

260th Knowledge Seekers Workshop - Jan 24, 2019

(,)

(:11). We have shared a lot in the past 5 years. What is important is to see where and how we can go with this knowledge. Ella will introduce the books. Amazon has Book #1 and 2, for \$19.99. ... (:14). ... Fraud on Amazon, Structure of Light, \$895. (:16). The second edition for \$22. (:18). (some products). (:20). (teachings start). What I'll try to do this week is to open the eye of some of you to the science, and some of you might come to it somewhere down the line, and it's so much in respect to life in the world of science and how scientists are developing different aspects of the T in the background and it has taken hold with elite scientists in the world. You know we had the scientist who claimed the Black Hole was the eating machine and the rest of it (Hawkins), we have proof of it and now we see that in reality it's not. A lot of terminology has been created and they're very hard to get out of the system because a lot of people accepted them. The terminology like the horizon, which comes with the black hole ?? core levels which comes with it to get to this point of horizon, (they say) you can never come back and the G will take hold of you. These theories are still carrying on, because one person has not asked ... (:22). .. What is interesting is that these terminologies in the world of science and creation of black holes which started with Steven Hawkins, still carries on and it becomes very difficult to change, because they come up with so many theories on it and they carry their own momentum, and are getting defended by scientists in a very aggressive way. By the development of the new technologies that are coming in they are creating more fallacies and unacceptable knowledge in the world of science. One of these is called, 3 dimensional ?? of the universe, what they call the hologram. Some of you might have heard of this terminology. What it is, is that the whole U is a hologram and there is no reality to it, and the reality is that the U is flat, 2 dimensions above, and what we are looking at has no reality to it, but we have come to accept it as reality. And hundreds of millions of dollars are getting spent on this fancy talk. (:24). It is good for the KF K Seekers to understand what this is and then you'll understand how this thing has taken hold, and governments are spending billions on it. Very soon someone will bring it to a point of reality. What a hologram U is, is that it is considered that the U is flat and then the reflection from this flatness creates images which are not real being the galaxies and stars and everything else. We can redefine this, this hologram principle is getting a lot of money spent on it. It started a few years and now they're actually creating a lot of things to confirm it's true and people because they can see things they believe in it. What it is they say, for example there is a 2 dimensional picture of the galaxy, and then underneath of it, if you look at it that way, here we see a galaxy, but actually there is no galaxy, there is just light shining through to give us that image. And one of these unreal things is planet earth because it has its ?? on the surface of the 2 dimension. This partially started due to a lot of computer programming, and now they are writing computer programs which actually can make and show this. But in reality, no one has asked a single question, why are these people spending so much money on a lot of fallacies. Because we see this in the real life (:26). and nobody is stopping this game of the hologram picture of the U, that if there is a galaxy here is actually creates a (reflection) here and there is a pin across it that it holds its position, they're imaginary pins but they're M fields. You see on the surface of the 2 dimension, this is to them the reality, what actually exists, and whatever we see underneath is just hologram. So the real life is in 2 dimension and we see what they are explaining, but in reality nobody has told these people that if you stand on earth and you look at the sun, it's flat, none of us

see the sun as a full sphere, we always observe the sun as a flat entity, but in the shape of a circle. We know the sun is there because when we look at the earth from the moon again we see it as flat. So in reality is the earth flat, we are living on it, and the earth is round because we know, we have mined in it, we travel around it. (:28). So when it comes to the new science of holography and they are trying to convince you that the U is flat. Yes, in the eyes of the man as an observer it is flat, but in reality it's not, because the man on the moon sees the earth as flat disk and the man on the sun sees the earth and the moon as a flat disk. This theory of holography they have created dimensions to it and have created it to say that it is a flat entity. What this subject brings up is that now that they have managed to create hundreds of millions of stars and they say they are holograms, and they confirm that it has a face like that earth outside, it's very much like if you have an eruption inside the sun we see it on the sun, because it bubbles up and we see it. And they say that this surface is flat and it's 2 dimension, that this hologram of the U as we see it is a reflection of a flat surface. ?? it's changed something fundamental. For the first time man confirms that the U has a face. There is an end, a surface exactly like the surface of the sun, earth, and the moon, and this theory that they are building up, it's quite possible that the U has a face, because as we say the U is Unicose, and so as we stood here and we watched the sun and the moon (:30). if you stand in another dimension we'll see the face of this U. And as is in Book #3, we are part of the Unicose, there are many of these flat surfaces, the 2 dimension pattern, because actually the light through the universe shines on its surface, like a fish in the ocean. But 1 fundamental question to ask the scientific world of what I can explain is that when you are on the sea, on a boat, and you are sitting on this flat surface of the U and it is transparent of anything, is this galaxy a fish swimming in the ocean of the U, as it does if we were on the boat on the high seas. Does it mean that our U has started opening up, does it mean now that man is beginning to understand more in its mistakes it's confirming the existence of the Unicose. Huge amounts of money are being spent in UK and US on this hologram, the last station is a \$160 million for just image producing computer programming. Originally 10 years ago this came up because people could not accept (:32). the totality of everlasting black hole that it gobbles up everything. A lot of scientists thought that if everything ends up to nothing then what is going to happen to us, therefore they created this mirage ?? Nuclear and astro-physicists and cosmologists altogether ganged up to confirm that there is no existence, there is nothing, because we were convinced that we'll all end up in this black hole created by Steven Hawkins and we'll never come out and that will be the end. But if you look at the fundamental principle of understanding of the reality about the interaction of the pattern of the fields of the U, it goes back to the same thing, it's as much M as it is G. It means even a black hole, if you consider it, due to confirmation of its existence, its atmosphere. And as we see with the interaction of the fields of the planet, and as we see with the interaction of the fields of the sun, it creates its own ripples. Up to now the world of science has denied this, and this is why they have come up with all these, what I call ridiculous concepts. Because at this moment in time in the world of fantasy of the black hole eating everything up we have never allowed the reality, that as much as it has G, (:34) it also has a M atmosphere too. And as we have seen with the earth, as with any energy with certain mass enters it, it creates light with it, it creates a dimension of existence of its atmosphere. So has happened on the surface on the boundary of the atmosphere of the black hole. We see the ripples of the confirmation of the existence of the atmosphere of the black hole when you look at the black hole in the background of the ?? of all the galaxies and the fields of the U as they cross. We see shimmers and play of games. Therefore it means for the first time we can confirm that a black hole is an entity. It's a

confirmation of existence very much like the sun, the earth, or like any other entity in the U where it not only has G pull, but it has its own atmosphere. Steven Hawkins brought us to this mistake, that we always looked at it as only a G field, but in fact, it's the same as any other entity. It has as much G as M. In the paper I wrote, the creation of black hole, this is what the meaning and emphasis was on, that why we see lights on what we call the magnetosphere of the black hole, (:36). it shows that it reflects light out as much as it takes it in. As much as it pulls in, in interaction with its M field it creates and releases light. The way we see meteorites enter the earth and they burn out and they create light. How come all those lights get attracted inside but we still can see light on the fringes of it outside. For the first time, if you understand this, those of you who ?? in the space T in the dimension of the travel, you'll understand that this is one of the biggest gifts mankind has ever been given. High speed transportation using black holes from one spot to another. Don't forget what you call black hole means the center of intensive fields, compactness. Nothing else. And if you were coming from earth and you locked into one point and to the next one, you might pass the magnetosphere of the black hole, but you can increase your speed beyond the speed of light by billions of times. Man in time will come to understand the beauty of the black holes. As you know in the recent past they made claims and built up (a theory) called Dark Energy and Dark Matters, and the dark energy was the cause of the movement in the galaxy, and now this theory has been totally abandoned by the cosmologists and nuclear physicists because it doesn't exist. If anybody speaks to you of the dark matter they're of the old generation and have not read the new science books because now we understand that there is no such thing as dark matter, (:38). or dark energy because nobody has ever seen it yet. It's just a guess that started a lot of other fallacies. It is important that this part of the theoretical cosmology has to be understood by the KF supporters who will become part of the space technology. You have go beyond the present understanding of the science so that you can understand that the speed of light, is the speed of the time and space that you are traveling. Maybe in the space of the speed of the light of the earth's MG field ??? but if you create another MG field with another material you might reach another speed, which is the ??? G field of the attraction of the light in that matter state, it could 2,3, or 10 times faster then the speed of light on earth. This is the reason why we see the shimmers on the magnetosphere of the black holes. As different matter strength of the fields decide to adjust in respect to the field strength of the background, and then you see the shimmers of G and M or what we call the MaGrav of the black hole is one of the best and clear indications of an entity as a whole. And like the sun in as much as it gives it takes. It takes in its transparent condition compared to the illusion of the black inside and it gives the same in the dimension of translucent atmosphere around it, in what we see as shimmers, (:40). or what we call magnetosphere. As we enter the space T the true space T of the U and not some manmade rocket propulsion this will play a huge gain in the dimension of the space travel. This means, if mankind understands the creation of the black hole within the structure of the cause of the Star Formation (SF) then a new dimension in the dimension of the transportation appears, where zero time travel across dimensions of the U becomes the reality without interacting or interfering with any object, be it galaxies, stars or any other entity. The creation of these 3 dimensional programs that they are working on, call it holography of the U to show that it is just a hologram and there is no reality to it, opens up a lot for those who work around the KF programs ??? SF, there is an extension in the Unified Field Theory, the Book #8 to be written and released is only and only about M fields of the U, how they are created, how and what is their origin, how they become to create what we call a 2 dimensional and 3D effect, and how our body has adapted itself for a lack of what I call,

(:42). understanding or make it easier to not jam the brain with the work of it, converts everything at a distance to a flat surface. These scientists are using this holography as a way of cheating, what more or less Einstein did to us in respect to the speed of light. If you think of it, the earth is flat in the eye of the man on the moon, we still have creatures, water, mines, and the whole caboodle of ?? inside. Then there is a fundamental point in the whole understanding of the structure of the space and that is, how come the speck of dust on the boundary of the solar system here becomes a planet and absorbs matters to it. Is there a reality to the term that there is a black hole inside every planet, that it is a strength that it can create its own dimension and its own magnetosphere and further more there is a point in the dimension of the STM which replicates the center of the planet. Do we have a black hole within the structure, the center of the brain which by absorbing from the totality of the U releases ?? some which becomes the manifestation of the physicality of the man. (:44). This is nothing but the truth. But what is important for mankind is to understand that the strength of this black hole pulls from the environment of the U that in the depth of the U he can use it to feed the physicality of the man, and not for the man to kill to sustain life. In the depth of the space where do we go and what do we look for, the only thing available for us are the fields which are free within the span of the U. And this black hole is called the center of the STM. The size of the brain is the magnetosphere of this black hole, then you have to decide through your emotion, by controlling, do you want this field or that one, depending on what you want to reflect yourself to be, or which part or which organ of this physicality you want to fix. The way we open our eyes and go to the supermarket and we see chicken leg, breast, sirloin steak, tomato, orange and apple. Why do we do this, because we have learned something very simple, we can take this, put it in our mouth and convert it to what we need. (:46). What our body needs, it needs vitamin C, A etc, why not work through the STM to absorb the fields which lead to the creation of this, for it to be converted to this, to be converted back up. In a very short time when the man takes into space ?? the MG fields of the U we'll learn this, because it's very hard to do this in the structure of this planet, because it doesn't allow you and secondly it doesn't have the field strength for you to be able to test it, for you to be able to exam and to see how it's done. What you and we need to learn from the understanding of the black holes, we go back to the paper published on the black holes, you understand that black holes not only absorb but in absorbing they reflect, again as I said in different dimensions and terminology of the physics we call this in the human body the brain, it's magnetosphere, on earth we call it earth's atmosphere, and in galaxies and black holes we call it the shimmering ?? dimension of its existence. So in fact the whole world of science changes when the structure of your brain to the strength (:48). of the structure of the brain of the man, man can travel the space of the U in no time, using the structure of his own existence through the center of the brain or what you call the STM. 12

(:50).

(:56).

(1:06).

(1:08). ... Any questions. Q: printed holograms can be cut up and have the whole picture in them, is that a better understanding of holography as in the parts comprise the whole, or is fractals a better approach? Just read the question again and you'll find the answer. (1:10). (Rick reads again). .. that the parts of the picture contain the whole picture. In a way yes. What is in the macro is in the micro. But now the PI field has the

full spectrum. It's not like a ?? phone. It's actually a dust. We have to look into the reality of the time and the space, the dimension of the ??? and then we have to consider we are one of the ?? 146 but in 3 dimension. It's extremely simple. Any other question. (1:12). One of the most important things which man will come to understand, as he says, that the Black Holes absorb everything, and within the center of the body there is a Black Hole in the center of the brain, then there is a very fundamental question to ask, when do we get to play with ?? or do we pigeon hole it and ignore a lot of it to fit the formulas we want it to. (1:14). These things can't be taught and ?? crossed to another subject. These things need to be listened to by some of us. It needs a full comprehension of the totality. 18

(1:18).

(1:24).

(1:34).

.. (break in transmission ..) (1:44). ... it was a mirage. What we understand that we have to become aware.

(1:46).

(1:52). ... Q: The last KS Workshop you asked us to understand the way our soul works, and I would like to know, when I create a wish I can feel what happens now thanks to you actually, but I do not really understand what happens within my soul, how does it create the vision sent out in the form of fields, maybe G fields or something, can you tell us more about that? It's very simple. How do you wish to have a cup of tea or a glass of water and you go physically and get it and you satisfy the thirst. The soul has the same function. (1:54). It has fields to go and reach what was the desire, or to give what was the desire. How many times have you passed someone on the street and you couldn't help, and you said, I wish I could help? Do you need to put your hand out to help or by giving through your soul you have already attached, given through the hand of the soul to the hand of the other soul. But is that soul happy to receive what you gave or is it satisfied with what it has. Maybe not content but because it knows its limitation, it can take without limit within that limitation, and be joyful with it and make the best out of it. You look at the giving by what money you put in the pocket or the bucket or in the hand of someone, but does that person need to receive it or is it a mirage you have. Or is it that you got used to physicality of the arm to give but you have no trust in the arm of your own soul. "I made man in the image of Myself." If the body of the man has a hand so does its soul. And then you say I made a vision and it happened because now you understand (1:56). that there is more to life then physicality. My soul has a hand too. Very recently I had to, as part of what we were involved in, trying to help, watch many animals dying. We were there to help, save, to find a solution, but I stood and watched some dead, some dying, some going through the process of separation of the soul from physicality ... and then it touches you. I gave from my soul to it, to them, but have I elevated the soul to the soul of a man or have I freed them from the dimension of physicality that the soul didn't have to be confined to its position and dimension. Then you understand how worthless physical life is. There are certain events in a man's life that open his eyes to a lot of things, I watched many animals just kicking the last life out of them, not understanding the soul of physicality or is it the soul of the animal. But I am there not just as a man of science to give the water, injection, or a physical hand, or

just to be there to see what can be done, (1:58). but I am there as a soul of the creation to give to the soul, that the separation of the soul of physicality is smooth. When you are in the dimension of the space and you have no dimension of the physicality but you see something needs help, needs field strength to move, it's like you go out of the car and you give it a push, but this time the push is not going out and putting a hand on it but you do it with the hand of the STM, then you get confidence that my physicality has no dimension in compared to what I can do with my soul which created the physicality, and the you say I wished, it means now you are learning about how to use the soul. And don't forget that when you wish to give someone a hand and it doesn't happen, you are not aware, you haven't become wise enough to see that they keep their distance from the fields so they can increase their strength, they don't need. We have to can trust and understand that man has a dual function one through his soul and one through his physicality. Now that the knowledge of the man is rapidly developing to understand the creation and understand that the creation of life is from the interaction of the fields of the U then we understand that we can live in both dimensions. (2:00). We can give with the strength or what I call the hand of the soul or with the hand of physicality, which one do we choose or do we become a master in it like a hybrid car, sometimes we run on diesel and sometimes on electric. Diesel needs a physical fuel and electric is the passage of magnetic fields. We are no different then a hybrid car, it's just that we think we created it but it is actually the image of our own physicality now that we are understanding the operation of the soul and the physicality. We always forgot that we are carrying the master with us and were always pushed to see the servant and we believed the servant and not the wealth of the man. Because the servant offoled us that we could use it to serve (as) its own master. So when you wish and you say it happened, it means now you have learned that you have another tool in your hand. A new dimension, because then when you are in the space and you have no physicality and you wish to communicate with another soul he hears you and listens to you. .. (2:02). Q: In space there is just the soul and not the eyes but the strength of the soul with the ability to create and see, are stronger emotions the key? More or less, maybe weaker emotions, maybe emotions will lead you to somewhere. Any time in the space you'll pickup the virus of the need, it's very much like a whale when they make distress noise from thousands of kilometers and everyone comes to see, or the others whales come to help. In the U most of the time we don't see the entity, we pickup in our soul the vibes of its feeling. It's 3 dimensional and understanding it leads us directly to the position. And strange enough sometimes you come across it and you give you soul to it that it stands ?? the lost of its entity, or what we call in the world of the man, suffering. You'll find out that in giving to stop (its suffering) you might lead to the demise of yourself but it doesn't matter because the need to give is much more then the need to take and to hold on to. It's not sacrifice, it's understanding the process of creation. What we doing is to get man to gain trust in his soul and understanding the strength of his soul. (2:04). And that is all it is, nothing else. Any other question. Q: I tried the formula, I love you my soul, I live you and I love with you and I adore you (which is one of your quotes). And what I received from it is a deep breath which helps me eat less. What does this breath mean, blessings from Hassan? It's the fields of life and that is what you received from yourself. In so many dimensions in the coming time, as you said, I wish and it happened, (2:06). the Mozhans were taught this but we never got to the end of it to understand, and that is, now that you say I wished it to happen because I gave my soul to it, now if you understand the process, start ?? give to the part of physicality from your soul, I would like my arms to be fed. Take whatever it needs, and never ask me what time and where, you create a field for it that it is there to take, and then you see how

much less food you eat because one arm is not taking more. And when you gain the confidence and not just the image of doing it, do it with a leg, and then another leg, and then the other arm, nothing will change, you'll feel the change in dimension but you'll feel the total understanding and in so many ways it just builds up to the point that you consume less matter state but in fact you feed yourself with the fields of your own soul, she takes from the U, and this builds up, you can't say I won't eat from tomorrow, I am fasting, but you can start training step by step to be able to support your existence through the dimension of the soul. It's really easy. You create a MG field through your soul within the atmosphere of your body, (2:08). and you feed it. In a recent experiment last September we had a huge complaint from farmers and it repeated so it could not be coincidental. What happened is that in some of the teachings I have referred to it, is that in the part where the farm was unused, the Gans material, suddenly out of nowhere bird appeared and ate the crop. Let's say we don't know how much, but it was so much and so often in that period that the farmers were complaining beyond. I said to myself, my god, these guys don't understand, and I said to K Seekers, that the birds came to take their share because the plant was happy that it has produced so much that it wanted to share. But the farmers were not happy, and they complained and complained, we don't know we never seen so many birds, it was strange. This is the field (draws) and we only watered this half. This part created 79 kg. (2:10). and this part (watered side) 249 kg. The same seed, but the material I chose to do, to feed (Gans Water) created this condition. Since the farmers complained about the birds eating so much means we must have produced 500 kg here and the birds ate half of it. They didn't eat from the untreated side (79 kg side). Did the fields create the emotion that we have so much so you had better come and take. The plants and animals were happy but the farmer wasn't happy even though it still tripled his harvest. Now which part don't we understand? Or now the way it's described we understand the totality. Because we never considered that the plant is like a man, it says come I have too much and the birds felt it. I stood watching very recently a large number of animals dying, we couldn't do anything, it was part of ?? (2:12). But what is strange is that it touches the STM. When one was on the ground and he was taking his last breath, the other animals come and push it, and you feel it when the soul leaves, because they shout and cry. The noise is deafening, they here the departure of the soul of their own, and us we just watch. Are we less then these animals? Have you seen when a man dies the others shout and cry from the time the soul leaves, or do we cry for our loss. They have no loss but why do they cry so much, why do they cry so much to feel that that soul touches their soul that they feed it. Have we become less then animals or have we covered ourselves to have no feelings, because then we have to use our soul to confirm we exist. I went into that position as a man and I can out of that position as a different man. Because in the dimension of physicality we are very much blocking the truth, the reality (2:14). because it's the only way we can handle it. But do we become, or can we feel the soul of an animal when it dies, or can we elevate it so that it becomes a pleasure instead of a loss to it, if it needs it can take. I walked up and down the building and I said to all, take as you need, I have come here to give, if you need to depart or if you want you can stay, as long as you are happy with the stay. I could see animals shaking their heads in an unusual way. Because the pain of the physical loss and the way they were going through it was beyond the strength of humanity. And then you change, you understand, do I love to be here to watch this or am I loved to be here to be able to give. Or you go numb to it, .. I have got nothing to do with it, I am just an observer. I can not be an observer, it doesn't matter how I try, because I know the truth and I know what it means to exist and what it means for the dimension of the soul. This understanding is what makes it easier. (2:16). Ignorance

can carry on and we can stick to it. Any other question. ... Q: if science wants to start understanding holographic ... (2:18). ... Yes, you see the holography, what we have what we see even in the commercialization of pictures is different then the astrophysics and cosmologists are trying now to elevate it. .. It's not that it can't be done or something wrong with it, it's wrong in hijacking it as science and bringing a lot of fallacies to it to confirm that nothing exists, that it is all a mirage. We create that dimension, the 3D through the field interaction, what we call the portals, which are nothing but what you call holography but in the P1 dimension, not in the matter dimension, but in a dimension where the entity has control over its existence. It's not making an image (2:20). it's in allowing the soul to manifest itself in the image it wants to be shown.07
