

270th Knowledge Seekers Workshop - April 4, 2019

(,)

(:14). Mr. Keshe asks if there are any questions of what we haven't understood. Rick asks if he could outline "going to space", the different ways and methods of going to space. We have talked about it on a physicality basis and the soul basis. The different levels that may be available to us or to open up for us? When we speak about going to space, what do we define the space as, what do we see or consider as space. We a space in our physical body on this planet and at the same time within the structure of our physical body there is another dimension of life which we call the STM. Even though it lives within the space dimensions of the body, it has its own life and line of communication. (:18). When we define going to space we already know that in the center of our physicality travels the depths of the U, it has been a space traveler all the time. It has a line of communication with other parts of us be it through dream we call it, or some people call it through the subconscious. Or we have the choice to physically move the physicality with its soul. In a way we have a caged bird in the physicality of the body called the STM. We can open that cage and let it loose at the point of death when the operation of this cage rots away and it can't hold together and this beautiful bird becomes free. Still it takes life in the universal dimension because it has a life, it exists on its own. Or we can carry the cage in a box and take it anywhere, I can take a bird cage in my car or in my hand and walk around the park, it doesn't change anything in the existence of that bird. It's still a bird, it sings and communicates with other birds in the park. And this is how our bird is, so we give it an option, those who understand the process of the creation can take that bird out of the cage, because we trust it, it will come back again. (:20). It's very much like when you have a parrot at home you open the door and let him fly around the house and it comes back again and goes in the cage, because you trust it and it knows that is where it belongs to. And this is the process that we have made as an option to man. The STM is that bird but it is engaged in the body of the physicality of man and for the first time man knows and he can see that it's him who hasn't trusted the bird to be free and the time has come where he doesn't need to see the cage to break up, to rust that the bird can fly out. Or by accident the cage's door is open and the bird flies out. That accident is when we die on the street, the cage opens up and that bird still gets freed. But now we are teaching how the man has control over the door of this cage and he trusts that the soul will come back to the body. Or the bird will stay that he can create that atmosphere of the home, the cage. This is the problem we have and we call it different ways of traveling. But to be able to free that bird without accident or when the cage rusts and we call it death, we are teaching how to be able to control, (:22). and trust that when we release that bird it can come home. Or it can make a home that we can go to. When my children were young, 4 or 5 years old, they wanted a bird, I bought them a cockatoo, .. we used to let it free the house and it would go back to its cage, but the doctor said it was causing disease and couldn't stay in the house. So we decided that if we let it free it would die because it didn't know how to feed itself. We took it to a shelter but on the way an old lady in the park saw it and wanted it. ... every now and then we went to see the bird . (:24). It was a new home, it was our home, and this is how the STM should be. It's trusting that where it goes it can make a home for us. In this process we are teaching different ways of freeing the bird or carrying the cage, the bird is still there. If you want to carry the cage and go somewhere you get in the car, that's the spaceship. Still the bird is there and the cage inside, the cage is the body and the bird is the STM. We haven't trusted that we could get the bird back, then we carry the cage in the SS. Or there is another line of teaching that is

understanding the structure of the cage that you can make the cage not to rust and then it frees the bird but it can open up and carry the bird, the bird is free, you don't need to fuel it, you don't need to do anything, it travels the space of the room, garden or city and comes back home again. When we teach about the STM it's in getting the man to trust himself, and to trust himself he has to become detached from physicality, the wealth, and everything else, that the wealth is within me and not belonging to me and this is where every man makes the mistake. (:26).

(:40).

... nuclear based planes, (:44). or gas reactor flight systems that we did in Iran, Gans system which is developed now with the Chinese, or do you want to travel with the dimension of the soul of the prophets of God which is the STM. We teach you that, you choose. The only thing is the journey has no end, only in the physical dimension. I am the beginning, I am the end. I decided what physicality I give to my soul and I decide when this soul will become part of totality existent on ?? my wishes. That's all it is. So what do you want me to explain Mr. Rick you have been here 280 sessions, you haven't even managed to fly physically yet, you are still changing. Yes indeed, that just proves we have a long way to go. No, it happens in a second it's just when you get enlighthen. Yes, exactly. That's basically where we ended up in our discussion. (:46). You did mention you went years without notes in your discussions. ... what clothes to wear. How can you put clothes on the sun. The thing is why we can dress the STM in the dimension of the physicality of the brain is because we have learned a trick. You can't catch a fish with nothing, you have to make a net to capture it, and the STM has learned how at a given strength to convert itself to the dimension of physicality which is the skull and the dimension of the skin. That's all. How do we travel, this is one of the things which mankind will face very soon. Can we keep the STP operating but move the STM to travel in the dimensions of the U and still be in touch with the STM. Do we need the STM to be within the body while it travels the depth of the U (:48). and comes back and brings everything, but this time it shares everything with the physicality. Many races in the U can do that and some humans have achieved it. Trusting that the bird comes back, the cages stays, it doesn't collapse. Q: Arthur sees blue light when he interacts his fields with the fields of the U? .. I wanted to ask about the blue light .. it's like a shinny bright dot and it's blue, ... you feel it in the forehead and the field flow, what is that blue light? (:50). Since when have you been seeing the blue light? It's been a year or something, since I started to practice the fields and then I started to see, I practice night and sometimes daytime. What made you to practice? I am a K Seeker for 6 years, very passionate KS and close to my emotions and always practicing fields. I also want to ask about the wave and particles, if I go outside and play fields, I try to see energies, if I look in the blue sky, it's like a wave and shimmers slightly, then it slows down and then it's like particles, shinny little dots running around, billions of them, is that the soul of the element? (:52). ... Where about in Scotland do you come from? About Attenborough. It seems what you see, you are moving in the direction or dimension of understanding or expanding the freedom of the STM. You still need the confirmation so you try to confirm that you see it with your eyes. The next step in the understanding to move to see with the fields of the soul and partially, many people can see waves, it depends on our AA and what we allow to be released from our soul, we change it, it's like the changing of a window (:54). the more you open up the more you see. I have no emotions, no filters, I just look through my soul. because most probably

you don't see (them) through the eye, you can see the depth of the U. I have taught Caroline, we see things, she can see waves and movements in the sky. It's understanding that there is no limit, you don't need to see with the eye, you can see through the fields of the STM. You expand your fields dimension beyond your physicality and if you manage to do enough of, or trust that I can be part of it to envelope the whole physicality, then you become the light. .. You see it done by many people who have passed the dimension of physicality, long time, this has been known for hundreds of years. It depends on the point of maturity how you get to that point. A lot of people who managed to it, they can prance the position and dimension of physicality, they can do that, but it means you're maturing in the right direction. You do not need it. But why do we see the blue light in the human dimension is because of the (:56). structures of the matters of this planet 04

(1:58). ... We are looking for elite Plasma Physicist to join a special training by Mr. Keshe. ...

(2:04). ... Q: Will the religious leaders try to put the crown of messiah on you and how will you divert them from trying to save their religions? (2:06).

.. peace (2:08). is the wish of every man, but to be solid on it, committing yourself to it is a totally different ball game. It doesn't matter what they call you. When you see the life of one of the most beautiful people like Nelson Mandela, he was committed to equality and freedom, and you stand for it, it doesn't matter what. You have to understand that everything has a price and a condition. Some times you do it doggedly until you get to the next step, and some times you set the conditions and that is where you want to get. In the coming weeks you'll understand what I am talking about, 2019 is the change for humanity and the acceptance of the technology by the world leaders. We see it coming up and it is already planned to be. We'll see the sharing of the knowledge, world leaders shoulder to shoulder with KF top lead scientists. .. (2:10). A year of solid work has brought us to a solid base. We have started to govern and soon you'll

understand. We govern through knowledge, peace and sharing T. .. One of the biggest contracts with the KF has been signed in the past few weeks and it's done under the title of KF T. . . .

(2:12).

(2:14).

(2:18). Q: Last time when I asked you a question you said we have to look to the totality. And I was looking at the totality and I realized last time I was wrong because I went in a wrong direction (Good Morning), so this time I want to describe the whole picture. Listen if you are enlightened you haven't made a mistake, you have elevated your knowledge. And that's all that matters. ... I want to discuss it here so others can benefit. I would like to put some numbers on it because I am a mathematical person .. If we look at the central array, which in the center is a antimatter. We don't have antimatter,??? the Principle. (2:20). The center is the most strongest one in the one we call PI, or M ??? Let's say the array in the middle has the strength of 1,000, and let's look at the principle of our galaxy to be the sun, the sun can also be like a proton in another system or an electron ??. If the sun is a strength of 1,000, then the earth is within the PI of the sun, and say the earth is 100. No, no, no, stop, stop. Let's put the knowledge in correct way. If the center of the sun has 1,000, then the center of the earth still has 1,000, but the earth to be where it is, it shows it's power of 100. What you show doesn't mean what you have. If the earth didn't have the strength of 1,000 it would never have been in existence in parallel with the sun. But what levels of it, it shows for its manifestation, and that's what it is. Cu is 60 or whatever, H is 1, both manifest themselves and both have the power of 1,000 in their centers otherwise they can't exist in the dimension of the sun and the earth. (2:22). Q: because what you were describing in the book is the opening of the PI where the weaker fields are getting together in respect to the center? Yes, yes. Q: So if the center is 1,000 the weaker field is like 800 in respect to the center. Yes, so they manifest themselves in that level, but to be manifested in this U, in this planet, this solar system, you have to have the center common denominator, which is what everybody else has, or you don't belong to it. Do you understand? It's different between the manifestation, what you manifest yourself to be, to show, and what you have inside. Q: I am getting your point, but I can't understand, in the earth is it also 1,000 then why is it keeping it's distance from the sun? Because it allows its surface. The STM in the center is 1,000 otherwise it can't manifest in this dimension. You have in mathematics what is called a common denominator of a strength of the fields. We can only be part of, or be existing to be if we have whatever they have. You can't become a doctor if you don't have education in medicine. (2:24). If you look at the way I draw a PI with a tight circle and it opens up, I put H on the outer side and Cu further in, but that H couldn't be there if it didn't have 1,000 in the center, can it. But it manifested itself at a weaker strength and we call it a H. Q: ?? the way you put it in the book? In the book it's exactly the same. The weaker get together, yeah, but to become manifested they have to make the center of 1,000 that they can be in that environment. The weakest carry in M and the strongest in G sits in the center that holds everything together. That's why I told you last week to go and think. Q: I was thinking but I couldn't get my head around it. Now get your soul around it and you'll understand. Q: Something was not adding up .. Does it add up now? Yeah. Q: If in the center we have the common denominator, like the earth has a common D with the sun but manifests at a lower strength, does our soul have the common D with the earth or the sun, or a higher entity ??? (2:26). With the Creator is will be the same, we can't be created in the dimension of the Creator if we don't have it inside us. Q: So it applies to

all of the U Community as well? Yes. Q: And that's how we can get in touch with them? Let me explain. Peter in Austria showed some years ago that by playing with fields he can create matter, but you have to understand the knowledge behind it, we take Cu and make 2 Gans' of it and put it in 2 balls and the way we position them and the way we interact them it gives us gold. Or Zn or Mg. In essence that field interaction is the principle common denominator, it has to be there, it's the knot, the center of G field forces, if you can rephrase it in the world of science, we as entities, to exist we need to have a point that we can relate to, and that is because it can exist, it can hold on to, so it's the highest level of G fields, and the lowest strength in G fields at the point of manifestation. (2:28). At the point where you can take in balance with what you can give, it gives you the point of manifestation. That's where you manifest yourself. If you take so much from the environment that what you give, gives you the balance equal to Cu, then you are Cu. If what you take from the environment and what you take is equal balance of ?? you manifest yourself as ?? It's like color, how do you become green or white, whatever is not needed it becomes the color of manifestation. In the world of PI we go by the strength of the fields. What we can take and what we can ?? at the point of the balance of the G and M field, in the interaction with the field state of the matter we create the surface of the earth. Until that point there is nothing, there is just what is trying to find out its dimensions. And when that balanced point is reached you get the surface of the planet. And then when the G field holds on but the M field through the Inertia expands further you get the atmosphere. On earth you just don't have the hills and the mountains. All the hills and mountains, the way they manifest themselves is the interaction of the fields of G fields of the center point with its M field and the condition of the Inertia of the matter state. When they interact you get the surface. Why don't get everything 20,000 km high or 20,000 km low in the sea. (2:30). Why do we have the point of manifestation of mountains and hills, why most of the planets, stars, whatever, we don't have hills and mountains in the stars but we do on planets. Because the energy transfer is too rapid at a higher level at the point of manifestation. It doesn't allow to become solid, to manifest in a solid state of matter. It's a PI state of matter. On the surface of the sun we have the plasmatic fields from the center, with the plasmatic fields of the plasma of the matter state which creates light and shines. If you put solid state on it like earth it won't shine anymore that way, does it. On earth it's reverse, or on any solid state planet. If you go beyond the understanding of the transmission of the fields which have no dimension to manifestation you'll understand the creation of the U. And where these interactions takes place you call it galaxies and when it changes manifestation to show the turbulence of the fields of the U. That's where the galaxies are created. And again in the center you have that common denominator field that allows them to manifest themselves in a matter, and say oh that planet is a Cu, but we have a Cu here too. And if all of them have a common denominator PI then so we have a relationship, we have the confirmation of existence at that level. It's very simple. Now you are becoming more knowledgeable and that's beautiful. (2:32). Rick wants to show a video of MG field animation from some years ago. Q: Mario thinks with the new understanding it needs to be updated. The people he asked can't confirm or deny so ask Mr. Keshe. You see there is something I have to clarify for some of you to understand, when we speak about the weakest field we are talking about the M weakest field and not the G. When the weakest fields come together it's like a banana, the peel doesn't say what strength it is inside as a banana. I always compare it to a banana in teaching. This is where your comprehension has to increase, when we speak about the weakest field we speak about the weakest field in manifestation which is the M. Plays the video. The fields create the condition and positioning of themselves, (2:34). according to the

mentality of G and M. The position is that everything carries ?? the banana is always a banana inside when you open it, outside the color can yellow, green, black. It's the same if you look at it. When you peel the banana it doesn't matter what is the skin, you look for what is inside, G, that is where all the energy is kept. These animation have been made by K Seekers. Q: So is it generally correct as you saw it there? It is correct but you have to understand what you are looking at, this is the problem, how you interpret the image. The image is very correct but you have to understand what you are looking at. Freeze that picture. Some of the lines that are double are the same, some of them are single going opposite. 1 red and a grey are going the same way, and then you have the others. (2:36). This is a true picture of a PI. Plasma is not 1 field. In the condition of the other fields, 1, 2, .. 9 arrows, if you look you go from inside 1 to outside 9 ?? are going the same direction, but they are of 2 different strengths, if you look at 7 it's still grey but it's going the opposite direction, but 6 is red and going in the same direction as 7, but their position is dependent on number 9 and 1, on how they react in respect to each other, that they give them which one, and somewhere number 6 and 7 will change direction because of the field forces of what gets absorbed from the environment forces the change or it adds to them, so now it gains a new value. You see this in nuclear testing of the plasmas. You people who run the dynamic systems see it, that the saturation and the motor suddenly stops and then you think you have burned the motor, and then you leave if for a while and then it works, because the fields inside the layer of Gans' have created field forces that are stronger then the motor. If you can run a motor at 6 or 7 watts energy, so you have to understand how much energy is created inside the ball that it can stop 6 and 7 watts, which means it has created a balanced position and doesn't see any forces to move. (2:38). When you have multi-cores you see it very clearly. We used to have 3 cores inside each other, now in a simpler way you have 3 different Gans', you see in, in one of the books we show it, the Gans' don't mix they stay separated, even they have some moving inside each other due to the MG field interaction. It's a simple understanding by such a gorgeous scientist like Newton but he explained it in a matter state, but if you translate the same thing into the PI then it still holds but in a different field strength, and not forces. There is a big difference. Q: In my opinion the M lines are represented correctly, but the G ones in red (2:40). I think the same direction because... Why this picture looks correct to me or near enough to get it visually, is that if you at # 6, 7, and 8 ring these are M, but # 3, 4, and 5 are G in respect to #6, 7 , and 8. Do you understand. But when you come to ring # 3 and 4 this is the M manifestation of the fields but 1, 2, are still G to 3 and 4. 50 (2:42).

(2:48).

(2:52).

(2:56). Q: Please teach us how to release the bird without any fear, how does one gain this knowledge and retain it? It's very much in the strength of the STM, you have to work through the soul to strengthen to give confidence to the STP that I am there, I am not running away. And it's the balance of the totality which we have to understand. The biggest problem that we have especially with the tying up with the work of the STM with religions is that they have created so much fear in us that we need to be punished and that there is always something bad, (2:58). that we have passed the point of trust in our own soul. This is what part of these teachings are, part of the process of the growth of humanity is to gain trust back in his soul. I created you, so why are you afraid of me

who created you, that you can let me free or I am free but I am here to look after you. If you go back to a lot of my teachings in medical, I always said, the physicality is a leech on the STM, it's a sucker to it, and because it sucks so much from it, it has created that point that we can't fly. When you put a 10 kg weight to the leg of a bird how do you expect it to fly. That is what man has done with the physicality of it. We cage the animal to enjoy the beauty of it, but we can still leave it free, I enjoy you to be here, I feed you and it comes back. The whole thing has been inbred in us with the fear and this is where the change has to come. Any other question. (3:00). Caroline asks Q: How can we reduce that pulling down on our soul I think that is where people are trying to find solutions for it? They are supporting themselves with the Gans water and with the knowledge you have brought so far, but how can we reduce that pulling on that soul, can you be more specific please? What do you mean? You just explained that the soul can't let go or be free because you have put a weight on it ... how can we deal with your knowledge ... that we can release that weight on our soul? (3:02). You need to understand. there are 2 ways to do it, the best way is done universally, is that you elevate your soul so much that the weight becomes irrelevant, so that weight becomes part of your self, it ?? doesn't become dependent. Very much like a new entity. the process is very simple you reach the point of creating a turmoil of the fields of the STM, turmoil not as bad, but let's say motion, more then a turmoil, that allows the STM to receive, that it doesn't depend on the physicality to receive. The physicality of the STM has leeches so much on the STM that it has literally handcuffed him to his self. It's like these octopuses with these suckers on them, it attaches itself to it, so it can't be free unless it dies then it loses its angle and leaves. But if you can understand or understood the teaching of ?? if you can absorb enough energy from the universal dimension that this leech becomes part of you, then you go beyond its boundary of existence. (3:04).

(3:10).

.. Look at Alzar's family detachment is setting in across the family. ...

(3:12). Stanly and Ella as a family are moving ...

(3:20).

.. When the world leaders understand (3:26). this and they see the abundance of the knowledge shared, the care for the STM then they will go back to it. When you become detached, it doesn't matter what happens it is part of the process, it has to happen because it needs to be there, but we accept it, live with it and make it part of the history of the life. What do we do with it, what is the next step in the elevation of our soul. Are we still getting more in case (of time) when we don't have, or do we give so much that we don't care, it comes when it is needed. When I need it, it's there. If it doesn't happen when I think it should be there, then there is a reason for it. You don't need to look back. When I left my business to become the KF, I left millions in diamonds with people around the world, I never went back to them to ask for them back. It was my hobby. It was something I enjoyed, but to me it has no meaning, because if I go back to it, I go back to the time of physicality. But I live the life ?? I don't go hungry, there is always something which comes that is needed (3:28). The physical tangibility has no meaning.

07

... We are detached from physicality but we have to live a physical life. (3:36). And they more they do that elevates us, then the more we serve you better. We share freely.

Today's knowledge, if you understand what was shared, it's the key to U Community opening. I said in the teaching, that we'll open something if it comes, and it came, but did you understand what came, what was released. The shackle on the physicality is the lack of strength in the STM in trusting that physicality will come with it, because it loves it so much so it has to embrace it, then it becomes a light. Any other questions.
(3:38). Ella presents KF Times April, 2019, 10th Edition. The U is not cooling down;
C14 teaching in multiple chapters, Images of sound; Portals, Neutron, Proton, Electron;
