

274th Knowledge Seekers Workshop - May 2, 2019

(All the prophets and teachers come from the same soul of the same teacher, warning to America, ,)

(:18). ... Last time we tried to show how the STM translates and transfers its knowledge, then his feelings and emotions with the physicality. (:20). You have to understand that you have to be of the same to be able to understand the same. It's no use if I tell you about love ??? and we don't speak the same language. It's no use me sending you a message on the telephone if you don't have a telephone number, it's not the same frequency, so the 2 have to match. And what I opened up in the discussion last time is exactly what it is. It says I made man in the image of myself, which means I have the ability to work out in every sense, the understanding of the work of the body and this ???? is walking around. The extension of the new knowledge comes into operation. This means we made man in the image of myself but it's just not the image, it's the totality. What is important to us as part of the totality of the work is how do we relate to, connect to, understand the totality of it. It's no use me sending (:22). you a message when you are not on the same strength of the fields and you can't understand what I am sending through. This clarifies something important to you ... if the STM has emotion of love, then or emotion of the STM has the strength of anger or happiness, it has to be somewhere in the range in interaction with the body, it shares that, understands that, allows that to happen, and in that process somewhere in the structure of the body it shares that. It allows it to be shared, to interact, (:24). to interface, but what does this mean, if you take the STM and you go through the process of understanding it, somewhere in the brain in conjunction with the physical structure of the brain, the information, emotion of the STP and they interact, they come to be in line, and their interaction completes its work, if we understand this process then we can go through the whole process of understanding. What is important .. is that ?? man to the whole process (:26). Do we understand where the point of physicality and the STM meets. If we understand this position, if we comprehend, what is the truth about our life is that soul feels the emotion of our physicality, it suffers with us, but it has one advantage, it doesn't need to share, it has an option to block, or to not transfer the wrong doings of man into his own work. This is part of the position that man has not understood and needs to understand. It needs to be able to go through the process that it can work with it, along with it, to be able to translate the whole process. In reality to be able to interact (:28). between the body of hte man and the physicality of the U. This is what is missing in our knowledge. We need to understand that the STM works as a buffer between the body of the man and the work of physicality of the man. This is important in the future work which we'll carry out. It's important for us to understand how much our soul even sacrifices to keep the physicality of the body in its totality, away from harming itself and harming the U Community. This is part of total understanding of the work, and what we need to be able to comprehend from the work of the STM, to what extent we will allow this to happen is the extent to what we understand of the work of our own physicality. (:30). How can we comprehend that how our soul works when we don't appreciate how much it sacrifices not to transfer the wrong doings of the man into the action of the soul. But it transfers the wrong doing as a knowledge to the other souls. This means when you do wrong the STM transfers the knowledge what has been done wrong, but it doesn't do the wrong thing itself, it's the messenger and not the doer. And this in turn comes to the working of the STM. This means that our soul transfers the information to the other souls, the actions of the life of the man but it doesn't behave for it, that what you done wrong, I pass or do the same wrong thing. The souls in their

interaction with each other are aware of the wrong doing, and they settle (:32). they decide, and put right, in decision making for the ?? future of the physicality of the man. Some of us call it as a punishment, and some of us know it comes back to what we did ourselves. This is part of the total understanding of the work of the U. This means that in the religions you get punished for what you did wrong, but in a way souls don't punish, they balance, they work in a dimension that these things that have been wrong, so we have to balance it out. They create a condition for that balancing, and then you say there was an accident or this or that, and this is what we have to understand. For example, in books of Christianity, Moslems, Jews or whatever, there is a promise of a Promised One to come, how are they aware of such a thing that the prophets write, because it is what the souls have decided to be done in time. But the life of the man is a few hundred years or few decades at this moment, but the life of the soul is thousands of years. (:34). So when the soul of a prophet tells you that there will be another prophet coming at such a time, the man lives a span of a hundred or a thousand years because to him that is what it is, but in fact it is the soul of the dimension of the creation which already in itself represents ?? back in manifestation at that time. It's like a teacher telling the students I am leaving the class for a few minutes you children behave until I come back. It's the same teacher coming back. You don't expect another teacher to start teaching. Many times many people talk about the children of Abraham, the son of this prophet, etc .. it is the same teacher, but because the STM is limited in his existence, then man thinks it's going to be something else or something else will come. In fact, there is no "something else", it's the same, it's just that man is used to a very short span of life. When we speak about 1,000 or 2,000 or 5,000 years, it's not that another position will come, it's the same soul which has been given the responsibility, (:36). to look after this planet. It's a commission. It's not that we bring other souls and do other things. Then this becomes very clear why we see this progressive development of the STM and the knowledge of the man catching up. Then we understand that we are dealing with the same messenger in the dimension of the soul and not different messengers, it's just who he decides in the structure of the soul of the creation, what ?? line will appear, what time and where. Is that 10 minutes break he'll come back in 10 minutes, but to the man it's 1 or 2,000 years. Then when he comes, she decides what John knows up to now the head of the class, now she decides to make George the head of the class. It's just a span of time, but it's the same soul that has been the creator of the totality, of guiding the man and the understanding into one line. For those of you who were thinking, now the Mohamed has come the Methel, the return of Christ, (:38). for Jews, Moses said, such and such a ?? person will come... these are all from the structure of the soul of the same soul. He has chosen guidance for different tribes in different ways and we see the structure of belief in guiding man, elevation of the STM all comes around about the same time through the same channels, through the same understanding but according to the emotion of the physicality he has chosen different paths. It's the way you are black or white, Chinese or whatever, it's the emotion of the man according to the environment which the man has then created it's the same. To the Buddhist or Taoist or Zoroastrians, or to people in South America, the message has been the same around the same time, but different ones have chosen to put different strengths into it, and they have woven it to fit into. The ones who have become more like the top, have got structures like the ?? Taoism or Buddhist or whatever. But the enlightenment comes from the same soul. Even in some of the promises that have been given by the same soul, it's like when the teacher goes out and says, (:40). when I come back, by that time if you do the test I will bring you all something as a gift, and that gift will let you be able to talk to each other. In a way he goes out and brings you a walkie talkie that you can all talk to each other. It

doesn't mean that the walkie talkie didn't exist, in the classroom it was unknown. So he says at that time ?? because it is he himself that is bringing the knowledge, enlightening the physicality, the STP, and the STM. We see scientists like Tesla, in a different way appear, because it's he who translates that knowledge in the soul of different Messengers from ?? Then this makes it very easy for mankind to be able to understand the totality and easy to be able to create the line of communication. Then this structure becomes part of the work of the present time. Then you understand how the man has decided to choose different names, teachers, guidelines, but all come to be at that time, ?? because the teacher for all the souls of the man has been the same teacher from the beginning. (:42). When the first messages were given and the first lives created on this planet, one soul was given the responsibility of bringing this child progressive development. For you, you talk about 6,000 years the first ?? was created, 3,000 years ago this was developed. Now archeologists dig out, there were cities which were there 13,000 years ago, what happened to everything that we accepted? And in those civilizations they had more advanced knowledge then the current civilization. Is this the cycle or what has happened to mankind? During and through disasters the whole totality of the life been lost, or moved on. A new cycle with the same knowledge has been re-grown. Why suddenly did the Mayans disappear? Why do we find structures but no civilization connection to them. Why do we see more advanced knowledge then ours? Did they pass and then we started again, or did some of the children of the past in moving have forgotten knowledge? (:44). In reality, there is one teacher for the whole of the class, from nursery to PhD. Over thousands of years sometimes the classroom has changed because of whatever, but in fact, the teacher has never changed. If you look at it, it is like schools with different classrooms and they just move you from one classroom to another because the roof of one classroom leaks. When you go into it you say, oh there used to be students here, what happened, but now nobody is there, but it doesn't mean the civilization and the teaching has stopped, now we moved to another position. It has to be understood that the STM progressively through the STP has developed through its own process. It's not that the man is given everything and he just copies. The evolution of the science has given man the ability to develop, to add to. Otherwise everything has to spoon fed. This is what we try in these teaching to bring all home, all the messengers of the past, (:46). from before even the man knows, have all been following the same ?? song. It's just that if say, John (Joe) leaves the school you can't be without a class head. Now John takes over, he has a better understanding and he brings more knowledge of his own and adding what is received to the classroom. .. The soul of the totality in the dimension of the physicality of the man has been the same soul responsible for this planet. But it has to be understood that as one teacher stays responsible for one class, there are other classes in the school also with different understanding and level of growth, you might call some physically or mentally handicapped, some are very advanced in learning, so we call this different parts of this U with different teachers according to their understanding. But then you have what we call, one headmaster who is in charge of the totality, but he passes all the messages to all the teachers that they all receive the same level, but they allow the knowledge to be distributed amongst their students according to their understanding. Now we are at this level that we understand the totality, (:48). that you call it whatever name, go back 6,000 or 2,000 years ago, ... whatever name you put on it, they come from the same soul communication line. But at the same time the soul of the creator of this class is like some stay in theoretical and some go for practical, making a circuit board or this and that and coming back to say what it is, and this is what we call the scientific world, they each develop ??? the soul of the physicality. Tesla is one of them and De Vinci another.

Enlightenment of the soul of humanity comes through the soul of one teacher and he lasts for thousands of years, but the life of man is very little. And we are one of those soul who comes from the totality, and this is what we can put everything and we know what the Christ did and Moses, and what everybody else did during their time because it's on the watch of one teacher one headmaster. Maybe now man understands the truth. (:50). Now you understand why man has gone through this process and will ever go through this process until he matures and understands that all the teachings over the centuries have come from the same teacher and nobody else. Maybe in this process we can understand more about the truth and about ourselves, our own creation, the connection with the totality, ... Do we elevate or understand that the elevation of the STM as the totality comes from the same source. (:52). ... if it's the same teacher then we can elevate our work, understand that our soul has the ability, the gift to talk to the same teacher, has the ability to access the same headmaster. .. once the STM has reached elevation it has access to the totality. (:54).

(:58).

(1:10).

(1:14).

(1:22). ... Any questions. (1:24).

(1:32).

(1:34). .. We'll release a technology that you can produce as much oil as you like.

(1:36).

(1:42).

(1:46). ... Mo Ibrahim ..

(1:50).

(1:56).

(2:00).

(2:12).

(2:20). Q: What happen to Atlantis ... It didn't just happen to Atlantis it happened to many cities, it's part of the nature of this planet. 27

.. it's partially the atmosphere of this planet that causes the behavior of the man. (2:24).

Q: Rick asks about the aggressive behavior of hummingbirds, and can we expect an upgrade in the behavior on this planet? (2:26). It's part of the condition of this planet. It's not just changing the man, he'll see the animals fighting and he'll start fighting again. We need to elevate the soul of this planet and this is what I keep on repeating. Q: And does the soul of the hummingbird get elevated as well? .. The rat, mouse, donkey and the rest (get elevated). This is part of .. it's not elevation ... it's going through the next phase. The worst thing, unless an accident happens, is destroying a culture, a planet. It happens often, it's not that it doesn't happen. It happens in those cases, we see we are aware of it, then we evacuate. It's been done many times. When mankind opens itself to

space you will see many peoples who are forever travelers of space. We cannot find a condition that they can survive in, there is no planet. If we could find a planet that matches theirs, we would give it to them. Every life is created out of certain conditions and this is part of the problem with this structure, that we .. if you find a ship that is abandoned, is sinking, (2:28). you pick up its passengers, and then you have to find a nation to accept them. But when we see crashes of solar system or galaxies or universes, we evacuate them as much as possible. It is done many times. It's part of the total structure of the work. 27

(2:30). We stay straight in our work but at the same time people have to learn how to work within the structure of the life. .. convert physical body into nothingness..

(2:38).

(2:44).

(2:46).

(2:50). When the policeman is not there everybody runs. But we don't have a policeman, we have a group of bandits who have been terrorizing everybody, when they are not there normal people will take over. Drugs will be like sweets on every corner of America. We can protect the rest of the world. How many zombies can cultivate and how many attend ??? This is my problem ... protecting the people not to suffer, but maybe we have to make an example and we are getting to that point. ?? it's very easy. They cam from black to white. We know the code, the gene and the access to the energy pattern. Like I said last time, we can grow a toe in 1 day or in 6 months. It's no problem which way. The knowledge is the secret to our enforcement not out of fear. Q: In the cosmos has there been another planet like earth where similar violence exists, are teachers working there ...? It has been that is why we do the path this way, we are doing it out of experience. .. (2:52). You see the progressive .. there is some misunderstanding in the world of cosmology, up to very recently man was thinking if there was any other planet, and if there is a planet with the water, etc., would it have life. So there is some misunderstanding, there is one addition to this knowledge that we added, yes there are lives, but it is mono-life, which means because it doesn't have variation, it lives peacefully. If mankind is looking to find a planet which is a replication of this planet, and then you see all the problems, not only you have at the planet as having the same distance from its sun, they say they find 10,000 new planets could have life in them, you have to look for the axis deviation of it. It's the axis of deviation that creates the combinations of lives, opportunities. All the planets which have a vertical axis will have a mono-life, we don't see this. Some planets go through this phase of, what we call, the end of ?? incarnation and a position. And that enforces a new direction of life. We have seen these kind of complications before and we can sort it out. If not ??, the easiest way is to take the planet out. The way we take it out is to increase its MG field forces to the position that it goes back to the sun. In totality, it creates some variations in some other planetary systems in the system, but it is the easiest solution. (2:54). It's like when you take a pot of soup and it's not correct and you put it back into the main pot, we can do that. It has been done many times. Venus will move slightly backwards, Mars will find a new position, all the planetary systems in the queue will change very slightly, not much. You'll see change in the planetary system, but it's not the first time. The earth is a speck of dust, it's not a mountain to move, even though mankind thinks it's everything, because that's your cage, you are used to it. But it's just another speck of dust. We are

making the information very public, directly to mankind. I can't be more straight forward. Do you remember the last time when we released the USB stick to governments and we saw the Americans force over NATO countries, and other countries ?? countries not to attend the KF peace treaty. (2:56). And through the pressure by the Italians, they were the first nation which broke rank and they came and we said, now the Italians joined, we received a call from the American Embassy, we won't be there this time but next time we will, because the Italians broke rank. We have seen the same thing with the "One brick, one road" of President Zhi of China. Again we saw Italians break rank last month ... now we have seen in the past few days Austrian and Switzerland have joined the rank. They'll be rewarded accordingly for their work. We'll see the peace work of China go through Western Europe rapidly in the next few months because the structure is broken up. 55 (2:58).

(3:02). Q: Regarding the hummingbird example given earlier, is the unstable condition in the hummingbird because it is at the level of Nitrogen field strength? There is something called with the animals, it's not the food, it's what we call, whoever has the food can spread his genes, if you understand what it means. This is the problem. It's very much like in Africa, a poor man can afford only 1 wife and maybe 1 child. But when you become, taking of Saudi Arabia, you have 84 children and an untold number of wives. (3:04). It's as simple as that, the same animal behavior. I think today we made a very clear cut in respect to the work of the KF and it has to work with our commitment to peace. Does mankind need to suffer? I think peace needs people like you who are committed. All the tools are available to carry out the work of it. The problem is just understanding it. (3:06). (3:08).

... Q: You said the center of the STP is in the heart, and STM in the brain, and the breath work is relevant. In yoga they use pranayama to consume energy through the breath, they use different exercises to control the breath, I was wondering if that might be the key to connect the STM with the STP, and get in position where the STM encloses the STP? (3:10). Partially you can do that if you wish so. Then what happens when the soul of totality takes over, where are you going to get your energy when you can't breathe anymore, because you become part of the totality. Q: Wouldn't you be able to consume from the energy? Do you need to breathe. Do you understand? So it is better to work through the soul of totality (STM) then actually through the physicality. But in a way it's a passage to take over if you, if I take your knowledge 1 step further, is by diverting the energy of the soul of totality to breathing capabilities of the physicality, so it can give birth back to the physicality ?? at point. You decide when the electron goes out and shows the total element or goes within and manifests itself as a plasma. Q: This is when we look at it from a higher perspective, but we are trying to make something like a first step to words disconnection, because as long as we make it maybe do the path to do what you just said? I think it's re-wording it, it's not disconnection, it's more a direct connection, that it can control both. It's looking at it in 2 different ways, but in the end it's the same outcome. (3:12). Q: Isn't this in a way a third entity that is being in place? Is the neutron a third entity, or electron or a proton which comes from a neutron. Q: The totality of both. Yes. This is what is part of the structure of life on this planet. We are not here to destroy, we are here to elevate and find a peaceful path for mankind to become part of the totality. ... I think we have come to that point with mankind, we have to do it, it doesn't matter how he shouts and cries. Q: When has the child grown enough that he can work with the fire? When he understands and can enjoy the fire and

the beauty of it and he doesn't need to kill to cook with it or to burn a house with it. It's the same fire, you have to decide on the position of it. .. It's the job of the world leaders to create a condition of peace and security for the nations. Each world leader is responsible for their own area. (3:14). KF One Planet One Nations is supposed to see that all nations benefit by it through 1 system. 07

(3:20).

... From today's teaching all you have to realize is that all you have received over the centuries is from one teacher, the same source. (3:22).

(3:26). Ella shows the KF Plasma Times ... Carbon 14, Blood Circulation cage for the STM, C14 balance connection, C14 creator of the man, Heartbeat of the Soul, Mining Revolution material creation, Zero Time Communication, Field Replication Unit, ..

(3:32).
