

268th Knowledge Seekers Workshop - Thursday, March 21, 2019 (,)

(:16). Today is equinox and people of the Silk Road start the new year. Usually we share gifts at this time. Today we give you a big gift. ... Zero time communication ..

(:18). The STM has always been working at zero time communication. ...

.. (:20). The Zoroastrians said, think good, do good, speak good. So if you look at it Iranians were already trained before to be man of space, to be ready for today. ..

Different cultures have matured in different ways. Many of the scientists who talk of zero time communication means that haven't understood that their own souls have been at this work for centuries. But how do communicate with this ...

(:22).

.. our soul travels the U. (:24). When you dream it's zero time communication. Your physicality is in the dimension of this planet but your soul is in the presence of the soul of the speaker or the one you communicate with. Then we understand that man lives this double life of being in 2 dimensions, keeping this physicality on earth but letting the soul to fly on the wings of the freedom of space. Then it comes, how do we bring these 2 together, can we exchange, can we develop systems that our words of physicality is heard by the ear of the soul of the receiver and not through the ear of his physicality. Do we need to leave this planet to become men of space, when now we understand that the STM in zero time communication can travel the span of the U. Is there a need for the man to leave the village of earth. Or do we just leave because it's nice to be tourists of the space. When we want to go somewhere or to communicate then we use our soul. But if we want to become the tourist of the space we use a SS. (:26).

...

(:28).

(:30). .. The leaders of the world have decided to go the path of the KF and in due course we'll all become the passengers of these ships. I have been asked not to talk until they are ready, but the preparation for this journey has already started. .. (:32). The voice of our work has been heard by the leaders of this planet and we have seen the response. The work of becoming travelers of the space is not just to get on the SS now it's to learn the zero time communication of the STM. If I could share with you what I have in my hand and what we have in the progress of the mankind towards world peace, most of you will say, I was there when he said it, and we'll deliver what we have said. The leaders of this planet have decided to take the path of peace and we have seen the first signs and we have become part of it. It has been our wish and our destiny to be at this time. The process of disarmament and world peace is a gift that we can give you today as Iranian new years gift. It's not a dream, even in the past few seconds before the teaching started I received some pictures which confirms more the commitment of mankind to peace through its world leaders. We are not dreamers, we have worked so hard to achieve it. It's not a wish anymore, now it has become reality, the fact which now takes very short time (:34). to become part of the structure of humanity in the coming months. Those who are very close around us they know the situation. We want to shout but we have to let those who did the organizing to do the shouting, it's their victory in understanding that peace is the ultimate goal of the human race, not us, we are the facilitators as KF. If I learn to speak in a zero time communication with the man on planet Zeus why don't I do it on this planet. If I understand the Zero time Communication with the man on planet Zeus or anywhere else in the U, these are all entities which have no understanding of their living (?? they are not self-aware) but

they are there as creatures and respond to me, I smile and they smile back, most probably I say hello through my soul and they respond back, I say, I love meeting you and I get the same feeling back that they love me too. Then it comes back to me on this planet, if I can relate to all these things in the U, would I read the soul of the lamb or of the chicken and he says to me, don't eat me, I love you, I have the right to live. Then would we take that step to kill to survive? (:36). Or would it change us to understand that this ZTC allows us to develop new tools to be able to understand new resources of life. Then life becomes very hard on this planet because even a grain of rice has a soul. We know it has because when we send a grain of rice or wheat to the lab, the lab sends a report, 15% protein, it means it carries many lives inside it. Protein is not on its own, it's a cycle of life, your muscle tissues has protein or your eye, then you have to consider, ??? can I talk, would the man take the new path, ZTC is zero time supply of energy from the U. Would we find a way to ??? energies which are not in the U, become the source of life for mankind to live. We are not philosophical, this is what many of you are going to face very soon. This is just opening up a little gap between the door and the frame. (:38).

(:42). Many of you think this is not for me and it won't happen in my lifetime. Or when it comes I will learn. I have a very bad news, extremely bad news, the time is now and the place is here where we are. The time has come for us to become part of the U Community and in a short time many of you will take to the wings ??? You will learn all the tricks of somersaulting in the space without anything and saying I haven't eaten for 3 years and I am not hungry because I have learned how to tap into, what nobody else needs as energy. You see, there is a secret in the world of the U. Now that you understand the work of the Gans, you have seen and transferred the Gans into the water and you drank it and it gives you the taste of the orange. Many of you were wondering what are the stars for, that is exactly what they are for. They are the providers of the energy for the man not to kill. The stars are the filling station for those souls who travel the space of the U that they do not need to kill. Unfortunately man waits for these fields to convert to the matter that he can use it, to receive energy. (:44). When you become passengers of the U your filling stations are all those billions of stars in the space you just need to learn how to tank. When you want to tank of car there is a fuel tank and a key, you have to put the key inside to open the cap. Now it's for mankind to find the key to tap into the universal energies released by all the suns of this U. Now you know why there are so many stars, they are not there for the beauty of the eyes, but for the nourishment of your souls. Then mankind shall not kill. The same as the earth takes what it needs from the sun, you become another planet, a planet of the soul of the U. Then you understand that we have already been the passengers of the spaceship, we just have to look outside to see that we are inside one. We always waited to see if there is another one (out there) that we can see. When you travel the U you don't look for food or energy because there are billions of star filling stations, (:46). big, strong, small, weak, many planets and the rest. It's very much what you are used to. You have different ?? and sources of fuel stations ..

But you always looked in one direction, to consume, you never looked that for you to be able to receive the rays of the suns that you can use to exist ... you have to give back otherwise there is no room to fill in, then you understand that only stars can exchange energy with stars, and the STM is a star in the universal galaxy. You can't receive if you can't give, you can't fill in if you haven't emptied a space. Then you understand what was said at the beginning of these teachings today, earth has 7 billion stars. If there are

so many stars on this planet which we see in physicality why don't I become the feeder of the souls and I will receive what they don't need, for me then in that respect, I ?? adapt that STP to fit in with the environment of the existence, then you'll (:48). find that man doesn't need food to eat, because it is given through what it needs, recognition of existence and the composition of the fields of the U to confirm that man is a man of peace not war. So have you understood what the ZTC is, or are you still in the maze of a lack of knowledge according to your own intelligence. How do we make this ZTC to work, now that we know that our soul is the tool of communication how do we tap into it. We need a Gans of CO2 for communication line, Zn for connection to soul, we don't need any Gans of Cu that is for physicality. But we need to communicate with the soul of another being from this planet, could it be the protein or the AA of the Mg with a little touch of Ca. I always said that O is the M field, (:50). not Fe in the life of creatures of this planet. As you have seen that only Fe gets attracted by magnets made of another Fe, now that you have created a STM with the fields of it, how do you match up. Or you can match up with the other souls. It's getting very complicated. I can feed my son and at the same time he can feed me and the wife is next door and she is feeding both of us through her soul, but we are waiting for the cuddles of physicality to confirm she loves us. Then the question comes do I need you or do you need me to teach each other how to make the Gans of the soul and the system ?? without motors that the soul can recognize. Or we start understanding the operation of the brain that becomes that dynamic core that in translating the information of the soul to become the motion of the arm and the hand, but becomes the language of the man, the STM and the physicality of existence in the dimension of the ??? (:52). Now that you know that you have been carrying this ZTC and a lot of you still have a problem in finding it and now you have to communicate with it. Do you want to travel alone or would you like to be part of the passengers of a SS, ...

now that you are on this ship you can't eat me or the others, but I have plenty of energy from the resources of my soul and don't need, if you are hungry would you like to tap into it, and I will take some the things you don't need. ...

(:54). Or do you still want to be in the life of denial and just wait and see so that I am not the first one to make a fool of himself. It's a very simple teaching for today, zero time communication, the STM and the confirmation that I exist through the interaction of the STM with the others. And now for the first time I found a free energy, a fueling or tanking station called the sun, I don't need to wait for the earth to convert it into the meat, to fatten the beef, and then I take some of it and then I have to get rid of the rest of the physicality of it. This time I take what I need. When I need it I tune to the taste that I like and at the same time I am not wasting so much energy to digest the physicality, I become myself the source of life for the others and then I take what they don't need and I give them what they don't need and I become a new Jewish businessman, just put some profit on it, a 100% is not too bad, but what am I going to do with it, there are no banks and no factories to buy stereo systems and you go and see children and you bring them the gift of the U in understanding more and not another Ipad and Iphone. Any questions. Ask yourself one question, (:56). how many of you in the last 2 or 3 nights had a dream and you remember that dream, so you have already been the passenger of zero time communication, but you lost your mobile phone and you think you can only find it when it's dark because it glows in the dark, but it is really with you 24 hours a day why don't you tune into it all the time. 40 ... (:58).

(1:06). Q: Please explain more about the soul and its function in the network of souls called the STM, what happens for example, to a soul of rice in the body of the man how does this effect the U? Nothing, we are just a bunch of souls forever going from one to another. We are passengers of the U without physical dimension, we call it a soul. Q: So what would happen to the soul of that grain of rice when it enters into our mouth? It is still part of the same. Listen Mr. Rick Crammon you are part of one of the very first ones who mixed the Gans' put them in a ball and rotated them. Did they mix and totally disappear or some kept their color or through the interaction of the fields create new colors, but they still stayed the same. We just become the collectors. (1:08).

(1:16).

(1:20).

(1:24).

(1:38).

(1:46).

(1:52).

.. Q: Last week you said you'll teach us about the dream and you have done that, but what is the difference between sleeping, (1:58). the position of sleeping and of vertical? It's the difference between the horizontal and the vertical people. Q: But it's the same creature. Because the physical activities are low so the soul activities look to be high but it's actually the same ?? The work of the STM is like a background noise, it's always there. It's just man when he adds his work of physicality to it, it just burdens it. We talked about the man, .. draws him lying down, all the chakras are here. (2:00). .. the lying down man his soul is more free, it's much more interactive. Q: So this is the secret of the soul? There is no secret, all it is, is this guy is free here, he can expand in any dimension. .. even you can be awake and lying down, this has different interaction with the fields of the planet. If you take an image (picture) of the aura of a man lying down and horizontal they are very different from each other. Q: How will it be in a SS because the earth may not be near by (2:02). and would it be the fields that exist in the U plus the fields of the ship, so would it matter if we lie down or stand up? You going to be like this. In the SS you have another problem you ?? a Star Formation, is along side it. Q: So would a man of space lie down in relation to the SF of the core of the SS? When you go to space. When you become a long time passenger of space a number of your center of energies move quite differently, and some amalgamates with the others, especially those that are more connected to physicality, so you become more centralized. (2:04). And the STM has a bigger influence. .. (2:06). (2:08). (2:10). Lady shows video. (2:12). .. Mario presents Periodic Table of plasma. (2:14). .. Instead of counting neutrons and protons that the numbers represent comparative energy levels. .. (2:16). The 7th Health, and 56 and 60th KS Workshops have information about energy levels. (2:18). .. flower of lie and Mr. Russell ... our 12 hours of the clock come, cycles of 7 the week ... (2:20). The fields divide into 12

segments .. where the circles intersect, the black dots, they drill a hole in the dimension, the universe, portals. distinct layers . (2:22). The same patterns repeating again and again, fractals.

(2:26).

(2:28).

heartbeats..

(2:34). ... (2:36). (2:38). Q: I don't think the U makes so exact, I think it's the human beings urge to measure. That's a really good point. ... We do measure things. In this we can look at the actual interactions between ... they do behave according to certain rules.

(2:40). This was given by the man of the universe to humans. .. it's a tool to measure the variations ...

(2:42).

... Rick shows video to demonstrate Mario's presentation...

2 toroid (2:44).

when they counter rotate to each other they can merge instead of bouncing off. (2:46) .

when you combine them they become a perfect sphere. (2:48).

(2:50).

(2:52). Rick you just help me visualize how a portal can work, when you put the stick inside the toroid ...

(2:54). Alzar reads for the Iranian new year in Farsi ...(2:57). The teachings of today are very much part of the portal teachings, it's important to understand and collectively putting everything together ??? the destiny of the mankind in the space. A lot of people come around the work of the KF expecting different things, but not many grasp the totality of the knowledge. In the coming weeks we'll look into the depth of the knowledge how to connect (2:58). all this knowledge ?? to mankind. The KF is part of the structure of the soul of mankind, which means we try to find our own soul, we are no guiding light to no one, no prophets or whatever to the others. It's understanding the totality that in the space we become mature enough not to behave and have the childish behavior but to be the man, and to be proud to be a man from the planet earth. In the process many people have many expectations to understand that the knowledge of the man is unique for the man and mankind. In the next few weeks we'll try to go more in-depth in the understanding of the totality. Very soon we'll announce the opening of the first international spaceship center in the world. It's a majestic place and it'll be the first position to test the space flight. I have been there very recently and it's beautiful to see it and mankind is entering in the final phase in the frontiers of moving into space as One Race but it needs to understand more of, (3:00). The knowledge is complete, it is just understanding and decoding it and being able to be a useful entity in the structure of the U. That's all it is. We are not trying to teach man how to fly, but we are trying to teach man to be perfect once he appears as part of the U Community. Not to be shorter or below, but to be equal and this takes a lot of work.

(3:04).
