of the field of the physicality. The astronauts of the future will have a huge problem to separate themselves from this. Those of you who travel through the structure of the STM will enjoy the beauty of the creation across the U. Then the question goes do we still need the SS or do we travel on the ship of the space of our soul and conquer the U. (1:12). Now I have opened to you one of the biggest mysteries of mankind, because you are so physical you have to see it to believe it. Now you understand how seeing has been a tool for you not to see the reality because it has kept man in the dimension of physicality at the strength of more or less the Ca of the life of this planet. With a slightly different strength of the Ca and I create the transparency of the vision of the man. And when I pile it up I call it a skull and when I thicken it a little bit I call it a skin, but this is the strength that I want to travel and I made portals for it to travel in the spans of the U. Now we have opened another mystery about the creation, it is for those of you who understand to decide where you want to go and for many of you it will take some time to understand, and many of you have already understood because I have reached and touched the soul to carry the information. If you look at it, we have to do something while the soul is alive, it doesn't matter if it's on this planet or in the U. What is better to teach the other souls, that is what I do ?? to elevate the souls of so many. Then the question comes, what do you do when you become passengers of the space (1:14). and in the dimension of the soul of the creation, and you become part of and you become into a new dimension. Do you become a teacher or do you become a thief? This very much depends on the strength of the physicality that you chose or you live on the extension of the dimension of the STM. Physicality needs feeding and if you can't find continuous feeding you become a thief. The soul becomes a teacher, it's not feeding, but it teaches and as it teaches it receives. Then you have to decide who is the white light and who has taken and become the red light, or is it that what I have given has become the red to me, not what is taken from me and therefore moving from me. This is a very important point for those of you who start understanding the work of the soul, the work of the portals, and that the portal of the U doesn't have to be a city but it is in the eye of the man, through the vision of the man at the strength of the dimensions of the physicality of the space and time of the existence. Now you can see where the new knowledge goes. Every week we extend bit by bit that somebody might understand. Some one still builds a SS and some one has already made the ship from the space of their soul. (1:16). Then the next time that you dream and you say, I had a dream, just think, I didn't have a dream, it's what I shared with the soul and it allowed me to be, to share with. And as the sun shines and it spreads light and its fields, and at the same time it shines on earth, and Jupiter and Saturn, it's the space of time that it confirms its manifestation. So as you are dreaming of or communicating through the dimension of the soul then you are yourself another dimension as a star in the galaxy receiving the lights and fields of the U and you take as much as you need and give as much as you don't need but you exist in the same time on earth, Mars and Jupiter and you can be observed in another part of the U as that shiny dot you call the sun, we call it our solar system. Now it becomes very easy to understand, are we dreaming or is our physical life part of the physicality dream. Then it comes to the point, do we live 2 lives, 1 life in the dimension of the physicality strength and 1 in the dimension of the soul of the strength of the U. When you close your eyes and call it asleep, (1:18). and you have that dream, which means you use the dimension of the portal of the eye to be in maybe 10 different dimensions but you only want to choose one, but the same thing happens while you are walking, you live the 2 lives, the life of the physicality, the soul of the strength of the matter state of this planet, and then the dimension of the soul of the universe, because the sun at this point is earth and we see, and the sun at the other point ?? and exists as

Jupiter or Saturn and is the mother or the father, or somewhere else. Man has to realize the portal of the STM operates in 2 dimensions and it's him who has to chose and at the time when you blank out one frequency, which you call the frequency of the physicality, the other one which is ?? around the time has been going ?? and still in touch, we decide today if I want to listen to channel 4 and tomorrow channel 3 and the channel 4 was the dream where I wanted to see where the mother is saying, and the channel 2 is my father and I can convert that channel vision ?? coming back, transferring the knowledge through my eyes to physicality of the existence of where I see. Then you understand that man has always been in touch with the totality of the U, it's us who has chosen to filter through the physicality, we still let the rest process in the back(ground). It explains why the brain is so big and such a big recording of everything, because it's not just recording what you see with the eye of (1:20). physicality, it's recording what is happening with the eye of the STM with the rest of the souls, and it has to remember it because it's the same as you remember that you have been to Africa 20 years ago and you saw the lion, it has to remember it has been to the other universes and has seen such a thing, because the other souls which it is in touch with have been there and they want to discuss something. 26

(1:22).

(1:26).

(1:30). Any questions. You'll understand these teachings of today especially, we'll be put into the structure and the teachings of Buddha. 39

(1:36).

(1:42).

(1:50).

(1:54). .. feeling the others and they become part of them. Each one of us will experience this in different ways. Man gradually will start going back to the memory of the physicality and the memory of the soul, because it has always been there but we didn't know how to tap into, and then to what extent we allow it to come and to be accepted by us, and it goes back to what I said, we take from this T according to our intelligence. We accept the understanding that there has been another recording of our lives all the time with us but we were not aware of it. It likes there has been a "spy" in the camp, but we thought we were taking a film from what is happening, but in fact, we were getting filmed ourselves of what we are doing in the whole structure in respect to the others that they are, have been in a way, already with us but were not aware of. Each one of us will experience this in a different way, now that we are, and slowly people will start gathering ?? The teaching of the KF, my teachings in the next 12 months will come across every man on this planet. It has been set. It's not the obscurity that we have been, we have choose to complete the teaching that when it comes into the totality, it will be done and accepted by totality in one go. The whole process is just like you are in a research program (1:56). and you fine tune and make everything perfect, then you exhibit the car, as the new invention, the new car. 09

... I told to Armen this morning, my work is not to build factories but to change the soul of mankind, (2:00). but if the factory has to be built because there are things to be done, okay we have to be busy, we keep busy, but the process can't stop. I wrote to Caroline yesterday and read it in the private teaching, when the process has started ... I am so glad I came here to work here with such a beautiful nation and government, this is the Chinese nation, the peace will come when the Yin and Yang ?? live in creation, and "Abrahamism" (3 Orthodox religion of West), will come to live in balance. Iran and China, the extremes of ??, to the extremes of religion ?? working through the space program of the Spaceship will bring humanity to balance. We brought the knowledge to Iran 11 years ago and now we balance it with China. (2:02). If you look, the setting up of the "Cirbo " is China and Iran. Is to bring the balance at the beginning that it lets the rest to be ?? We know what we are doing, it's just that covering the sugar with a slightly different test, that when the sugar comes you all don't throw everything away and just stick to the honey part, because honey part will be here forever, but man has to understand what mistakes he has paid, and made and for it to change. My work is well planned, designed, and it will be translated to and acted upon, because it's not just one teaching of 259, it's the teaching of totality that there is no numbers, but it has taken so long to bring the education and to get educated. If we would have brought this T and knowledge, mankind was not ready that all of them benefit by it the same way, that there should be no inequality, all have to be equal, and we made and made and brought the knowledge of communication into internet, television, the way I am talking to you across this planet, (2:04). to be able to deliver at this time so everybody gets the same thing. 05

(2:10).

(2:20).

(2:30). ... (2:32). (long talk ..) using N coated mirrors to discharge emotions, then can feel the fields easy. .. price 1,000 Euros for the pair it's far too less because we can only produce 1 in 2 months. (2:38). .. (2:40). (2:42). .. the system you have is known as a plasma frequency jammer. (2:44). it blocks, but at the same time you still hear commands, the voice, but your switch has certain ?? This is the end of the military warfare. This is how what I said, we make, metal birds out of aircraft, and bathtubs out of aircraft carriers. This is what is the beginning of the new science. No interference, it's just a matter of plasma transfer. You can use the same thing to feed the man. 48

(2:46).

(2:48).

(2:54). This is a live test, ... (2:56). (2:58). Shows the plasma field unit. (3:00).

(3:04). (3:06).

(3:08).

(3:10).

(3:12). (3:14).

(3:16).

(3:18). What you'll see in the coming time,

(3:20).
