

266th Knowledge Seekers Workshop - Thursday, March 7, 2019

(Understanding the emotions final frontiers before crossing to the STM, The soul of physicality comes inside and the STM takes over going back into the neutron, The energy is the STM, John achieved flight in AZ but doesn't see it, You have to find your own way to the soul, ,)

(:06). 5 year anniversary of KS Workshops. 55

(:08). .. it's very hard when you don't understand the totality of the teachings, you have to be ready ...

.. Permanent location for the KF.

.. We had to reorganize the whole of the KF especially in the last 12 months, top to bottom, which has been a painful process ... (:14). .. that painful process is over, it's none of our doing, it was put on us ... we are solid more then before... as part of our policy from now on we'll not announce it. We'll be going through the governments .. (:16).

(:20). .. In teaching we have always spoke about the physicality and the knowledge of the soul and in the medical teachings ... I have touched on something very simple, we talked about emotion, as the interface between the soul of the physicality and the STM (:22). that when and how they interact with the physical dimension they show their existence, how they allow the physical body to carry on, to be able to coexist with other dimensions with life on the physical dimension. There are different ways and in one of the teachings in the past I explained, "I made man in the image of Myself," if man has emotion then so does the STM, if he has the emotion of love so does the STM, and as the STM is made from the soul of the Creator, therefore loving is one of the attributes of the Creator too. But when it comes to the physical life there are other emotions which do not exist in the dimension of the soul, because it's total physicality, but the strength of itself manifests itself in that way, fear, anxiety, the emotion of wanting an end, the emotion of taking more and giving less, and when we look at the emotions in that level these are existence confirmation of what we call physical life. (:24). But the strange thing in our relationships and in our emotions we touch the soul but we inform the physicality, and the 2 have 2 opposite ends. We have fear, joy, cry, laughther, we see that everything is a balance with it but when we look at the operation at the structure inside the brain, in the physical term it's one electron and one positron, do we create the emotion of the reverse on the other side, like the laughther to tears or crying, through the same process but in an opposite direction or when the G field becomes stronger than the M, which means we have to give more, or we take more. If we look at the structure of the emotion of the man it's in fact the same, are we working on one or more of the other, are we as many of you consider yourself scientists of the KF, does it work more on the M or G, then if we understand this then we understand that the sun is G and M pull, and it's the same as the STM, (:26). it's constant. The position of the plasmatic M field to another dictates the direction of the motion of the reactor in a positive or negative, or clockwise or anticlockwise, then you understand which emotion brings us closer to our soul, then the reaction changes. Are the joy and laughther weaker and that by gaining in strength, becoming stronger creates a space gap, or is the fear weaker that by gaining energy in MG field itself, by loosing part of itself, it becomes closer to the STM and it reverses into joy and somewhere between the 2, for example, when we are laughing we cry. Man has to understand the work of the emotion, it's one of the final stages of the man to become passengers of the U. Emotions are one of the final frontiers of the knowledge of the space T because more or less all of the creatures of the U carry this,

(:28). it's not the exclusivity of the man. But we access it a different way, we don't access fear the way man does by seeing it as endangering his own life or somebody else's or in that region connecting it to the existence. Fear in the universal language comes out of, am I giving enough. In the language of the man it says, I am not doing enough to help the others, I am not doing enough to the progress even in my education because this means letting me down. In the universal language the fear comes when you do not give, you don't contribute to the elevation of the other souls. Whereas man's fear comes out of, I am losing something, it's all about me getting something and it's what you call the "me, me, me policy or philosophy, whereas in the universal language it's totally opposite, it's very much like what we call the Russian yes and English no. In English when you want to say no you shake your head left to right, in most of the Russian language people when they want to say yes they shake their head left to right. This is a joke which sits in reality with the STM. This will be one of the final frontiers for man to be able to cross to the dimension of the STM. (:30). This emotion is the barrier, the dam which has stopped man to be able to be detached from the dimension of physicality. In the teaching of last week I referred to it when you have to go through the barrier of living as a man of space and you are born in the dimension of the soul and the only thing which will stop man is his emotion. By looking at it as, if I cross I lose, I lose my mother and father and everything I worked for, or a fear of ... (break in connection)

(:32) (:33). .. What I was explaining, when we are in the womb of the mother, do we have a fear of falling out or something happens, or would we attach ourselves to the womb of the mother, I am not going out. At that point we are not aware of what is to come, we have no fear of. Maybe we have a lot of reasons to go and a lot not to go, but it comes to a point that the physicality in dimension of the STM, the child, the baby inside the womb balances with the womb of the mother, and that point is like when you put 2 magnets together and 1 becomes strong enough that it creates a space gap, that's the time when the man is born, we go through the process of the birth. (:34). This is where the totality of the soul of the child, the baby, and the mother find a new dimension, a new balance. But this time it's the same, it's what we think of as a fear, it's the emotion that is with us of what is to come. When it's done by the physical life, when the STM in the progress of achieving maturity we call age, we come to that natural process of birth. We call it the death of the man, in a way it's the maturity of the soul and the separation of the man from the point of physicality, but now for the first time man has been given a choice to be able to cross that line, and it means if you go to the part of the teachings of the past years, I explained that we give from the soul of the physicality to mature the STM in the dimension then we are in charge of the soul of physicality, are we prepared to give it all in the trust that when we decide within the structure of the soul of physicality it allows us to get back. It means that we give, if you look at the bigger PI, we have decided to give a dimension to the STM, we call it the body and we put some control on it, we call it the soul of physicality, (:36). but would we get to the point that the STP comes inside and the STM takes over. If you look at, at the point of the birth from our mother we come from inside out, as we said, in plasma technology we have gone from the process of going from matter to energy and energy back to matter, now is the same process, are we converting what we call the structure of the body in the matter state to be now inside the energy, which is the STM. We move in with a consciousness that somewhere down the line in a new position we are aware of the existence of the new position where we go. We can decide to manifest ourselves according to the environment of the manifestation. Now you understand how all the

teachings are connected to each other, and everything we taught from matter to energy and energy back to matter, now is the life of the man. The way we decided to create Gans' and energy packs, do we go through the same process to create the same condition that we go from the state of the matter outside to go to the state of matter inside and allow the energy which is the STM to take over and we trust it that at a point where we are aware of a new environment, we can take, can decide into the dimension of the physicality and manifest ourselves according to the position. (:38). What this means for the first time for the man that he has the ability, what has been taught in the dimension of the Gans to matter, energy and back to matter. ... This goes back to the fear, the understanding of the Reality, into the dimension of the STM and the STP being in trust and in tandem with each other that I let you in and you can go out when you like. We become like a kangaroo our soul decides to manifest itself and we go out and come in, but this time we don't come out as a kangaroo when we go into the womb of the mother or the sack, we come out as what we see as appropriate in the environment where we are. This goes back to the totality of the understanding of the whole teachings, with what I always referred to and I start using it more and more, "you are the last man standing." (:40). You're the last man standing in front of your soul and you are deciding whether you are converting, with pleasure I do, because I know I am in charge, I am in position and I am in control of the best, and the best is me, is my soul and what I do is to serve with my soul. This is where the difference of the emotion comes. As I said, many of the KF management and the rest have been under a lot of processes and they're soul searching, shall we abandon the KF or stay with it, and we do but this and that. In so many ways these are the tests which they'll see the fruit of, the confidence in totality. In what this means, in what I rely on. The last man standing for the development of the peace on this planet. And I count because it's my soul which counts for it rather than my physicality. This will take root. In the writings of one of the prophets, we test the gold with fire and the man with gold. We'll see how the man will come and be gold and those who come through will be those who we call the gold. They'll shine, they'll be the first cycle of people who will transmute, (:42). because the confidence, the strength will be built. Many of them looked at it as a test of physical life, endurance, and now that we gained the trust in the position of the decision to be correct they'll become the first passengers of the universe into the next cycle, because they trust in their own soul. It doesn't come by hardship or what we call, other things, it comes by resolution of the strength of their understanding of the strength of the physicality in the dimension of the STM. We do not test but we allow the man to test himself against his own scale, and many of you have passed. But you'll understand what it means when it comes to it. There has been no race in which to be against and better than the other, it's been a race to test can I be there what I stand for has given me strength enough to be able to give more to bring that change. In so many ways hundreds of KF supporters have reached that point. And that is why I said, we have reached that point, we have achieved what we came here for. It's not so much for the structure of the KF to be known, but the first foundation for the man to test himself, to cross the line to become man of the U has been completed. Many of you know what I am talking about. And then you'll understand why the point of change has come. (:44). We have seen many fail and we'll see many in the future fail and we don't judge, many times in the past and in the time of Christ and the others, there have been many of these tests, but not the way in which it has been this time. Those who were in the path as same as the Christ, he said, "you'll deny me 3 times before the cock crows in the morning, those who denied did so, and those who stayed fast will cross the line, and the rest will learn from them. We had to go to what we call the evolution of the emotion to understand the

process of understanding the STM. I have been there, giving support, trying to hold, for them to go through the test as much as we went through the test, and now it's the point where it's the same. I explained this some time ago in a very direct way and many of you might understand it, mankind is at a cross point, not as a cross point, as a point of evolution, development and it's very much like a parachute, you can use it in the time of crisis when the plane is crashing, or use it trusting I can land (:46). and enjoy the trip. The trust in jumping and knowing that I have a safe parachute comes into operation. The first time you might have some fear but you know that you'll land and walk again. This is the process that humanity from now on will go through. You know that you have crossed, and that you can leave the soul and come back too, as you need. We are not teachers or prophets or people who predict, we are the people who bring the change. We are the doers. We are the people who set out, brought out, and set up the structure for man to mature to this point and the beauty of it is that there is no one for you in the time of control called, Christ help me, or is Mohammad, Moses, Buddha there to help me. We rely on one thing and that is your own soul. You have become and you are the creator of your future and nobody else. In that process this has been part of my teaching. This is part of the evolution which we have brought, and with this and the confidence, and that fear of man and that fear of the U Council, (:48). or the U Community. Now you understand the point of the Cross. If I allow my physicality to become within my soul then standing outside and containing the soul, would I be able to serve more that I do not need to manifest myself, but I can live and give from rays of my soul to elevate the others. There is no sacrifice, it's a trust of man to give, to continue of the process of the creation. This has been with man, we know this feeling, but now we have to expand it to the next level. Mankind when it comes to the children, they give in order for them to elevate. If there is a danger the mother or father jumps in front of the car, to let the child's life to be saved even if they lose their own. Now we don't need that heroism but we need to understand that by giving from my soul I allow many souls to elevate because no man has ever understood the strength of his soul. (:50). It's not saving one child, it's elevating the whole lives of the Universal Community. If man thought that his soul is so meager, he has many so many mistakes. It's due to his ignorance in understanding his own creation. We go through the process of fear of death, but we don't go through the process of releasing the physicality with the joy that we can serve many more. But and if, there is a very big but behind it, that but and if, are very simple, we can not do it to gain more or to give more, so there is no elevation of higher thinking that if I sacrifice my life, cross the line of becoming a soul I can give more and that will be it, but it is the balance of the totality. It's understanding the totality and this is part of what all these teachings are all about. This is what I have said in all my teachings (:52). that man has to understand his own beauty, understand how can he give, and how much he has and has given from his soul. We always look at, I gave this to my son and that to my daughter, I did this and that, but is the man aware that during this lifetime of his, as we talk, he is still giving through his soul. It's not something that is going to happen the minute he dies. Man has lived a double life, as we said before, he always has given in the dimension of his soul without him knowing, and now he becomes aware of it. He has to become aware of it. He decides in the totality of it. Does the man need to go through this process, to be able to understand the reality of his work, and how much do we know of and where will we cross this line. We need to understand, (:54). because we have to cross the line. We'll be pushed or be hassled to push. They'll push us, every part of the STM, the STP will force the man to go through that process because don't forget you called it age, or death. It's something we know and it will come to us, but we are already passengers in that line, it's the ship we boarded when we were created in the

womb of our mother. It's not the fear of death, it's a joy of reunion with our dimension of physicality but with knowing that I can have physicality any time I like. There is a difference between the STM when he separates the physical life from it and the STM which carries the STP within it. (:56). There is a huge difference. The STM when the man dies separates from the physicality has no dimension, because now it has taken its own direction of the motion and delivering in a position where we decide to let the soul to take over in a dimension of physicality, it has a controller, which is the condition of the STP within it. When you die in a normal way, separation of the 2, there is a certain amount of STP in the man within the STM when it departs the physicality, but when you do that through your own soul to go in the dimension of the STM to control of the physicality, to ?? feed it , to cocoon it, then you still have that operation inside with the soul. When you want to move out and manifest yourself. If I can put it in a terminology of science, you are an electron and a proton, and now you are a neutron, but still within it and you can dictate the position and the place. Then the travel and the motion takes a different dimension. It takes a totally different understanding. (:58). It takes a maturity that space and time don't exist because now every space and every time in the U is yours. This is what it means when you say there is no time or space because you are the dictator of it, you are the creator of it and it can start at any point that you decide. But what is the outcome of this separation. ... You have decided the change, the position, am I in control (1:00). or I let my destiny to be controlled by my own creator, which is my soul. .. we have not or the maturity of the U Community have not reached a point to make a machine to play, run and test because that maturity comes from the understanding of the soul of the created to believe in the soul of itself or its own creator. Unfortunately this is the only machine that I cannot make. I cannot make you an energy system that allows you making a decision to transfer your STP to a dimension within the STM and take the light of man ??? across the U. This machine is not invented yet because if we invent it, the minute you decide to go through it, you come out the eggshell and you're in the atmospheric condition of the earth of somewhere else. It's a false alarm (1:02). ... Any questions. (1:04). .. Q: The Baghavad Gita explains 2 souls the Atman and Para-atman, the soul and super soul, 2 birds in the same tree, 1 bird or the Atman eats the fruits of the tree enjoying or suffering, the other bird, Para-atman simple observes and waits for the other to turn and take ?? to peaceful existence. Does Mr. Keshe wish to explain further on this, ancient knowledge and modern ?? are joined into universal knowledge? Not really. Would you like to talk about Adam and Eve, or different stories in different time lapses, talk of different things of the same. Q: Tell me how to handle the emotion of Mr. Keshe stepping down? Nothing, say halleluiah it's finished. (1:06). It's not stepping down. In a way it's a good news, it means the man has matured. For those of you who will carry on will understand more, you'll mature into it, and for those who are, what I call, still waiting for a spaceship to move them, we spend time to move those. I stepped down a year and some months ago as the head of KF. I think by ?? I run it, because we have more time to do other things with it ... (1:08).

.. It allows me to open mankind to the U Community... (1:10). .. I know exactly what I am doing and exactly the time it has to done. As my mom used to tell me, you leave everything to the last minute and then you are happy that you did it. ... It's like when you set the Christmas Table ... (1:12).

(1:14). ... You'll still probably see an old man called Keshe, that man has a lot of things to do to complete the cycle for the maturity of man. Any other questions. Rick says, .. was that you said that you pray to (for) the reactors, at that time I said, what ... You said

you open the reactors up many times a day and then when you start them up again you say this prayer, (to the entities in this reactor) I hope you are going to have as much fun with this today as I am, to that effect. (1:16). That struck me as wow ... to give it your blessing into it ... I thought I would just add that. Yeah, because you create a being, a soul, a mixture of the fields which in their interaction they decide, as I said in the last teaching, they decide to stop or to go, they start to play, the people say, oh, this is a field balance. Where does this field make its decision to be in balance. I always said to the K Seekers in the lab, always pray for the reactors you open and close, because you create, you give life to it. I still hear some of the KS do that when they start up a reactor, they understand the life of the U and not the arrogance of the man. It's beautiful when you feel it .. I built the reactor for you but I work with the reactor with your soul. (1:18). I don't need any. It's to understand the strength of your own inner being. When you just run a reactor because it's something mechanical, you get that. It's like you work in an office with a woman secretary, you ask can I have a letter, etc, it's there just there physicality. But that secretary is a lover to somebody, has emotion, shows, gives, is a mother to someone, and this is what people don't understand. A reactor that you create in the dynamic field of the U is not like a motor where fuel comes and mixes and burns and you go forward. Mankind has a lot to learn. You have to understand the dimension of creation, of life in the U. You come to understand that I am here because of you, you allow me to share my joys with you. In a way we have been told, but we forgot, it has a life so we do it. Some of the Christians they do, they say a blessing before we start the ofod, In Islamic and in Judaism we bless the soul of the animal which we take the life of, unfortunately it's the wrong way around. We bless the soul of the system because we give a (1:20). creation of life to it and we take and we allow it to be there for the reason we chose. It has a life, an existence. Life is not exclusivity (of the man), they tell me you are an abortionist or antiabortionist, I have been accused of a lot of it. No, life has to make sense that makes life easy for the soul which creates it, which is there. And it has to be in harmony. I create the machine, I create dimensions of it, I put the pieces together to become, so I am responsible for it, and you realize that when you work with it that way, that it gives you so much pleasure. And it works with you, and if you give it to other people and you sit there and nothing happens. But in a way it happens, but they don't see it because they are so focused into achieving something and they don't see what they have achieved and what is going around. Many times I watched K Seekers achieving flight or motion and they don't see it and I just watch. And they say, it never works. ... have you checked what you never did before that caused it to fly, you already achieved it. In one of the KF labs they achieved lift in the past 7 days but they still don't believe it because they don't understand how they did it. I got a text, we came in and it was on the floor. ... We have achieved lift in one of the labs ... (1:22).

... making a system to fly is like a man's DNA, with no genetic defect, everything has to be perfect to give birth to a child with 2 eyes, 2 ears and everything moving. If you make one mistake out of the whole so many billions bits of genes, it doesn't work, or it works and something says it has genetic defect in it. I have seen many times Armand's systems flying but he doesn't see it. And I have seen many others do it but they don't make a connection with the soul of the system, and I am not there, you'll understand ... At the moments we call them pilots, even if we have a full plane of pilots only one can fly the plane, the rest are passengers. It's like being in a car with mom and dad and the kids, (1:24). 1 steering wheel, brake and gear and everybody else is a driver, "oh be careful", but it is me who makes the decision where the car goes, not you lot. You made the system, it's your soul, but you have made no connection with it, what do you expect. The reason they fly this week is because they had a (right) connection but they don't see

it. .. it shows the members of the different labs around the KF have not become one yet, and this is picture taken by Armand in AZ and 4 members of the team they are holding their hands around the reactor trying to feel it, some feeling this is ridiculous but since he is taking the picture I have to be there, the other one says I feel some pressure here, but the whole intention of me standing there trying to tell them to feel the force of the reactor was to unite them that collectively they could decide who was (the pilot) and who could fly and then the machine will fly. Mankind has not understood a collective work of the soul. The most rubbish word that has ever come into the work of the KF is "synchronizing." Those who speak about it don't even have a clue. You try with a 125 people in the back of the cockpit (1:26). synchronized and taking control of the plane. My ofot, it doesn't work that way, unless you know how to rhythm into it. That's a different story. So now comes, it's you and your soul which you created it, and you have to be in communication with it and it flies. This is the same, your STP has to be in the line of understanding and confirming the existence of your own soul that you can be allowed, this is the key, this is the time when the soul will take over. This is what I called you, "the fear". I hide the reality in different words because the man isn't mature enough. Now you are mature, when you heard 5 - 7 years ago, now you understand. It's the same process. I made the most beautiful flying systems in ?? Sienia, but the soul wasn't there. Every electrical system was ?? waiting for it except the STM not having trust in what he has done. And everything else can be blamed. I said before I allow the non-communication through the STM to develop in AZ because I see what is there to come. And AZ has achieved flight this week. Because the STM is there behind it to do but I have to play all sorts of tricks with them. (1:28). How come during the past 3 -4 years nothing fell on the floor. ... then you understand that the totality of the work in AZ is through the soul, and the man achieves it but he doesn't appreciate it. Mankind has a fear of understanding of his own soul, so when you set up a system, in a way it's not praying, you are part of, making a connection. Like when you are sitting in a classroom and you want to call your friend on the other side of the room you don't just stand there and pray that you want him to hear you, you have to talk to him. He says, Hi John can you hear me and he knows you are talking to him. It's the same (with this), you have to call, you have to make the connection, you give from your soul, you throw the rope and then you can pull it. ??? can I teach? The steps for us after I step down is very systematic, I can write it down and give it to you, and in 2 or 5 years time you'll say, how did he know. Upon my departure is the end of the kingship. Is the imprisonment of most of the world leaders, by themselves, not by us. (1:30). It will be the first steps for the path of peace. Do you want me to tell you the next? It's the end of kingship, because we'll open the borders, nobody needs them, I can be king of my own castle, that's if I can afford a castle. When you can travel the length and breadth of this planet, do you think the UN will have a committee of the kings, which kingdom goes.. not a word. It's the end of kingship and the beginning of the peace for mankind because everybody will be equal. World leaders will stay because we need to direct in certain ways, but they'll work collectively and not the way we see now, I am the president of the US or so and so. It will be a collective for the betterment of human kind, for the peace of the totality of the humanity. Then you'll know why I am stepping down. How can I be the head of an organization at this level when I am destroying the headship. This process needs understanding. Even when you make these Gans Boxes, there is life in there, (1:32). if you move it, it moves, it shakes. Do you pray for your Gans Boxes, no, nobody does. I do. You have to understand that life has a structure and whenever you break it, it breaks you. We have to go through the process of maturity, one by one, man by man, and then we go a step at a time. ... We have to understand that we have to progress and elevate

our own soul in respect to our physicality and not against our son we are not in competition with him to show that we are better ... It's can I be elevated one step further. (1:34). It's like a race in England, you race against yourself to better yourself to understand more how you can reach your own soul through the soul of the physicality. You have 2 choices and this is strange that nobody understands this, you have to wait to die to let the soul separate and then you have no control over it because now it's free, or you can join the soul to be with it that it can take you to the spans of the U in the physicality dimension ?? hiding to go. It's like the monkey's they attach the babies to themselves and they jump from one tree to another, that's the soul, and you attach yourself inside it, then when you are ready you come off it and crawl around the branches and then come back and stick to the mom again and then go to the next tree. That soul is that mom and it's you who decides, I go for excursions but this time I go between the lions, they look like lions otherwise I get eaten and become a ofod to them. But in a way that's your fear, because nobody eats you in the space. I change to the physicality of the dimension of where I appear for the pleasure of me enjoying them and them enjoying me. So next rime start understanding what is, and we don't pray, we connect that we can give. Just watch the trial of the Iranian reactor, it comes down from 9 Kg to 6.1, I could have shown flight or anything, but if I would have shown flight at that time I would have become another (1:36). "Wright Brothers", I would have become the first man who showed a space bla, bla, or the man who did this. I don't need. I know how to do. But now it's time you have got the first man flying, Mr. in AZ. He has got his combination (Gans') right, but when he has his combination right he has to put his soul in it as well. You can all go to AZ and see a flying machine. John .. start charging admission tickets. Don't give the recipe to no one because the thing is that if they haven't put a soul into it they won't understand it. But this is part of the process. ... Q: Maybe I can connect with my soul of physicality by going into the heart chakra and go in this way in a deep sense of peace and satisfaction where nothing is missing, contentment, nothing is lacking of the love for myself and for other people, opens like a flower. Can you tell me how to get more in touch with my soul of man, are there any exercises for it? (1:38). It doesn't make any sense, if you know that you can go through your chakra, go do it, what do you want me to show you the way. Q: So the main thing to do is to clear and ofcus our emotions like we influence everything with it? Q: Do thoughts come before the emotions, as thoughts create our physical reality? ... Rick, says, they're all looking for guidance, for answers. I know but you have to find your own way. because .. all the roads end up in Rome, but which road are you on. You have to find your way. Why do you choose this path of physicality, we have been given a position direction and we can do. The same question comes, why do some children die at birth, and the others have to wait 80 years to reach that achievement, to achieve that separation. Mankind needs a lot of understanding of his own structure before he can go to the next step. (1:40). Do we need position of energies, or is position of energies a path for us to achieve what we want, maybe for you the case applies but for the others it doesn't. Maybe some of us can reach it directly we don't need to go through it. It's interesting what we expect and what we set out to do, I had a dream for the past years to be able to do something, I know it and it's (1:42). in some of my books and papers, and today I achieved at least the first step of it. I was like a little boy in a candy shop, I knew exactly which candy I wanted, but this time I could make the candy to taste it the way I wanted. I stood still and gave thanks to the souls which have brought me to such a point to get such a pleasure to be able to serve from it. I stood back looking at these people, not with the eye of physicality, but through the soul, the eye of the souls, what pleasure it was giving them, and what they were expecting to show the beauty of their work

through, what I could contribute towards it that they could show, they're a bunch of artisans, and this is my job you're all artisans of your own soul, what you want to make out of it. The only one you can make is your own soul, nobody else's. One of issue. Any other question (1:44). Man from Nigeria. Q: The soul is located in the brain, now where can we locate the soul of physicality? (1:46). I am a little confused on that. The soul of physicality is an amalgamation of the totality of the soul of every cell of the man, and then in totality they share, they have a common denominator of sharing or mixing, which is the heart of the man. You have a sun and many planets but everything is focused towards that sun which dictates the position and condition of each one and collectively they give to exist. The soul of physicality is more or less within the dimension of the heart, because when you take the heart the physicality dies. You can take any organ out and you can still survive. Rick asks, would it be a bit lower say what we call, the solar plexus? It's a field effect, not a shape. Rick, solar means sun so I am wondering if that is associated? Uh .. maybe it's the first place the sun hits, you never know. It doesn't have a fixed position even within the heart of the man. It's a proximity, because first of all the heart moves continuously in its rhythm, and secondly at any time different field strengths of blood enters it, it's not a fixed point, so it's what we call the heart or the rhythm of the heart. (1:48). We can see it if you ... it's one of things of man is wise enough and understands it, you can see the soul of physicality of others. To see your own with your own eye is more or less an impossibility, it's not impossible, you can do it, there is a way for it to be done. But as the STM, the understanding is in line with the horizon of the eye ?? you can see through your soul or convert it to be seen by the STP, the physical soul. Thank you. Q: How can the PI T help in the coming economic collapse? .. It depends on what we call economic collapse. (1:50). Economic collapse for those who have stolen, or for all those who have stolen in dimension start living like those who never had it. So we are becoming all equal. But is there going to be an economical collapse? What we see, possible, maybe, but for who? British are facing it at the end of this month, we don't know what is going to happen with them, if they get kicked out of ... as they say, the end of the world for Britain is the 31st of March this year. The debt process is going into the emergency room. ... is it going to touch France or Germany, no because they are the beneficiary of it ... (1:52). There can't be an economical collapse, but an adjustment.

(1:54).

(1:56).

(1:58).

(2:00).

(2:06).

(2:08). People are teaching K Seekers workshops around the world, Brazil, Mexico, Iran, India. Thank you very much. ... (2:10). Q: I would like to know how Mr. Keshe deals with the fact that some people have taken things away from him without his consent, like when we know that someone took his theory about the black hole? (laughs) We call it a stealing ... if you understand the meaning of what I am going to tell you. Years ago I was upset, I was not concerned ... this is the habit of the Belgium's, they steal things, we had a holiday home in Belgium and after a few months in England Caroline went back home and it was locked from the inside and we went over the garage door ... the whole house was cleaned out, everything stolen furniture. And they put the our things for sale in our own garden, because we weren't there ... I was talking to my fathers soul, he said, my son they must have needed it otherwise they don't steal. And those words stayed with me. (2:12). When you speak of Stephen Hawkins he

needed it to confirm himself and with it he brought the demise of himself. When people steal things they need it otherwise they don't do it. ... if you look at the last 10 years of Stephen Hawkins work papers he wrote and speeches, it was a copy of our work. Book #3 Origin of the Universe (2:14). ... 4 days later in same university Stephen Hawkins comes suddenly out of nowhere given a lecture and guess what, the name of his speech. ... The Origin of Universe. A copy of the book. ... (2:16). So he needed it. We have seen this in China ... they don't want to show that this T has come from Iran even though they have promoted it heavily everywhere, but the Chinese are trying to steal the T which we work with them, as a Chinese development that the Chinese have done. And this is wrong. ... When we become One Nation this will die, because it doesn't matter if you are Iranian, Chinese or whatever it's the achievement for humanity. This is one of the big problems. I understand why president Trump pushed with this kind of thing with the Chinese. The Chinese are very proud and everything has to be done by them and they made so many obstructions by their own scientists .. stealing is not to be proud of and the Chinese government leadership has to understand this. (2:18). We don't need the patents, we respect peoples knowledge and what is there. We have seen very recently stealing with the KF in China, we are aware of it and have to know more about it. ...

... Ella presents KF Plasma Times. ...

(2:20). "Plasma Mirrors and Plasma Interference", Parallel World of Creation, Hummingbird of the space, Holography of the Universe, Ella experienced the Shooting Star, Holistic lecture Dr. Parva, Rick, K Plasma Reactor Group, Global University teaching, Plasma Knee Pad, ...

(2:30). ... We are in our 6th year and there are a lot of people in the background doing work but they don't show it ... Our promise with peace between Iran and US, the first of the coma patients to bring back to life has started. (2:32). In due course we'll tell you.

(2:36). Dog from Ghana was revived.
