

28th Knowledge Seekers Workshop Sept 18 2014

Ceramic cores removed from lab interference, The habit of Man to collect as much as possible and save it, this system is different you gather what you need at point of need, nothing more or less, when battery charged balanced reached so doesn't take anymore, Don't need capacitors, transistors etc, how to use

Pyramids was last time to try to convey where energy of pyramids sit, Man didn't understand so made pyramids, More energy stored in the gaps between the gans, non-dimensional capacitors, CO₂ and CuO gans interact as plasma similar to molecular interaction, Changing of polarity, Matter current flow (0 volts), plasmatic flow (lights LED), Mix Gans plasma flow with matter electron flow, don't be one-sided, What is Temperature, field flow radiation, changed the speed of field flow in given environment, Teach Freely and keep knowledge flowing,
