

269th Knowledge Seekers Workshop - Thursday, March 28, 2019

(Attachment is holding us to the planet, our time has come to be ejected by this planet like the birth of a child, we will elevate.... ,)

(:23).

.. There is a lot more that needs to be understood, (:26). let alone put into practice. Zero time transportation and communication using the MG field of the U is the only way man can get out of this planet and travel the depths of the U. Once we understand this man will move to the next step. We have to realize that we built these systems over years for flight but up to now we have never brought them to work within the structure of the universal M fields and this why that most who test these have found problems. I have talked about this in my teachings many times but maybe today is the time to start to bring it home so it makes sense. In space T of today ... we fight the MG field of this planet by using rocket fuel or by flying with the wings to over come or balance part of the MG field of the planet. How does the Iranian spaceship program work (:28).

(:36).

(:42). Do we need to go back and make Gans Boxes, make composite Gans' inside the Gans boxes? If you understand how to make composite Gans' inside the Gans Boxes this will make life much easier.... you've seen how they flip, and in that process the amount of energy released is enormous. Those of you who played with CH₃ and conversion of it to Deuterium or to CH₁₄ all gives you the same and how you can flip between the different Gans' in the strength can give you the same process MG fields that can power systems that can fly and reject or be attracted, repelled in every shape or form and strength that you need. The understanding of zero time space travel of today in zero time space then has become part of the reality that we have reached. (:44). Many of the K Seekers have to test and try. ... you need to understand how fast CH₃ has changed to C₁₄ or Deuterium, if you understand that process then you can control MG fields from the Earth's MG field strength or the universal MG field strength. Going back to the teachings of 6 weeks ago, in which a lot of space agencies came on to see what it is, (:46). now they're going to get themselves another understanding.

(:58). Any questions. Q: John asks, are you going to give us any hints on what the strength of the moon would be? Would you like me to spoon feed you. Q: Does it have to be the moon or somewhere half way between here and the moon? I'll explain you can do it yourself. We don't always have the moon in the space do we? Q: Maybe a satellite? Maybe an imaginary reactor. Rick says, the way spiders can travel through our atmosphere is they send a tendril out, just 1 fine thread and it get picked up by the wind and they can actually fly. Mr. Rick you get 5 out of 10. So let's expand on it. ... Q: Can a spaceship send out a field, (1:00). a tendril into space and use that to pull itself along, the saying is pull yourself up by your own bootstraps. Would you like to become more plasmatic then matter state. ... Do we have any housewives who have played with the Gans' maybe they can give it to you much easier then you think. ... (1:02). You see the play with the plasma of the U is what we do everyday. Every breath you take is G attracts from the moisture or mixture of this planet what it needs. It doesn't take everything which is in front of it, on a matter state it might do but not in the plasmatic state. Q: Siad, traveling with a SS the closest star is 4.3 light years away ... (1:04). ..

Stop, stop ... am I correct to speak it that way or not .. this is an assumption of a bookkeeper who became a physicist who never understood about the physics. Now you're a physicist and you're talking like a bookkeeper. ... Who said 4.3 light years, light of what? You are still a camel bird like the Arabs You speak about my T in the space T in the plasmatic MG fields and then you refer to the camel, the speed of light 4.3 LY, it doesn't fit, you haven't understood the meaning of space and time. Why LY away, at what strength of the PI. You want to go 20 million LY to the same destination, you're quite welcome, get on a donkey. If you want to travel the space with the understanding of the PI T, (1:06). you create the strength of the G field of the destination, wa lah, you are there. How long does it take you to feel, I am hungry? 4.3 million LY. This is the limitation that man has put in our heads and you all offlow. The bookkeeper should have stayed a bookkeeper, especially a Jewish one. ... You have put that restriction, I have told you many times, if you want to go with a camel to the moon, you're quite welcome... You speak of the space time MG field of the PI, you have it in your hands, you make it at home, why are you confused between the 2 states. What is holding you back to think in plasmatic conditions and not in bookkeepers conditions. You have the tools ... (1:08). .. You speak about the CH3 (red), CuO (greenish), ... why do you see them in different colors and how can distinguish a plasma field from another. Then what is the problem in understanding that you have a new tool, new dimension, it's you who is confused between the 2. ... when you speak about the application of the PI and you understand its field strength you decide the speed. (1:10). Match the speed of the light it gets from that star to you, then you are there instantaneously, it means you have understood its MG field. Understand the work of your kidney and you already understand the whole question, it creates the MG field of Cu, Zn, and every other poison in your body and it just pulls them in and converts them to matter state, this is how you create your urine. ... if you're in the PI T and you have understood the totality of the knowledge, you decide the speed. I want to be for 2 seconds. ... Now that we are coming to this point and a lot of you are matured in the knowledge of the PI, I told you it's like (peeling) a banana, how much you want and how fast you want it. .. (1:12). .. Now you go into the details of the simplicity of the knowledge we have. ..

(1:14).

(1:16)

(1:18).

(1:22).

(1:30).

(1:34). The simplest way I can put it, how did your soul come to see the light of the star, to know that is a star, this is the question you have to ask yourself, your eye reflection or the work of your eye sees the star or light. First of all your brain interprets that it's a light from a star and not a light of a car or a plane, then in that process what gives, and the information is transferred to your brain and part of that inof is deciphered by your soul that this is a light from another planet, do I know anybody there, because the man sees the light of the planet, the STM sees the passengers of that planet through their soul, so leave that schizophrenic life, that you see the light and you recognize it to be from a planet and then you have a bookkeeper who tells you 4.7 light years away, but your soul sees the light in ?? limitation of your physical observation, and says, oh I

think I have some friends there, I haven't been there for a long time, keep the eyes there I am communicating. (1:36).

.. we'd have to find a way to connect with that strength. (1:40). Your soul does, you recognize it, you see it, you know it. Rick says, it takes one to know one. Yeah, good morning. I'll bet if we have a mother here, many of them gave birth, they can answer you instantaneously, but they have no confidence. If I was a woman who gave birth I would tell you straight away the answer. Pia had an answer, we could go by a portal inside ourselves. ... Let me tell you something, how does a mother communicate with the soul of the child inside her. How does the child carry the imprint of the emotion of the mother. How does the soul of a child know it's time to be born, how it takes the position to be born, why do children move upside down to come head first out, is it MG field positioning or genetically we are tuned to do that, and then even that is based on MG field forces. (1:42). If a mother can communicate with the soul of a child, what its needs are, hungry or whatever. How many times as mothers you feel connected to the child inside you. So now you are inside the zone of the U, now you become the star and the U is the mother, there is no difference. It's us because we don't understand it we make it to be different. In reality it's the same thing. We are in the womb within another womb which itself is a part of another animal called the galaxy or another animal called the U. We have made that decision because it's according to our understanding and intellect, but the reality is the same, we are all a bunch of souls in a pregnant mother called the sun atmosphere, if we are sitting outside, we are like the chick inside the eggshell, because the MG field of the sun has created that eggshell, in interaction with the field of its environment, so we are already another part of a part and we create a part lower and call them a baby of the mother can feed it, so how do we do it. I deliberately referred to it in the recent past, the soul of the earth. Is it time for the man to mature that like when the child gets matured and gets rejected (1:44). or gets born, is the totality of the STM has matured now that the planet earth wants to give birth to the child ?? born into the dimension of the U Community, in the new dimension. Is it us who are maturing or is it the collective essence of the soul of the creation of this planet has reached a critical mass of the strength that it is time for humanity to be born into the U Community. We are getting rejected by our mother, we are getting evicted in a way if you look at it, and people like me are here to show you the best way to get out. I am the first .. break of the water as you call it. Rick says, you're the midwife for mankind. I am inside I came here by mistake. There's an old saying, you know how the Jewish people give birth to their children, how they get born? In Flemish you buy a child, in the Jewish the father stands and throws a coin the minute the baby comes to grab it. Rick, says, he wondered why the babies change and go head first. Now you got your answer. (1:46). .. we never get what we expect do we. In a way by being evicted ... Yeah, can you imagine how 7 billion are going to shout when they are evicted. So we are doing it in piece meal as they say. ... Does it mean that the collective soul of mankind has reached the point of maturity to depart the planet? And the answer is yes. We are just putting it together that collectively so that the birth is without any hiccups and we give a perfect birth into the U Community. This is what it boils down to, all these teachings. Q: When a baby is born it develops the physicality as well as the soul and if we have this idea that what you are saying right now (1:48). is that we are getting born again, is this birth going to be connected ... We are not getting born again, we are getting kicked out in the U Community. Q: But is this process connected with the change in physicality or the soul or is it more like ... It's, each soul is on its own, it's like fish who spawn 100 eggs, now they're born together, we are in that process but this time there are billions of it.

The STM and the same as a soul of a fish, and a cat, it's a collective maturity of the soul ... man will understand this very soon, I brought this discussion yesterday.. it's a collectiveness of the 7 billion. When you sit and you talk to people, you understand that there is one way to it ... are you going to do it one by one, which we did, or are you going to it collectively ??? there are others to do it. We carry the whole ?? mess. We have already done the one by one, now we do it collectively that the whole process of the whole nursery to be gone, and that needs the world leaders to be doing it. ... it's very simple what I have done to the humanity and it amazes them how I can take you anywhere I like, but it has to be done by you. I just tell you afterwards how you have been guided, you think you did yourself. Your RNA and DNA accepts it and then it goes to the next step. Just go to one of the teachings where I have explained what we did and the past 5 to 7 years (1:50). in respect to the sharing of the knowledge. We played a very simple game of knowledge, .. you are all offlowers of the KF, millions of you listen to it, and many of you walked away, and then you came back and listened a little bit more and got hooked again and went on again. When I released the USB stick with the patents to the governments I had upheaval from the KF supporters, I received a shower of, "you betrayed the humanity and every other thing on planet ", that I gave my T to the governments. Then after 2 and half years I found an excuse ... to share it, I opened the patent and everything else. If you remember we crushed the European patent office, 400 servers backed up and they still crushed, because many people were trying to download what they thought was a secret in there. So I shared it with you lot, the governments had it for 2 and a half years and you thought they did nothing with it, but they did everything, all the governments in the background had some senses, they worked on all the paragraphs and appointed scientists to break this thing up. But I came here and I taught you one by one every week like a patient father, in every crook and crack of what it was to get where you are. Now the governments know what you know, but the governments can't go any further, and you public (1:52). can't do much because you don't have the financial backing to do a lot of other things. So now we are going back to the governments. The public knows, so we all become Christians or we stay Zoroastrians as we say, or we copy both and call it a new religion. Now the government knows and the public is catching up very quickly, so we talk to the governments. What are we going to do, the government knows and the public knows and will catch up, will there be a need for a government when they know they can feed and do everything else themselves. They don't need any metals to make cars and the rest of it. Okay, maybe a few million achieve it, what are we going to do with the other 7 billion? Therefore as a government we better start sharing that everybody is Christian now. We call it a plasma technology. As I said, I am a Master, I gave to them they played it themselves, they thought they had their time, but then I came and taught you in public and some of you are very wise, at the same time government scientists ?? you lot, because they thought they are clever, but they're not. They called me and said, we made the thing can you come and show us how to make the fuel, and I thought my god, I am glad I am Iranian, because Iranians manage to do it themselves ?? impartial. So now we went back to the governments, you don't want us to do more sharing, but we still share, is let us teach everyone at the same time. Put the guns down and we'll spend the money on the knowledge and the existence of the peaceful coexistence. And we are at this phase at the moment. That's why in the past few weeks we have no announcement to make, we got what we wanted. (1:54). And we are heading for peace in such a speed. But there is a step behind it, the rulers who broke the rule now have to answer those who are there to be correct as rulers. This you will understand very soon. We work with the nations that are peaceful and whose intentions are peaceful. Economical advantage doesn't make

you a predator, but slavery and colonization makes you an abuser. Now we have the knowledge in our hands, the people know, the governments knew they didn't do much, whatever they knew the public knows, now the governments know that the public will catch up very soon, so we open our work together. Watch the space. This comes to the knowledge how are we going to expand. The development of this T in the next few months will be so radical that it will shock many of you. We have, you have done all the work, by your presence of some 100 million a week listening in different ways and going up, and in special cases, it's a lot of number which you built up, I just taught. Everyday the numbers increase just because you have a car outside doesn't mean you (1:56). are going to go joy riding all the time and spend your life in the car. It's there and if you need to go somewhere you get in and get the job done. We teach everything about the PI T and when you need it you use it, the knowledge is there. You don't have to be all the time on your Gans boxes, it's there if you need something, if you're hungry, get sick, want to go somewhere, you use it and then put it aside. But it will become so much a part of your life ... we are making it to become part of your life. A lot of people don't know English so they shouldn't fall behind therefore we set up an international program so every part of this planet is a part of the T If you want to go to the moon and see the light of it you should be able to make the travel to it. Now you understand I said if you want to go from this point to that point, most of the time it's actually breaking and starting off, most of you are space born, it's zero time space conversion to the matter state friction takes a little time. Takes a lot of little times. (1:58). Every reactor and dynamic system you made, they can fly, if flying is to move form position it means you have created the right field strength it doesn't move, but you look at your own systems, you put a motor underneath, you have put a big balloon and you strung it with a million ton weight at the bottom, how can it fly. Those who managed space gap it, to break it up, saw a little bit of rotation and a little bit of lift but they can't break through. Now maybe you can, maybe now even governmental research offices can reach that point. You're dynamic motors is that million ton weight that absorbs you to the planet and it absorbs that weight before you go up, so you need a lot to break through it. Some people do, but some of the fields, you need the totality to be able to break through. So how do we fly? Q: But in a way isn't our body the same as the motor keeping us here? Good morning, you got a 9. (2:00). Q: Sorry I mixed the matter with the plasmatic state, new question is, how can we train our thought process to think in plasmatic state? Fall in love. That's the only way, the best way I can explain it. I have said it many times. What do you do when you fall in love, you give up everything. Look at it, the king of England abdicated because of the love. You are not more then a king, even though we don't believe in them. Q: Become weaker then that strength you receive then you get attracted. He's cheating, you get blown away, don't do that. (ha, ha). ... it doesn't mean that just because you are getting fed you are going to come closer too. It means balance or it doesn't bring you any closer. Q: What about the eyeball and the destination drawing you had there, what would be the strength one would want to achieve if the stronger gives to the weaker? I am going to stop you there because there is something I have to explain. Understand this for now, now we are in the Spring, (2:02). if this is the sun and this is the earth and if a few degree deviation can create such a seasonal change and variation, now you can understand what the field strength can do. If you understand this you should be able to develop a system that attracts you or pushes you away, ... But why do you work with the sun, it so small, why don't you tune into the MG field of a black hole, center of galaxy or U. Higher speed longer distances. (2:04). I tried to open your horizons of understanding. ... if you just listen to his soul we just convert it we don't need the microphone. Hello. Is it your soul speaking

or is it the voice of your microphone. I think it's my soul making a miracle. (2:06). Q: ... before we were trying to bring these Gans' back to the matter state, we tried to heat them and different things and then like you said we reverse the process ... I just realized that to reverse the process we just have to introduce the Gans to the environment, we kind of drop its field back, in that way it can open up and go back to the matter state, it's the only way, right, it's the same thing that is actually happening to us here on the planet because if we look in the whole thing, we are in the plasma of the earth which is within the Pl of the U, can the Gans be brought back to the matter state, does that mean that if we built all these things, we could put one in the middle of the town, but then isn't there a danger we bring our bodies back faster to the matter state if they absorb these fields back so fast? Not really, it's a state of ?? find, do you want what is there or not, a state of the soul the strength of the need. Q: We are not entirely from the earth, we were discussing that our energy is also coming from the sun, both, which means in a way we are feeding the center of the planet, right, which is the collective soul of the planet, so slowly we are actually creating the matter on the ??? (1:08). You are going one way only, can we go both ways, the planet is feeding us to be part of it too. Yeah. So you are already handcuffed and chain locked. So what do you want to do with it. To swing you need something to jump off from, to hold on to. If you jump without something to hold on to you keep on falling back on earth. If you want to travel the depths of the U, just change the name and position, sun, galaxies, universes. If you jump but you have nowhere to land to, you end up back where you came from. ... Let me explain the other part, in the work of the U you already have a field which is given you, if you can see it, or feel it, you can lock into it. Q: What do you mean lock into it? Because the fields are already ?? part so all the fields are active? So if we feel it consciously it means we go to the deeper fields in the mind, right? But it's already there because we in the center of the planet, because the G is stronger, right ? (2:10). Okay, now that we are talking universal let's take it a step further. You have the earth, you are standing there, but this (earth) is connected to the G of the sun, sun's G is connected to the G of the galaxy, and to the universal central line. This is all this way traffic, but at the same time what about the M of it. So how are you going to do it. You have to also consider the G field of the sun and so on when you want to travel out of this space. And then you have to consider the G of the galaxy when you want to travel the depths of the U. Or can you use them to travel towards. This GPS is multi purpose use, it's just to understand where it lands you. (2:12). ... the same applies to the sun, because the fields of the earth are connected to the sun. What I am trying to explain to you is to look 1 step further, beyond what's on the table. ... in understanding the totality. Q: ... Have you become Mr. Bookkeeper? so it's not obvious is it, so the understanding of totality you have to .. you might not need it, (2:14). but it is there that it might do something. Q: Okay what is your understanding of totality if my logic doesn't go in the right direction? Think a little bit. Q: Okay you are suggesting that this travel would be possible but it means that we have to have like a second field that isolates us from the earth, then we can go? Good Morning. But what is connecting you to this earth, it's your physicality's MG field Inertia of the mass of your body. Q: Is this connected by what you said, we are getting fed by the earth, so does that mean if we tune to a feeding station let's say the sun, we would get locked by the sun and not the earth, or let's say to the galaxy then we could travel anywhere because we are locked to the strongest? ... (2:16). You see many of you have worked near a space reactor and those of you who have, haven't understood the work of it, if you spend a lot of time in the vicinity of space reactors especially the ones set for flight, you come to realize your behavior changes, your desires changes, your comprehension of the totality changes, unless you are materialistic. Many of you ... the fields of it, because it's

trying to find balance between itself and the planet and you are part of it, you feel the change. In my talks, I explained the tickle factor ... I watched as people walked in (the room with the reactor) and they just bend forward. This was my dynamic field detector. ... (2:18). ... How do we feel that field and why does it suddenly touch us that way. This is part of us, we know it so well but we always ignored it. ... Why do some of us have a fear of falling, where does that fear come from, has it got a reason, that you can measure the MG field of the planet and doesn't know how he might react to it. It has some essence of a feeling that we are afraid of it. In our body we have a sense of measure but we have never developed it, because now we have a guy who measures it and says, 4.3 Light Years. Can you imagine how badly you are going to crash on that planet/sun when you are out of the earth and free falling 4.3 Light Years, it'll be a big splash when you land on that star. Is the fear of falling associated with this planet only? Because in the space you can't fall. Would it be something we loose? (2:20). It's one of the first feelings we loose, because we can't fall, it's zero time space. Fear of loss. When everything is provided for us in the space do we feel, I need a shirt, ofod, I loose .. you can't because everything is there. We need the STM to feed if there is any physicality. Why do we insist on feeding the STM, because when you change dimension and you don't have legs what are you going to feed. Like an amputation, bits and pieces, are you going to keep on feeding the brain of it. Let me explain ... In my teachings in the recent past I explained this in a very soft way. This is the brain ... we explained that the STM what it creates, radiates the skull this way. (2:22). But when it has no bottom to it, in respect to MG pull of the earth has created the arms and legs and body .. now when we are in the space when there is no G pull, would the STM become all the same (sphere). Then you become a sun. Maybe for the first time you can understand what you become when we call you the travelers of the space. Or you become like this (irregular shape) depending on which MG field comes from where, and the soul becomes the center of it. Or ?? primarily you end up to become a star, because now this part (lower body) which is created due to the pull of the planet doesn't exist anymore. Is it the fear of physicality that stops the man to reach the point of falling in love, to give. Then if you do this your are not ?? of the planet. What's going to happen with you? Now you understand how we make a star from the STM once you leave this (physicality), because the G pull of this planet doesn't exist anymore. So you don't have that pull, or would the man want to have an arm and a leg connected to earth. Now you understand how you all become shining stars. How in the depth of space you don't have the G pull and you end up to be that. I made man in the image of Myself, to be a star, a giver, (2:24). to fall in love, which is giving unconditionally. I told you that the development in the past few weeks, that we are taking you to become part of the Universal Community in the right direction, right way with the right understanding. Do you need all the packs and ofod, how are you going to feed yourself. How do the stars in the sky stay there for millions of years, where do they get their energy from or do they tap into the universal energy and they give what they don't need. 45

(2:26).

(2:32).

(2:40).

.. The process of change of emotion will come with detachment. (2:44). When I left a beautiful business life for what I sit here now I had to make a decision to be detached, it

doesn't matter what happens, and it's very hard for your loved ones and the people around knowing that you have, that you can get access to it but you choose not to. Because I know the attraction of the money, of making. At 27 years old I walked away, it took me 5 ?? years I went back to it again, and again I walked away later on, but I wasn't committed to develop the T further, I went back to it and I made it worse ?? But this time I did exchange of my life for the T and the development of it for the peace of man. I stuck to it and I see the benefit of it, it doesn't matter what, many times Caroline tells me, you shouldn't have one it this way. I said, if I wouldn't have walked away from it and become detached from it I would have never been able to do what I have done. Detachment is the key to it. Then you can detach from the physicality. Then you can become part of (2:46). not even being attached to the U Community but being a part of it. That's what I keep on saying, to be a part of U Community. Not to become the UC then you become attached. I don't ??? I live an example of the way it should be. But when it's needed it's there, because I am not attached to it if there is a need for it, it jumps out. Everyone across the KF, especially in the last year and a half have learned that, somehow we passed the test and made it to the next ... we get to the point. Detachment with all the harshness of it, man needs to understand it because then when you go into space you won't cry to go back to earth, I miss my fish and chips... it's there, it's not becoming a hermit, it's understanding that there is a level of satisfaction, not needing to be attached to it, when you are detached from physicality you're not attached to this planet. a process of detachment, self-satisfaction from the STM not through physicality, then I can give. I have a scan of my brain every year and when I saw the last one it frightened me, I said, how bad am I getting. Pretty soon there won't be even a brain left in there because everything was given. What do you expect this is the point (2:48). How much are you attached and then you get attached to physicality then how are you going to leave this body and become man of space. Or are we just dragging on, let's get on the plane. ... ??? teach the other souls not to go this way, we crashed on planet Zeus. Upgrading the souls. Q: The second part of my writing was that I hope the souls around up there who know me come and guide me? (2:50). How do you know they are going the right way that they can guide you. If you get misguided you'll never know. Q: Because I can make now and feel them around me I think where they are they'll take me into their arms ... if I believe God is kind, so in each transition He has been faithful if I do what He wants. So the arrangement is in a way that I would not be hurt. But I can't know anything with my brain, but I can imagine what will happen ... Are we living out of the fear of misguiding or out of the confidence that everything is correct. Q: Confidence that I made keep the path as I decided ... (:52). .. Can I stop you there, let's go in another step, now that as a KF scientist you have the understanding and you understand that the soul has a strength and you understand that you are capable to do with many Gans' for different applications, would you dare to or have enough confidence, that can I make a copy of my own soul, and what would happen at that point. Many of you have changed in the process of producing all these flight systems and Gans'. Some of you might have achieved or reached to the level of the strength of the singularity strength in your Gans' or in dynamic systems (2:54). of your own soul. What is the fear of the man to produce or achieve the creation of his own. We have cloned the sheep. .. what if we gathered the knowledge that we can clone our own soul. Or would there be a fear of us. It's not that it hasn't happened, it will happen. Will it become me or shall I become it. Many of you, especially some of the doctors are playing on that verge, I watched it, without them knowing. ... but they don't understand what they are playing with, What are the consequences of it? Now for the first time in man's history you have managed to turn matter into energy and energy back

to matter, but at the same time you can convert and divide that energy to any other energy that in turn they (it) becomes matter, if you want them to. We have completed the knowledge of mankind from matter to energy and energy back to matter. This is what you do, you get a Cu and make a Gans of it and put it in interaction, and you make gold, Zn or whatever. (2:56). The knowledge of man through this T is complete. .. if you can make the gold then you can also make the STM. How confident are you in handling this and would it be that do I deliver to or receive from, to enlighten or increase the capability of my own soul to give unconditionally. This is not a theory anymore The knowledge is within the grasp of the man. ... Would I become through that system, through its interaction I can match the soul of myself, The system is the same as the womb of the mother and to use that as the repulsion of my own soul in the depth of the U. This is the reality that is going to hit many of you. (2:58). Do we aircrafts to propel or do we use the STM to enter the dimension of the U. ... In a another way, you went to the toy shop and bought a toy but you can only play with one of its functions, now I'll show you that it has many more functions, it's not just one of those robots that can only say hello, it can serve you too. It's not made in Japan, it's made from you, by you in the kitchen of your house, as many of you use it for your pains and anything else. Now you understand what we are talking about, the depth of the knowledge and what you have got yourself into. You came here to learn something of Gans' but if you understand in depth you can make a copy of your own soul. And are you ready to accept it, because now .. what did we say, an egg and sperm in a given condition of the womb of the mother come together to create the STM, which makes the physicality of the man, when it takes shape we call it a baby. (3:00).

... It's a knowledge that sets us apart from the animals but in so many ways our awareness and being able (3:04). to share the knowledge the way we do gives us a lot of confidence that we can go to the next step. How many of us would like to be a lonely passenger in the space of the U? When I look at the list of attendees or panelist, there is a long list of Universal Council members and why have these people put their soul as part of the structure, what gives them that confidence that their soul would act on it. How does the soul of the UC member be different of become different or take a direction of difference to be a giver. Can we replicate that, why don't we allow the member of the UC, Core team or EC to be in 2 positions, because those who chose that point are of different values then the others and can and take in respect and with the others. This is all part of the development which is going through, and why the KF stands for world peace and we are very strong in it. We share knowledge worth billions in exchange for world peace. (3:06). For a meager feeling of, I don't have to be afraid of living, that's all peace means. Why do we see K Seekers coming here and sharing knowledge so freely that last things they know, or on other teachings this patent for sharing knowledge unconditionally comes from the confidence of knowing the STM. 44

.. why we took some of the UC members out because they were here to just make profit and were advertising for their websites. And how many are still there. The totality is to understand that the maturity has come. Man has to mature to the strength of his own soul. This is what it is. I shared my knowledge freely, I don't have you sign a non-disclosure ... I am disclosing everyday on my teachings and you lot do worse. (3:08). I have made a bunch of men whose knowledge has no value to them unless they share it. We are a special breed of giving, we share knowledge which up to now had a lot of

patents, values and stealing. If you steal a gift you are by nature a thief, if you take a gift and nourish it for it to become a gift for somebody else then you're a man. Because as the pleasure you took from it you give to somebody else to share it. This is what I did ... we become a bunch of free and without the fear. This is what the whole existence is, there are no patent offices in the U. ... if there is any it's called God. ... (3:10). Q: What is the meaning of giving and receiving? When you give and expect to receive it becomes Christianity. You go for a Christmas and you give a gift and you expect a gift. When you give a gift unconditionally, it doesn't matter what happens, even if it's (costs you) your life then you become the Christ. There is a big difference between the soul of Christ and Christianity and the followers. If you understand that then one gives the gift of life for the others to elevate, and another gives a gift to get something back for it. And that's not a gift, that's expectation and that's the level of humanity.

... I hope we opened a new Pandora's Box for many of you who are afraid of opening it. Now you have to deal with it. (3:13).
