

## 288th Knowledge Seekers Workshop - Thursday, August 8, 2019

(USING THE FIELDS OF THE UNIVERSE; START OF THE FINAL SOUL TEACHINGS: Conferences to show new unseen technologies to share with militaries and space programs worldwide, It's a push for global development, Shows video, Mr. Keshe starts to teach again live and will present new technologies that we have never seen, In the new teachings from now on we don't need the Matter, Nano or Gans to create fields and energy we need only the fields of the universe to create everything we need, We need 3 field forces to create anything and we have up to now learned how to create 1 of these through the Gans, The 2nd field are fields that come from the universe or the Creator they are the framework without which we can't operate, the 3rd field comes from the salts which connect the origin with the manifestation, Space flight date in 21st April 2020 in Theran, Neutrinos are just energy packs, In the universe the strongest fields try to make contact with the smallest and he draws a relation between the Creator to universe to galaxy to man to atomic and beyond and then it goes back to the Creator, The fields of the universe are mono-energetic and travel instantaneously and he teaches how man can interfere with them to create anything anywhere in the universe, The fields of the Creator are like water hitting the wall and splashing back the soul of the man is like the wall it absorbs and gives back what it doesn't need these are 2 fields and the third field comes from the STM through his wish to manifest whatever he needs, Therefore the STM is part of the Creator and also creates, Nikolai asks about the Star Formation (SF) as Amino Acid and is taught how 4 souls can create a SF with a pure soul in the center humble enough to give and receive, Stonehenge was built as a SF hidden within number 12, Role of Universal Council to create SF with their souls to create The Protection for humanity, The true role of the all the Councils and how we'll interact with the Universal Community, "This is how you build a starship", This is how the pyramids were built and used by humanity to travel the universe, Souls have decided to be here for this change in humanity which is NOW, , , , )

(:08). .... We are moving into the final phase of sharing the T development but this time we are sharing with a number of governments and public directly. (:10). This is why we have set up the first conference in Austria at the end of September, we'll invite space agencies and militaries to be part of this conference. This is a prelude to another conference a few months later which will be the beginning of what we call CIRBIRU this is a combination space program (China, Iran, Russia, Brazil, India and US). We have already made the offer and invited the military from both sides ...

(:12). .. Any of you who want to attend we have allocated very limited numbers, because we have to see how the governments respond in sending delegations or how they participate in this conference. To get the attention of the governments that the new T is a breakthrough, new totally unseen technologies which will effect the defense, space and every other aspects of the T will be openly demonstrated. This means we'll breakthrough and if the governments do not go through with the process of collaboration, the KF K Seekers who are present become their ambassadors to separate it and to bring it out. Any of you who attend the conference will become part of the first One Nation power force in T and this is why we are very careful who we invite and allow to come in and any of you can join. We are not making any difference in who you are, as long as we know who you are , one of the KF scientists or K Seekers (:14). or those who understand the T and want to be part of it we allow you in. The condition is

no pillow talk, nothing can be done, because then you become part of the structure to develop the T worldwide for all the nations together. ..

(:16).

(:21). Start of video about flight ...

(:34). We are back to teaching live and we try to do this kind of teaching because it brings a lot of dimension and new understanding and a lot of reality rather than just being a voice from the box. ... We'll present technologies live, you'll units and discussions and new technologies you have never seen. I'll explain what we have to do to break through to the next level of scientific acknowledgement and to the research. The reason I had this tape (video) played is because it said everything that we want to discuss and everything we could imagine that we have. (:36). In the original teachings we started with matter state which is close entanglement, if you look at this still there is a space gap but it is tightly controlled (Nano). Then we came to what we call the separation of these atoms (Gans), then we came to the understanding of the individual atoms as they are. We have progressed to the point where now we use the M fields of these elements. the process of the new space T begins here. Whatever we learned (up to now) was to bring us to here (today), from now on is where the new teachings start. We learned a process that whether it be a an atom, a cell of the body, the cell of a plant, or any other thing, it has a center, a soul, the inner being of, and it controls it. Now in this process, this new understanding, we live without and only with plasmatic magnetic fields. This will bring us a totally new concept and understanding where up to now we needed the Gans's or the Nano material or the matter to create fields and energy. Where from now on we only need the fields of the plasma of the U, (:38). to create every dimension, now that we understand that this (the former) process is no different than the process of creation in the U. This is what you are going to see in the conferences and what is going to be the objective of the new teachings and new process. We go to the next level, which is simple, we have fields, how do we convert these fields to what we need, we don't have Gans's or saltwater with us in the space, we have no Cu and Zn in the space. How do we collect the MG field forces in the U to work for us to bring us new energies that we can convert these to what we see, what is needed to be. Do you want matter state, or vegetation or what we call animal state, or do you want to come to the level of the Creator. Now this new T brings us to this new level of understanding, to the totality of the work of the U. Man becomes independent of what he knew and knows up to now. How do we attract these energies, (:40). and bring these M fields together to give us the possibility and the chance to survive, to replicate, to accumulate, to make a new cycle of life in the space. To what extent are we going to extend the knowledge, in what limitation do we accept to be the limit that we can understand, or we make the knowledge of the U unconditional, limitless, and depending on the intelligence of the man. It comes back to the original teachings, where did everything start from? What are these fields and how do we know how we can absorb, and how do we know we can emit from what we absorb, that in interaction of the two we can create what we need. I think if you understood the original teachings, when we had people who went and started creating matter, we noticed that there is a need for a new dimension of understanding, new possibility for work, a new way to be able to create anything at any point. You need 3 field forces to be able to create anything at any point, at any destination in the U. It even comes to be the skin of the man. (:42). For the skin to manifest itself you need 3

layers, to give the possibility of life to man, we call it the top, middle and bottom layers. In the space we need to bring 3 field forces which in fact they have a common denominator energy or M field strength, and then in interaction of one with the other, we can create the entity, the material, even create the strength of the soul of the Creator. Now you understand that the game has changed. Up to now we looked at what we can release and how we can create Nano materials and Gans's and what they can do, but now we learn a new way and whatever we have done up to now has been of the three (fields) needed. Up to now all the teachings have brought us to this (that is one of the 3 fields needed). To be able to survive in the space we need 2 more (fields). If we can bring these 2 together with what we already know then we truly become man of space. (:44). One thing for a fact is we need the fields of the U, without it we can't operate. It's a framework, it's the cage, it's the field forces which dictate how in totality the whole 3 manifest themselves. If you look at it, that's the skin of the man. the top layer. You have to have a condition of the environment that you can manifest yourself within its structure. You need to understand how these fields of the U effects and interacts. If you look in the structure of the planet earth, without the fields of the sun, it has no manifestation and creation. Up to now we learned about this, and now we learn about this (fields of the U). How do we absorb, identify, classify and how do we replicate these forces (fields of U). Then it comes one more thing, a field force which is in-between the 2. Without these field forces there is no connection or manifestation, there is no point of interaction. The fields of the center of the U travel billions of kilometers but they don't show themselves until they reach this state. But in that state even if they reach, they need an intermediary, something that connects the 2, matter state to the fields of the U state. (:46). Where is the conversion of the matter state with what we call, the fields of the U. Without this point man will never achieve to become the man of space. In the body of the man we call these the salts. In the presence of an intermediary, in the U we call it transition lines, which have to have a common denominator between the point of birth and the point of manifestation. this is what is to come and what we need to learn and is the next generation of the teachings that will come. I know our American friends in what I call the military are well on the line and they know what we are talking about. To capture a meteorite or an asteroid you need to understand the MG fields or what we call the Inertia. In the language of the communication we call it, whatever frequency you want to put on it. There is no difference between the frequency and the Inertia. Or scalar wave and Inertia, it's a collection and separation of the 2. In the space T what you'll see is very simple, we create the condition of the center cell, the common denominator, (:48). then as we do, we encapsulate. Now it's not two separate ones, it's two as one. Then you have to match to the fields of the common denominator. You share, you control, you understand, you create motion and in that process of creating motion you can create anything you like, fields, radiation, ofod, matter state and everything else. And if you happen to match you make one single soul out of the 2. This is the point if the man understands he'll become part of the soul of the Creator, because all of these sits within the structure of the creation. But how do you do it, create these fields and how do we show to interact with these fields without the state of matter, is what will be done in most of the conferences to come. We'll keep these parts totally out of the domain of the public for security reasons and for lack of understanding of totality, as they will not know how to handle the situations that will come up. In the presence condition which we are heading for, we can manifest the condition of any entity be it from any part of the U. You call them Martians or coming from planet Zeus. This is the time from now on we open the door of interaction, (:50). with the Universal Community through the development of the new T. It's for the governments and the

governing states of the KF, as the U Council to start the program to work as one team. We bring the T and in the process we'll be sharing the knowledge with the governments as (a) governing body, we'll start the collaboration and operation of changing the process of the ofod, the interaction of materials, and communication. As I said at the beginning of the teachings today, last time we relied on the governments for two and a half years, it did not work. We brought the KF K Seekers and they tried everything, and now what is here is very clear, KF K Seekers in conjunction with governments. We'll govern as one, on the ethos of peace, we'll share knowledge on the agreement of the totality of the peace. As I said, there shall be no more war. We have seen it, and we'll not allow it to happen. In that process we have to create a condition where as we can dictate the knowledge and technology, we can dictate the terms of peace as one and in the future to come, as the totality of One Nation as one group. Those of you who attend the conferences and teachings you'll become that part of the governing body. Some of the conferences in the future will be totality between the U Council members and the present running state of governments. The only body which will not accept to negotiate and talk with, (:52). in the UN because there is no unity in the UN. I have invited the American military, Iranian government officials, the Russians, Chinese and every other person involved that we show the power of the T, the last week of September in Austria. From then on we take steps, we share knowledge step by step, and the full knowledge for the development for the space flight will be around the 20 -21st April in the beautiful city of Theran. From there on we shall see. The Americans will be present as much as any other nation and hopefully by the time we get to this point they will all have worked together not to be embarrassed that they don't have the same T. This is the beauty of sharing knowledge and being strong enough to understand that we can do it. At the same time there are other parameters which come into operation, M fields in the U do not travel the way man has thought up to now, from the point of inception to the point of interaction and manifestation, is instantaneous. This for man to understand is a big revelation. What we see as a depth and lights of a star, (:54). in the eye of the man, and we see all together, is because we carry the MG field strength of the star in our body, because in common denominator we were all created from the same fields coming from the center of the U. On the other hand, fields which come from other universes of different strength which create other entities in this dimension are not foreseen by man. We cannot see (them). In the coming time when man travels the depth of the U, he'll come to understand that there are many objects which have no similarity to the structure of the U and the man, but they have a common denominator where in fact they're from the interaction of the fields of the man's U and the Unicose. In so many ways part of the STM is created from the same source and the totality of the forces that you see and the fields all come from one direction and that is the soul of the Creator, and in the same way it shines in all directions. How do we create, how do we absorb, and how do we change these conditions, to what extent can we, and to what parameters do we, and to what strength of the fields which you already know as Gans's or matter state, you can deliver these technologies. (:56).

Let's go back to the teachings.

The most powerful fields try to make contact with the smallest fields. If we look the process is very much ?? In that process this be the soul of the Creator, this the soul of the U, soul of galaxies, soul of solar systems, then it comes to the soul of the planet, and then there we are the STM. All of us have one common denominator together. This common denominator is where man will find the return path. In the teachings of the books we call these (Creator) the Principle, we have called these one by one the Transition because each one has lead to the manifestation of one thing at the point of

their manifestation. If you look the only way the U can show its manifestation is by the interaction of the field forces of its internal ?? with the light of the Creator. (:58). For a galaxy to manifest itself, now not only you have the fields of the U but you also have the interaction of the guidelines of the Creator's fields. If you understand this and go into sub-atomic and nuclear based there is something very interesting, even the soul of the atom has a line of creation. If we understood this part then we see that there is everlasting continuity in this. In this position, this line will carry on. Man and atom is not the final point, a nucleus and neutron is not the final point. This is the point we see, and if you are a galaxy this is the point you see, universe, solar system and the planet, there is more beyond which man needs to understand. In the world of physics we call it sub-atomic, but in fact, it's a world of creation of its own. If we truly look at the whole point of the creation and we call this point A (point of man), and we consider this whole lot as a totality, if I am going from point A then the point of the Creator is somewhere here, (1:00). there is much more to go, but mankind doesn't have the intelligence or knowledge to see, because it's the same when we knew about the table and chairs, and then we got to know about metals and everything else, we go to know about the atom and nucleus, and a proton and electron and now a plasma, and we are just about here in the knowledge of the creation. There is a lot more to go. the man more man becomes intelligent and can go down this line, he'll find out much more truth which is in fact the totality of the whole lot, and goes back to the Creator. It becomes so small that itself becomes the central ofcal point of the line of the Principle creation point of the Creator. If you understood this and you worked on some of the plasma technologies, especially the dynamic systems, you understand exactly what I mean, this is not theoretical. A lot of you worked on this and in that process a lot of you know about it. A lot of you created the dynamic center point of your dynamic systems, and you just ignored it. Now you understand how and to what extent you have been blind to the knowledge and what is to come is literally (1:02). what we do, we create a new dimension, a new parameter, and that understanding is that it will manifest itself that from now on that we become the creator of any states, be it sub-matter, sub-atomic, sub-nucleus, even sub-creator. The totality of the knowledge has been taught, it's now for K Seekers to decipher it, and in the process of organizing everything we come to understand a new totality, understanding of totally new comprehension of where and how, and from now on we go back to from where we came from. How do we extend this knowledge. What is important for us is to understand the concept, the principle behind the concept. (1:04). To understand that the process of creation is mutually reversible and one cannot exist without the others. How we will fit this into our knowledge in the coming time is one of the most important parts of our work. How do we actually come to understand more and more the understanding of totality. The fields of the U always travel in a very systematic way the only time we see frequency in it is when the Pl comes into contact with the lower state of matter as it tries to penetrate it. The fields of the U are mono-energetic, both in G and M and then they carry what we know as 1 G in the center. I have taught this before and you understand very clearly. You see frequencies not in Pl, you see them in step down in the field strength of the Pl, call it matter state or field state. (1:06). If you understand this you can move very fast to the next step of knowledge and creation of every other matter in the U. It's the man who dictates where the vibration will be, and that vibration will be stone, gold, ofod, or honey, or if you can go above it you come to the strength of the soul of the Creator. What it comes to is very much what we saw with the work of Peter, he created the fields and then he dictated the strength of the frequency (draws 3 circles as reactors). It rains whatever you like. In the space how do you manipulate these, how do you stop the fields of the U that the

interaction of their motion leads to creation of the condition that in interaction with the lower fields leads to creation of matter state of whatever you want to call it, be it STM, be it material of the man. The T of understanding the work of the U is to understand how man can interfere with the mono-energetic field of the U, (1:08). and understand which field is flowing in which direction, and if you develop further in understanding, it's very simple you create a condition that you become both sides, this is the STM. This is (like) the radio, with a power supply and 2 cables, one to feed and one to send back what is added to, this is for example, why a lot of you have a problem with the MaGrav systems, you haven't understood that the MaGrav system is a point of conversion of one to the other, and what you can take from it. The fields of the U in their interaction with the other fields might show us some signs of resonance or what you call frequency, but then you have to find out what is happening in this point of the resonance and the frequency, what has manifested itself that you can't see. The universal fields are like motorways, one flies opposite to each other with a space gap, and if you introduce for example, (1:10). another field from another dimension into it then you come to the point of manifestation of the new fields, new strength, new dimension which is a combination of the 3 (fields). So if you understood then you only need 1 field, 1 unified field to create everything you need. Because if you understood you can take the field and create a point of interaction and let it go back. That is your 2 fields. And then if you are clever enough and have understood the rest of it, what is used here, can be used as a third field. So any single force, and single MG field force is in fact, the source of life on its own, singularity of existence in the dimension of the creation. If you are on planet Zeus you create the conditions of planet Zeus, and on Mars you create the condition of Mars. With 1 field you can create that condition. So in the work of the U. in the understanding and work of the T, man comes to one thing, unified field theory, that in totality by interruption of the condition and this introduction, it creates a feedback that it keeps the 2 and what is inside and has been used, can be used itself as one (field), (1:12). that it leads to manifestation of any entity at any strength. But at the body of the man this point of interaction is called the STM. Through the absorption of the fields of the U through the STM and the feedback of it, man can manifest itself in any dimension, at any point, anywhere in the U, as the focal or center point, is itself. In fact if you speak the language of children, if I throw water from a hose pipe, the water will carry on to go as far as it goes, until it hits the wall and it comes back, then we know there is a wall, but at the same time, this wall, as it splashes back, it retains some of the energy of the water, so in fact, it dictates what goes back and what it absorbs. In so many ways, the STM is that wall, is that process, and it only needs the light and the fields of the Creator by interaction with itself to manifest itself as any entity, anywhere in the U. Absorb it in the strength of the U, you shall make a U. Absorb it in the strength of the STM and you'll manifest the man. As simple as that. Then you understand why the earth is the nursery of the souls of the U, not only this planet, as energy converted, at the strength of, it becomes the creation of its own strength. As we said, when you look from outside, (1:14). the STM is the same as a soul of a star. It creates its own planets, its own living entities and its own dimension. In the space travel we change the STM to the soul of the captain or the one who accepts the totality of the responsibility for the lot, for those who like to go picnic together. Now your job is, or part of the KF K Seekers work is how to control to understand this conversion system what we call the STM, or what we call the reflector of the soul of the Creator. There is nothing in between the man and the Creator accept the lack of understanding of the man of his own potential. The stars, the galaxies, and everything in between is the interaction of the fields of the condition of the U, the STM is a U on its own in interaction with the soul of

the Creator. There can not be any other way, if the man doesn't understand, unless he needs others to confirm his own existence. Then, do we need the spaceship, the galaxies, and everything else, to return back to our Creator. In the process of the conferences coming up, we'll teach this process, gradually backwards. The completion for a full flight system promised 21st April (1:16). in the beautiful city of Theran. Those of you who follow the conferences, step by step, will gather the information, to be able to complete. Then the KF K Seekers as a force on their own, as what we call One Nation scientists in balance with the world governments. As we carry the lot we become. Any questions? if you are not lost in the maze of the fields of the Creator. (Rick finally speaks up about the microphone ..).

If you want to restart the whole teaching. No problem I'll start from the beginning. (1:18). ... Q: If you decide to go back to the Creator can you manifest instantly anywhere else, or once you go is that it? Of course you can because it's a dynamic flow. Do you think that when you get there you would want to come back? Or will you become like the sun, you'll be pushed back because the others ?? weaker in energy then you can. The beauty of it is, is that when we have such a point of the strength and one of the weak, it's not the strong which dictates the position of the weak, (1:20). it's the weak which gives the confirmation to the existence of the strong. ... When you become weak enough the Creator puts the whole of the energy of what it needs for to balance you that you become one. So you are part of the one. You see you couldn't hear me, it means the mankind wasn't ready to hear the truth. So you have to listen very carefully with all the noise in the background, as you said, muffled, that you might hear what I call, the knowledge of the U, that you can carry on. And in this process that is what it is. When the light, the fields and energy of the Creator comes to enlignthen the STM, in giving so much it becomes part of the STM and the Creator as one. This is how the universes expands, the expansion of the Unicose comes from this principle. As the energies and the fields move further and the strength of the soul of the Creator tries to reach them, it creates new dimensions and then new universes in this new dimension. This is how the creation comes about. This is the true essence of creation. (1:22). It's very much when man starts moving from fields to fields and we went to villages and then we expanded the villages, it became too many and we weren't happy being in one village and the rest of it. What did we do, we went ... it became more people and some moved out, and again some moved out, the villages connected together and it became towns and cities. Then the towns grew and they made nations and then we made the planet. It is the same thing with the process of creation. When you have the soul of the Creator, and then you have the fields which travel away from it, it radiates, now it tries to embrace it, and in embracing it, it gets to the point of what we call a ??? (draws a circle around it) and then it opens up new dimensions to hold on to, and then they radiate more and more. This is how the U expands in the total dimension of the Unicose is created. Read Book #3 and you'll understand this immediately. If you look at the Unicose and then at the atomic structure, we started with a H with 1 electron and 1 proton, then in field interaction and adding together then it becomes He and the rest and the rest. (1:24). It's the same if you look in the solar system, you have the sun with further radiation and interaction with its environment lead to creation of the planets. The same thing with the Creator, an extension, you call it planetary system, or you call it universes. 22

(1:26).

... Any other question?

Q: Are there 3 elements needed for manifestation? 3 fields are needed for manifestation. 3 fields or 3 conditions are the prerequisite (1:28). for the confirmation of the existence. It doesn't matter if you look at it as a physical dimension or as a sound or a light or whatever. Rick says, and you have mentioned the 3 layers of the skin as important both for both the skin of the man and the skin of the spaceship. Yes, and the skin of the Creator. Do you want to see His skin? Yes, let's add some examples of that. We have to understand one concept or one principle and then you will see it fits into everything. Q: So the expansion of the U is knowledge? Where does the knowledge come from, the expansion of understanding and intellect is the knowledge not the U. Those of you who come close to understand the T and the knowledge in its true meaning, (1:30). will come to understand one simple principle, and that is it is us who puts limitation on the understanding of our own existence and the existence of what we call our environment, and what we may know and what we may not know, what we call the true life. The true existence is not in the physicality of the body of the man, it is understanding the totality of the work of the U and in that process we can do many, many things. (There is a .. teaching in Iran tomorrow ) (1:32).

... any other question. Q: 3 layers of different strengths are needed but are all 3 of the same state or are 2 in the state of Gans fields and the third in a weaker field state of Nano? You can choose any, let's see what the outcome is, there is no limitation. What about one in the state of the matter, or 1 in the state of sub-matter. If you look at the logo of KF SSI especially of the Institute, it has a beautiful meaning, it was done by the Iranian physicist when they developed the spaceship institute logo, when you look at the star or circle in the middle, (1:34). that is the soul of the Creator. The beginning of the beginning, it depends on where you stand from and near to, and in any direction there is nothing but fields. This logo was designed in the total understanding of not only physicality but the dimension of the STM by the Iranian physicist. You have a center, then a star, star, fields, and then a cloud, what we call a galaxy, the dimension where the manifestation appears, it depends where you are on it. This (logo) is a very true meaning of the spaceship, because in the space it's what we are, where do we go and in which direction, and in one position, and which stars we pass, and where do we want to manifest ourselves and which strength. If you look at it, this is, you have a spaceship. And this is the direction of the flight. We have to decide on the strength, on the purpose, on what extent we want to go, to expand. Do we want to expand the knowledge in creating or in ?? intellectual understanding, or in the field forces of the U, (1:36). Now everything is in one pot.

(1:40). neutrinos

.. separation of the atoms of water is because the 2 O are fed by the H and the H continuously releases energy, but it has a MG bound with all 2. ...

(1:44). How nuclear technology developed and a lady physicist discovered the centrifuge ... later she shared technology with Russians to keep nations equal and at peace ...

(1:50).

Q: Jallal, The sun is the sender and we as humans are the receiver and we see the actual sun because of our environment, if we change the environment do we see the sun in a different shape? I am going to answer in a very deeper way, if you see the sun through

the physicality of the eye, (1:52). what happens if you look at the sun through the STM, would you see the Creator? That's exactly my point Mr. Keshe. That's how I answered you. Now what did you understand. You see if the dimension of the physicality of the eye of the man would allow him to see the U, what about if you look with the stronger part, would you see the soul of the Creator. Here man is always physical, here he is in the dimension of the Creator. Which one would you like, and now you understand why I said many times I am ashamed to be in the body of the man, because my soul sees the soul of the Creator. But our work is to make mankind get the same understanding. .. Would you still like to see the sun and the stars or would you like to see the Creator of the sun and stars? Are you happy with the servant or the master. This is what we teach for man to understand the station of his soul. (1:54). Next question.

.. Q: Miguel shows ...

(2:00).

(2:04).

trying to get photos . (2:06).

.. scalar waves are passing into the walls. That is the beauty of scalar waves. (2:08).

.. I put a plasma ball with a static reactor around it and it's attracting all the fields. ...

(2:10). ...

(2:12).

(2:14). .. Mr. Keshe teaches, about the colors in the balls ..

(2:16).

... Miguel tells his dream with Mr. Keshe. .. (2:18). ... Many people tell me they go to sleep with my voice and they have a dream about me and I say my soul must be a very busy chap at night it goes everywhere. Any other question. Q: What creates or causes the motion of the fields, the movement in the process of creating the potential difference, intention or desire? It depends in which mood you are in, giving or taking mood, either way it creates a condition and a position. This is one of the parts where we say, how do you feed your soul and in one of the teachings I explained, you have to be soul weak, as the strength of the soul, (2:20). compared to the fields of the U that you get fed by, and at the same time you have to be strong enough as a source that you can feed the soul of the physicality as they are weaker in comparison to you, that you, my soul can feed and if man learns this he can feed himself in the space. In what are you weak, is G and what you are strong in is M. If you understood that you end up with that (?? back to the Creator). Q: Is the ofcused and humble intention to reach a certain destination the key to safe motion, interplanetary or beyond? Either way you want to call it. I think when I sit here and look at the sign of the U Council that explains it in totality, when you look at that picture. Any other question. (2:22). Q: If one man can reach the point of peace with the Creator, then everything in between those strengths in man's U will balance accordingly in between. Is it correct? More or less, it's what we call when you find peace. Having peace means having a balance and that's all it is. Any other question. Q: Is the spectrum field effect, plus or minus 10% of the Gans's, created by the process of Beta or inverse Beta decay? Nothing to do with Beta decay. It can be Alpha, as much as Gamma and cosmic rays. ... we never counted, do universal rays come into it? Do they effect it, penetrate it? If you have neutrino's for the planet you have to find out, some of these neutrinos come from other universes which crossing the whole span of the U and getting to us is just having enough energy that they still don't

reveal themselves and go through us. If you understand the position of the planet earth, (2:24). on the edge of the galaxy, we are somewhere here (on the end of the spiral), getting pulled further into one of the arms. If this is the edge of the galaxy, we receive more fields from the U than from the planets of the solar system, or the stars which are more inside, because when you get to the center of the galaxy it's more or less unified, most of the fields are absorbed by the galaxy as a total structure. Part of the evolution of the life in this part of the universe which we are part of, are created by the fields which come from the U. Part of the cancers that we face are due to this position. As we go further into the funnel of the galaxy or the Milky Way, we'll become more immune to it, because there are more layers, (as we go inside) are condition of the interactions become more stable. What they call neutrinos, are fields that have already come from the U and part of the fields which comes from the galaxy. (2:26). They effect us, surely. We know for example, if you have lived on the surface of the planet where at the point of massive explosions on the surface of the sun, you'll be facing the interactions of these fields, we see massive increase in diseases at the point of interaction of the solar system with the solar flares, depending on what this solar flare has done. .. They turn off the satellites because the fields are so strong that they can damage them. At the same time these fields create human AA's or what we call, DNA changes. Years down the line we'll suddenly see a lot of cancers in this region, specific cancers that we don't see any other place and nobody knows why. ...

(2:28). If you can hit a satellite and create damages, imagine what it does to the soft tissues of the body. These are what you call neutrinos, when they embed themselves in you and some of it passes through you and it depends on that time, what was the MG field shielding of the earth in that respect at this point. Many, many cancers are caused by the flares of the sun, but we never understood because we can't relate it, but now we can relate it. It's very simple with the systems we built to reverse that energy back out. These are energy systems, energy cancers which are virtually unknown but we see in rare cases, we don't see elevation of any materials, but we see cancers because a mutation has taken place. We have the same kind of cancers inverse from the center of the earth. The earth is not mono-energetic, it creates different (? strengths), if you look at for example the G field of the earth which they publish everyday, it has a funny shape, it's not spherical. What happens if you are here at that time because of a burst of energy or change of events inside here, it hits you. We are open to a lot of fields, and when we see a sudden increase in conditions we go back and check the environmental conditions at the point and you'll see why. We are part of a living, live process. (2:30). Next question. Q; Andreas, what is the task or role of crystals or diamonds on our planet? Nothing, it's just a formation, what is the task of carrots and tomatoes. It's just what is formed, it's the conditions that creates crystals.

Q: Nikolai, Mr. Keshe you said something in one of your teachings of the last few weeks that gave me great pause, you said, you have 22 here, and 22 here, 22, 22, and if you add it up you get 88 and the Chinese call it a lucky number. Test it. This lead me to think of the AA's in the body of the man, if you we have 22 AA's are you suggesting that what we need to do is to position 4 beings in a SF, (2:32). and to remove the baggage of the collective emotions to a point where these 4 beings can tune to a central ofcal point of the vehicle and become as one in this way, would it then be possible to tune the group attention to a place where the 4 would like to travel and arrive as a group in this formation?

We said many times if you can find the 4 souls of equal strength, or equal common denominator strength you can create that elusive ship or object or position or school of thoughts, it doesn't necessarily need to be a spaceship. You see, traditionally if you look at some of the structures which were left behind centuries ago, you always see this, (draws a SF), or in some cases it's hidden in other structures, this is where the men used to stand, and the center man, then you'll see what you have created, a SF. They hide it beautifully in 12 positions. If you look at the places or structures built thousands of years ago, (2:34). this is the structure, you create a SF and with this you can create, The Protection. If you can understand this and create the right combination, in a way, then you'll see what happens, you have the 12 and with it, you create what is known as, if I can draw it for you, a 3 dimensional effect (draws 3 circles around the SF, (could be the 3 layers)) of what we call, they themselves with a 4th one, (draws another inner circle in green), lead to creation the essence of the Creator. You have got a lot to learn. And the totality if you like, depending on which source you have a strength in becomes the manifestation (draws another circle around the outside). These kind of structures used to be used, as what we call, the castles of that time. It's very well protected, for the priests, for the people who had a clear soul would take their positions. If you look at many historical buildings, which we call it like Stonehenge, you see this, but nobody understood it. The men stood in a configuration of 12, and then you have the holy priest, the purified man who stands in the center, where each (member) in the group are connected to him by strength. (2:36). According to their strength they used to create what we call, the shielding effect. And through theirs, what goes to the next step of understanding, is the creation of the dimension of the soul that they could see and they come in touch with the U Community (he drew 3 circles around the people standing). It's a very specific. In time I will teach you this. Man is not ready for this yet. Another few decades, maybe sooner. If you look at the structure of Stonehenge this is what it does. Man of (lower), higher strength of holding, understanding, what we call, pure souls, which are givers, take the center point, they can protect, then the next layer. This is what I said if you listen to the teaching of the U Council, we recognize the UC by the strength of their soul and they are not elected, because when the time comes those who take the seat of UC as we were discussing last week, maybe it makes it much more clear what it is. As the circles (members) of the 12 UC take their positions, you create these rings, you create more dimensions, and then as a soul in the center of the 12, as the totality, you create the protection for the human race in the depth of the U. Now you understand why we set up the UC the way we have. If you bring the picture of the seat of the UC it is on these basis's because we are far ahead of you, so we can't explain it to you. Maybe it is time to explain today. When we set the UC, unknowingly the UC members of the 12 seats of the council will choose, (2:38). of their strength, that's why we brought the different languages in, because they support, strengthen it. then as you have seen in the work of the systems before you get your 12, then you have your 12 that creates the next step, then this makes the soul of the humanity. Then this protects, which reaches the whole of the U Community with the STM as the common denominator exist. You'll understand this very soon. This is one of the reasons why we have not made specific seats for specific people, even the travelers of the U who are here, they can have a seat, because through the creation of the line of creation, they feed that, they extend it (draws rings outward) the more you have the more you can extend this. But the most purest will sit in the center of the ofur. If you look at the structure of the U Council and at whatever structure you have seen (like Stonehenge), it's what we brought before but man couldn't understand, but now you do. Men according to their strength will take their seat in the central council. You'll find out in the future suddenly one of the

members will move to the position, because that position is needed and they (the other) just moves back. For that purpose, it depends what discussion (is going on) for the discussion of the soul of the council, what is needed to be understood. They bring the strength because then they can create the direction. Zero time communication, if we have a crisis in the corner of the U, and you have human races which are there, (2:40). they'll send you a message, it's zero time to the STM. This man who is responsible for this, and on the strength of his creation can link (to the area of crisis), and take position. You have a lot to learn yet. That's why the soul of the ... no members of the U Council will ever be elected, they are selected by the STM on the strength of what it can deliver. Because this is what it is. Now you understand, I say again, why do we create all these dimensions with the 4 always look for the center. In the center usually sits the holy man, the purest of the pure. It's the seat of the Creator, where the collective soul creates that position. This is used in the depth of the space by creatures to create protection in the time of trouble. For example if you come to a huge M field, survival is complete, you create these (SF), you stand by your soul, not your physicality and you create the condition. Man will be tested, it's not by your physical dimension. This is why we teach about the STM and this is the reason we set up the U Council in this structure. If you look the Core Team has the same characteristics, it doesn't matter if they have physically left the Core or they are in the Core, or they die. Their soul has already taken the position, it is sacrosanct, it cannot be changed. The same if you look, we have strengthened it because of the condition of the work of the man to the Earth Council. ?? the EC is the most purest you'll get on this planet (he draws star of David with dot in center and circle around) and through them you'll find what is needed to absorb, totality, singularity, (2:42). it reaches the level of the creation of the STM. When the EC meets you sit with the Creator at the level of the mankind. When the U Council sits in true meaning, it sits at the level of the Creator in the level of the U. The Core Team has the totality of them all (draws a circle around all councils). Everything we put down has a meaning and a reason and when you are mature enough we'll explain, and maybe as I said last week, now you understand the purpose of the 12 seats of the UC. You take 12 pure souls of the UC in the center core to what we call, Stonehenge, and if they stand in a correct way, we shall see the soul of The Protection. Because it was used that way. There are many places in which they were taught in the old time what it is, and they'll abide by it. You know the 12 Knights, it comes from this. Because mankind couldn't understand what it means, now you understand. If you look, always sits. .. the Star of David was created very much similar to the EC, but it was not understood. It lacked the understanding. (2:44). The 6 legs (of the S of D) is the soul of the collective. A long way for you to understand. When you put 4 human being, you understand that you have created that essence of protection.

#### **THIS IS HOW WE CREATE THE STARSHIP.**

(2:45). Any other question. Q: If say tomorrow the communications with the mobile phone fails, how will we communicate with through the souls of each other, I communicate with my mother who lives 50 km away, I feel what she feels and live her pain, often I don't know if it is my back pain or my mothers, does she feel my condition, how will I connect with Rick if there is no internet or phone? Was there a phone or internet 200 years ago, now at least you are educated that you can communicate through your soul. Then all these souls are sending messages and it's like standing in a ofotball field with everybody shouting, which one is the (2:46). ... It's very simple. Q: Mrs. Keshe, you once explained to me that the secret sits when you can even join 4 by 4 that, that is the total beauty on how you increase the strength through this positioning? One of the most important things is not sitting 4 in, but finding which one of the 4 would like

to sit on the edge, and which one chooses the seat of the middle. This is one of the things that the people will not be able to accept is, if there are 4 of you, you need to be the weakest to sit in the middle, the humblest, that you can receive and in receiving that you can give to all 3. In Farsi we say, ... bring the donkey and get it loaded, how to get that done, which one of you is humble enough to say I am the lowest. (2:48). In Farsi they say ... I am biggest but I tell you I am the lowest because I know you are giving the place (to the lowest). Very much like the French way, the later you come for the diner the more important you are, you keep everybody else waiting. When the 4 come together, in reality, what you call the truth about the life is that, who is the most humblest to be in the center, and not to be the strongest to be in the center, that you can receive so you can give. If you look at the SF this is what it does, doesn't it. You put the weakest on the top that the 3 bottom ones can feed and as it receives so much, like a ofountain it showers back, that it feeds and leads to creation of your spaceship. This is the biggest problem for mankind, not by talk, humbleness, but by giving of the soul, then you can create. In olden days many, many tribes used to travel this way. You don't need a spaceship, but man is physical, he has to see something and to be in it. One of the ways that ... in time you'll understand. (2:50). You see pyramids all over the planet and they are about the same time. How do you think it came about? Those who taught the people the way of travel, they traveled to these destinations the same way and built the same structures. Man did not go by boat or ship or anything else. And many of these at that time, they became the travelers of the U. This is not the first time man is going into the U. Now you understand why you have pyramids about ?? this time, it wasn't travelers (from outer space) it was the understanding of those who could create that condition of humbleness. I told you that one day I would open the book of the man and you'll understand exactly what has happened. Any other question. Q: If we humbly wish to see the Creator, will He not come towards us also and we can meet instantly in love and balance, then we can sing and dance together? How do you know that your soul hasn't (already) done that yet? How do you know that the Creator dances? (2:52). Which music does He like? Thank you for that answer, that is so perfect. Your welcome. Q: Is salt being used as anti-gravity? First of all we don't believe in anti-gravity this is the time of the past. But speaking about the salt it is a common denominator, it's a glue between the fields and manifestation. Without the salt in the body you can't manifest any organs, and without the fields of the U there is no salt or no man. If you create a specific salt you get kidneys, if you change it to another specific salinity you get the liver. So it's the salt which leads to the creation of the organs of the man, manifestation of physicality. If you go further into the understanding of this, as Bahula said, that even a stone has a soul, even the stone has a salt, because that salt leads to manifestation of his creation in the dimension of physicality. If you listen to ?? Mohammad, he refers to these things but man couldn't understand. (2:54). He was a very wise man. Then if you read in the Torah, part of it again comes to it. If you look at the totality of the meaning of shalom or in Arabic they call it salaam, in essence this is the greeting to the Creator, and not for man to introduce ... hello this is the soul of the Creator, as is from the man. You've got a lot to learn. Any other question. Q: How finite does the balance become the closer you get to the Creator? What do you mean? I feel in my life I have big sways of balance from one side to the other. The closer and more balanced I become the closer I get.. How finite does that balance point have to get, does it have to be complete stillness? Nothing exists in stillness. There is not a point of balance. In a way you still find your soul. Mankind has to learn the strength of his soul, or understand the language of his soul, where it sits. (2:56). Many of us measure everything in a human dimension and a human strength. In fact once we understand the

strength of our soul then we understand the reality of the creation. Some of the KF followers are going that way. I have seen ?? divisions, and a lot of you have started what I call the true soul searching. Many of you get trapped by the materialistic world and many of you move on, and many people will see as they gradually reach that point, we leave that point, the point of physicality. I see a number of K Seekers since last year, it's something that they have been looking for but they couldn't the path, and gradually they are reaching it. The point of manifestation by the desire of the STM. Q: Mr. Keshe did you know the path before I took it? Pardon? Q: Did you know my path before I took my path? You take your own path, why should I know? Q: hum... Did I know my path before I took it? The soul does and physicality follows. You have to understand especially when it comes to the points like this in the history of the man, in what you call, (a) turning point, it's not that we appear as one suddenly. There are many souls who have been made to travel to be here, it's like what we say, it's a point of destination. It's like a ofotball match, we all have to be there at a given time to watch the match and some of them are the players in the match.

**THE TIME AND PLACE FOR THE CHANGE OF HUMNITY IS NOW.**

(2:58). All have come together. You see the soul of people like Armand, and other people, they are not here just by accident. Their souls have been set centuries ago, to come to be there (here). The rest are the same, we are the watchers. I said there are many blessed souls (here). All the members of the Core Team are those who have been promised centuries ago to be here on time. It's not coincidence. Coincidence doesn't exist. Q: Mr. Keshe it is shining very brightly here right now, the sun is blazing. Where in England, be careful it doesn't get as hot as France it can burn. What it is, you see this is what it is. It's not just accidentally somebody came and happened to be there. It's the same as when we choose the soul of the Core Team, what do you call? The EC, it's the same, it's the same power. These souls just don't happen, I came, I heard about the KF, the soul brings them to the point of physicality, to be there. It's understanding it. It doesn't matter how much you try to jump off, we'll bring you back in again. This is a point of promise, the change for the course for humanity, and that will be done. Nobody can change it. It doesn't matter what tricks you play. A king tried to stop it, and a bunch of idiots do the same, (3:00). but at the end of it you can't change the destiny of mankind. It has been set centuries ago, thousands of years ago, when the man matures and has the communications that everybody can hear, can communicate, the position of the travel, people can understand the work of the U, and the construction of their own life, and now the man is mature to get to that point. And we are here to deliver. Q: Mr. Keshe thank you for the beauty. Your welcome, it is given by the Creator. What you understand is the simplicity of the knowledge. If you look even in the construction of the Core Team, we had the same, those who were weaker have always stood out. (screen goes black ..)

(lost connection ... ). (3:02). .. Sometimes is happens, I think God didn't want me to explain something to you very important. If you look at the structure as I was saying about the Core Team, we had those in the blocks of 3 that they moved out gradually as they did their job, and those who are the strength, the pillars are still there. And the time comes when it is (down) to the last 3 as we call it. To be there, to stand, and that's what it holds, and then it will shine outwards. This is what we call the process of creation. It's not for man. The same process, it's the structure will follow, the structure which was set, which will carry on throughout the U. In the time when what we call the U Council reaches a point, at some point the members of the UC those who are longing (?belonging) to the U Community and not to the earth as such but they are passengers or

visitors, you'll find out the mankind will go to them, to their dimension of ?? 12 to reach beyond and at the same time in the coming time, we'll have members from the U Council which are from different universes. But for man it's a bit too early to understand this, they are amongst us. (3:04). It's not something that might happen in the future, but he didn't have the eye to see. You need the strength of the U to see the creations of it, and you need the strength of the Unicose to see its creation. You can't see with the eye of the man. Like I said many times, you can't see anything unless you have a night vision (glasses) of what's happening in the dark. ... once you put on the night vision glasses it's a different world. When the STM reaches that strength to see the strength of the Unicose and the Creator, then you'll see a different dimension. Any other question. Q: Can you repeat how to tune into the field of the target, such as the Creator or any star, the field of the target has to be weaker so we are pulled to the target? You have to be weaker on one and stronger on the other. On the strength of the U but you become the stronger on the strength of the creation of the dimension of what you need or you want to be. If you can go in both dimensions you can reach (3:06). the process of the understanding the totality that can be in 2 points, you can be in the dimension of your physical strength while you are on a dimension of the soul strength, so mankind in the coming time will be able to manifest in 2 dimensions 1 in the soul of the strength of the physicality and one in the strength of the STM where in fact the interaction of the 2 allows such a facility. So what we see in the dimension of the STM and the dimension of the physicality STM allows the man to manifest in 2 dimensions, one in the soul and one in physical level. As they are interconnected they can cover themselves in both dimensions. (3:08). Q: Plant photosynthesis and how N14 becoming C12 at night so the plants get more CO<sub>2</sub>, and in the daytime the N14 the O16 and we get more O, now what about the body of the man should that be the case too, so that in the nighttime the N14 in our HCNO will become HCCO, more C, and in the daytime the N will turn into the O, for man's health and energy and activity, so what does the more C at night do, if this theory is correct? I don't know, I think you answered it yourself, but you don't understand what you answered. You go from one to the other, from the plant to the human and then you say the use C into N or O. (He draws) That is the back and front of a leaf of a plant. One has a different Nano coating than the other one, MG field of the earth due to the suppression and the pressure from the sun MG fields, releases different strength fields (3:10). that can be absorbed by either side, and the balance of the two becomes the energy of the what the plant needs or absorbs, and whatever it doesn't need, in position and release what we call, fields of O or C. The body of the man is circular, the Nano coating from the front and back and different textures of the body is a totally different operation. The shape of our body and of the animals body dictates very much the same as the plants, the leaf's. Then do we release N or do we absorb C at night? But in that process what happens to us, why do we need to absorb and release? (3:11). break ... (3:12:50). mankind has to understand the process of creation, we can't change it. In many of the structures why do we use CO<sub>2</sub> as a Gans, as a field, balancer, collector ...

(3:22).

(3:28).

... Q: Are all souls equal or different in strength due to the layers created through experiences interacting with the environment? We all carry our own beauty and our own strength, in essence we are the same, but it depends on what we would like to show.

Would you like to wear short clothes and show all your arms and legs or would you like to wear coats and keep yourself covered up. (3:30). It's the same body, what do you want to show.

K reads questions off phone. Q: I would to attend where do I apply ... (3:32).

(3:34). Booking for conference.

(3:38).

... This is on the back of the global company we are waiting for lawyers to announce it in the US, then you can buy shares. The process of the KF will start from that point. Any other question. (3:40). Thank you for today, it's nice to be back live with you.

(3:42).

Video

END
