

276th Knowledge Seekers Workshop - Thursday, May 16, 2019 (Offers China and Iran flight to moon, ,)

(:09).

(:12).

Chinese and Iranian flight to the moon...

(:24).

... It's already in China, I have made sure of it. The process of sharing knowledge and taking mankind to the next phase, (:26). is not a decision of the governments but now it's a decision of the KF and us as people of this planet. We share knowledge freely and now it has reached a point of maturity that we can openly plan the first excursions, not nation by nation, but as One Nation of the human race. It is easy to achieve, the tests have been there, all of you know how to do it, it has been done. As I said, many times I gave you the Rolls Royce but never gave the golden key. And now the golden key will be shared directly with the government of China as of yesterday or 2 days ago. This is our pleasure and part of the work of the KF to create condition of peace, means not to think about people who create war. Because Tel Aviv from Theran is less then 1 minute, we can buy as many flowers in Iran and embrace the people of Israel. It's not a life threat, this is a friendship. I have too many cousins, my grand parents were too busy creating too many grandchildren, etc.. some in Washington, Tel Aviv, and in Theran. (:28). And now we are in China, they are all the same. 10

(:34). (:36).

... trust one soul to give all our souls to, to be in ?? guard enough at the point of delivery. Many times mankind has tested and done this, but in a way the physicality of the soul which was given to, has abused, are those who had or used the name of the soul. We used to call them the prophets. (:38). It's what we trust our soul to and by those who used the physicality, abused it. Now this time the mankind sees his soul and trusts his soul to the soul of the captain, in full knowledge that has nothing to do with the dimension of physicality, as this time the physicality of him is within the reach of his own soul, therefore it can't be abused. In the past mankind had his soul and was told it was in 2 separate points. Now that you can understand that you can travel in the dimension of the physicality of the soul within the STM, now you can hold it, that no one like the priest, mullahs, rabbis, or whatever you call them, to abuse the physicality in the torture of the STM. This is the difference. This is where the development comes in. Everything has a time and a place. The time and the place for the next step has come. What we are trying to do is to be able to understand the totality of what is to come in the coming weeks. (:40). What we will develop is very simple, we'll try to develop and complete the process of what we started (:40). in China last year in the space program. In that process with the support of 2 nations of Iran and China a new fuel for space travel will be introduced into this process. This fuel for the deep space travel has never been released. This fuel allows only the creation of the physical dimension and not the control of the soul. This fuel was originally tested in Theran 11 years ago and now it's been re-developed in a much easier way for the whole control of the system. We are not bringing something out of the unknown, but now that we have completed everything, all come together to create one integral system. It's very much like when you try to make a food, you make the vegetables ready, then the meat ready, and everything else, you

herbs ready, for when you start cooking, to come to that point. All our teaching has been to complete all these parts, now we start cooking. Now we start ?? as One Nation. The condition for this will keep, as we did with the USB Stick, we give the governments a time, maybe up to 2 to 4 months time advanced development product. Which means by seeing the knowledge and effect of it they know they have 2 to 4 months to reach international agreements on borders. (:42). In this process we can learn a lot from the European Union, the way you can live anywhere but you live under ?? taxation. This is where we become and live where we want and we decide in what direction we allow our effort, what we call taxation to be used for. We allow some of it for our countries, some of it back for where we stay and we live. With this development, no borders, no nations. As of this week it has become very clear. We release this T in one direction, the direction of peace. If anyone crosses the line of peace, we'll show how we can create that dimension. What's the use of trying to use and protect oil reserves when all the KF K Seekers know how to make protein. Oil is a kind of protein. Combination and evaluation, and combination of the CONH and what do you burn in your systems, and how many of you have made CH₃. (:44). Would you like ethane, methanol, what would you like me to make for you. 22

(:48). ... In the next few days this T will be demonstrated to the ambassadors of these nations in Beijing. We don't need to do anything anymore, because I have made sure that we are in that position with the strength of the knowledge and the way you as K Seekers have supported it to be where it is. (:50).

(:54).

(1:00).

(1:04).

(1:08).

(1:10). What is the next step. The full system to deliver this T landed in Beijing at 5:30 this morning. And we are in possession of it and we can show its power. I make a blind to see and a dead man to walk. Any questions. ... K asks John if he would like to show to the American government since he did so much work around it. (1:12). .. You'll become the representative to President Trump to see the T. Q: Are we putting our soul into the reactor or an aspect of soul, like the field level of our soul..? You are the decision maker, you have to trust it, 'how much do I want to make this work.' Q: So can our soul be split into many pieces, is that true? You do make it into pieces, you see, go back to the medical teachings. If you remember, if this is the brain and this is the soul. (1:14). if you remember from teachings years ago, what are you afraid of, to split your soul. As your brain is part of the manifestation and part of your soul, do you remember what we said about the glands in the body? That glands are in fact part of the operation of the brain. So if you already look at it, we have already trusted because each of these glands have their own system, own soul of themselves. What are we afraid of, we already know that we already have a split part of the structure of our brain with the rest of our body, within the structure of our own body. It's not something new. If the soul has trusted to split itself through the operation of the glands which is part of the brain, so what is there to be afraid of. What happens if you bring the soul of these into

the body and with it, it brings the total operation within the STM. (1:16). What are we afraid of what we already have but we didn't know. It's like going shopping and panicking that you have no money, but you already have a coin in the side pocket that you forgot you put it there. Q: So we can have more than 1 soul in 1 place? No, you can have part of your soul in more than 1 place. If you want to shift the whole lot you are quite welcome. Q: And we carry the soul's of all of the passengers of the ship? If you feel like it, if they trust you. If you don't charge interest and take some of their energy for your self. You have to understand something very simple, go back to all of the teachings from the beginning, all the plasmas are the same, if I give you my soul to carry it will be in line with yours. He draws a spiral within a spiral. It doesn't mean it will be less than yours, it could be more or a little bit less. It's very much, you have seen it, you put a CO₂ and you call it a Gans of CO₂, which part is C and which part is O, it's always on the same, this is the captain and this is you. You have seen it, you operate, there is no fear of what. (1:18). How many of you have mixed CH₃, CO₂, and AA and the rest of it, where does your Gans of AA come, it's a combination of the O, H and everything else embedded on top of each other, you don't see the O, you see the behavior of AA. Maybe the captain becomes much more cleverer because in that soul there is a knowledge that he doesn't have and he can support it. Go back, I think it's in the book where we talk about the Gans, where I say clearly we can't mix Gans's, and there is a picture of it. You can't mix my soul with your soul, but we stay together as part of one thing. Many of you if you did the dynamic reactors you made the Cu, CH₃, and the CO₂, you saw the layering, but they are all the same created, the soul of totality in the center. I think you are afraid of the unknown but in a way it is known, I didn't know. .. I love your last video. (1:20). .. where I learn how to speak Taiwanese. (1:22). .. John shares video... Learning Taiwanese... (1:24). part 1 ... (1:26). (1:28). part 2 ... (1:30). . 25 (1:32). ... We saw systems that are stacked up in trying to create (1:34). You'll see better effects and results to work in the same dimension as reality, the way the U works. If you find a Free Plasma between this and this (the 2 reactors), then interaction of these 2 FP, which is here (another FP is created between them). then you can take that to interface with the emotion and the STM. There is a very big misconception maybe for the first time I can explain it that you can understand. We created the MaGrav stacker unit like this. But if we look at this elevation inside the system, we are not looking for energy to come out of this, we are looking for the energy we tap up from here (on top). I have mentioned this many times but our people do not understand. The true energy of the MaGrav system... the way it is done now you are going for the matter state (electricity). The true power of the MaGrav S is the energy which this creates, the bottom and 2nd layer funnel in and the top layer delivers. We call this the enter place, we call it the South Pole, this is the energy which is absorbed from the environment (1:36). and it's the energy of what you call the North Pole or giving. You need to tap into this energy and not by connecting to this energy (electricity). I'll give you 1 megawatt, but in the plasmatic field strength. What you saw with John's (video) is actually working here, where in fact if you see, the energy is above the system, and the true energy is somewhere here (FP) that energy you can take a soul in and one out, as a strength field. In the MaGrav S you have the coils, it's a constant balanced field in all levels. When I developed this I always said no one will see it, they are all looking for this (electricity). How many times I have said that the MaGrav S is on a plasmatic field system, not current system. We took all the funny bits of everybody else looking for energy, but in reality I was laughing all the times at those who were looking at the wrong place. This is how a planetary system creates itself. That's all it is, the entry and exit. Mankind is too materialistic. (1:38). If you find the right center point

you'll hit the maximum point you need to do. This is the principle of the working, if you try to transfer anything. Each one has its own center. If you structure it the right way it will ... if you drain this, the amount that you drain dictates the speed, that is one of the reasons that the KF generators can't be controlled, because the more I pull the more it comes in. You have been looking for the coils and windings, I was looking for a plasma. Many times I said that MaGrav systems are plasma systems, not matter state systems, some of it leaks and it goes in (out as electricity) and it depends on how you connect it. These fields are exactly the same as if you drink a glass of (plasma) water, you call it, if it has a CH₃ or CO₂ in it, and then you lose some of your, what you call imbalances in your body. (1:40). Because you know the fields are in there, but which one do you want, it's the same way here. The way the coils are set is in the winding situation, which then compresses the fields into the center. The stronger fields of G are here (bottom core), the strongest field in M is here (top core). How many of you have tried to do a reverse connection? (1:42). Any other question Q: Dan says he is learning language through the soul using a MaGrav, through the soul power, I am learning other languages, because Mr. K put inside me and everybody else the knowledge ... you put a piece of your soul in everybody, the soul of totality. (1:44). How many languages have you learned? Or do we need to learn it until we come across a person who needs to understand it. ... Do we get to the point that you speak through the soul of the common denominator that what they receive they translate into the language that they understand. This was part of the teaching some months and months ago. How are we going to understand the soul, the language, the intention of someone we see in space? I asked someone a very funny question recently, have you seen the bits of the Apollo on the moon, and the answer was to me was yes. If so then why don't the Americans confirm, that we have to ask the others. They tell us they have seen the bits of Apollo on the moon. (1:46). It comes to the point, what happens if we walk there, we never find the footprints but we see the souls. Where are they from, do we speak their language, does it have to be the mother language of the man that we understand. I was watching a strange program and it was amazing, an antelope gave birth to a little baby, very few minutes old and a cheetah comes and the mother moves away from the baby that the cheetahs don't get attracted towards it. But strange enough the mother makes a noise that a few minutes old baby antelope knows that it has to stay low and hidden. Where did this language come from? It takes mankind years to teach noise and a voice to his child, yes or no. ... (1:48).

(1:52).

(1:58).

(2:04).

MaGrav fields

(2:10).

(2:12). ... (2:13). ... (:50). maybe we go back to the first teachings. (2:14). in the U we don't any cylinder ships. 18

(2:16). .. The MaGrav systems have a problem very much like rectangular magnets, and we have hidden inside it. If we make spherical MaGravs and we understand the process of the 2 rings where we create the G field forces stronger here, and M field force, where the direction of the PI will be like this. Then very simply we can reverse. When we went to build the first MaGrav systems my suggestion to the Italian team was it should be this

way ?? it can't be produced. Then you have to understand the ratio and the proportion to the fields. If you make such a MaGrav, isn't the next step of it the dynamic balls. In the MaGrav systems, the push is opposite to the universal structure, condition, because we pressurize these. But if you looked at the construction of the MaGrav S where you have (2:18). 2 systems inside each other and 1 ring, a smaller, bigger, medium chamber compression to the other chamber, isn't that then the heartbeat of the man. 14

(2:22).

(2:28). Any other question.

(2:30).

(2:32). Q: Roberto from Brazil. say thank you.... (2:34). Q: Arnold wants to share a spherical MaGrav. I am very careful about the way you share knowledge because part of it doesn't fit in to the pattern of the flow of the fields. It's not my liking ... I used the wrong words. (2:36). ... shares a picture.. (2:38). ... (can't understand him) (2:40). This is how the MaGrav works it goes form G to M. .. What you are trying to do is to split a MaGrav S and pull it apart. ... you are trying to expand the fields by creating another position. This is what is done in a SF. (2:42). One of the reasons that we make the basis of the SF this way is to expand the fields. That's the only reason it's done. If you make 1 single system you have what I call the Iranian system, a single core like the stars. What you are trying to explain is a natural process of opening up the base for the expansion. If you make this slightly bigger you get a bigger system but instead of changing the position through the composition of the Gans and field position and strength we expand it without changing the poison. .. For others to understand, what he is doing is taking a MaGrav S, and then he is taking this one to pull it apart to expand this (the top one) into it. So in fact what you don't have is this ... and this has been split. This in a way a MaGrav S which is built but to expand the fields. This is a SF. Thank you. Am I correct? Yes. (2:44).

(2:48). Q: Tectonic plates ...

(2:54).

... could be next 5 years, maybe tomorrow, (2:56). but it is due and one of these might go, this is the problem and everything shifts. I have been watching this for some years and that's my biggest fear, being on the same line, we might get 2 nations suffering at the same time or close to each other. We don't have the capability to meet this horrendous shape (size), and this will go right through the US. Q: Is this a totally physical reaction or is it plasmatic as well because one of the things ... It's a physical, you see there is a history of it, I was watching a program accidentally on this very recently, and what we saw the last time this has happened, said the scientists, it hit Japan's east coast. .. Q: But you were referring to the ??? continental end and how it was effecting ... Oh, that, it comes to it, it will be amazed. Q: But is that plasmatic though? Yes, very much so, it will come into it. Q: What my question is when the subduction of the tectonic plates, does that create a plasmatic reaction causing a upheaval ... ? Yes. We are made of it. (2:58). We are connected to it. You see I told you Seattle is in a very bad position. Rick says, he lives between Vancouver and Seattle, the earthquake happened in Seattle in 1700 and created a Tsunami in Japan. It happens regularly every 300 year or so. We are overdue for the next one. Mr. Keshe says, these are all connecting up to each other. It's natural and in a way coincidental that creates these kind

of conditions. Q: But is the conduct of man irritating this condition? The behavior of the man enhances certain conditions, or gets touched by it, because of it, and in a way brings a lot of .. Let me expand into something because now we speak about the space technology, I'll go a step further. (3:00). Now that the man enters into the dimension of the space travel we'll teach you a little bit more that you understand. On earth we see continental M field movement, in space we have the same kind of conditions, release, storage, and M field shock through the U is very common. Here through the matter state of it, if you look at it the matter state is another M field state but it's in a compact form because it's in a matter state, the Inertia side. The same thing happens. Many times we get these blockages, on earth you call it continental plates, but in the U we have M field plates that they need to cross each other and they get blocked. Many times, in the interaction of the universal condition you'll see suddenly that there are huge energy releases. It comes from this. The fields pressurize so much that they let go, or one just manages to gather more energy and pushes the other one and this creates M field wave shocks. Some of these Shocks we see it on the upper solar system layers, which some times and not just on this planet, sometimes leads to creation and release of the meteorites into the center of the plate. These are the meteorites we don't expect and suddenly they just appear, (3:02). out of nowhere. The direction of the flow of meteorites on the earth is this way, then suddenly they appear, because suddenly a M field shock has hit and these move inside. These sudden meteorites that appear usually comes from these M shocks on the upper end, so it's like an arrow and a bow, they just get hit. It's not that something hit the solar system, it's just these M field shocks, ?? you see this and you can loose spaceships because of this. Q: Do these meteorites have the same characteristics as the plasmatic? They're of another density of the fields. Q: But the characteristics, the rays? It's more or less the same. They have to have a common denominator in fields as the field strength of the wave that they could effect them. This is the partiality. We use this in the space T for deep space travel ??? expansion. You can make an arrow of yourself and travel if you know how to do it. These M field waves are very common. You can imagine billions of stars, you always .. it's not just here you have the planet. It's the same in the U you have this full time. (3:04). (3:06).

... Q: You said from the matter we created the PI and from the PI the matter, does this mean that even the Creator was created in this way? (silence). Next question. Q: Can we catch the fields (? like John) in a simple SF reactor and have the same results? Yes but you have to find out where you leave it. In the coming time I will teach you a lot of games with plasma reactors. Mankind is not yet ready, then I become a magician, but when you all understand then it becomes an understanding. At the moment if I show you then I become another magician. (3:08). At this moment in time we are trying to avoid all these because the knowledge has to be understood in its totality in the reality of what it is. Q: What happens when we become equal to the Creator? God forbid, what do you think you are that big. The thing is you become part of, you are part of, it's just understanding the position you attained. Part of the teaching of the soul is for man to understand the position of his own soul. This is where the problem is, man is lost in his understanding his own position and the place, it's like an unruly child when you go some place, you have been to a party and the child doesn't understand who is a guest and who sits where and he goes on the plate and eats whatever he likes, doesn't wait for the others, that is the behavior of mankind at the moment. He's not unruly, he hasn't been taught the rules of the engagement. I was listening to a program, they said they never had a king and now the US has created a king, unanswerable, not accountable, and do what I like, I own the nation. And you know who exactly I am talking about. It's

that childish behavior. Q: What has happened to other races on other planets once they receive this knowledge in full, (3:10). so the man on the street with no knowledge understands what is to come? When mankind goes into the level of understanding the work of the soul, then it's another progressive development to the next level. In elevation of understanding more. When I draw this circle which combines the totality of it (a PI spiral), mankind in reality is somewhere here (at the beginning), when you understand more you go deeper inside. That going inside teaches you, you become more conscious of the creation. In some teachings and some books they talk about different levels that the soul travels, in a way, you don't need to travel, you understand more of, you see the higher power. If it takes you 18 hours to go from Theran to Washington and now you can do it in 5 minutes, it's just because now you understood more. You only understood about jet engines and rocket propulsion, but now you understand more about ??? 5 minutes, then when you understand more of the reality you do it in 1 minute. The distance doesn't change, it's the knowledge which elevates you to understand more, and this is the process. (3:12). Then when you are very good at it, you are there no time and no space, the condition of the Creator. Mankind will never achieve it, very hard, seldom if you become part of the totality. If you look at it, the famous movie going around the earth in 80 days and now man circumvents the planet in 1 hour 30 minutes in the upper atmosphere. It's just the level of knowledge we are gaining, the more you understand then you go to the next step and then you see different. It's not that mankind will see the Creator, mankind has just entered the zone of ?? The concept of feeding you according to what you need, because now you see planets ??? oh it's possible. then in a few months you say the guy knew something, no it's because we understand the totality of the creation. It's your understanding. .. the people who were born in 1919 until 2010, can you imagine what they have seen, the understanding and technology. Whereas the child born in 2009 to him it's normal. The other guys had to mature into it, but for him it's already been decided. (3:14). It's the same with mankind. the electron, carbon, the plastic, the gold has been there, it's how we mixed it is how we managed to make microchips. But do we actually need the microchips, the next step is plasma fields, and the next step in the inner strength of the plasma so you can go faster. This is a warning to some countries who think .. let me explain something, intercontinental missiles in the hand of the right person are totally non-detectable, I was explaining this very recently. When I share a knowledge I share the totality, if you mix the knowledge of the KF with intercontinental missiles, then the missiles are zero friction, then Moscow to Washington is a few seconds. And this T is in the hands of a couple of nations. At the moment America shoots a missile they have to wait for it to come, those who have this missile they reach already before they come. The present western weapons T is totally obsolete, but it is a shame to be tested. (3:16). ... Do not test my patience. ... there is an interim T we could take the aircraft and remove the jet engine and use them, there is a possibility to shorten the flight. .. We can connect all the wings of the plane and you have a UFO, you don't need the engines. Or we can cover the front of it that you travel into zero space time. (3:18) .

(3:20).

.. they know our intention so they confine you to the prison of this planet ... my knowledge has already been transferred to you, I hope you get enlightened. (3:22). Q: What makes salt G and field wise how does it help make life and make Gans in the Gans box or in the body? The salt is G and that is why the body absorbs more energy from its environment then it gives. Q: So what makes the salt G? It's because of the mass of it, compared to its environment. It's G field strength. This is one of the reasons I

always say man takes most of his energy, 80% from his environment, and 20% by feeding himself. Because of carrying different amounts of salt in our body, we are so G that we pull everything in from our environment, lower than itself to us and we feed back to. When you are heavy G you have to give the field back out, you can't just hold on to everything, then you change the ?? character. the content of the body, the different kinds of salts and salinity is in a way the absorber of the energy from the ?? now you understand where the 80% energy comes from. Q: She says you always say that life starts as a gaseous plasma and that the salt environment, (3:24). basically pulls in and allows that to collect, congregate? If you test the sperm and egg and the salinity with them, then you'll understand why. Even the interaction of the 2 is the condition of the salinity in trying to mix and become 1 and that creates the dynamic position, because 1 is absorbing more from the environment of the womb than the other and in that process, in trying to give to the other one to balance itself, it creates its dynamic system. They call it, 'one has got one more chromosome than the other one', that small amount of difference is very big for the two. this is the line of the creation maybe for the first time western science can understand why. Then if you can divide it, make it more G or M, then you decide on the sexual dependency. And some souls can decide which one to be at the point of the need, that is why some animals who have reached that point of position of understanding ??? even ?? because man is not there, all intelligent creature on this planet, they can be a male or a female to the conditions, if you understand it further, then we understand that the virgin birth is a natural process, if you reach a special condition. These are taboos that man has to get rid of if he wants to understand more of the creation. (3:26). This is very much in line with the science if you go and see a lot of diseases at the older ages, and other disease at certain ages, we can now explain it fully when we understand the science. The salinity also has a lot to do with the emotions, because it's what you give, what you hold, what you don't share, and what you give too much of, .. where does the depression come from, and where do other diseases come from. If the miracle scientists in the background, they know exactly what it means. Next week or after the KF .. we'll release the locations and the hospitals in the next few weeks that you can go to for all sorts of recoveries, processes ?? to be monitored by highly qualified doctors and scientists for certain diseases. We concentrate this section only to Chinese territorial land for the time being and then you can travel to them. ... (Hospitals only in China)

(3:28).
